“() MERCED, CALIFORNIA.—The main stem from its sources (including Red Peak Fork, Merced Peak Fork, Triple Peak Fork, and Lyell Fork) on the south side of Mount Lyell in Yosemite National Park to a point 300 feet upstream of the confluence with Bear Creek, consisting of approximately 71 miles, and the South Fork of the river from its source near Triple Divide Peak in Yosemite National Park to the confluence with the main stem, consisting of approximately 43 miles, both as generally depicted on the map entitled ‘Merced River Wild and Scenic Rivers—Proposed’, dated June 1987, to be administered by the Secretary of Agriculture and the Secretary of the Interior. With respect to the portions of the river designated by this paragraph which are within the boundaries of Yosemite National Park, and the El Portal Administrative Unit, the requirements of subsection (b) of this section shall be fulfilled by the Secretary of the Interior through appropriate revisions to the general management plan for the park, and the boundaries, classification, and development plans for such portions need not be published in the Federal Register.
