§567a. Cooperation by Secretary of Agriculture with States in acquisition and administration of State forests

For the purpose of stimulating the acquisition, development, and proper administration and management of State forests and of insuring coordinated effort by Federal and State agencies in carrying out a comprehensive national program of forest-land management, the Secretary of Agriculture is authorized to enter into cooperative agreements with appropriate officials of any State

or States for acquiring in the name of the United States, by purchase or otherwise, such forest lands within the cooperating State as in his judgment the State is adequately prepared to administer, develop, and manage as State forests in accordance with the provisions of sections 567a to 567c of this title and with such other terms not inconsistent therewith as he shall prescribe, such acquisition to include the mapping, examination, appraisal, and surveying of such lands and the doing of all things necessary to perfect title thereto in the United States: *Provided*, That, since it is the declared policy of Congress to maintain and, where it is in the national interest to extend the national-forest system, nothing herein shall be construed to modify, limit, or change in any manner whatsoever the future ownership and administration by the United States of existing national forests and related facilities, or hereafter to restrict or prevent their extension through the acquisition by purchase or otherwise of additional lands for any national-forest purpose: *Provided further*, That sections 567a to 567c of this title shall not be construed to limit or repeal any legislation authorizing land exchanges by the Federal Government, and private lands acquired by exchange within the limits of any area subject to a cooperative agreement of the character herein authorized shall hereafter be subject to the provisions of sections 567a to 567c of this title.

(Aug. 29, 1935, ch. 808, §1, 49 Stat. 963.)

§567b. Conditions and requirements for cooperation in acquisition and management of State forests

No cooperative agreement shall be entered into or continued in force under the authority of sections 567a to 567c of this title or any land acquired hereunder turned over to the cooperating State for administration, development, and management unless the State concerned, as a consideration for the benefits extended to it thereunder, complies in a manner satisfactory to the Secretary of Agriculture with the following conditions and requirements which shall constitute a part of every such agreement:

(a) In order to reduce the need for public expenditures in the acquisition of lands which may be brought into public ownership through the enforcement of appropriate tax delinquency laws, and, by bringing about the handling of such lands upon a sound social and economic basis, to terminate a system of indeterminate and unsound ownership injurious to the private and public interest alike, no additional lands shall be acquired within any State by the United States under sections 567a to 567c of this title after June 30, 1942, unless the State concerned has prior thereto provided by law for the reversion of title to the State or a political unit thereof of tax-delinquent lands and for blocking into State or other public forests the areas which are more suitable for public than private ownership, and which in the public interest should be devoted primarily to the production of timber crops and/or the maintenance of forests for watershed protection, and for the enforcement of such law: *Provided*, That in the administration of sections 567a to 567c of this title prior to June 30, 1942, preference will be given to States applying for cooperation hereunder which provided by law for such reversion of title under tax delinquency laws.

(b) In order to insure a stable and efficient organization for the development and administration of the lands acquired under sections 567a to 567c of this title, the State shall provide for the employment of a State forester, who shall be a trained forester of recognized standing.

(c) The Secretary of Agriculture and the appropriate authorities of each cooperating State shall work out a mutually satisfactory plan defining forest areas within the State which can be most effectively and economically administered by said State, which plan shall constitute a part of the cooperative agreement between the United States and the State concerned: *Provided*, That nothing herein shall be held to prevent the Secretary of Agriculture from later agreeing with the proper State authorities to desirable modifications in such plan.

(d) No payment of Federal funds shall be made for land selected for purchase by the United States under sections 567a to 567c of this title until such proposed purchase has been submitted to and approved by the National Forest Reservation Commission created by section 513 of this title.

(e) Subject to the approval of the National Forest Reservation Commission, the Secretary of

Agriculture is authorized to pay out of any available money appropriated for carrying out the purposes of sections 567a to 567c of this title any State, county, and/or town taxes, exclusive of penalties, due or accrued on any forest lands acquired by the United States under donations from the owners thereof and which lands are to be included in a State or other public forest pursuant to said sections.

(f) The State shall prepare such standards of forest administration, development, and management as are necessary to insure maximum feasible utility for timber production and watershed protection, and are acceptable to the Secretary of Agriculture and shall apply the same to lands acquired and placed under the jurisdiction of the State pursuant to sections 567a to 567c of this title.

(g) That with the exception of such Federal expenditures as may be made for unemployment relief, the State shall pay without assistance from the Federal Government the entire future cost of administering, developing, and managing all forest lands acquired and over which it has been given jurisdiction under sections 567a to 567c of this title.

(h) During the period any cooperative agreement made under sections 567a to 567c of this title remains in force, one-half of the gross proceeds from all lands covered by said agreement and to which the United States holds title shall be paid by the State to the United States and covered into the Treasury. All such payments shall be credited to the purchase price the State is to pay the United States for said land, such purchase price to be an amount equal to the total sum expended by the United States in acquiring said lands. Upon payments of the full purchase price, either as herein provided or otherwise, title to said lands shall be transferred from the Federal Government to the State, and the Secretary of Agriculture is authorized to take such action and incur such expenditures, as may be necessary to effectuate such transfer.

(i) Upon the request of the State concerned, any agreement made pursuant to sections 567a to 567c of this title may be terminated by the Secretary of Agriculture. The Secretary of Agriculture may, with the consent and approval of the National Forest Reservation Commission, after due notice given the State and an opportunity for hearing by said Commission, terminate any such agreement for violations of its terms and/or the provisions of said sections of this title. If such agreement is terminated, the United States shall reimburse the State for so much of the State funds as have been expended in the administration, development, and management of the lands involved as the Secretary of Agriculture may decide to be fair and equitable.

(j) The State shall furnish the Secretary of Agriculture with such annual, periodic, or special reports as he may require respecting the State's operations under its agreement with him.

(k) When a State or political unit thereof acquires under tax delinquency laws title to forest lands without cost to the United States and which lands are included within a State or other public forest, the Secretary of Agriculture, on behalf of the Federal Government, may contribute annually out of any funds made available under sections 567a to 567c of this title not to exceed one-half the cost of administering, developing, and managing said lands.

(a) Composition; election meetings

(1) To provide national forest grazing permittees means for the expression of their recommendations concerning the management and administration of national forest grazing lands, a local advisory board shall be constituted and elected as hereinafter provided for each national forest or administrative subdivision thereof, whenever a majority of the grazing permittees of such national forest or administrative subdivision so petitions the Secretary of Agriculture. Each elected local advisory board existing for such purpose on April 24, 1950, and recognized as such by the Department of Agriculture, shall continue to be the local advisory board for the unit or area it represents, until replaced by a local advisory board or boards constituted and elected as hereinafter provided.

(2) Each such local advisory board shall be constituted and elected under rules and regulations, consistent herewith, now or hereafter approved by the Secretary of Agriculture, and shall be recognized by him as representing the grazing permittees of the national forest or administrative subdivision thereof for which such local advisory board has been constituted and elected.

(3) Each such local advisory board shall consist of not less than three nor more than twelve members, who shall be national forest grazing permittees in the area for which such board is constituted, elected, and recognized. In addition, a wildlife representative may be appointed as a member of each such board by the State game commission, or the corresponding public body of the State in which the advisory board is located, to advise on wildlife problems.

(4) Each such local advisory board shall meet at least once annually, at a time to be fixed by such board, and at such other time or times as its members may determine, or on the call of the chairman thereof or of the Secretary of Agriculture or his authorized representative.

(b) Advice and recommendations on matters within jurisdiction

Upon the request of any party affected thereby, the Secretary of Agriculture, or his duly authorized representative, shall refer to the appropriate local advisory board for its advice and recommendations any matter pertaining to (1) the modification of the terms, or the denial of a renewal of, or a reduction in, a grazing permit, or (2) the establishment or modification of an individual or

community allotment. In the event the Secretary of Agriculture, or his duly authorized representative, shall overrule, disregard, or modify any such recommendations, he, or such representative, shall furnish in writing to the local advisory board his reasons for such action.

(c) Notification by Secretary of Agriculture of intention to issue regulations; recommendations; written explanation of reasons for overruling

(1) At least thirty days prior to the issuance by the Secretary of Agriculture of any regulation under sections 490, 500, 504, 504a, 555, 557, 571c, 572, 579a, 580c to 580l, and 581 ¹ of this title or otherwise, with respect to the administration of grazing on national forest lands, or of amendments or additions to, or modifications in, any such regulation, which in his judgment would substantially modify existing policy with respect to grazing in national forests, or which would materially affect preferences of permittees in the area involved, the local advisory board for each area that will be affected thereby shall be notified of the intention to take such action. If as a result of this notice the Secretary of Agriculture shall receive any recommendation respecting the issuance of the proposed regulation and shall overrule, disregard, or modify any such regulations, he or his representative shall furnish in writing to the local advisory board his reasons for such action.

(2) Any such local advisory board may at any time recommend to the Secretary of Agriculture, or his representative, the issuance of regulations or instructions relating to the use of national forest lands, seasons of use, grazing capacity of such lands, and any other matters affecting the administration of grazing in the area represented by such board.

The benefits hereinbefore enumerated, referred to in text, means the benefits enumerated in the preamble to Joint Res. 53, Oct. 11, 1949, ch. 674, 63 Stat. 762. The preamble is set out as a note below.

TRANSFER OF FUNCTIONS

Functions of all officers, agencies, and employees of Department of Agriculture transferred with certain exceptions, to Secretary of Agriculture by Reorg. Plan No. 2 of 1953, §1, eff. June 4, 1953, 18 F.R. 3219, 67 Stat. 633, set out as a note in Appendix to Title 5, Government Organization and Employees.

PREAMBLE

The preamble to act Oct. 11, 1949, provided that:

“Whereas the national forests of the United States contain approximately eighty million acres of the Nation's commercial timber lands and approximately eighty-three million acres of the Nation's important grazing lands; and

“Whereas these national-forest lands comprise the principal source of water supply for domestic, irrigation, and industrial purposes for thousands of communities, farms, and industries, and good forest and other vegetative cover is essential for watershed protection; and

“Whereas these lands annually supply approximately four billion board-feet of forest products through twenty-seven thousand sales transactions and the demand for national forest timber is steadily increasing; and

“Whereas these lands are the sole or main source of summer range for ten million cattle and sheep grazed by thirty thousand livestock permittees whose livelihood is wholly or partially dependent upon livestock grazed on national-forest ranges; and

“Whereas these lands contain over four million acres of denuded and unsatisfactorily stocked timberlands and an additional four million acres of seriously depleted range lands; and

“Whereas all of these lands are potentially capable of producing an important part of the timber and forage needs of local communities, and contributing to the protection of watersheds, thereby alleviating flood damage and insuring a continuing water supply, increasing opportunity for local employment, bringing greater stability to local communities, and increasing returns to counties in the national forests from their share of national forests receipts, together with other benefits; and

“Whereas these lands will not restock or revegetate satisfactorily or within a reasonable time except through reforestation and revegetation or other measures to induce restocking or revegetation; and

“Whereas it is practical to reforest these denuded and unsatisfactorily stocked timber lands and revegetate these seriously depleted range lands in a period of fifteen years; and

“Whereas it is necessary to provide reasonable continuity of reforestation and revegetation programs in order to insure effective, efficient, and economical operations: Therefore be it”.

§581k. Authorization of appropriations for reforestation and revegetation

For the purpose of carrying out the provisions of this joint resolution on national-forest lands and other lands under the administration or control of the Forest Service of the Department of Agriculture, including the acquisition of land or interests therein for nurseries, there is authorized to be appropriated to remain available until December 31 of the ensuing fiscal year, \$3,000,000 for the fiscal year ending June 30, 1951; \$5,000,000 for the fiscal year ending June 30, 1952; \$7,000,000 for the fiscal year ending June 30, 1953; \$8,000,000 for the fiscal year ending June 30, 1954; \$10,000,000 for the fiscal year ending June 30, 1955; a like amount for each subsequent year through the fiscal year ending June 30, 1965, and thereafter such amounts as may be needed for reforestation; and \$1,500,000 for the fiscal year ending June 30, 1951; \$1,750,000 for the fiscal year ending June

SUBCHAPTER III—RESEARCH PROGRAMS

§582a. Congressional findings

It is recognized that research in forestry is the driving force behind progress in developing and utilizing the resources of the Nation's forest and related rangelands. The production, protection, and utilization of the forest resources depend on strong technological advances and continuing development of the knowledge necessary to increase the efficiency of forestry practices and to extend the benefits that flow from forest and related rangelands. It is recognized that the total forestry research efforts of the several State colleges and universities and of the Federal Government are more fully effective if there is close coordination between such programs, and it is further recognized that forestry schools are especially vital in the training of research workers in forestry. It is also recognized that the provisions of this subchapter are essential to assist in providing the research background that undergirds the Forest and Rangeland Renewable Resources Planning Act of 1974 [16 U.S.C. 1600 et seq.], the Renewable Resources Extension Act of 1978,¹ and the Soil and Water Resources Conservation Act of 1977 [16 U.S.C. 2001 et seq.].

§582a–2. Authorization of appropriations; other allotments and grants

To enable the Secretary to carry out the provisions of this subchapter there are authorized to be appropriated such sums as the Congress may from time to time determine to be necessary but not exceeding in any one fiscal year one-half the amount appropriated for Federal forestry research conducted directly by the Department of Agriculture for the fiscal year preceding the year in which the budget is presented for such appropriation. universities certified for receipt of funds under this subchapter fails to make available and budget for expenditure for forestry research in any fiscal year sums at least as much as the amount for which it would be eligible for such year under this subchapter, the difference between the Federal funds available and the funds made available and budgeted for expenditure by the college or university shall be reapportioned by the Secretary to other eligible colleges or universities of the same State if there be any which qualify therefor and, if there be none, the Secretary shall reapportion such differences to the qualifying colleges and universities of other States participating in the forestry research program. If in any year the amount made available by a State from its own funds (including any revenue-sharing funds) to a State-certified institution eligible for assistance under this subchapter is reduced because of an increase in the allotment made available under this subchapter, the allotment of such State-certified institution from the next succeeding appropriation shall be reduced in an equivalent amount. The Secretary shall reapportion the amount of such reduction to other eligible colleges and universities of the same State if there be any that qualify therefor and, if there be none, the Secretary shall reapportion such amount to the qualifying colleges and universities of other States participating in the forestry research program.

SUBCHAPTER IV—SUSTAINED-YIELD FOREST MANAGEMENT

§583. Establishment of sustained-yield units to stabilize forest industries, employment, communities and taxable wealth

In order to promote the stability of forest industries, of employment, of communities, and of taxable forest wealth, through continuous supplies of timber; in order to provide for a continuous and ample supply of forest products; and in order to secure the benefits of forests in maintenance of water supply, regulation of stream flow, prevention of soil erosion, amelioration of climate, and preservation of wildlife, the Secretary of Agriculture and the Secretary of the Interior are severally authorized to establish by formal declaration, when in their respective judgments such action would be in the public interest, cooperative sustained-yield units which shall consist of federally owned or administered forest land under the jurisdiction of the Secretary establishing the unit and, in addition thereto, land which reasonably may be expected to be made the subject of one or more of the cooperative agreements with private landowners authorized by section 583a of this title.

(Mar. 29, 1944, ch. 146, §1, 58 Stat. 132.)

§583a. Cooperative agreements with private owners; privileges of private owners; recordation of agreements

The Secretary of Agriculture, with respect to forest land under his jurisdiction, and the Secretary of the Interior, with respect to forest land under his jurisdiction, are severally authorized, for the purposes specified in section 583 of this title, to enter into cooperative agreements with private owners of forest land within a cooperative sustained-yield unit, established pursuant to said section, providing for the coordinated management of such private forest land and of federally owned or administered forest lands within the sustained-yield unit involved. Each cooperative agreement may give the cooperating private landowner the privilege of purchasing without competitive bidding at prices not less than their appraised value, subject to periodic readjustments of stumpage rates and to such other conditions and requirements as the Secretary may prescribe, timber and other forest products from federally owned or administered forest land within the unit, in accordance with the provisions of sustained-yield management plans formulated or approved by the Secretary for the unit; shall limit the time, rate, and method of cutting or otherwise harvesting timber and other forest products from the land of the cooperating private landowner, due consideration being given to the character and condition of the timber, to the relation of the proposed cutting to the sustained-yield plan for the unit, and to the productive capacity of the land; shall prescribe the terms and conditions, but not the price, upon which the cooperating private landowner may sell to any person timber and other forest products from his land, compliance by the purchaser with such conditions to be required by the contract of sale; shall contain such provisions as the Secretary deems necessary to protect the reasonable interest of other owners of forest land within the unit; and shall contain such other provisions as the Secretary believes necessary to carry out the purposes of this subchapter.

Each cooperative agreement shall be placed on record in the county or counties in which the lands of the cooperating private landowner covered thereby are located, and the costs incident to such recordation may be paid out of any funds available for the protection or management of federally owned or administered forest land within the unit. When thus recorded, the agreement shall be binding upon the heirs, successors, and assigns of the owner of such land, and upon purchasers of timber or other forest products from such land, throughout the life of such cooperative agreement. (Mar. 29, 1944, ch. 146, §2, 58 Stat. 132.)

§583b. Establishment of sustained-yield units to stabilize sale of timber and forest products

The Secretary of Agriculture and the Secretary of the Interior are further severally authorized, whenever in their respective judgments the maintenance of a stable community or communities is primarily dependent upon the sale of timber or other forest products from federally owned or administered forest land and such maintenance cannot effectively be secured by following the usual procedures in selling such timber or other forest products, to establish by formal declaration for the purpose of maintaining the stability of such community or communities a sustained-yield unit consisting of forest land under the jurisdiction of the Secretary establishing such unit, to determine and define the boundaries of the community or communities for whose benefit such unit is created, and to sell, subject to such conditions and requirements as the Secretary believes necessary, federally owned or administered timber and other forest products from such unit without competitive bidding at prices not less than their appraised values, to responsible purchasers within such community or communities.

(Mar. 29, 1944, ch. 146, §3, 58 Stat. 133.)

Each of the said Secretaries is further authorized in his discretion to enter into cooperative agreements with the other Secretary, or with any Federal agency having jurisdiction over federally owned or administered forest land, or with any State or local agency having jurisdiction over publicly owned or administered forest land, providing for the inclusion of such land in any coordinated plan of management otherwise authorized by the provisions of this subchapter when by such a cooperative agreement he may be aided in accomplishing the purposes of this subchapter; but no federally or publicly owned or administered forest land not under the jurisdiction of the Secretary establishing the sustained-yield unit concerned shall be included in any such plan except in pursuance of a cooperative agreement made under this section.

(Mar. 29, 1944, ch. 146, §4, 58 Stat. 133.)

§583d. Notice; registered mail and publication; costs; contents; request for hearing; time; determination and record available for inspection

Before any sustained-yield unit authorized by section 583 or 583b of this title shall be established, and before any cooperative agreement authorized by section 583a or 583c of this title shall be entered into, advance notice thereof shall be given by registered mail or by certified mail to each landowner whose land is proposed to be included and by publication in one or more newspapers of general circulation in the vicinity of the place where the timber is located, and the costs incident to such publication may be paid out of any funds available for the protection or management of the federally owned or administered forest land involved. This notice shall state: (1) the location of the proposed unit; (2) the name of each proposed cooperator; (3) the duration of the proposed cooperative agreement or agreements; (4) the location and estimated quantity of timber on the land of each proposed cooperator and on the Federal land involved; (5) the expected rate of cutting of such timber; and (6) the time and place of a public hearing to be held not less than thirty days after the first publication of said notice for the presentation of the advantages and disadvantages of the proposed action to the community or communities affected.

Before any sale agreement made without competition and involving more than \$500 in stumpage value of federally owned or administered timber shall be entered into under this subchapter, advance notice thereof shall be given by publication once weekly for four consecutive weeks in one or more newspapers of general circulation in the vicinity of the place where the timber is located, and the costs incident to such publication may be paid out of any funds available for the protection or management of federally owned or administered forest land within the unit concerned. This notice shall state: (1) the quantity and appraised value of the timber; (2) the time and place of a public hearing to be held not less than thirty days after the first publication of said notice if requested by the State or county where the timber is located or by any other person deemed to have a reasonable interest in the proposed sale or in its terms; and (3) the place where any request for a public hearing shall be made. Such requests need be considered only if received at the place designated in the notice not later than fifteen days after the first publication of such notice. If a request for a hearing is received within the time designated, notice of the holding of the hearing shall be given not less than ten days before the time set for such hearing, in the same manner as provided for the original notice.

The determination made by the Secretary having jurisdiction upon the proposals considered at any such hearing, which determination may include the modification of the terms of such proposals, together with the minutes or other record of the hearing, shall be available for public inspection during the life of any coordinated plan of management or agreement entered into in consequence of such determination.

(Mar. 29, 1944, ch. 146, §5, 58 Stat. 133; Pub. L. 86-507, §1(17), June 11, 1960, 74 Stat. 201.)

In addition to any other remedy available under existing law, upon failure of any private owner of forest land which is subject to a cooperative agreement entered into pursuant to this subchapter to comply with the terms of such agreement, or upon failure of any purchaser of timber or other forest products from such land to comply with the terms and conditions required by such agreement to be included in the contract of sale, the Attorney General, at the request of the Secretary concerned, is authorized to institute against such owner or such purchaser a proceeding in equity in the proper district court of the United States, to require compliance with the terms and conditions of said cooperative agreement; and jurisdiction is conferred upon said district courts to hear and determine such proceedings, to order compliance with the terms and conditions of cooperative agreements entered into pursuant to this subchapter, and to make such temporary and final orders as shall be deemed just in the premises. As used in this section the term “owner” shall include the heirs, successors, and assigns of the landowner entering into the cooperative agreements.

(Mar. 29, 1944, ch. 146, §6, 58 Stat. 134.)

Whenever used in this subchapter, the term “federally owned or administered forest land” shall be construed to mean forest land in which, or in the natural resources of which, the United States has a legal or equitable interest of any character sufficient to entitle the United States to control the management or disposition of the timber or other forest products thereon, except land heretofore or hereafter reserved or withdrawn for purposes which are inconsistent with the exercise of the authority conferred by this subchapter; and shall include trust or restricted Indian land, whether tribal or allotted, except that such land shall not be included without the consent of the Indians concerned.

(Mar. 29, 1944, ch. 146, §7, 58 Stat. 134.)

The powers conferred under this section and sections 590h, 590i, and 590j to 590n of this title shall be used to assist voluntary action calculated to effectuate the purposes specified in this section. Such powers shall not be used to discourage the production of supplies of foods and fibers sufficient to maintain normal domestic human consumption as determined by the Secretary from the records of domestic human consumption in the years 1920 to 1929, inclusive, taking into consideration increased population, quantities of any

commodity that were forced into domestic consumption by decline in exports during such period, current trends in domestic consumption and exports of particular commodities, and the quantities of substitutes available for domestic consumption within any general class of food commodities. In carrying out the purposes of this section due regard shall be given to the maintenance of a continuous and stable supply of agricultural commodities adequate to meet consumer demand at prices fair to both producers and consumers.

(2) In the case of wheat, the allotment to any county shall be apportioned annually by the Secretary, through the local committees, among the farms within such county on the basis of tillable acres, crop-rotation practices, type of soil, and topography. Not more than 3 per centum of such county allotment shall be apportioned to farms on which wheat has not been planted during any of the three marketing years immediately preceding the marketing year in which the allotment is made. Notwithstanding any other provision of this section, the allotments established, or which would have been established, for any farm acquired in 1940 or thereafter by the United States for national-defense purposes shall be placed in an allotment pool and shall be used only to establish allotments for other farms owned or acquired by the owner of the farm so acquired by the United States. The allotments so made for any farm, including a farm on which wheat has not been planted during any of the three marketing years preceding the marketing year in which the allotment is made, shall compare with the allotments established for other farms in the same area which are similar except for the past acreage of wheat.

(3) In the case of corn, the allotment to any county shall be apportioned annually by the Secretary, through the local committees, among the farms within such county on the basis of tillable acreage, type of soil, topography, and crop rotation practices.

(4) Repealed. Apr. 10, 1939, ch. 48, 53 Stat. 573.

(5) In determining normal yield per acre for any county under this section in the case of wheat or corn, the normal yield shall be the average yield per acre therein for such commodity during the ten calendar years immediately preceding the calendar year in which such yield is determined, adjusted for abnormal weather conditions and trends in yields. If for any reason there is no actual yield, or the data therefor are not available for any year, then an appraised yield for such year, determined in accordance with regulations of the Secretary, shall be used. If, on account of drought, flood, insect pests, plant disease, or other uncontrollable natural cause, the yield in any year of such ten-year period is less than 75 per centum of the average (computed without regard to such year), such year shall be eliminated in calculating the normal yield per acre. Such normal yield per acre for any county need be redetermined only when the actual average yield for the ten calendar years immediately preceding the calendar year in which such yield is being reconsidered differs by at least 5 per centum from the actual average yield for the ten years upon which the existing normal yield per acre for the county was based.

(6) In determining normal yield per acre for any farm under this section in the case of wheat or corn, the normal yield shall be the average yield per acre thereon for such commodity during the ten calendar years immediately preceding the calendar year in which such yield is determined, adjusted for abnormal weather conditions and trends in yields. If for any such year the data are not available, or there is no actual yield, then the normal yield for the farm shall be appraised in accordance with regulations of the Secretary, taking into consideration abnormal weather conditions, the normal yield for the county, and the yield in years for which data are available.

(d) to (f) Repealed. Pub. L. 104–127, title III, §336(a)(1)(A)(ii), Apr. 4, 1996, 110 Stat. 1004

A payment that may be made to a producer under this section may be assigned only in accordance with regulations issued by the Secretary. This subsection shall not authorize any suit against or impose any liability on the Secretary, any disbursing agent, or any agency of the United States if payment is made to the producer without regard to the existence of any such assignment.

CODIFICATION

Section was enacted as part of the Agriculture Act of 1970, and not as part of the Soil Conservation and Domestic Allotment Act which comprises this chapter.

§590q–3. Critical lands resource conservation program in Great Plains area

Notwithstanding any other provision of law—

(a) Authorization for program

The Secretary of Agriculture is authorized to formulate and carry out a program with owners and operators of land in the Great Plains area as described in section 590p(b) ¹ of this title to reduce runoff, soil and water erosion, and otherwise to promote the conservation of soil and water resources in such area through the conversion of cropland from soil depleting uses to conserving uses including the production of soil conserving cover crops.

(b) Terms of agreements with owners or operators

To effectuate the purposes of the program, the Secretary may enter into an agreement for a two-year period with an owner or operator as described in subsection (a) of this section whereby the owner or operator shall agree to devote to a soil conserving cover crop a specifically designated acreage of cropland on the farm up to 50 per centum of the acreage which had been planted to any soil depleting crop or crops in any of the two years preceding the date of the agreement. The agreement shall be renewable for annual periods thereafter subject to the mutual agreement of the owner or operator and the Secretary. In such agreement, the owner or operator shall agree (1) to plant a legume, or if not adapted to such area, an annual, biennial, or a perennial cover crop, as specified in the agreement; (2) to divert from production such portion of one or more crops designated by the Secretary as the Secretary determines necessary to effectuate the purpose of the program; (3) not to harvest any crop from or graze the designated acreage during the agreement period, unless the Secretary determines that it is necessary to permit grazing or harvesting in order to alleviate damage, hardship, or suffering caused by severe drought, flood, or other natural disaster, and consents to such grazing or harvesting subject to an appropriate reduction in the rate of payment; (4) to give adequate assurance, as specified by the Secretary, that the land was not acquired for the purpose of placing it in the program: *Provided*, That the foregoing provision shall not prohibit the continuation of an agreement by a new owner if an agreement has once been entered into under this section nor prevent an owner or operator from placing a farm in the program if the farm was acquired by the owner to replace an eligible farm from which he was displaced because of its acquisition by any Federal, State, or other agency having the right of eminent domain; (5) to forfeit all rights to further payments under the agreement and refund to the United States all payments received thereunder upon his violation of the agreement at any stage during the time he has control of the land if the Secretary determines that such violation is of such a nature as to warrant termination of the agreement, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if the Secretary determines that the violation by the owner or operator does not warrant termination of the agreement; (6) upon transfer of his right and interest in the farm, during the agreement period, to forfeit all rights to further payments under the agreement and refund to the United States all payments received thereunder unless the transferee of any such land agrees with the Secretary to assume all obligations of the agreement; (7) not to adopt any practice specified by the Secretary in the agreement as a practice which would tend to defeat the purposes of the agreement; and (8) to such additional provisions as the Secretary determines are desirable to effectuate the purposes of the

program or to facilitate the practical administration of the program, including such measures as the Secretary may deem appropriate to keep the designated acreage from eroding and free from weeds and rodents in accordance with good conservation systems.

(c) Annual adjustment payments

In consideration for such agreement, the Secretary shall make annual adjustment payments to the owner or operator for the period of the agreement at such rate or rates not in excess of \$30 per acre as the Secretary determines to be fair and reasonable. The Secretary may use an advertising and bid procedure in determining the lands in any area to be covered by agreements and the payment rate therefor. The Secretary and the owner or operator may agree that the annual adjustment payments for the agreement period shall be made either upon approval of the agreement or in such installments as they may agree to be desirable: *Provided*, That for each year any annual adjustment payment is made in advance of performance, the annual adjustment payment shall be reduced by 5 per centum.

(d) Termination of agreements

The Secretary may terminate any agreement under the program, by mutual agreement with the owner or operator, if the Secretary determines that such termination would be in the public interest, and may agree with the owner or operator to such modification of agreements as the Secretary may determine to be desirable to carry out the purposes of the program or facilitate its administration.

(e) Preservation of cropland, crop acreage, and allotment history

The Secretary may, to the extent the Secretary deems it desirable, provide by appropriate regulations for preservation of cropland, crop acreage, and allotment history applicable to acreage diverted from the production of crops to establish vegetative cover for the purpose of any Federal program under which such history is used as a basis for an allotment or other limitation or for participation in such program.

(f) Utilization of Federal and non-Federal offices

In carrying out the program, the Secretary shall utilize the services of local, county, and State committees established under section 590h of this title and the technical services of the Soil Conservation Service and soil and water conservation districts.

(g) Program payments

In case any producer who is entitled to any payment under the program dies, becomes incompetent, or disappears before receiving such payment, or is succeeded by another who renders or completes the required performance, the payment shall, without regard to any other provisions of law, be made as the Secretary may determine to be fair and reasonable.

(h) Tenants and sharecroppers

The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provision for sharing, on a fair and equitable basis, in payments under the program.

(i) Rules and regulations

The Secretary shall prescribe such regulations as the Secretary determines necessary to carry out the provisions of this section.

(j) Authorization of appropriations; utilization of Commodity Credit Corporation

There are authorized to be appropriated for the period beginning October 1, 1977, and ending September 30, 1981, such sums as may be necessary to carry out the program provided for in this section. The Secretary is authorized to utilize the facilities, services, and authorities of the Commodity Credit Corporation in discharging the Secretary's functions and responsibilities under the program, including payment of costs of administration: *Provided*, That the Commodity Credit Corporation shall not make any expenditures for such purposes unless the Corporation has received funds to cover such expenditures from appropriations made to carry out this section.

§590z–1. Prerequisites for construction of project

(a) Investigation and report to President

No construction of a project may be undertaken pursuant to the authority of this subchapter unless and until the Secretary has made an investigation thereof and has submitted to the President his report and findings on—

- (i) the engineering feasibility of the proposed construction;
- (ii) the estimated cost of the proposed construction;
- (iii) the part of the estimated cost which properly can be allocated to irrigation;
- (iv) the part of the estimated cost which probably can be repaid by the water users in accordance with the requirements of section 590z–2 of this title;
- (v) the part of the estimated cost which can properly be allocated to municipal or miscellaneous water supplies or power and probably be returned to the United States in revenues therefrom;
- (vi) the part of the estimated cost which can properly be allocated to the irrigation of Indian trust and tribal lands, and be repayable in accordance with existing law relating to Indian lands;
- (vii) the part of the estimated cost which can properly be allocated to flood control as recommended by the Secretary after consultation with the Chief of Engineers, Department of the Army.

In connection with each such investigation, report, and finding, the Secretary shall consult with the Secretary of Agriculture regarding participation in the proposed project by the Department of Agriculture under the authority of sections 590z–3 and 590z–4 of this title; and the Secretary shall also transmit to the President a report by the Secretary of Agriculture to the President on the participation, if any, proposed by the Department of Agriculture. The project shall be deemed authorized and may be undertaken pursuant to this subchapter if (1) the Secretary finds and certifies to the President that the project has engineering feasibility and that the water users probably can repay, in accordance with the requirements of section 590z–2 of this title an amount equal to or in excess of that part of the estimated cost allocated by him to irrigation to be met by expenditure of moneys appropriated pursuant to section 590z–10(1) of this title; and (2) the President has approved said report and findings and has found that services, labor, materials, easements, and other property, including money, for the construction of the project, should be made available to the Department of the Interior by the Works Projects Administration or other Federal agencies, to the extent found necessary by the Secretary to make up the difference between the estimated cost of project construction and (i) the part thereof to be met by expenditure of moneys appropriated pursuant to section 590z–10(1) of this title, together with (ii) such services, materials, money, easements, and other property as non-Federal agencies or parties have agreed to contribute and the Secretary has found acceptable under section 590z of this title.

(b) Construction of physical features

No actual construction of the physical features of a project shall be undertaken unless and until (1) the Secretary has found that lands, or interests in lands, deemed necessary for the construction and operation of the major features of the projects have been secured, or sufficient progress made in their procurement to indicate the probability that all these lands or interests in lands can be secured, with titles and at prices satisfactory to him; and (2) the Secretary has found (i) that water rights adequate for the purposes of the project have been acquired with titles and at prices satisfactory to him, or that such water rights have been initiated and in his judgment can be perfected in conformity with State law and any applicable interstate agreements and in a manner satisfactory to him; and (ii) that such

water rights can be utilized for the purposes of the project in conformity with State law and any applicable interstate agreements and in a manner satisfactory to him.

(c) Division of project

Any part of a project hereunder may be designated as a division of the project by the Secretary if he, after consultation with the Secretary of Agriculture, deems this desirable for orderly and efficient construction or administration. The term “project”, as used in subsection (b) of this section and section 590z–2 of this title, shall be deemed to mean also “division of a project”, designated as provided in this subsection. Any project authorized for construction from appropriations under the head “Water Conservation and Utility Projects” in the Interior Department Appropriation Act, 1940 [ch. 119] (53 Stat. 685), hereinafter called the 1940 water conservation appropriation, may be designated by the Secretary, upon agreement with the Secretary of Agriculture, a project under this subchapter, and shall thereupon be subject to all the provisions and requirements thereof, except those of subsections (a) and (b) of this section.

No water for irrigation may be delivered from the works of any project constructed under the authority of this subchapter until after the repayment contract or contracts required by this section have been executed. Where practicable in the judgment of the Secretary, the repayment contract shall be with a water users’ organization or organizations satisfactory in form and powers to the Secretary;

and otherwise the repayment contract shall be with the individual landowners. The contract or contracts shall contain such provisions as the Secretary deems necessary to carry out the purposes of this subchapter and to protect the interests of the United States.

(b) “Reimbursable construction costs” defined

The term “reimbursable construction costs” as used in this subchapter means that part of the costs of investigating, constructing, and operating and maintaining the project, which are allocated by the Secretary to irrigation, and which are met by expenditures of moneys therefor appropriated under the authority of section 590z–10(1) of this title, plus such amounts as the President, under section 590z(1) of this title, may determine to be reimbursable: *Provided*, That administrative expenses incurred in the District of Columbia in connection with the investigation construction, or operation and maintenance of a project shall not be included in the reimbursable construction costs nor shall they be charged to the water users in any way.

(c) Terms

The repayment contract or contracts for a project shall, in their aggregate, provide for repayment to the United States of the total amount of the reimbursable construction costs of the project allocated to irrigation. Each such contract shall provide, among other things, that—

(1) The Secretary shall fix a development period for each project of not to exceed ten years from and including the first calendar year in which water is delivered for the lands in said project; and during the development period water shall be delivered to the lands in the project involved at a charge per acre-foot, or other charge, to be fixed by the Secretary each year and to be paid in advance of delivery of water. Such charges shall be fixed with a view of returning such amounts as in the Secretary's judgment are justified by the rate of project development, including as a minimum the return over the full development period of that part of the cost of operating and maintaining the project, during said period, allocated by the Secretary to irrigation; and collections of such charges in excess of the cost of the operation and maintenance during the development period, as thereafter determined by the Secretary, shall be credited to the reimbursable construction costs of the project in the manner determined by the Secretary.

(2) The United States shall operate and maintain the project during the development period fixed for it. After the development period, the United States shall operate and maintain the project or any part thereof as long as is deemed necessary by the Secretary, and shall be paid in advance for each year that part of the estimated cost of operating and maintaining the project for such year allocated by the Secretary to irrigation. In the event charges due the United States are not paid when due the United States may, at its election, suspend operations in whole or in part.

(3) The repayment of the reimbursable construction costs, except as to Indian lands which shall be repayable in accordance with existing law relating to Indian lands, shall be spread in not to exceed forty annual installments, of the number and amounts fixed by the Secretary; and the first annual installment under each contract shall become due and payable on the date fixed by the Secretary, in the year next following the last year of the development period fixed under subsection (c)(1) of this section: *Provided*, That the provisions of this subsection shall not be construed to modify the provisions of special legislation pertaining to any particular project.

(4) The water users or their organization will take such measures as the Secretary deems proper to secure the adoption of proper accounting, to protect the condition of project works, and to provide for the proper use thereof, and to protect project lands against deterioration due to improper use of water. Delinquencies in any payments due to the United States shall be penalized by a penalty of not less than one-half of 1 per centum per month. No water shall be delivered to or for any land or party while either said land or the organization in which it is located or said party is in arrears in the advance payment of operation and maintenance charges or development period charges under subsection (c)(1) of this section, or in arrears for more than twelve months in the payment of an installment of the reimbursable construction costs.

(5) The Secretary shall establish the size of farm units of irrigable lands on each project in accordance with his findings of the area sufficient in size for the support of a family on the lands to be irrigated. No water may be delivered to or for more than the farm unit area of irrigable lands

in the project owned by a single landowner: *Provided*, That this subsection shall not apply to the United States or any agency or instrumentality thereof, corporate or otherwise. No water shall be delivered to or for any land, in a project area, transferred or disposed of subsequent to approval of the project by the President, and within three years from the time water becomes available, unless and until it has been shown to the satisfaction of the Secretary or his duly authorized representative that the land has been transferred or disposed of at a price not exceeding the appraised value as determined by the Secretary or his duly authorized representatives, and upon proof of fraudulent representation as to the true consideration involved the Secretary is authorized to cancel the water right attaching to the land involved: *Provided further*, That nothing herein shall be construed to create authority to interfere with the delivery of water under prior rights.

CODIFICATION

The first sentence of this section is from section 1 of act June 3, 1878.

The words of this section reading “bona fide residents of the States of Colorado, Nevada, New Mexico, Arizona, Utah, Wyoming, North Dakota, South Dakota, Idaho, or Montana,” read in the original section, “bona fide residents of the State of Colorado, or Nevada, or either of the Territories of New Mexico, Arizona, Utah, Wyoming, Dakota, Idaho, or Montana.”

A proviso at the close of section 1 of act June 3, 1878, was combined with a similar proviso in act Jan. 11, 1921, to form the last sentence of this section.

Act of Jan. 11, 1921, is the source of the remainder of the section.

As originally enacted that act began with the following language: “Section 1 of an Act entitled ‘An Act authorizing the citizens of Colorado, Nevada, and the Territories to fell and remove timber on the public domain for mining and domestic purposes,’ approved June 3, 1878, chapter 150, page 88, volume 20, United States Statutes at Large, and section 8 of an Act entitled ‘An Act to repeal timber-culture laws, and for other purposes,’ approved March 3, 1891, as amended by an Act approved March 3, 1891, chapter 559, page 1093, volume 26, United States Statutes at Large, and the several Acts amendatory thereof, be, and the same are hereby, extended so that,” etc.

This language was omitted as having been given effect by the combination of the remaining language of the act with section 1 of act June 3, 1878, to form this section, by section 612 of this title.

§605. Unlawful cutting on mineral lands; notice to Secretary

“Such officer as the Secretary of the Interior may designate” substituted in text for “the register and the receiver of any local land office”, “Secretary of the Interior” for “Commissioner of the General Land Office”, and “such officer” for “such register and receiver” on authority of Reorg. Plan No. 3 of 1946, set out in the Appendix to Title 5.

(3)(A) Sums collected by the appropriate Secretary in connection with the buy-out of contracts pursuant to this subsection shall be deposited in and paid from the Treasury in the same manner as moneys received from timber sales from such lands and shall be determined as follows: The purchaser's loss on any qualifying timber sales contracts shall be determined by the Forest Service or the Bureau of Land Management by subtracting the current delivered log value (as determined by such agency) from the delivered log cost based on the current contract return (as determined by such agency) of any such contracts. If such loss is—

(i) in excess of 100 per centum of the net book worth of the purchaser, the buy-out cost shall be \$10 per one thousand board feet of currently held volume bought out;

(ii) in excess of 50 per centum up to 100 per centum of the net book worth of the purchaser, the buy-out cost shall be 10 per centum of the contract overbid but at least \$10 per one thousand board feet of currently held volume bought out; or

(iii) up to 50 per centum or less of the net book worth of the purchaser, the buy-out cost shall be

15 per centum for the purchaser's first one hundred twenty-five million board feet, 20 per centum for additional board feet above one hundred twenty-five million up to one hundred fifty million, 25 per centum for additional board feet above one hundred fifty million up to one hundred seventy-five million, and 30 per centum for additional board feet above one hundred seventy-five million up to two hundred million, of the contract overbid but at least \$10 per one thousand board feet of currently held volume bought out.

(B) For purposes of this paragraph, the term "net book worth" does not include the value of any outstanding uncut Federal timber sales contracts.

(C) Net book worth shall be, subject to agency verification, as determined by an independent certified public accountant in accordance with generally accepted accounting standards for the timber industry.

(D) A purchaser may elect to pay the buy-out cost imposed by subparagraph (A)(iii) in lieu of utilizing loss and net book worth determinations.

(E) Where a purchaser is not able to obtain sufficient credit elsewhere to finance the buy-out charge at reasonable rates and terms, purchaser may, upon payment of 5 per centum of the buy-out charge, pay the remainder of the buy-out charge in equal quarterly payments over a period not to exceed 5 years at an interest rate adjusted with each payment equal to the average market yield of outstanding Treasury obligations with remaining years to maturity of five years payment must be secured by bond, deposited securities or other forms of security acceptable to the appropriate Secretary in an amount sufficient to cover the entire buy-out payment.

(F) For purposes of this paragraph, the term "contract overbid" is the difference between the advertised contract rate and the rate the purchaser bid.

(4)(A) Contracts returned pursuant to this subsection under which no harvest has begun shall be returned in full.

(B) Contracts returned to the appropriate Secretary pursuant to this subsection under which harvest has begun, shall be returned conditionally and shall not be considered as part of the outstanding volume of timber under contract for the purposes of this Act. The return shall become final after the purchaser has completed stages of contractual obligations for the units on which the harvest has begun, including work on roads, to logical stopping points as determined by the Secretary after consultation with the purchaser. All remaining unharvested units must be returned.

(C) The appropriate Secretary may reject return of a contract on which harvest has begun if he determines, in his discretion, that the remaining unharvested portion is substantially unrepresentative of the original sale as a whole in terms of species, logging methods, or other appropriate criteria, and that accepting the return of such contract would seriously disadvantage the Government.

(5)(A) Timber from returned or defaulted contracts shall be offered for resale in an orderly fashion as part of, and not in addition to, the normal congressionally authorized timber sales program, and in a manner which does not disrupt regional markets or artificially depress domestic timber prices. Timber from returned or defaulted contracts shall be given preference for resale in the Forest Service timber sales programs.

(B) Timber sales in Forest Service region 6 shall not exceed four billion three hundred million board feet of net merchantable sawtimber in fiscal year 1984.

(C) Beginning in fiscal year 1985 and continuing through fiscal year 1991 or the fiscal year in which timber contract extensions in region 6 granted under the President's program of July 28, 1983 (as constituted on October 16, 1984), are completed, whichever is later, the Secretary of Agriculture shall set, and periodically adjust as necessary, the maximum annual timber sale volume in region 6. Such maximum sale volume shall be set so as to achieve a volume of region 6 net merchantable sawtimber under contract at the end of each fiscal year which does not exceed twelve billion three hundred million board feet: *Provided, however,* That such maximum annual sale volume shall not exceed five billion two hundred million board feet of net merchantable sawtimber. The sale of timber within region 6 shall be made in such a manner as not to result in discriminatory treatment as between different forests in the region.

(6)(A) The Secretary of the Interior and the Secretary of Agriculture shall publish final rules for

the implementation of this subsection in the Federal Register within ninety days after October 16, 1984.

(B) Such final rules shall require purchasers to submit buy-out requests to the appropriate Secretary within ninety days after the publication of such rules.

(7)(A) For purposes only of determining a purchaser's buy-out limitation under paragraph (2) and net worth in connection with buy-out cost under paragraph (3), concerns which are affiliates as defined under subparagraph (B) of this paragraph shall be treated as a single entity.

(B) Definition of affiliates: Concerns are affiliates of each other when either directly or indirectly, one concern controls or has the power to control the other, or a third party or parties controls or has the power to control both. In determining whether or not affiliation exists, consideration shall be given to all appropriate factors, including, but not limited to, common ownership, common management, and contractual relationships.

(C) Definition of purchaser: For the purposes of this Act, a purchaser is the holder of a contract to purchase timber from the Secretary of Agriculture or the Secretary of the Interior.

(b) Extension of time for performance of contracts; covered contracts; damages for default

(1) Timber contracts bid prior to January 1, 1982, not bought out pursuant to subsection (a) of this section and included in the President's program of July 28, 1983, shall not be subject to any further extension of time for performance except as permitted under the President's program of July 28, 1983, as implemented by the Secretary of Agriculture and the Secretary of the Interior, providing for the extension of certain timber sale contracts and requiring the phased harvesting of such extended contracts, which program is hereby ratified except as modified by paragraph (2).

(2) Notwithstanding any other provision of law, timber contracts extended pursuant to the President's program of July 28, 1983, as implemented by the Secretary of Agriculture shall not be subject to inclusion of additional provisions for calculating damages for default.

(c) Monitoring of bidding patterns on timber sale contracts; discouragement of bids; reporting requirements

The Secretary of Agriculture and the Secretary of the Interior shall monitor bidding patterns on timber sale contracts and take action to discourage bidding at such a rate as would indicate that the bidder, if awarded the contract, would be unable to perform the obligations as required, or that the bid is otherwise for the purpose of speculation. Each Secretary shall include in the annual report to Congress information concerning actions taken under this subsection.

(d) Cash down-payment and periodic payments for contracts; effective date

Effective January 1, 1985, in any contract for the sale of timber from the National Forests, the Secretary of Agriculture shall require a cash down-payment at the time the contract is executed and periodic payments to be made over the remaining period of the contract.

§619. Emergency stumpage rate redeterminations in Alaska

(a) Application; applicable period

Emergency stumpage rate redetermination shall be made upon the written application of the purchaser of National Forest timber in Alaska, bid after January 1, 1974, and rates established as a result thereof shall be effective for timber scaled during a period between January 1, 1981, and five years from October 16, 1984.

(b) Competitive effect of modification of contracts

In making the emergency rate redeterminations the Secretary may modify existing contract terms, including the amount of the bid premium, in order to provide rates which will permit the holders of contracts bid after January 1, 1974, to be competitive with other purchasers of National Forest timber.

(c) Excepted contracts

The provisions of this section shall not apply to contracts held by the holders of 50-year timber sale contracts in Alaska.

§620. Findings and purposes

(a) Findings

The Congress makes the following findings:

- (1) Timber is essential to the United States.
- (2) Forests, forest resources, and the forest environment are exhaustible natural resources that require efficient and effective conservation efforts.
- (3) In the interest of conserving those resources, the United States has set aside millions of acres of otherwise harvestable timberlands in the western United States, representing well over 100,000,000,000 board feet of otherwise harvestable timber.
- (4) In recent years, administrative, statutory, or judicial action has been taken to set aside an increased amount of otherwise harvestable timberlands for conservation purposes.
- (5) In the next few months and years, additional amounts of otherwise harvestable timberlands may be set aside for conservation purposes, pursuant to the Endangered Species Act of 1973 [16 U.S.C. 1531 et seq.], the National Forest Management Act of 1976, or other expected statutory, administrative, and judicial actions.
- (6) There is evidence of a shortfall in the supply of unprocessed timber in the western United States.
- (7) There is reason to believe that any shortfall which may already exist may worsen unless action is taken.
- (8) In conjunction with the broad conservation actions expected in the next few months and years, conservation action is necessary with respect to exports of unprocessed timber.

(b) Purposes

The purposes of sections 620 to 620j of this title are—

- (1) to promote the conservation of forest resources in conjunction with State and Federal resources management plans, and other actions or decisions, affecting the use of forest resources;

(2) to take action essential for the acquisition and distribution of forest resources or products in short supply in the western United States;

(3) to take action necessary, to meet the goals of Article XI 2.(a) of the GATT 1994 (as defined in section 3501(1)(B) of title 19), to ensure sufficient supplies of certain forest resources or products which are essential to the United States;

(4) to continue and refine the existing Federal policy of restricting the export of unprocessed timber harvested from Federal lands in the western United States; and

(5) to effect measures aimed at meeting these objectives in conformity with the obligations of the United States under the WTO Agreement and the multilateral trade agreements (as such terms are defined in paragraphs (9) and (4), respectively, of section 3501 of title 19).

§620a. Restrictions on exports of unprocessed timber originating from Federal

lands

(a) Prohibition on export of unprocessed timber originating from Federal lands

No person who acquires unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States may export such timber from the United States, or sell, trade, exchange, or otherwise convey such timber to any other person for the purpose of exporting such timber from the United States, unless such timber has been determined under subsection (b) of this section to be surplus to the needs of timber manufacturing facilities in the United States.

(b) Surpluses

(1) Determinations by Secretary concerned

The prohibition contained in subsection (a) of this section shall not apply to specific quantities of grades and species of unprocessed timber originating from Federal lands which the Secretary concerned determines to be surplus to domestic manufacturing needs.

(2) Procedures

Any determination under paragraph (1) shall be made in regulations issued in accordance with section 553 of title 5. Any such determination shall be reviewed at least once in every 3-year period. The Secretary concerned shall publish notice of such review in the Federal Register, and shall give the public an opportunity to comment on such review.

(Pub. L. 101-382, title IV, §489, Aug. 20, 1990, 104 Stat. 715.)

§620b. Limitations on substitution of unprocessed Federal timber for unprocessed timber exported from private lands

(a) Direct substitution

(1) Except as provided in paragraph (3) and subsection (c) of this section, no person may purchase directly from any department or agency of the United States unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States if—

(A) such unprocessed timber is to be used in substitution for exported unprocessed timber originating from private lands; or

(B) such person has, during the preceding 24-month period, exported unprocessed timber originating from private lands.

(2) Notwithstanding paragraph (1)—

(A) Federal timber purchased pursuant to a contract entered into between the purchaser and the Secretary concerned before the date on which regulations to carry out this subsection are issued under section 620f of this title shall be governed by the regulations of the Secretary concerned in effect before such date that restrict the substitution of unprocessed timber originating from Federal lands for exported timber originating from private lands;

(B) in the 1-year period beginning on August 20, 1990, any person who operates under a Cooperative Sustained Yield Unit Agreement, and who has an historic export quota shall be limited to entering into contracts under such a quota to a volume equal to not more than 66 percent of the person's historic export quota used during fiscal year 1989;

(C) a person referred to in subparagraph (B) shall reduce the person's remaining substitution volume by an equal amount each year thereafter such that no volume is substituted under such a quota in fiscal year 1995 or thereafter; and

(D) the 24-month period referred to in paragraph (1)(B) shall not apply to any person who—

(i) before August 20, 1990, has, under an historic export quota approved by the Secretary concerned, purchased unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States in substitution for exported unprocessed timber originating from private lands;

- (ii) certifies to the Secretary concerned, within 3 months after August 20, 1990, that the person will, within 6 months after August 20, 1990, cease exporting unprocessed timber originating from private lands; and
- (iii) ceases exports in accordance with such certification.

(3) **APPLICABILITY.**—In the case of the purchase by a person of unprocessed timber originating from Federal lands west of the 119th meridian in the State of Washington, paragraph (1) shall apply only if—

- (A) the private lands referred to in paragraph (1) are owned by the person; or
- (B) the person has the exclusive right to harvest timber from the private lands described in paragraph (1) during a period of more than 7 years, and may exercise that right at any time of the person's choosing.

(b) Indirect substitution

(1) In general

Except as provided in paragraph (2), no person may, beginning 21 days after August 20, 1990, purchase from any other person unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States if such person would be prohibited from purchasing such timber directly from a department or agency of the United States. Acquisitions of western red cedar which are domestically processed into finished products to be sold into domestic or international markets are exempt from the prohibition contained in this paragraph.

(2) Exceptions

(A) The Secretary of Agriculture shall, as soon as practicable but not later than 9 months after August 20, 1990, establish, by rule, a limited amount of unprocessed timber originating from Federal lands described in subparagraph (B) which may be purchased by a person otherwise covered by the prohibition contained in paragraph (1). Such limit shall equal—

- (i) the amount of such timber acquired by such person, based on the higher of the applicant's actual timber purchasing receipts or the appropriate Federal agency's records, during fiscal years 1988, 1989, and 1990, divided by 3, or
- (ii) 15 million board feet,

whichever is less, except that such limit shall not exceed such person's proportionate share, with respect to all persons covered under this paragraph, of 50 million board feet.

(B) The Federal lands referred to in subparagraph (A) are Federal lands administered by the United States Forest Service Region 6 that are located north of the Columbia River from its mouth and east to its first intersection with the 119th meridian, and from that point north of the 46th parallel and east.

(C) Any person may sell, trade, or otherwise exchange with any other person the rights obtained under subparagraph (A), except that such rights may not be sold, traded, or otherwise exchanged to persons already in possession of such rights obtained under subparagraph (A).

(D) Federal timber purchased from Federal lands described in subparagraph (B) pursuant to a contract entered into between the purchaser and the Secretary of Agriculture before the date on which regulations to carry out this subsection are issued under section 620f of this title shall be governed by the regulations of the Secretary of Agriculture in effect before such date that restrict the substitution of unprocessed timber originating from Federal lands for exported timber originating from private lands.

(c) Sourcing areas

(1) In general

The prohibitions contained in subsections (a) and (b) of this section shall not apply with respect to the acquisition of unprocessed timber originating from Federal lands within a sourcing area west of the 100th meridian in the contiguous 48 States approved by the Secretary concerned under this subsection by a person who—

(A) in the previous 24 months, has not exported unprocessed timber originating from private lands within the sourcing area; and

(B) during the period in which such approval is in effect, does not export unprocessed timber originating from private lands within the sourcing area.

The Secretary concerned may waive the 24-month requirement set forth in subparagraph (A) for any person who, within 3 months after August 20, 1990, certifies that, within 6 months after August 20, 1990, such person will, for a period of not less than 3 years, cease exporting unprocessed timber originating from private lands within the sourcing area.

(2) Requirements for application for sourcing areas for processing facilities located outside the northwestern private timber open market area

The Secretaries concerned shall, not later than 3 months after August 20, 1990, prescribe procedures to be used by a person applying for approval of a sourcing area under paragraph (1). Such procedures shall require, at a minimum, the applicant to provide—

(A) information regarding the location of private lands (except private land located in the northwestern private timber open market area) from which such person has, within the previous year, harvested or otherwise acquired unprocessed timber which has been exported from the United States; and

(B) information regarding the location of each timber manufacturing facility owned or operated by such person within the proposed sourcing area boundaries at which the applicant proposes to process timber originating from Federal lands.

The prohibition contained in subsection (a) of this section shall not apply to a person before the date which is 1 month after the procedures referred to in this paragraph are prescribed. With respect to any person who submits an application in accordance with such procedures by the end of the time period set forth in the preceding sentence, the prohibition contained in subsection (a) of this section shall not apply to such person before the date on which the Secretary concerned approves or disapproves such application.

(3) Grant of approval for sourcing areas for processing facilities located outside of the northwestern private timber open market area

(A) In general

For each applicant, the Secretary concerned shall, on the record and after an opportunity for a hearing, not later than 4 months after receipt of the application for a sourcing area, either approve or disapprove the application. The Secretary concerned may approve such application only if the Secretary determines that the area that is the subject of the application, in which the timber manufacturing facilities at which the applicant desires to process timber originating from Federal lands are located, is geographically and economically separate from any geographic area from which that person harvests for export any unprocessed timber originating from private lands.

(B) For timber manufacturing facilities located in Idaho

Except as provided in subparagraph (D), in making a determination referred to in subparagraph (A), the Secretary concerned shall consider the private timber export and the private and Federal timber sourcing patterns for the applicant's timber manufacturing facilities, as well as the private and Federal timber sourcing patterns for the timber manufacturing facilities of other persons in the same local vicinity of the applicant, and the relative similarity of such private and Federal timber sourcing patterns.

(C) For timber manufacturing facilities located in States other than Idaho

Except as provided in subparagraph (D), in making the determination referred to in subparagraph (A), the Secretary concerned shall consider the private timber export and the Federal timber sourcing patterns for the applicant's timber manufacturing facilities, as well as

the Federal timber sourcing patterns for the timber manufacturing facilities of other persons in the same local vicinity of the applicant, and the relative similarity of such Federal timber sourcing patterns. Private timber sourcing patterns shall not be a factor in such determinations in States other than Idaho.

(D) Area not included

In deciding whether to approve or disapprove an application, the Secretary shall not—

- (i) consider land located in the northwestern private timber open market area; or
- (ii) condition approval of the application on the inclusion of any such land in the applicant's sourcing area, such land being includable in the sourcing area only to the extent requested by the applicant.

(4) Denial of application for sourcing areas for processing facilities located outside the northwestern private timber open market area

(A) Subject to subparagraph (B), and notwithstanding any other provision of law, in the 9-month period after receiving disapproval of an application submitted pursuant to this subsection, the applicant may purchase unprocessed timber originating from Federal lands in the area which is the subject of the application in an amount not to exceed 75 percent of the annual average of such person's purchases of unprocessed timber originating from Federal lands in the same area during the 5 full fiscal years immediately prior to submission of the application. In the subsequent 6-month period, such person may purchase not more than 25 percent of such annual average, after which time the prohibitions contained in subsection (a) of this section shall fully apply.

(B) If a person referred to in subparagraph (A) certifies to the Secretary concerned, within 90 days after receiving disapproval of such application, that such person shall, within 15 months after such disapproval, cease the export of unprocessed timber originating from private lands from the geographic area determined by the Secretary for which the application would have been approved, such person may continue to purchase unprocessed timber originating from Federal lands in the area which is the subject of the application, without being subject to the restrictions of subparagraph (A), except that such purchases during that 15-month period may not exceed 125 percent of the annual average of such person's purchases of unprocessed timber originating from Federal lands in the same area during the 5 full fiscal years immediately prior to submission of the application which was denied.

(C) Any person to whom subparagraph (B) applies may not, during the 15-month period after the person's application for sourcing area boundaries is denied, export unprocessed timber originating from private lands in the geographic area determined by the Secretary concerned for which the application would have been approved in amounts that exceed 125 percent of the annual average of such person's exports of unprocessed timber from such private lands during the 5 full fiscal years immediately prior to submission of the application.

(5) Review of determinations for sourcing areas for processing facilities located outside the northwestern private timber open market area

Determinations made under paragraph (3) shall be reviewed, in accordance with the procedures prescribed in sections 620 to 620j of this title, not less often than every 5 years.

(6) Sourcing areas for processing facilities located in the northwestern private timber open market area

(A) Establishment

In the northwestern private timber open market area—

- (i) a sourcing area boundary shall be a circle around the processing facility of the sourcing area applicant or holder;
- (ii) the radius of the circle—
 - (I) shall be the furthest distance that the sourcing area applicant or holder proposes to haul Federal timber for processing at the processing facility; and
 - (II) shall be determined solely by the sourcing area applicant or holder;

- (iii) a sourcing area shall become effective on written notice to the Regional Forester for Region 6 of the Forest Service of the location of the boundary of the sourcing area;
- (iv) the 24-month requirement in paragraph (1)(A) shall not apply;
- (v) a sourcing area holder—

- (I) may adjust the radius of the sourcing area not more frequently than once every 24 months; and

- (II) shall provide written notice to the Regional Forester for Region 6 of the adjusted boundary of its sourcing area before using the adjusted sourcing area; and

- (vi) a sourcing area holder that relinquishes a sourcing area may not reestablish a sourcing area for that processing facility before the date that is 24 months after the date on which the sourcing area was relinquished.

(B) Transition

With respect to a portion of a sourcing area established before November 14, 1997, that contains Federal timber under contract before November 14, 1997, and is outside the boundary of a new sourcing area established under subparagraph (A)—

- (i) that portion shall continue to be a sourcing area only until unprocessed Federal timber from the portion is no longer in the possession of the sourcing area holder; and

- (ii) unprocessed timber from private land in that portion shall be exportable immediately after unprocessed timber from Federal land in the portion is no longer in the possession of the sourcing area holder.

(7) Relinquishment and termination of sourcing areas

(A) In general

A sourcing area may be relinquished at any time.

(B) Effective date

A relinquishment of a sourcing area shall be effective as of the date on which written notice is provided by the sourcing area holder to the Regional Forester with jurisdiction over the sourcing area where the processing facility of the holder is located.

(C) Exportability

(i) In general

On relinquishment or termination of a sourcing area, unprocessed timber from private land within the former boundary of the relinquished or terminated sourcing area is exportable immediately after unprocessed timber from Federal land from within that area is no longer in the possession of the former sourcing area holder.

(ii) No restriction

The exportability of unprocessed timber from private land located outside of a sourcing area shall not be restricted or in any way affected by relinquishment or termination of a sourcing area.

(d) Domestic transportation and processing of private timber

Except as provided in subsection (g) of this section, the Secretary of Commerce shall issue orders to prohibit the export from the United States of unprocessed timber originating from public lands, as provided in subsection (b) of this section.

(b) Schedule for determination to prohibit export of unprocessed timber originating from State or other public lands

(1) States with annual sales of 400,000,000 board feet or less

With respect to States with annual sales volumes of 400,000,000 board feet or less, the Secretary of Commerce shall issue an order referred to in subsection (a) of this section to prohibit, notwithstanding any other provision of law, the export of unprocessed timber originating from public lands, effective June 1, 1993.

With respect to any State with an annual sales volume greater than 400,000,000 board feet, the Secretary of Commerce shall issue an order referred to in subsection (a) of this section to prohibit, notwithstanding any other provision of law, the export of unprocessed timber originating from public lands, effective as of November 14, 1997.

(3) Prohibition on substitution

(A) Prohibition

Subject to subparagraph (B), each order of the Secretary of Commerce under paragraph (1) or (2) shall also prohibit, notwithstanding any other provision of law, any person from purchasing, directly or indirectly, unprocessed timber originating from public lands in a State if—

(ii) such person has, during the preceding 24-month period, exported unprocessed timber originating from private lands in that State.

(B) Exemption

The prohibitions referred to in subparagraph (A) shall not apply in a State on or after the date on which—

(iii) regulations of the Secretary of Commerce issued under subsection (c) of this section to carry out this section take effect,

whichever occurs first.

(4) Report to Congress

Not later than June 1, 1995, the Secretary of Commerce, in conjunction with the Secretaries of Agriculture and Interior, shall issue a report to the Congress on the effects of the reallocation, as a result of the enactment of sections 620 to 620j of this title, of public lands timber resources to the domestic timber processing sector, the ability of the domestic timber processing sector to meet domestic demand for forest products, the volume of transshipment of timber originating from public lands across State borders, the effectiveness of rules issued and administered by the Secretary of Commerce pursuant to sections 620 to 620j of this title and the effectiveness of State programs authorized under subsection (d) of this section, and trends in growth and productivity in the domestic timber processing sector.

(c) Federal program

(1) Administration by the Secretary of Commerce

(A) In general

Subject to subparagraph (B), the Secretary of Commerce shall, as soon as possible after July 1, 1993—

(i) determine the species, grades, and geographic origin of unprocessed timber to be prohibited from export in each State that is subject to an order issued under subsection (a) of this section;

(ii) administer the prohibitions consistent with sections 620 to 620j of this title;

(iii) ensure that the species, grades, and geographic origin of unprocessed timber prohibited from export within each State is representative of the species, grades, and geographic origin of timber comprising the total timber sales program of the State; and

(iv) issue such regulations as are necessary to carry out this section.

(B) Exemption

The actions and regulations of the Secretary under subparagraph (A) shall not apply with respect to a State that is administering and enforcing a program under subsection (d) of this section.

The Secretary of Commerce is authorized to enter into agreements with Federal and State agencies with appropriate jurisdiction to assist the Secretary in carrying out sections 620 to 620j of this title.

(d) Authorized State programs

(1) Authorization of new State programs

Notwithstanding subsection (c) of this section, the Governor of any State may submit a program to the Secretary of Commerce for approval that—

(A) implements, with respect to unprocessed timber originating from public lands in that State, the prohibition on exports set forth in the Secretary's order under subsection (a) of this section; and

(B) ensures that the species, grades, and geographic origin of unprocessed timber prohibited from export within the State is representative of the species, grades, and geographic origin of timber comprising the total timber sales program of the State.

(2) Approval of State programs

(A) Program approval

Not later than 30 days after the submission of a program under paragraph (1), the Secretary of Commerce shall approve the program unless the Secretary finds that the program will result in the export of unprocessed timber from public lands in violation of sections 620 to 620j of this title and publishes that finding in the Federal Register.

(B) State program in lieu of Federal program

If the Secretary of Commerce approves a program submitted under paragraph (1), the Governor of the State for which the program was submitted, or such other official of that State as the Governor may designate, may administer and enforce the program, which shall apply in that State in lieu of the regulations issued under subsection (c) of this section.

(C) Prior State programs

Not later than 30 days after July 1, 1993, the Governor of any State that had, before May 4, 1993, issued regulations under this subsection as in effect before May 4, 1993, may provide the Secretary of Commerce with written notification that the State has a program that was in effect on May 3, 1993, and that meets the requirements of paragraph (1). Upon such notification, that State may administer and enforce that program in that State until the end of the 9-month period beginning on the date on which the Secretary of Commerce issues regulations under subsection (c) of this section, and that program shall, during the period in which it is so administered and enforced, apply in that State in lieu of the regulations issued under subsection (c) of this section. Such Governor may submit, with such notification, the program for approval by the Secretary under paragraph (1).

(e) Prior contracts

Nothing in this section shall apply to—

(1) any contract for the purchase of unprocessed timber originating from public lands that was entered into before—

(A) September 10, 1990, with respect to States with annual sales volumes of 400,000,000 board feet or less; or

Nothing in this section shall be construed to supersede section 2406(i) of title 50, Appendix.

(g) Presidential authority

(h) Removal or modifications of State restrictions

Based upon a determination that it is in the national economic interest, the President may remove or modify any prohibition on exports from public lands in a State if that State petitions the President to remove or modify such prohibition.

(i) Effect of prior Federal law

No provision of Federal law which imposes requirements with respect to the generation of revenue from State timberlands and was enacted before August 20, 1990, shall be construed to invalidate, supersede, or otherwise affect any action of a State or political subdivision of a State pursuant to sections 620 to 620j of this title.

(j) Surplus timber

The prohibitions on exports contained in orders of the Secretary of Commerce issued under subsection (a) of this section shall not apply to specific quantities of grades and species of unprocessed timber originating from public lands which the Secretary concerned determines by rule to be surplus to the needs of timber manufacturing facilities in the United States. Any such determination may, by rule, be withdrawn by the Secretary concerned if the Secretary determines that the affected timber is no longer surplus to the needs of timber manufacturing facilities in the United States.

(k) Suspension of prohibitions

Notwithstanding any other provision of this section, beginning on January 1, 1998, and annually thereafter, if the President finds, upon review of the purposes and implementation of sections 620 to 620j of this title, that the prohibitions on exports required by subsection (a) of this section no longer promote the purposes of sections 620 to 620j of this title, then the President may suspend such prohibitions, except that such suspension shall not take effect until 90 days after the President notifies the Congress of such finding.

(l) Existing authority not affected

Nothing in sections 620 to 620j of this title shall be construed to limit the authority of the President or the United States Trade Representative to take action authorized by law to respond appropriately to any measures taken by a foreign government in connection with sections 620 to 620j of this title.

Except as hereafter stated in subsection (h) of this section, whenever the waters of any stream or other body of water are proposed or authorized to be impounded, diverted, the channel deepened, or the stream or other body of water otherwise controlled or modified for any purpose whatever,

including navigation and drainage, by any department or agency of the United States, or by any public or private agency under Federal permit or license, such department or agency first shall consult with the United States Fish and Wildlife Service, Department of the Interior, and with the head of the agency exercising administration over the wildlife resources of the particular State wherein the impoundment, diversion, or other control facility is to be constructed, with a view to the conservation of wildlife resources by preventing loss of and damage to such resources as well as providing for the development and improvement thereof in connection with such water-resource development.

(b) Reports and recommendations; consideration

In furtherance of such purposes, the reports and recommendations of the Secretary of the Interior on the wildlife aspects of such projects, and any report of the head of the State agency exercising administration over the wildlife resources of the State, based on surveys and investigations conducted by the United States Fish and Wildlife Service and such State agency for the purpose of determining the possible damage to wildlife resources and for the purpose of determining means and measures that should be adopted to prevent the loss of or damage to such wildlife resources, as well as to provide concurrently for the development and improvement of such resources, shall be made an integral part of any report prepared or submitted by any agency of the Federal Government responsible for engineering surveys and construction of such projects when such reports are presented to the Congress or to any agency or person having the authority or the power, by administrative action or otherwise, (1) to authorize the construction of water-resource development projects or (2) to approve a report on the modification or supplementation of plans for previously authorized projects, to which sections 661 to 666c of this title apply. Recommendations of the Secretary of the Interior shall be as specific as is practicable with respect to features recommended for wildlife conservation and development, lands to be utilized or acquired for such purposes, the results expected, and shall describe the damage to wildlife attributable to the project and the measures proposed for mitigating or compensating for these damages. The reporting officers in project reports of the Federal agencies shall give full consideration to the report and recommendations of the Secretary of the Interior and to any report of the State agency on the wildlife aspects of such projects, and the project plan shall include such justifiable means and measures for wildlife purposes as the reporting agency finds should be adopted to obtain maximum overall project benefits.

The cost of planning for and the construction or installation and maintenance of such means and measures adopted to carry out the conservation purposes of this section shall constitute an integral part of the cost of such projects: *Provided*, That such cost attributable to the development and

improvement of wildlife shall not extend beyond that necessary for (1) land acquisition, (2) facilities as specifically recommended in water resource project reports, (3) modification of the project, and (4) modification of project operations, but shall not include the operation of wildlife facilities.

(e) Transfer of funds

In the case of construction by a Federal agency, that agency is authorized to transfer to the United States Fish and Wildlife Service, out of appropriations or other funds made available for investigations, engineering, or construction, such funds as may be necessary to conduct all or part of the investigations required to carry out the purposes of this section.

(f) Estimation of wildlife benefits or losses

In addition to other requirements, there shall be included in any report submitted to Congress supporting a recommendation for authorization of any new project for the control or use of water as described herein (including any new division of such project or new supplemental works on such project) an estimation of the wildlife benefits or losses to be derived therefrom including benefits to be derived from measures recommended specifically for the development and improvement of wildlife resources, the cost of providing wildlife benefits (including the cost of additional facilities to be installed or lands to be acquired specifically for that particular phase of wildlife conservation relating to the development and improvement of wildlife), the part of the cost of joint-use facilities allocated to wildlife, and the part of such costs, if any, to be reimbursed by non-Federal interests.

(g) Applicability to projects

The provisions of this section shall be applicable with respect to any project for the control or use of water as prescribed herein, or any unit of such project authorized before or after the date of enactment of the Fish and Wildlife Coordination Act for planning or construction, but shall not be applicable to any project or unit thereof authorized before the date of enactment of the Fish and Wildlife Coordination Act if the construction of the particular project or unit thereof has been substantially completed. A project or unit thereof shall be considered to be substantially completed when sixty percent or more of the estimated construction cost has been obligated for expenditure.

(h) Exempt projects and activities

The provisions of section 661 to 666c of this title shall not be applicable to those projects for the impoundment of water where the maximum surface area of such impoundments is less than ten acres, nor to activities for or in connection with programs primarily for land management and use carried out by Federal agencies with respect to Federal lands under their jurisdiction.

1972—Pub. L. 92-535 inserted proviso that the Secretary of the Interior may permit the taking, possession, and transportation of golden eagles for the purposes of falconry with exception that only golden eagles that cause depredations on livestock and wildlife may be taken for falconry.

1962—Pub. L. 87-884 extended provisions of section to the golden eagle, permitted the taking of specimens for the religious purposes of Indian tribes and authorized the taking of golden eagles for purpose of seasonally protecting domesticated flocks and herds.

POLICY CONCERNING DISTRIBUTION OF EAGLE FEATHERS FOR NATIVE AMERICAN RELIGIOUS PURPOSES

Memorandum of President of the United States, Apr. 29, 1994, 59 F.R. 22953, provided:

Memorandum for the Heads of Executive Departments and Agencies

Eagle feathers hold a sacred place in Native American culture and religious practices. Because of the feathers' significance to Native American heritage and consistent with due respect for the government-to-government relationship between the Federal and Native American tribal governments, this Administration has undertaken policy and procedural changes to facilitate the collection and distribution of scarce eagle bodies and parts for this purpose. This memorandum affirms and formalizes executive branch policy to ensure that progress begun on this important matter continues across the executive branch.

Today, as part of an historic meeting with all federally recognized tribal governments, I am directing executive departments and agencies (hereafter collectively "agency" or "agencies") to work cooperatively with tribal governments and to reexamine broadly their practices and procedures to seek opportunities to accommodate Native American religious practices to the fullest extent under the law.

As part of these efforts, agencies shall take steps to improve their collection and transfer of eagle carcasses and eagle body parts ("eagles") for Native American religious purposes. The success of this initiative requires the participation, and is therefore the responsibility, of all Federal land managing agencies, not just those within the Department of the Interior. I therefore direct each agency responsible for managing Federal lands to diligently and expeditiously recover salvageable eagles found on lands under their jurisdiction and ensure that the eagles are promptly shipped to the National Eagle Repository ("Repository"). To assist agencies in this expanded effort, the Secretary of the Interior shall issue guidelines to all relevant agencies for the proper shipment of eagles to the Repository. After receiving these guidelines, agencies shall immediately adopt policies, practices, and procedures necessary in accordance with these guidelines to recover and transfer eagles to the Repository promptly.

I support and encourage the initial steps taken by the Department of the Interior to improve the distribution of eagles for Native American religious purposes. In particular, the Department of the Interior shall continue to adopt policies and procedures and take those actions necessary to:

- (a) ensure the priority of distribution of eagles, upon permit application, first for traditional Native American religious purposes, to the extent permitted by law, and then to other uses;
- (b) simplify the eagle permit application process quickly and to the greatest extent possible to help achieve the objectives of this memorandum;
- (c) minimize the delay and ensure respect and dignity in the process of distributing eagles for Native American religious purposes to the greatest extent possible;
- (d) expand efforts to involve Native American tribes, organizations, and individuals in the distribution process, both at the Repository and on tribal lands, consistent with applicable laws;
- (e) review means to ensure that adequate refrigerated storage space is available to process the eagles; and
- (f) continue efforts to improve the Repository's ability to facilitate the objectives of this memorandum.

The Department of the Interior shall be responsible for coordinating any interagency efforts to address continuing executive branch actions necessary to achieve the objectives of this memorandum.

We must continue to be committed to greater intergovernmental communication and cooperation. In addition to working more closely with tribal governments, we must enlist the assistance of, and cooperate with, State and local governments to achieve the objectives of this memorandum. I therefore request that the Department of the Interior work with State fish and game agencies and other relevant State and local authorities to facilitate the objectives of this memorandum.

With commitment and cooperation by all of the agencies in the executive branch and with tribal governments, I am confident that we will be able to accomplish meaningful progress in the distribution of eagles for Native American religious purposes.

The Director of the Office of Management and Budget is authorized and directed to publish this memorandum in the Federal Register.

WILLIAM J. CLINTON.

§668dd. National Wildlife Refuge System

(a) Designation; administration; continuance of resources-management-programs for refuge lands in Alaska; disposal of acquired lands; proceeds

(1) For the purpose of consolidating the authorities relating to the various categories of areas that are administered by the Secretary for the conservation of fish and wildlife, including species that are threatened with extinction, all lands, waters, and interests therein administered by the Secretary as wildlife refuges, areas for the protection and conservation of fish and wildlife that are threatened with extinction, wildlife ranges, game ranges, wildlife management areas, or waterfowl production areas are hereby designated as the “National Wildlife Refuge System” (referred to herein as the “System”), which shall be subject to the provisions of this section, and shall be administered by the Secretary through the United States Fish and Wildlife Service. With respect to refuge lands in the State of Alaska, those programs relating to the management of resources for which any other agency of the Federal Government exercises administrative responsibility through cooperative agreement shall remain in effect, subject to the direct supervision of the United States Fish and Wildlife Service, as long as such agency agrees to exercise such responsibility.

(2) The mission of the System is to administer a national network of lands and waters for the conservation, management, and where appropriate, restoration of the fish, wildlife, and plant resources and their habitats within the United States for the benefit of present and future generations of Americans.

(3) With respect to the System, it is the policy of the United States that—

(A) each refuge shall be managed to fulfill the mission of the System, as well as the specific purposes for which that refuge was established;

(B) compatible wildlife-dependent recreation is a legitimate and appropriate general public use of the System, directly related to the mission of the System and the purposes of many refuges, and which generally fosters refuge management and through which the American public can develop an appreciation for fish and wildlife;

(C) compatible wildlife-dependent recreational uses are the priority general public uses of the System and shall receive priority consideration in refuge planning and management; and

(D) when the Secretary determines that a proposed wildlife-dependent recreational use is a compatible use within a refuge, that activity should be facilitated, subject to such restrictions or regulations as may be necessary, reasonable, and appropriate.

(4) In administering the System, the Secretary shall—

(A) provide for the conservation of fish, wildlife, and plants, and their habitats within the System;

(B) ensure that the biological integrity, diversity, and environmental health of the System are maintained for the benefit of present and future generations of Americans;

(C) plan and direct the continued growth of the System in a manner that is best designed to accomplish the mission of the System, to contribute to the conservation of the ecosystems of the United States, to complement efforts of States and other Federal agencies to conserve fish and wildlife and their habitats, and to increase support for the System and participation from conservation partners and the public;

(D) ensure that the mission of the System described in paragraph (2) and the purposes of each refuge are carried out, except that if a conflict exists between the purposes of a refuge and the mission of the System, the conflict shall be resolved in a manner that first protects the purposes of

the refuge, and, to the extent practicable, that also achieves the mission of the System;

(E) ensure effective coordination, interaction, and cooperation with owners of land adjoining refuges and the fish and wildlife agency of the States in which the units of the System are located;

(F) assist in the maintenance of adequate water quantity and water quality to fulfill the mission of the System and the purposes of each refuge;

(G) acquire, under State law, water rights that are needed for refuge purposes;

(H) recognize compatible wildlife-dependent recreational uses as the priority general public uses of the System through which the American public can develop an appreciation for fish and wildlife;

(I) ensure that opportunities are provided within the System for compatible wildlife-dependent recreational uses;

(J) ensure that priority general public uses of the System receive enhanced consideration over other general public uses in planning and management within the System;

(K) provide increased opportunities for families to experience compatible wildlife-dependent recreation, particularly opportunities for parents and their children to safely engage in traditional outdoor activities, such as fishing and hunting;

(L) continue, consistent with existing laws and interagency agreements, authorized or permitted uses of units of the System by other Federal agencies, including those necessary to facilitate military preparedness;

(M) ensure timely and effective cooperation and collaboration with Federal agencies and State fish and wildlife agencies during the course of acquiring and managing refuges; and

(N) monitor the status and trends of fish, wildlife, and plants in each refuge.

(5) No acquired lands which are or become a part of the System may be transferred or otherwise disposed of under any provision of law (except by exchange pursuant to subsection (b)(3) of this section) unless—

(A) the Secretary determines with the approval of the Migratory Bird Conservation Commission that such lands are no longer needed for the purposes for which the System was established; and

(B) such lands are transferred or otherwise disposed of for an amount not less than—

(i) the acquisition costs of such lands, in the case of lands of the System which were purchased by the United States with funds from the migratory bird conservation fund, or fair market value, whichever is greater; or

(ii) the fair market value of such lands (as determined by the Secretary as of the date of the transfer or disposal), in the case of lands of the System which were donated to the System.

The Secretary shall pay into the migratory bird conservation fund the aggregate amount of the proceeds of any transfer or disposal referred to in the preceding sentence.

(6) Each area which is included within the System on January 1, 1975, or thereafter, and which was or is—

(A) designated as an area within such System by law, Executive order, or secretarial order; or

(B) so included by public land withdrawal, donation, purchase, exchange, or pursuant to a cooperative agreement with any State or local government, any Federal department or agency, or any other governmental entity,

shall continue to be a part of the System until otherwise specified by Act of Congress, except that nothing in this paragraph shall be construed as precluding—

(i) the transfer or disposal of acquired lands within any such area pursuant to paragraph (5) of this subsection;

(ii) the exchange of lands within any such area pursuant to subsection (b)(3) of this section; or

(iii) the disposal of any lands within any such area pursuant to the terms of any cooperative agreement referred to in subparagraph (B) of this paragraph.

(b) Administration; public accommodations contracts; acceptance and use of funds; exchange of properties; cash equalization payments

In administering the System, the Secretary is authorized to take the following actions:

(1) Enter into contracts with any person or public or private agency through negotiation for the provision of public accommodations when, and in such locations, and to the extent that the Secretary determines will not be inconsistent with the primary purpose for which the affected area was established.

(2) Accept donations of funds and to use such funds to acquire or manage lands or interests therein.

(3) Acquire lands or interests therein by exchange (A) for acquired lands or public lands, or for interests in acquired or public lands, under his jurisdiction which he finds to be suitable for disposition, or (B) for the right to remove, in accordance with such terms and conditions as he may prescribe, products from the acquired or public lands within the System. The values of the properties so exchanged either shall be approximately equal, or if they are not approximately equal the values shall be equalized by the payment of cash to the grantor or to the Secretary as the circumstances require.

(4) Subject to standards established by and the overall management oversight of the Director, and consistent with standards established by this Act, to enter into cooperative agreements with State fish and wildlife agencies for the management of programs on a refuge.

(5) Issue regulations to carry out this Act.

(c) Prohibited and permitted activities; application of mining and mineral leasing laws, hunting or fishing regulations, and State laws or regulations

No person shall disturb, injure, cut, burn, remove, destroy, or possess any real or personal property of the United States, including natural growth, in any area of the System; or take or possess any fish, bird, mammal, or other wild vertebrate or invertebrate animals or part or nest or egg thereof within any such area; or enter, use, or otherwise occupy any such area for any purpose; unless such activities are performed by persons authorized to manage such area, or unless such activities are permitted either under subsection (d) of this section or by express provision of the law, proclamation, Executive order, or public land order establishing the area, or amendment thereof: *Provided*, That the United States mining and mineral leasing laws shall continue to apply to any lands within the System to the same extent they apply prior to October 15, 1966, unless subsequently withdrawn under other authority of law. With the exception of endangered species and threatened species listed by the Secretary pursuant to section 1533 of this title in States wherein a cooperative agreement does not exist pursuant to section 1535(c) of this title, nothing in this Act shall be construed to authorize the Secretary to control or regulate hunting or fishing of resident fish and wildlife on lands not within the system. The regulations permitting hunting and fishing of resident fish and wildlife within the System shall be, to the extent practicable, consistent with State fish and wildlife laws and regulations.

(d) Use of areas; administration of migratory bird sanctuaries as game taking areas; rights of way, easements, and reservations; payment of fair market value

(1) The Secretary is authorized, under such regulations as he may prescribe, to—

(A) permit the use of any area within the System for any purpose, including but not limited to hunting, fishing, public recreation and accommodations, and access whenever he determines that such uses are compatible with the major purposes for which such areas were established: *Provided*, That not to exceed 40 per centum at any one time of any area that has been, or hereafter may be acquired, reserved, or set apart as an inviolate sanctuary for migratory birds, under any law, proclamation, Executive order, or public land order may be administered by the Secretary as an area within which the taking of migratory game birds may be permitted under such regulations as he may prescribe unless the Secretary finds that the taking of any species of migratory game birds in more than 40 percent of such area would be beneficial to the species; and

(B) permit the use of, or grant easements in, over, across, upon, through, or under any areas within the System for purposes such as but not necessarily limited to, powerlines, telephone lines,

canals, ditches, pipelines, and roads, including the construction, operation, and maintenance thereof, whenever he determines that such uses are compatible with the purposes for which these areas are established.

(2) Notwithstanding any other provision of law, the Secretary may not grant to any Federal, State, or local agency or to any private individual or organization any right-of-way, easement, or reservation in, over, across, through, or under any area within the system in connection with any use permitted by him under paragraph (1)(B) of this subsection unless the grantee pays to the Secretary, at the option of the Secretary, either (A) in lump sum the fair market value (determined by the Secretary as of the date of conveyance to the grantee) of the right-of-way, easement, or reservation; or (B) annually in advance the fair market rental value (determined by the Secretary) of the right-of-way, easement, or reservation. If any Federal, State, or local agency is exempted from such payment by any other provision of Federal law, such agency shall otherwise compensate the Secretary by any other means agreeable to the Secretary, including, but not limited to, making other land available or the loan of equipment or personnel; except that (A) any such compensation shall relate to, and be consistent with, the objectives of the National Wildlife Refuge System, and (B) the Secretary may waive such requirement for compensation if he finds such requirement impracticable or unnecessary. All sums received by the Secretary pursuant to this paragraph shall, after payment of any necessary expenses incurred by him in administering this paragraph, be deposited into the Migratory Bird Conservation Fund and shall be available to carry out the provisions for land acquisition of the Migratory Bird Conservation Act (16 U.S.C. 715 et seq.) and the Migratory Bird Hunting Stamp Act (16 U.S.C. 718 et seq.).

(3)(A)(i) Except as provided in clause (iv), the Secretary shall not initiate or permit a new use of a refuge or expand, renew, or extend an existing use of a refuge, unless the Secretary has determined that the use is a compatible use and that the use is not inconsistent with public safety. The Secretary may make the determinations referred to in this paragraph for a refuge concurrently with development of a conservation plan under subsection (e) of this section.

(ii) On lands added to the System after March 25, 1996, the Secretary shall identify, prior to acquisition, withdrawal, transfer, reclassification, or donation of any such lands, existing compatible wildlife-dependent recreational uses that the Secretary determines shall be permitted to continue on an interim basis pending completion of the comprehensive conservation plan for the refuge.

(iii) Wildlife-dependent recreational uses may be authorized on a refuge when they are compatible and not inconsistent with public safety. Except for consideration of consistency with State laws and regulations as provided for in subsection (m) of this section, no other determinations or findings are required to be made by the refuge official under this Act or the Refuge Recreation Act for wildlife-dependent recreation to occur.

(iv) Compatibility determinations in existence on October 9, 1997, shall remain in effect until and unless modified.

(B) Not later than 24 months after October 9, 1997, the Secretary shall issue final regulations establishing the process for determining under subparagraph (A) whether a use of a refuge is a compatible use. These regulations shall—

- (i) designate the refuge official responsible for making initial compatibility determinations;
- (ii) require an estimate of the timeframe, location, manner, and purpose of each use;
- (iii) identify the effects of each use on refuge resources and purposes of each refuge;
- (iv) require that compatibility determinations be made in writing;
- (v) provide for the expedited consideration of uses that will likely have no detrimental effect on the fulfillment of the purposes of a refuge or the mission of the System;
- (vi) provide for the elimination or modification of any use as expeditiously as practicable after a determination is made that the use is not a compatible use;
- (vii) require, after an opportunity for public comment, reevaluation of each existing use, other than those uses specified in clause (viii), if conditions under which the use is permitted change significantly or if there is significant new information regarding the effects of the use, but not less frequently than once every 10 years, to ensure that the use remains a compatible use, except that,

in the case of any use authorized for a period longer than 10 years (such as an electric utility right-of-way), the reevaluation required by this clause shall examine compliance with the terms and conditions of the authorization, not examine the authorization itself;

(viii) require, after an opportunity for public comment, reevaluation of each compatible wildlife-dependent recreational use when conditions under which the use is permitted change significantly or if there is significant new information regarding the effects of the use, but not less frequently than in conjunction with each preparation or revision of a conservation plan under subsection (e) of this section or at least every 15 years, whichever is earlier; and

(ix) provide an opportunity for public review and comment on each evaluation of a use, unless an opportunity for public review and comment on the evaluation of the use has already been provided during the development or revision of a conservation plan for the refuge under subsection (e) of this section or has otherwise been provided during routine, periodic determinations of compatibility for wildlife-dependent recreational uses.

(4) The provisions of this Act relating to determinations of the compatibility of a use shall not apply to—

(A) overflights above a refuge; and

(B) activities authorized, funded, or conducted by a Federal agency (other than the United States Fish and Wildlife Service) which has primary jurisdiction over a refuge or a portion of a refuge, if the management of those activities is in accordance with a memorandum of understanding between the Secretary or the Director and the head of the Federal agency with primary jurisdiction over the refuge governing the use of the refuge.

(e) Refuge conservation planning program for non-Alaskan refuge lands

(1)(A) Except with respect to refuge lands in Alaska (which shall be governed by the refuge planning provisions of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 et seq.)), the Secretary shall—

(i) propose a comprehensive conservation plan for each refuge or related complex of refuges (referred to in this subsection as a “planning unit”) in the System;

(ii) publish a notice of opportunity for public comment in the Federal Register on each proposed conservation plan;

(iii) issue a final conservation plan for each planning unit consistent with the provisions of this Act and, to the extent practicable, consistent with fish and wildlife conservation plans of the State in which the refuge is located; and

(iv) not less frequently than 15 years after the date of issuance of a conservation plan under clause (iii) and every 15 years thereafter, revise the conservation plan as may be necessary.

(B) The Secretary shall prepare a comprehensive conservation plan under this subsection for each refuge within 15 years after October 9, 1997.

(C) The Secretary shall manage each refuge or planning unit under plans in effect on October 9, 1997, to the extent such plans are consistent with this Act, until such plans are revised or superseded by new comprehensive conservation plans issued under this subsection.

(D) Uses or activities consistent with this Act may occur on any refuge or planning unit before existing plans are revised or new comprehensive conservation plans are issued under this subsection.

“This title may be cited as the ‘National Wildlife Refuge System Centennial Act’.

“SEC. 302. FINDINGS AND PURPOSES.

“(a) FINDINGS.—Congress finds that—

“(1) President Theodore Roosevelt began the National Wildlife Refuge System by establishing the first refuge at Pelican Island, Florida, on March 14, 1903;

“(2) the National Wildlife Refuge System is comprised of more than 93,000,000 acres of Federal land managed by the United States Fish and Wildlife Service in more than 532 individual refuges and thousands of waterfowl production areas located in all 50 States and the territories of the United States;

“(3) the System is the only network of Federal land dedicated singularly to wildlife conservation and where wildlife-dependent recreation and environmental education are priority public uses;

“(4) the System serves a vital role in the conservation of millions of migratory birds, dozens of endangered species and threatened species, some of the premier fisheries of the United States, marine mammals, and the habitats on which such species of fish and wildlife depend;

“(5) each year the System provides millions of Americans with opportunities to participate in wildlife-dependent recreation, including hunting, fishing, and wildlife observation;

“(6)(A) public visitation to national wildlife refuges is growing, with more than 35,000,000 visitors annually; and

“(B) it is essential that visitor centers and public use facilities be properly constructed, operated, and maintained;

“(8) as of the date of the enactment of this Act [Nov. 1, 2000], the System has an unacceptable backlog of critical operation and maintenance needs; and

“(9) the occasion of the centennial of the System, in 2003, presents a historic opportunity to enhance natural resource stewardship and expand public enjoyment of the national wildlife refuges of the United States.

CONGRESSIONAL FINDINGS

Pub. L. 105–57, §2, Oct. 9, 1997, 111 Stat. 1252, provided that: “The Congress finds the following:

“(1) The National Wildlife Refuge System is comprised of over 92,000,000 acres of Federal lands that have been incorporated within 509 individual units located in all 50 States and the territories of the United States.

“(2) The System was created to conserve fish, wildlife, and plants and their habitats and this conservation mission has been facilitated by providing Americans opportunities to participate in compatible wildlife-dependent recreation, including fishing and hunting, on System lands and to better appreciate the value of and need for fish and wildlife conservation.

“(3) The System serves a pivotal role in the conservation of migratory birds, anadromous and interjurisdictional fish, marine mammals, endangered and threatened species, and the habitats on which these species depend.

“(4) The System assists in the fulfillment of important international treaty obligations of the United States with regard to fish, wildlife, and plants and their habitats.

“(5) The System includes lands purchased not only through the use of tax dollars but also through the proceeds from sales of Duck Stamps and national wildlife refuge entrance fees. It is a System that is financially supported by those benefiting from and utilizing it.

“(6) When managed in accordance with principles of sound fish and wildlife management and administration, fishing, hunting, wildlife observation, and environmental education in national wildlife refuges have been and are expected to continue to be generally compatible uses.

“(7) On March 25, 1996, the President issued Executive Order 12996 [set out below], which recognized ‘compatible wildlife-dependent recreational uses involving hunting, fishing, wildlife observation and photography, and environmental education and interpretation as priority public uses of the Refuge System’.

“(8) Executive Order 12996 is a positive step and serves as the foundation for the permanent statutory changes made by this Act [see Short Title of 1997 Amendment note above].”

“(3) the manner in which section 810 of the Alaska National Interest Lands Conservation Act [16 U.S.C. 3120] is implemented in national wildlife refuges in Alaska.

“(b) CONFLICTS OF LAWS.—If any conflict arises between any provision of this Act and any provision of the Alaska National Interest Lands Conservation Act, then the provision in the Alaska National Interest

**EX. ORD. NO. 12996. MANAGEMENT AND GENERAL PUBLIC USE OF NATIONAL WILDLIFE
REFUGE SYSTEM**

Ex. Ord. No. 12996, Mar. 25, 1996, 61 F.R. 13647, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in furtherance of the purposes of the Fish and Wildlife Act of 1956 (16 U.S.C. 742a [et seq.]), the Fish and Wildlife Coordination Act (16 U.S.C. 661 [et seq.]), the National Wildlife Refuge System Administration Act (16 U.S.C. 668dd [, 668ee]), the Refuge Recreation Act (16 U.S.C. 460k [et seq.]), the Endangered Species Act of 1973 (16 U.S.C. 1531 [et seq.]), the Emergency Wetlands Resources Act (16 U.S.C. 3901 [et seq.]), the North American Wetlands Conservation Act (16 U.S.C. 4401 [et seq.]), the National Environmental Policy Act (42 U.S.C. 4321 [et seq.]), and other pertinent statutes, and in order to conserve fish and wildlife and their habitat, it is ordered as follows:

SECTION 1. *The Mission of the National Wildlife Refuge System.* The mission of the National Wildlife Refuge System ("Refuge System") is to preserve a national network of lands and waters for the conservation and management of fish, wildlife, and plant resources of the United States for the benefit of present and future generations.

SEC. 2. *Guiding Principles.* To help ensure a bright future for its treasured national heritage, I hereby affirm the following four guiding principles for the management and general public use of the Refuge System:

(a) *Public Use.* The Refuge System provides important opportunities for compatible wildlife-dependent recreational activities involving hunting, fishing, wildlife observation and photography, and environmental education and interpretation.

(b) *Habitat.* Fish and wildlife will not prosper without high-quality habitat, and without fish and wildlife, traditional uses of refuges cannot be sustained. The Refuge System will continue to conserve and enhance the quality and diversity of fish and wildlife habitat within refuges.

(c) *Partnerships.* America's sportsmen and women were the first partners who insisted on protecting valuable wildlife habitat within wildlife refuges. Conservation partnerships with other Federal agencies, State agencies, Tribes, organizations, industry, and the general public can make significant contributions to the growth and management of the Refuge System.

(d) *Public Involvement.* The public should be given a full and open opportunity to participate in decisions regarding acquisition and management of our National Wildlife Refuges.

SEC. 3. *Directives to the Secretary of the Interior.* To the extent consistent with existing laws and interagency agreements, the Secretary of the Interior, in carrying out his trustee and stewardship responsibilities for the Refuge System, is directed to:

(a) recognize compatible wildlife-dependent recreational activities involving hunting, fishing, wildlife observation and photography, and environmental education and interpretation as priority general public uses of the Refuge System through which the American public can develop an appreciation for fish and wildlife;

(b) provide expanded opportunities for these priority public uses within the Refuge System when they are compatible and consistent with sound principles of fish and wildlife management, and are otherwise in the public interest;

(c) ensure that such priority public uses receive enhanced attention in planning and management within the Refuge System;

(d) provide increased opportunities for families to experience wildlife-dependent recreation, particularly opportunities for parents and their children to safely engage in traditional outdoor activities, such as fishing and hunting;

(e) ensure that the biological integrity and environmental health of the Refuge System is maintained for the benefit of present and future generations of Americans;

(f) continue, consistent with existing laws and interagency agreements, authorized or permitted uses of units of the Refuge System by other Federal agencies, including those necessary to facilitate military preparedness;

(g) plan and direct the continued growth of the Refuge System in a manner that is best designed to accomplish the mission of the Refuge System, to contribute to the conservation of the ecosystems of the United States, and to increase support for the Refuge System and participation from conservation partners and the public;

(h) ensure timely and effective cooperation and collaboration with Federal agencies and State fish and wildlife agencies during the course of acquiring and managing National Wildlife Refuges;

(i) ensure appropriate public involvement opportunities will be provided in conjunction with refuge planning and management activities; and

(j) identify, prior to acquisition, existing compatible wildlife-dependent uses of new refuge lands that shall be permitted to continue on an interim basis pending completion of comprehensive planning.

SEC. 4. *Judicial Review.* This order does not create any right or benefit, substantive or procedural,

enforceable at law or equity by a party against the United States, its agencies, its officers, or any person.

WILLIAM J. CLINTON.

REFERENCES IN TEXT

Section 669c(d) of this title, referred to in par. This chapter, referred to in par. (6), was in the original “this title”, and was translated as reading “this Act”, meaning Act Sept. 2, 1937, ch. 899, to reflect the probable intent of Congress, because Act Sept. 2, 1937, ch. 899, which enacted this chapter, does not contain titles.

(1) Amounts transferred to the Wildlife Conservation and Restoration Account shall supplement, but not replace, existing funds available to the States from the sport fish restoration account and wildlife restoration account and shall be used for the development, revision, and implementation of wildlife conservation and restoration programs and should be used to address the unmet needs for a diverse array of wildlife and associated habitats, including species that are not hunted or fished, for wildlife conservation, wildlife conservation education, and wildlife-associated recreation projects. Such funds may be used for new programs and projects as well as to enhance existing programs and projects.

(2) Funds may be used by a State or an Indian tribe for the planning and implementation of its wildlife conservation and restoration program and wildlife conservation strategy, as provided in

sections 669c(d) and (e) ² of this title, including wildlife conservation, wildlife conservation education, and wildlife-associated recreation projects. Such funds may be used for new programs and projects as well as to enhance existing programs and projects.

(3) Priority for funding from the Wildlife Conservation and Restoration Account shall be for those species with the greatest conservation need as defined by the State wildlife conservation and restoration program.

(d) Obligation of amounts in State

Notwithstanding subsections (a) and (b) of this section, with respect to amounts transferred to the Wildlife Conservation and Restoration Account, so much of such amounts apportioned to any State for any fiscal year as remains unexpended at the close thereof shall remain available for obligation in that State until the close of the second succeeding fiscal year.

§669c. Allocation and apportionment of available amounts

(a) Set-aside for expenses for administration of this chapter

(1) In general

(A) Set-aside

For fiscal year 2001 and each fiscal year thereafter, of the revenues (excluding interest accruing under section 669b(b) of this title) covered into the fund for the fiscal year, the Secretary of the Interior may use not more than the available amount specified in subparagraph (B) for the fiscal year for expenses for administration incurred in implementation of this chapter, in accordance with this subsection and section 669h of this title.

 - (II) the amount determined by multiplying—
 - (aa) the available amount for the preceding fiscal year; and
 - (bb) the change, relative to the preceding fiscal year, in the Consumer Price Index for All Urban Consumers published by the Department of Labor.

(2) Period of availability; apportionment of unobligated amounts

(A) Period of availability

For each fiscal year, the available amount under paragraph (1) shall remain available for obligation for use under that paragraph until the end of the fiscal year.

(B) Apportionment of unobligated amounts

Not later than 60 days after the end of a fiscal year, the Secretary of the Interior shall apportion among the States any of the available amount under paragraph (1) that remains unobligated at the end of the fiscal year, on the same basis and in the same manner as other amounts made available under this chapter are apportioned among the States for the fiscal year.

(b) Apportionment to States

The Secretary of the Interior, after deducting the available amount under subsection (a) of this section, the amount apportioned under subsection (c) ¹ of this section, any amount apportioned under section 669g–1 of this title, and amounts provided as grants under sections 669h–1 and 669h–2 of this title, shall apportion the remainder of the revenue in said fund for each fiscal year among the several States in the following manner: One-half in the ratio which the area of each State bears to the

total area of all the States, and one-half in the ratio which the number of paid hunting-license holders of each State in the second fiscal year preceding the fiscal year for which such apportionment is made, as certified to said Secretary by the State fish and game departments, bears to the total number of paid hunting-license holders of all the States. Such apportionments shall be adjusted equitably so that no State shall receive less than one-half of 1 per centum nor more than 5 per centum of the total amount apportioned. The term fiscal year as used in this chapter shall be a period of twelve consecutive months from October 1 through the succeeding September 30, except that the period for enumeration of paid hunting-license holders shall be a State's fiscal or license year.

(c) ² Apportionment of certain taxes

One-half of the revenues accruing to the fund under this chapter each fiscal year (beginning with the fiscal year 1975) from any tax imposed on pistols, revolvers, bows, and arrows shall be apportioned among the States in proportion to the ratio that the population of each State bears to the population of all the States: *Provided*, That each State shall be apportioned not more than 3 per centum and not less than 1 per centum of such revenues and Guam, the Virgin Islands, American Samoa, Puerto Rico, and the Northern Mariana Islands shall each be apportioned one-sixth of 1 per centum of such revenues. (1) The Secretary of the Interior shall make the following apportionment from the Wildlife Conservation and Restoration Account:

(A) to the District of Columbia and to the Commonwealth of Puerto Rico, each a sum equal to not more than one-half of 1 percent thereof.

(B) to Guam, American Samoa, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands, each a sum equal to not more than one-fourth of 1 percent thereof.

(2)(A) The Secretary of the Interior, after making the apportionment under paragraph (1), shall apportion the remaining amount in the Wildlife Conservation and Restoration Account for each fiscal year among the States in the following manner:

(B) The amounts apportioned under this paragraph shall be adjusted equitably so that no such State shall be apportioned a sum which is less than one percent of the amount available for apportionment under this paragraph for any fiscal year or more than five percent of such amount.

(3) Of the amounts transferred to the Wildlife Conservation and Restoration Account, not to exceed 3 percent shall be available for any Federal expenses incurred in the administration and execution of programs carried out with such amounts.

(i) uses such information on the distribution and abundance of species of wildlife, including low population and declining species as the State fish and wildlife department deems appropriate, that are indicative of the diversity and health of wildlife of the State;

(ii) identifies the extent and condition of wildlife habitats and community types essential to conservation of species identified under paragraph (1);

(iii) identifies the problems which may adversely affect the species identified under paragraph (1) or their habitats, and provides for priority research and surveys to identify factors which may assist in restoration and more effective conservation of such species and their habitats;

(iv) determines those actions which should be taken to conserve the species identified under paragraph (1) and their habitats and establishes priorities for implementing such conservation actions;

(v) provides for periodic monitoring of species identified under paragraph (1) and their habitats and the effectiveness of the conservation actions determined under paragraph (4), and for adapting conservation actions as appropriate to respond to new information or changing conditions;

(2) A State shall provide an opportunity for public participation in the development of the comprehensive plan required under paragraph (1).

(3) If the Secretary finds that the comprehensive plan submitted by a State complies with paragraph (1), the Secretary shall approve the wildlife conservation and restoration program of the State and set aside from the apportionment to the State made pursuant to subsection (c) ³ of this section an amount that shall not exceed 75 percent of the estimated cost of developing and implementing the program.

(4)(A) Except as provided in subparagraph (B), after the Secretary approves a State's wildlife conservation and restoration program, the Secretary may make payments on a project that is a segment of the State's wildlife conservation and restoration program as the project progresses. Such payments, including previous payments on the project, if any, shall not be more than the United States pro rata share of such project. The Secretary, under such regulations as he may prescribe, may advance funds representing the United States pro rata share of a project that is a segment of a wildlife conservation and restoration program, including funds to develop such program.

(B) Not more than 10 percent of the amounts apportioned to each State under this section for a State's wildlife conservation and restoration program may be used for wildlife-associated recreation.

(5) For purposes of this subsection, the term "State" shall include the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

§669e. Submission and approval of plans and projects

(a) Setting aside funds

Any State desiring to avail itself of the benefits of this chapter shall, by its State fish and game department, submit programs or projects for wildlife restoration in either of the following two ways:

(1) The State shall prepare and submit to the Secretary of the Interior a comprehensive fish and wildlife resource management plan which shall insure the perpetuation of these resources for the economic, scientific, and recreational enrichment of the people. Such plan shall be for a period of not less than five years and be based on projections of desires and needs of the people for a period of not less than fifteen years. It shall include provisions for updating at intervals of not more than three years and be provided in a format as may be required by the Secretary of the Interior. If the Secretary of the Interior finds that such plans conform to standards established by him and approves such plans, he may finance up to 75 per centum of the cost of implementing segments of those plans

meeting the purposes of this chapter from funds apportioned under this chapter upon his approval of an annual agreement submitted to him.

(2) A State may elect to avail itself of the benefits of this chapter by its State fish and game department submitting to the Secretary of the Interior full and detailed statements of any wildlife-restoration project proposed for that State. If the Secretary of the Interior finds that such project meets with the standards set by him and approves said project, the State fish and game department shall furnish to him such surveys, plans, specifications, and estimates therefor as he may require. If the Secretary of the Interior approves the plans, specifications, and estimates for the project, he shall notify the State fish and game department and immediately set aside so much of said fund as represents the share of the United States payable under this chapter on account of such project, which sum so set aside shall not exceed 75 per centum of the total estimated cost thereof.

The Secretary of the Interior shall approve only such comprehensive plans or projects as may be substantial in character and design and the expenditure of funds hereby authorized shall be applied only to such approved comprehensive wildlife plans or projects and if otherwise applied they shall be replaced by the State before it may participate in any further apportionment under this chapter. No payment of any money apportioned under this chapter shall be made on any comprehensive wildlife plan or project until an agreement to participate therein shall have been submitted to and approved by the Secretary of the Interior.

(b) “Project” defined

If the State elects to avail itself of the benefits of this chapter by preparing a comprehensive fish and wildlife plan under option (1) of subsection (a) of this section, then the term “project” may be defined for the purposes of this chapter as a wildlife program, all other definitions notwithstanding.

(c) Costs

Administrative costs in the form of overhead or indirect costs for services provided by State central service activities outside of the State agency having primary jurisdiction over the wildlife resources of the State which may be charged against programs or projects supported by the fund established by section 669b of this title shall not exceed in any one fiscal year 3 per centum of the annual apportionment to the State.

(2), struck out reference to Secretary of the Treasury and the requirement that the State pay 10 percent of the costs.

Subsecs. (b), (c). Pub. L. 91–503 added subsecs. (b) and (c).

TRANSFER OF FUNCTIONS

Reorg. Plan No. II of 1939, set out in the Appendix to Title 5, Government Organization and Employees, transferred functions of Secretary of Agriculture relating to conservation of wildlife, game, and migratory birds to Secretary of the Interior.

§669f. Payment of funds to States; laws governing construction and labor

(a) When the Secretary of the Interior shall find that any project approved by him has been completed or, if involving research relating to wildlife, is being conducted, in compliance with said plans and specifications, he shall cause to be paid to the proper authority of said State the amount set aside for said project. The Secretary of the Interior may, in his discretion, from time to time, make payments on said project as the same progresses; but these payments, including previous payments, if any, shall not be more than the United States pro rata share of the project in conformity with said

plans and specifications. If a State has elected to avail itself of the benefits of this chapter by preparing a comprehensive fish and wildlife plan as provided for under option (1) of subsection (a) of section 669e of this title, and this plan has been approved by the Secretary of the Interior, then the Secretary may, in his discretion, and under such rules and regulations as he may prescribe, advance funds to the State for financing the United States pro rata share agreed upon between the State fish and game department and the Secretary.

(b) Any construction work and labor in each State shall be performed in accordance with its laws and under the direct supervision of the State fish and game department, subject to the inspection and approval of the Secretary of the Interior and in accordance with rules and regulations made pursuant to this chapter. The Secretary of the Interior and the State fish and game department of each State may jointly determine at what times and in what amounts payments shall be made under this chapter. Such payments shall be made by the Secretary of the Treasury, on warrants drawn by the Secretary of the Interior against the said fund to such official or officials, or depository, as may be designated by the State fish and game department and authorized under the laws of the State to receive public funds of the State.

§670a. Cooperative plan for conservation and rehabilitation

(a) Authority of Secretary of Defense

(1) Program

(A) In general

The Secretary of Defense shall carry out a program to provide for the conservation and rehabilitation of natural resources on military installations.

(B) Integrated natural resources management plan

(i) To facilitate the program, the Secretary of each military department shall prepare and implement an integrated natural resources management plan for each military installation in the United States under the jurisdiction of the Secretary, unless the Secretary determines that the absence of significant natural resources on a particular installation makes preparation of such a plan inappropriate.

(ii) The Secretary of a military department may, subject to the availability of appropriations, develop and implement an integrated natural resources management plan for a State-owned National Guard installation. Such a plan shall be developed and implemented in coordination

with the chief executive officer of the State in which the State-owned National Guard installation is located. Such a plan is deemed, for purposes of any other provision of law, to be for lands or other geographical areas owned or controlled by the Department of Defense, or designated for its use.

(2) Cooperative preparation

The Secretary of a military department shall prepare each integrated natural resources management plan for which the Secretary is responsible in cooperation with the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service, and the head of each appropriate State fish and wildlife agency for the State in which the military installation or State-owned National Guard installation concerned is located. Consistent with paragraph (4), the resulting plan for the military installation or State-owned National Guard installation shall reflect the mutual agreement of the parties concerning conservation, protection, and management of fish and wildlife resources.

(3) Purposes of program

(A) Consistent with the use of military installations and State-owned National Guard installations to ensure the preparedness of the Armed Forces, the Secretaries of the military departments shall carry out the program required by this subsection to provide for—

- (i) the conservation and rehabilitation of natural resources on such installations;
- (ii) the sustainable multipurpose use of the resources on such installations, which shall include hunting, fishing, trapping, and nonconsumptive uses; and
- (iii) subject to safety requirements and military security, public access to military installations to facilitate the use.

(B) In the case of a State-owned National Guard installation, such program shall be carried out in coordination with the chief executive officer of the State in which the installation is located.

(4) Effect on other law

Nothing in this subchapter—

(A)(i) affects any provision of a Federal law governing the conservation or protection of fish and wildlife resources; or

(ii) enlarges or diminishes the responsibility and authority of any State for the protection and management of fish and resident wildlife; or

(B) except as specifically provided in the other provisions of this section and in section 670b of this title, authorizes the Secretary of a military department to require a Federal license or permit to hunt, fish, or trap on a military installation.

(b) Required elements of plans

Consistent with the use of military installations and State-owned National Guard installations to ensure the preparedness of the Armed Forces, each integrated natural resources management plan prepared under subsection (a) of this section—

(1) shall, to the extent appropriate and applicable, provide for—

(A) fish and wildlife management, land management, forest management, and fish- and wildlife-oriented recreation;

(B) fish and wildlife habitat enhancement or modifications;

(C) wetland protection, enhancement, and restoration, where necessary for support of fish, wildlife, or plants;

(D) integration of, and consistency among, the various activities conducted under the plan;

(E) establishment of specific natural resource management goals and objectives and time frames for proposed action;

(F) sustainable use by the public of natural resources to the extent that the use is not inconsistent with the needs of fish and wildlife resources;

(G) public access to the installation that is necessary or appropriate for the use described in subparagraph (F), subject to requirements necessary to ensure safety and military security;

- (H) enforcement of applicable natural resource laws (including regulations);
- (I) no net loss in the capability of installation lands to support the military mission of the installation; and
- (J) such other activities as the Secretary of the military department determines appropriate;

(2) must be reviewed as to operation and effect by the parties thereto on a regular basis, but not less often than every 5 years; and

(3) may, in the case of a military installation, stipulate the issuance of special State hunting and fishing permits to individuals and require payment of nominal fees therefor, which fees shall be utilized for the protection, conservation, and management of fish and wildlife, including habitat improvement and related activities in accordance with the integrated natural resources management plan; except that—

(A) the Commanding Officer of the installation or persons designated by that Officer are authorized to enforce such special hunting and fishing permits and to collect, spend, administer, and account for fees for the permits, acting as agent or agents for the State if the integrated natural resources management plan so provides, and

(B) the fees collected under this paragraph may not be expended with respect to other than the military installation on which collected, unless the military installation is subsequently closed, in which case the fees may be transferred to another military installation to be used for the same purposes.

(c) Prohibitions on sale and lease of lands unless effects compatible with plan

After an integrated natural resources management plan is agreed to under subsection (a) of this section—

(1) no sale of land, or forest products from land, that is within a military installation covered by that plan may be made under section 2665(a) or (b) of title 10; and

(2) no leasing of land that is within the installation may be made under section 2667 of such title 10;

unless the effects of that sale or leasing are compatible with the purposes of the plan.

(d) Implementation and enforcement of integrated natural resources management plans

With regard to the implementation and enforcement of integrated natural resources management plans agreed to under subsection (a) of this section—

(1) neither Office of Management and Budget Circular A-76 nor any successor circular thereto applies to the procurement of services that are necessary for that implementation and enforcement; and

(2) priority shall be given to the entering into of contracts for the procurement of such implementation and enforcement services with Federal and State agencies having responsibility for the conservation or management of fish or wildlife.

(e) Applicability of other laws

Integrated natural resources management plans agreed to under the authority of this section and section 670b of this title shall not be deemed to be, nor treated as, cooperative agreements to which chapter 63 of title 31 applies.

(f) Reviews and reports

(1) Secretary of Defense

Not later than March 1 of each year, the Secretary of Defense shall review the extent to which integrated natural resources management plans were prepared or were in effect and implemented in accordance with this subchapter in the preceding year, and submit a report on the findings of the review to the committees. Each report shall include—

(A) the number of integrated natural resources management plans in effect in the year covered by the report, including the date on which each plan was issued in final form or most

recently revised;

(A) the Committee on Resources and the Committee on Armed Services of the House of Representatives; and

(B) the Committee on Armed Services and the Committee on Environment and Public Works of the Senate.

(g) Pilot program for invasive species management for military installations in Guam

(1) Inclusion of invasive species management

During fiscal years 2009 through 2014, the Secretary of Defense shall, to the extent practicable and conducive to military readiness, incorporate in integrated natural resources management plans for military installations in Guam the management, control, and eradication of invasive species—

(A) that are not native to the ecosystem of the military installation; and

(B) the introduction of which cause or may cause harm to military readiness, the environment, or human health and safety.

Secretary as having expertise relevant to requirements of this section; such review and assessment to be completed and results to be made available to the public and transmitted to certain committees of Congress no later than two years after Mar. 31, 1988, and such plan to be developed and transmitted to such committees no later than three years after Mar. 31, 1988; with a failure by Secretary to transmit such report within such three-year period not to relieve the Secretary from requirement to prepare such plan.

§670h. Comprehensive plans for conservation and rehabilitation programs

(a) Development of plans

(1) The Secretary of the Interior shall develop, in consultation with the State agencies, a comprehensive plan for conservation and rehabilitation programs to be implemented on public land under his jurisdiction and the Secretary of Agriculture shall do the same in connection with public land under his jurisdiction.

(2) The Secretary of the Interior shall develop, with the prior written approval of the Atomic Energy Commission, a comprehensive plan for conservation and rehabilitation programs to be implemented on public land under the jurisdiction of the Chairman and develop, with the prior written approval of the Administrator, a comprehensive plan for such programs to be implemented on public land under the jurisdiction of the Administrator. Each such plan shall be developed after the Secretary of the Interior makes, with the prior written approval of the Chairman or the Administrator, as the case may be, and in consultation with the State agencies, necessary studies and surveys of the land concerned to determine where conservation and rehabilitation programs are most needed.

(b) Consistency with overall land use and management plans; hunting, trapping, and fishing

Each comprehensive plan developed pursuant to this section shall be consistent with any overall land use and management plans for the lands involved. In any case in which hunting, trapping, or fishing (or any combination thereof) of resident fish and wildlife is to be permitted on public land under a comprehensive plan, such hunting, trapping, and fishing shall be conducted in accordance with applicable laws and regulations of the State in which such land is located.

(c) Cooperative agreements by State agencies for implementation of programs

(1) Each State agency may enter into a cooperative agreement with—

(A) the Secretary of the Interior with respect to those conservation and rehabilitation programs to be implemented under this subchapter within the State on public land which is under his jurisdiction;

(B) the Secretary of Agriculture with respect to those conservation and rehabilitation programs to be implemented under this subchapter within the State on public land which is under his jurisdiction; and

(C) the Secretary of the Interior and the Chairman or the Administrator, as the case may be, with respect to those conservation and rehabilitation programs to be implemented under this subchapter within the State on public land under the jurisdiction of the Chairman or the Administrator; except that before entering into any cooperative agreement which affects public land under the jurisdiction of the Chairman, the Secretary of the Interior shall obtain the prior written approval of the Atomic Energy Commission and before entering into any cooperative agreement which affects public lands under the jurisdiction of the Administrator, the Secretary of the Interior shall obtain the prior written approval of the Administrator.

Conservation and rehabilitation programs developed and implemented pursuant to this subchapter shall be deemed as supplemental to wildlife, fish, and game-related programs conducted by the Secretary of the Interior and the Secretary of Agriculture pursuant to other provisions of law. Nothing in this subchapter shall be construed as limiting the authority of the Secretary of the Interior or the Secretary of Agriculture, as the case may be, to manage the national forests or other public lands for wildlife and fish and other purposes in accordance with the Multiple-Use Sustained-Yield Act of 1960 (74 Stat. 215; 16 U.S.C. 528–531) or other applicable authority.

(2) Any conservation and rehabilitation program included within a cooperative agreement entered into under this subsection may be modified in a manner mutually agreeable to the State agency and the Secretary concerned (and the Chairman or the Administrator, as the case may be, if public land under his jurisdiction is involved). Before modifying any cooperative agreement which affects public land under the jurisdiction of the Chairman, the Secretary of the Interior shall obtain the prior written approval of the Atomic Energy Commission and before modifying any cooperative agreement which affects public land under the jurisdiction of the Administrator, the Secretary of the Interior shall obtain the prior written approval of the Administrator.

(3) Each cooperative agreement entered into under this subsection shall—

(A) specify those areas of public land within the State on which conservation and rehabilitation programs will be implemented;

(B) provide for fish and wildlife habitat improvements or modifications, or both;

(C) provide for range rehabilitation where necessary for support of wildlife;

(D) provide adequate protection for fish and wildlife officially classified as threatened or endangered pursuant to section 1533 of this title or considered to be threatened, rare, or endangered by the State agency;

(E) require the control of off-road vehicle traffic;

(F) if the issuance of public land area management stamps is agreed to pursuant to section 670i(a) of this title—

(i) contain such terms and conditions as are required under section 670i(b) of this title;

(ii) require the maintenance of accurate records and the filing of annual reports by the State agency to the Secretary of the Interior or the Secretary of Agriculture, or both, as the case may be, setting forth the amount and disposition of the fees collected for such stamps; and

(iii) authorize the Secretary concerned and the Comptroller General of the United States, or their authorized representatives, to have access to such records for purposes of audit and examination; and

(G) contain such other terms and conditions as the Secretary concerned and the State agency deem necessary and appropriate to carry out the purposes of this subchapter.

A cooperative agreement may also provide for arrangements under which the Secretary concerned may authorize officers and employees of the State agency to enforce, or to assist in the enforcement of, section 670j(a) of this title.

(4) Except where limited under a comprehensive plan or pursuant to cooperative agreement, hunting, fishing, and trapping shall be permitted with respect to resident fish and wildlife in accordance with applicable laws and regulations of the State in which such land is located on public land which is the subject of a conservation and rehabilitation program implemented under this subchapter.

(5) The Secretary of the Interior and the Secretary of Agriculture, as the case may be, shall prescribe such regulations as are deemed necessary to control, in a manner consistent with the applicable comprehensive plan and cooperative agreement, the public use of public land which is the subject of any conservation and rehabilitation program implemented by him under this subchapter.

(d) State agency agreements not cooperative agreements under other provisions

Agreements entered into by State agencies under the authority of this section shall not be deemed to be, or treated as, cooperative agreements to which chapter 63 of title 31 applies.

§670i. Public land management area stamps for hunting, trapping, and fishing on public lands subject to programs

(a) Agreements to require stamps

Any State agency may agree with the Secretary of the Interior and the Secretary of Agriculture (or with the Secretary of the Interior or the Secretary of Agriculture, as the case may be, if within the State concerned all conservation and rehabilitation programs under this subchapter will be implemented by him) that no individual will be permitted to hunt, trap, or fish on any public land within the State which is subject to a conservation and rehabilitation program implemented under this subchapter unless at the time such individual is engaged in such activity he has on his person a valid public land management area stamp issued pursuant to this section.

(b) Conditions for agreements

Any agreement made pursuant to subsection (a) of this section to require the issuance of public land management area stamps shall be subject to the following conditions:

(1) Such stamps shall be issued, sold, and the fees therefor collected, by the State agency or by the authorized agents of such agency.

(2) Notice of the requirement to possess such stamps shall be displayed prominently in all places where State hunting, trapping, or fishing licenses are sold. To the maximum extent practicable, the sale of such stamps shall be combined with the sale of such State hunting, trapping, and fishing licenses.

(3) Except for expenses incurred in the printing, issuing, or selling of such stamps, the fees collected for such stamps by the State agency shall be utilized in carrying out conservation and rehabilitation programs implemented under this subchapter in the State concerned. Such fees may be used by the State agency to acquire lands or interests therein from willing sellers or donors to provide public access to program lands that have no existing public access for enhancement of outdoor recreation and wildlife conservation: *Provided*, That the Secretary of Agriculture and the Secretary of the Interior maintain such access, or ensure that maintenance is provided for such access, through or to lands within their respective jurisdiction.

(4) The purchase of any such stamp shall entitle the purchaser thereof to hunt, trap, and fish on any public land within such State which is the subject of a conservation or rehabilitation program implemented under this subchapter except to the extent that the public use of such land is limited pursuant to a comprehensive plan or cooperative agreement; but the purchase of any such stamp shall not be construed as (A) eliminating the requirement for the purchase of a migratory bird hunting stamp as set forth in section 718a of this title, or (B) relieving the purchaser from compliance with any applicable State game and fish laws and regulations.

(5) The amount of the fee to be charged for such stamps, the age at which the individual is required to acquire such a stamp, and the expiration date for such stamps shall be mutually agreed upon by the State agency and the Secretary or Secretaries concerned; except that each such stamp shall be void not later than one year after the date of issuance.

(6) Each such stamp must be validated by the purchaser thereof by signing his name across the

face of the stamp.

(7) Any individual to whom a stamp is sold pursuant to this section shall upon request exhibit such stamp for inspection to any officer or employee of the Department of the Interior or the Department of Agriculture, or to any other person who is authorized to enforce section 670j(a) of this title.

(3) read as follows: “Except for expenses incurred in the printing, issuing, or selling of such stamps, the fees collected for such stamps by the State agency shall be utilized in carrying out conservation and rehabilitation programs implemented under this subchapter in the State concerned and for no other purpose. If such programs are implemented by both the Secretary of the Interior and the Secretary of Agriculture in the State, the Secretaries shall mutually agree, on such basis as they deem reasonable, on the proportion of such fees that shall be applied by the State agency to their respective programs.”

§670j. Enforcement provisions

(a) Violations and penalties

(1) Any person who hunts, traps, or fishes on any public land which is subject to a conservation and rehabilitation program implemented under this subchapter without having on his person a valid public land management area stamp, if the possession of such a stamp is required, shall be fined not more than \$1,000, or imprisoned for not more than six months, or both.

§684. Game breeding areas in Wichita and Grand Canyon National Forests

The President of the United States is authorized to designate such areas in the Wichita National

Forest and in the Grand Canyon National Forest as should, in his opinion, be set aside for the protection of game animals and birds and be recognized as a breeding place therefor.

(Jan. 24, 1905, ch. 137, §1, 33 Stat. 614; June 29, 1906, ch. 3593, §1, 34 Stat. 607.)

CODIFICATION

Act Jan. 24, 1905, and act June 29, 1906, are identical in language throughout, except that the earlier act authorizes the setting aside of areas in Wichita National Forest, while the latter authorizes areas in Grand Canyon National Forest. The two acts have been combined to form this section and sections 685 and 686 of this title.

“Wichita National Forest” and “Grand Canyon National Forest” substituted for “Wichita Forest Reserve” and “Grand Canyon Forest Reserve”, respectively, on authority of act Mar. 4, 1907, ch. 2907, 34 Stat. 1269, which provided that forest reserves shall hereafter be known as national forests.

PRESIDENTIAL DESIGNATION; ABOLITION OF WICHITA NATIONAL FOREST

The entire Wichita National Forest was designated a Game Preserve by Proclamation of June 2, 1905 (34 Stat. 3062), enlarged by Executive Order No. 7116, July 26, 1935, and designated the Wichita Mountains Wildlife Refuge by Act June 4, 1936, ch. 489, title I, §1, 49 Stat. 1446. Proclamation No. 2211, Nov. 27, 1936 (50 Stat. 1797), revoked the proclamations of July 4, 1901 (32 Stat. 1973), May 29, 1906 (34 Stat. 3207), and Oct. 13, 1910 (36 Stat. 2754), establishing, enlarging, and modifying the Wichita National Forest, but did affect the Wichita Mountains Wildlife Refuge.

The Grand Canyon National Game Preserve was established by Proclamation of Nov. 28, 1906 (34 Stat. 3263), enlarged by Proclamation of June 23, 1908 (35 Stat. 2192), and diminished by Proclamation of June 3, 1909 (36 Stat. 2496). The lands of the Grand Canyon National Forest were divided among and combined with those of the Coconino and Kaibab National Forests by Proclamation of July 2, 1908 (35 Stat. 2196).

§685. Hunting, trapping, killing, or capturing game in designated breeding areas unlawful

When such areas have been designated in the Wichita National Forest as provided for in section 684 of this title, hunting, trapping, killing, or capturing of game animals and birds upon the lands of the United States within the limits of said areas shall be unlawful, except under such regulations as may be prescribed from time to time, by the Secretary of the Interior.

When such areas have been designated in the Grand Canyon National Forest as provided in section 684 of this title, hunting, trapping, killing, or capturing of game animals upon the lands of the United States within the limits of said areas shall be unlawful, except under such regulations as may be prescribed from time to time by the Secretary of Agriculture.

(Jan. 24, 1905, ch. 137, §2, 33 Stat. 614; June 29, 1906, ch. 3593, §2, 34 Stat. 607; 1939 Reorg. Plan No. II, §4(f), eff. July 1, 1939, 4 F.R. 2731, 53 Stat. 1433; June 25, 1948, ch. 645, §§8, 9, 62 Stat. 860.)

CODIFICATION

Words “in the Wichita National Forest and in the Grand Canyon National Forest” inserted, and “Secretary of the Interior and Secretary of Agriculture, respectively” substituted for “Secretary of Agriculture” because of Reorg. Plan No. II of 1939, which transferred Bureau of Biological Survey from Department of Agriculture to Department of the Interior. The successor to Wichita National Forest, which was then administered by that Bureau, was affected by the transfer. However, the successor to Grand Canyon National Forest was administered by Forest Service and was consequently not affected.

For successors to Wichita National Forest and Grand Canyon National Forest, see Presidential Designation note set out under section 684 of this title.

The Secretary of the Interior (hereafter referred to as the “Secretary”) shall, as soon as practicable, publish a detailed description of the boundaries of the preserve in the Federal Register which shall include not more than five hundred and seventy thousand acres of land and water.

(c) Methods of acquisition of land; prerequisites to Federal appropriations; improved property; oil and gas rights; appraisal of property; transfer of Federal property to Secretary

The Secretary is authorized to acquire by donation, purchase with donated or appropriated funds, transfer from any other Federal agency, or exchange, any lands, waters, or interests therein which are located within the boundaries of the preserve or the Addition: *Provided*, That any lands owned or acquired by the State of Florida, or any of its subdivisions, in the preserve may be acquired by donation only and, any land acquired by the State of Florida, or any of its subdivisions, in the Addition shall be acquired in accordance with subsection (d) of this section: *Provided further*, That no Federal funds shall be appropriated until the Governor of Florida executes an agreement on behalf of the State which (i) provides for the transfer to the United States of all lands within the preserve previously owned or acquired by the State and (ii) provides for the donation to the United States of all lands acquired by the State within the preserve pursuant to the provision of “the Big Cypress Conservation Act of 1973” (Chapter 73–131 of the Florida Statutes) or provides for the donation to the United States of any remaining moneys appropriated pursuant to such Act for the purchase of lands within the preserve. No improved property, as defined by sections 698f to 698m–4 of this title, nor oil and gas rights, shall be acquired without the consent of the owner unless the Secretary, in his judgment, determines that such property is subject to, or threatened with, uses which are, or would be, detrimental to the purposes of the preserve. Notwithstanding the provisions of section 4651 of title 42 the Secretary (i) may evaluate any offer to sell land within the preserve or the Addition by any landowner and may, in his discretion, accept any offer not in excess of \$10,000 without an appraisal and (ii) may direct an appraisal to be made of any unimproved property within the preserve or the Addition without notice to the owner or owners, thereof. Notwithstanding any other provision of law, any federally owned lands within the preserve shall, with the concurrence of the head of the administering agency, be transferred to the administrative jurisdiction of the Secretary for the purposes of sections 698f to 698m–4 of this title, without transfer of funds. (d) Land within Addition; United States share of acquisition costs

(1) The aggregate cost to the United States of acquiring lands within the Addition may not exceed 80 percent of the total cost of such lands.

(3) The amount described in paragraph (2) shall be reduced by an amount equal to 20 percent of the amount of the total cost incurred by the Secretary in acquiring lands in the Addition other than from the State of Florida.

(4) For purposes of this subsection, the term “total cost” means that amount of the total acquisition costs (including the value of exchanged or donated lands) less the amount of the costs incurred by the Federal Highway Administration and the Florida Department of Transportation, including severance damages paid to private property owners as a result of the construction of Interstate 75.

SHORT TITLE OF 1988 AMENDMENT

Pub. L. 100–301, §1(a), Apr. 29, 1988, 102 Stat. 443, provided that: “This Act [enacting sections 698m–1 to 698m–4 of this title, amending this section and sections 698h and 698j to 698m of this title, and enacting provisions set out below] may be cited as the ‘Big Cypress National Preserve Addition Act’.”

FINDINGS AND PURPOSE

Pub. L. 100–301, §2, Apr. 29, 1988, 102 Stat. 443, provided that:

“(a) FINDINGS.—The Congress finds that—

“(1) the planned construction of Interstate 75 is presently being designed in such a way as to improve the natural water flow to the Everglades National Park, which has been disrupted by State Road 84 (commonly known as ‘Alligator Alley’);

“(2) the planned construction of Interstate 75 provides an opportunity to enhance protection of the Everglades National Park, to promote protection of the endangered Florida panther, and to provide for public recreational use and enjoyment of public lands by expanding the Big Cypress National Preserve to include those lands adjacent to Interstate 75 in Collier County north and east of the Big Cypress National Preserve, west of the Broward County line, and south of the Hendry County line;

“(3) the Federal acquisition of lands bordering the Big Cypress National Preserve in conjunction with the construction of Interstate 75 would provide significant public benefits by limiting development pressure on lands which are important both in terms of fish and wildlife habitat supporting endangered species and of wetlands which are the headwaters of the Big Cypress National Preserve; and

“(4) public ownership of lands adjacent to the Big Cypress National Preserve would enhance the protection of the Everglades National Park while providing recreational opportunities and other public uses currently offered by the Big Cypress National Preserve.

“(b) PURPOSE.—It is the purpose of this Act [see Short Title of 1988 Amendment note above] to establish the Big Cypress National Preserve Addition.”

§698g. Acquisition of lands for Big Cypress Preserve

(a) Expeditious acquisition of Florida lands

In recognition of the efforts of the State of Florida in the preservation of the area, through the enactment of chapter 73–131 of the Florida statutes, “The Big Cypress Conservation Act of 1973”, the Secretary is directed to proceed as expeditiously as possible to acquire the lands and interests in lands necessary to achieve the purposes of sections 698f to 698m–4 of this title.

(b) Submission of plan to Congressional committees; time; contents

Within one year after October 11, 1974, the Secretary shall submit, in writing, to the Committee ¹ on Interior and Insular Affairs and to the Committees on Appropriations of the United States Congress a detailed plan which shall indicate:

- (i) the lands and areas which he deems essential to the protection and public enjoyment of this preserve.

- (iii) the annual acquisition program (including the level of funding) which he recommends for the ensuing five fiscal years.

It is the express intent of the Congress that the Secretary should substantially complete the land acquisition program contemplated by sections 698f to 698m–4 of this title within six years after October 11, 1974.

§698v. Findings and purposes

(a) Findings

Congress finds that—

(1) the Baca ranch comprises most of the Valles Caldera in central New Mexico, and constitutes a unique land mass, with significant scientific, cultural, historic, recreational, ecological, wildlife, fisheries, and productive values;

(2) the Valles Caldera is a large resurgent lava dome with potential geothermal activity;

(3) the land comprising the Baca ranch was originally granted to the heirs of Don Luis Maria Cabeza de Vaca in 1860;

(4) historical evidence, in the form of old logging camps and other artifacts, and the history of territorial New Mexico indicate the importance of this land over many generations for domesticated livestock production and timber supply;

(5) the careful husbandry of the Baca ranch by the current owners, including selective timbering, limited grazing and hunting, and the use of prescribed fire, have preserved a mix of healthy range and timber land with significant species diversity, thereby serving as a model for sustainable land development and use;

(6) the Baca ranch's natural beauty and abundant resources, and its proximity to large municipal populations, could provide numerous recreational opportunities for hiking, fishing, camping, cross-country skiing, and hunting;

(7) the Forest Service documented the scenic and natural values of the Baca ranch in its 1993 study entitled “Report on the Study of the Baca Location No. 1, Santa Fe National Forest, New Mexico”, as directed by Public Law 101–556;

(8) the Baca ranch can be protected for current and future generations by continued operation as a working ranch under a unique management regime which would protect the land and resource values of the property and surrounding ecosystem while allowing and providing for the ranch to

eventually become financially self-sustaining;

(9) the current owners have indicated that they wish to sell the Baca ranch, creating an opportunity for Federal acquisition and public access and enjoyment of these lands;

(10) certain features on the Baca ranch have historical and religious significance to Native Americans which can be preserved and protected through Federal acquisition of the property;

(11) the unique nature of the Valles Caldera and the potential uses of its resources with different resulting impacts warrants a management regime uniquely capable of developing an operational program for appropriate preservation and development of the land and resources of the Baca ranch in the interest of the public;

(12) an experimental management regime should be provided by the establishment of a Trust capable of using new methods of public land management that may prove to be cost-effective and environmentally sensitive; and

(13) the Secretary may promote more efficient management of the Valles Caldera and the watershed of the Santa Clara Creek through the assignment of purchase rights of such watershed to the Pueblo of Santa Clara.

(b) Purposes

The purposes of sections 698v to 698v–10 of this title are—

(1) to authorize Federal acquisition of the Baca ranch;

(2) to protect and preserve for future generations the scientific, scenic, historic, and natural values of the Baca ranch, including rivers and ecosystems and archaeological, geological, and cultural resources;

(3) to provide opportunities for public recreation;

(4) to establish a demonstration area for an experimental management regime adapted to this unique property which incorporates elements of public and private administration in order to promote long term financial sustainability consistent with the other purposes enumerated in this subsection; and

(5) to provide for sustained yield management of Baca ranch for timber production and domesticated livestock grazing insofar as is consistent with the other purposes stated herein.

EX. ORD. NO. 13186. RESPONSIBILITIES OF FEDERAL AGENCIES TO PROTECT MIGRATORY BIRDS

Ex. Ord. No. 13186, Jan. 10, 2001, 66 F.R. 3853, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in furtherance of the purposes of the migratory bird conventions, the Migratory Bird Treaty Act (16 U.S.C. 703-711), the Bald and Golden Eagle Protection Acts (16 U.S.C. 668-668d), the Fish and Wildlife Coordination Act (16 U.S.C. 661-666c), the Endangered Species Act of 1973 (16 U.S.C. 1531-1544), the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4347), and other pertinent statutes, it is hereby ordered as follows:

SECTION 1. *Policy.* Migratory birds are of great ecological and economic value to this country and to other countries. They contribute to biological diversity and bring tremendous enjoyment to millions of Americans who study, watch, feed, or hunt these birds throughout the United States and other countries. The United States has recognized the critical importance of this shared resource by ratifying international, bilateral conventions for the conservation of migratory birds. Such conventions include the Convention for the Protection of Migratory Birds with Great Britain on behalf of Canada 1916, the Convention for the Protection of Migratory Birds and Game Mammals-Mexico 1936, the Convention for the Protection of Birds and Their Environment-Japan 1972, and the Convention for the Conservation of Migratory Birds and Their Environment-Union of Soviet Socialist Republics 1978.

These migratory bird conventions impose substantive obligations on the United States for the conservation of migratory birds and their habitats, and through the Migratory Bird Treaty Act (Act), the United States has implemented these migratory bird conventions with respect to the United States. This Executive Order directs executive departments and agencies to take certain actions to further implement the Act.

SEC. 2. *Definitions.* For purposes of this order:

(a) "Take" means take as defined in 50 C.F.R. 10.12, and includes both "intentional" and "unintentional" take.

(b) "Intentional take" means take that is the purpose of the activity in question.

(c) "Unintentional take" means take that results from, but is not the purpose of, the activity in question.

(d) "Migratory bird" means any bird listed in 50 C.F.R. 10.13.

(e) "Migratory bird resources" means migratory birds and the habitats upon which they depend.

(f) "Migratory bird convention" means, collectively, the bilateral conventions (with Great Britain/Canada, Mexico, Japan, and Russia) for the conservation of migratory bird resources.

(g) "Federal agency" means an executive department or agency, but does not include independent establishments as defined by 5 U.S.C. 104.

(h) "Action" means a program, activity, project, official policy (such as a rule or regulation), or formal plan directly carried out by a Federal agency. Each Federal agency will further define what the term "action" means with respect to its own authorities and what programs should be included in the agency-specific Memoranda of Understanding required by this order. Actions delegated to or assumed by nonfederal entities,

or carried out by nonfederal entities with Federal assistance, are not subject to this order. Such actions, however, continue to be subject to the Migratory Bird Treaty Act.

(i) "Species of concern" refers to those species listed in the periodic report "Migratory Nongame Birds of Management Concern in the United States," priority migratory bird species as documented by established plans (such as Bird Conservation Regions in the North American Bird Conservation Initiative or Partners in Flight physiographic areas), and those species listed in 50 C.F.R. 17.11.

SEC. 3. *Federal Agency Responsibilities.* (a) Each Federal agency taking actions that have, or are likely to have, a measurable negative effect on migratory bird populations is directed to develop and implement, within 2 years, a Memorandum of Understanding (MOU) with the Fish and Wildlife Service (Service) that shall promote the conservation of migratory bird populations.

(b) In coordination with affected Federal agencies, the Service shall develop a schedule for completion of the MOUs within 180 days of the date of this order. The schedule shall give priority to completing the MOUs with agencies having the most substantive impacts on migratory birds.

(c) Each MOU shall establish protocols for implementation of the MOU and for reporting accomplishments. These protocols may be incorporated into existing actions; however, the MOU shall recognize that the agency may not be able to implement some elements of the MOU until such time as the agency has successfully included them in each agency's formal planning processes (such as revision of agency land management plans, land use compatibility guidelines, integrated resource management plans, and fishery management plans), including public participation and NEPA analysis, as appropriate. This order and the MOUs to be developed by the agencies are intended to be implemented when new actions or renewal of contracts, permits, delegations, or other third party agreements are initiated as well as during the initiation of new, or revisions to, land management plans.

(d) Each MOU shall include an elevation process to resolve any dispute between the signatory agencies regarding a particular practice or activity.

(e) Pursuant to its MOU, each agency shall, to the extent permitted by law and subject to the availability of appropriations and within Administration budgetary limits, and in harmony with agency missions:

(1) support the conservation intent of the migratory bird conventions by integrating bird conservation principles, measures, and practices into agency activities and by avoiding or minimizing, to the extent practicable, adverse impacts on migratory bird resources when conducting agency actions;

(2) restore and enhance the habitat of migratory birds, as practicable;

(3) prevent or abate the pollution or detrimental alteration of the environment for the benefit of migratory birds, as practicable;

(4) design migratory bird habitat and population conservation principles, measures, and practices, into agency plans and planning processes (natural resource, land management, and environmental quality planning, including, but not limited to, forest and rangeland planning, coastal management planning, watershed planning, etc.) as practicable, and coordinate with other agencies and nonfederal partners in planning efforts;

(5) within established authorities and in conjunction with the adoption, amendment, or revision of agency management plans and guidance, ensure that agency plans and actions promote programs and recommendations of comprehensive migratory bird planning efforts such as Partners-in-Flight, U.S. National Shorebird Plan, North American Waterfowl Management Plan, North American Colonial Waterbird Plan, and other planning efforts, as well as guidance from other sources, including the Food and Agricultural Organization's International Plan of Action for Reducing Incidental Catch of Seabirds in Longline Fisheries;

(6) ensure that environmental analyses of Federal actions required by the NEPA or other established environmental review processes evaluate the effects of actions and agency plans on migratory birds, with emphasis on species of concern;

(7) provide notice to the Service in advance of conducting an action that is intended to take migratory birds, or annually report to the Service on the number of individuals of each species of migratory birds intentionally taken during the conduct of any agency action, including but not limited to banding or marking, scientific collecting, taxidermy, and depredation control;

(8) minimize the intentional take of species of concern by: (i) delineating standards and procedures for such take; and (ii) developing procedures for the review and evaluation of take actions. With respect to intentional take, the MOU shall be consistent with the appropriate sections of 50 C.F.R. parts 10, 21, and 22;

(9) identify where unintentional take reasonably attributable to agency actions is having, or is likely to have, a measurable negative effect on migratory bird populations, focusing first on species of concern, priority habitats, and key risk factors. With respect to those actions so identified, the agency shall develop and use principles, standards, and practices that will lessen the amount of unintentional take, developing any such conservation efforts in cooperation with the Service. These principles, standards, and practices shall be regularly evaluated and revised to ensure that they are effective in lessening the detrimental effect of agency

actions on migratory bird populations. The agency also shall inventory and monitor bird habitat and populations within the agency's capabilities and authorities to the extent feasible to facilitate decisions about the need for, and effectiveness of, conservation efforts;

(10) within the scope of its statutorily-designated authorities, control the import, export, and establishment in the wild of live exotic animals and plants that may be harmful to migratory bird resources;

(11) promote research and information exchange related to the conservation of migratory bird resources, including coordinated inventorying and monitoring and the collection and assessment of information on environmental contaminants and other physical or biological stressors having potential relevance to migratory bird conservation. Where such information is collected in the course of agency actions or supported through Federal financial assistance, reasonable efforts shall be made to share such information with the Service, the Biological Resources Division of the U.S. Geological Survey, and other appropriate repositories of such data (e.g., the Cornell Laboratory of Ornithology);

(12) provide training and information to appropriate employees on methods and means of avoiding or minimizing the take of migratory birds and conserving and restoring migratory bird habitat;

(13) promote migratory bird conservation in international activities and with other countries and international partners, in consultation with the Department of State, as appropriate or relevant to the agency's authorities;

(14) recognize and promote economic and recreational values of birds, as appropriate; and

(15) develop partnerships with non-Federal entities to further bird conservation.

(f) Notwithstanding the requirement to finalize an MOU within 2 years, each agency is encouraged to immediately begin implementing the conservation measures set forth above in subparagraphs (1) through (15) of this section, as appropriate and practicable.

(g) Each agency shall advise the public of the availability of its MOU through a notice published in the Federal Register.

SEC. 4. *Council for the Conservation of Migratory Birds.* (a) The Secretary of Interior shall establish an interagency Council for the Conservation of Migratory Birds (Council) to oversee the implementation of this order. The Council's duties shall include the following: (1) sharing the latest resource information to assist in the conservation and management of migratory birds; (2) developing an annual report of accomplishments and recommendations related to this order; (3) fostering partnerships to further the goals of this order; and (4) selecting an annual recipient of a Presidential Migratory Bird Federal Stewardship Award for contributions to the protection of migratory birds.

(b) The Council shall include representation, at the bureau director/administrator level, from the Departments of the Interior, State, Commerce, Agriculture, Transportation, Energy, Defense, and the Environmental Protection Agency and from such other agencies as appropriate.

SEC. 5. *Application and Judicial Review.* (a) This order and the MOU to be developed by the agencies do not require changes to current contracts, permits, or other third party agreements.

(b) This order is intended only to improve the internal management of the executive branch and does not create any right or benefit, substantive or procedural, separately enforceable at law or equity by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

WILLIAM J. CLINTON.

(2) Native to the United States defined

“(c) **PERIOD OF APPLICATION FOR INTERIM AUTHORITY.**—The period described in this subsection

is the period beginning on the date of the enactment of this Act [Dec. 2, 2002] and ending on the date on which the Secretary of the Interior publishes in the Federal Register a notice that—

ARCTIC TUNDRA HABITAT EMERGENCY CONSERVATION

Pub. L. 106–108, Nov. 24, 1999, 113 Stat. 1491, provided that:

“SECTION 1. SHORT TITLE.

“This Act may be cited as the ‘Arctic Tundra Habitat Emergency Conservation Act’.

“SEC. 2. FINDINGS AND PURPOSES.

“(a) FINDINGS.—The Congress finds the following:

“(1) The winter index population of mid-continent light geese was 800,000 birds in 1969, while the total population of such geese is more than 5,200,000 birds today.

“(2) The population of mid-continent light geese is expanding by over 5 percent each year, and in the absence of new wildlife management actions it could grow to more than 6,800,000 breeding light geese in 3 years.

“(3) The primary reasons for this unprecedented population growth are—

“(A) the expansion of agricultural areas and the resulting abundance of cereal grain crops in the United States;

“(B) the establishment of sanctuaries along the United States flyways of migrating light geese; and

“(C) a decline in light geese harvest rates.

“(4) As a direct result of this population explosion, the Hudson Bay Lowlands Salt-Marsh ecosystem in Canada is being systematically destroyed. This ecosystem contains approximately 135,000 acres of essential habitat for migrating light geese and many other avian species. Biologists have testified that one-third of this habitat has been destroyed, one-third is on the brink of devastation, and the remaining one-third is overgrazed.

“(5) The destruction of the Arctic tundra is having a severe negative impact on many avian species that

breed or migrate through this habitat, including the following:

“(A) Canada Goose.

“(B) American Wigeon.

“(C) Dowitcher.

“(D) Hudsonian Godwit.

“(E) Stilt Sandpiper.

“(F) Northern Shoveler.

“(G) Red-Breasted Merganser.

“(H) Oldsquaw.

“(I) Parasitic Jaeger.

“(J) Whimbrel.

“(K) Yellow Rail.

“(6) It is essential that the current population of mid-continent light geese be reduced by 50 percent by the year 2005 to ensure that the fragile Arctic tundra is not irreversibly damaged.

“(b) PURPOSES.—The purposes of this Act are the following:

“(1) To reduce the population of mid-continent light geese.

“(2) To assure the long-term conservation of mid-continent light geese and the biological diversity of the ecosystem upon which many North American migratory birds depend.

“SEC. 3. FORCE AND EFFECT OF RULES TO CONTROL OVERABUNDANT MID-CONTINENT LIGHT GEESE POPULATIONS.

“(a) FORCE AND EFFECT.—

“(1) IN GENERAL.—The rules published by the Service on February 16, 1999, relating to use of additional hunting methods to increase the harvest of mid-continent light geese (64 Fed. Reg. 7507–7517) and the establishment of a conservation order for the reduction of mid-continent light goose populations (64 Fed. Reg. 7517–7528), shall have the force and effect of law.

“(2) PUBLIC NOTICE.—The Secretary, acting through the Director of the Service, shall take such action as is necessary to appropriately notify the public of the force and effect of the rules referred to in paragraph (1).

“(b) APPLICATION.—Subsection (a) shall apply only during the period that—

“(1) begins on the date of the enactment of this Act [Nov. 24, 1999]; and

“(2) ends on the latest of—

“(A) the effective date of rules issued by the Service after such date of the enactment to control overabundant mid-continent light geese populations;

“(B) the date of the publication of a final environmental impact statement for such rules under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)); and

“(C) May 15, 2001.

“(c) RULE OF CONSTRUCTION.—This section shall not be construed to limit the authority of the Secretary or the Service to issue rules, under another law, to regulate the taking of mid-continent light geese.

“SEC. 4. COMPREHENSIVE MANAGEMENT PLAN.

“(a) IN GENERAL.—Not later than the end of the period described in section 103(b) [probably means section 3(b)], the Secretary shall prepare, and as appropriate implement, a comprehensive, long-term plan for the management of mid-continent light geese and the conservation of their habitat.

“(b) REQUIRED ELEMENTS.—The plan shall apply principles of adaptive resource management and shall include—

“(1) a description of methods for monitoring the levels of populations and the levels of harvest of mid-continent light geese, and recommendations concerning long-term harvest levels;

“(2) recommendations concerning other means for the management of mid-continent light goose populations, taking into account the reasons for the population growth specified in section 102(a)(3) [probably means section 2(a)(3)];

“(3) an assessment of, and recommendations relating to, conservation of the breeding habitat of mid-continent light geese;

“(4) an assessment of, and recommendations relating to, conservation of native species of wildlife adversely affected by the overabundance of mid-continent light geese, including the species specified in section 102(a)(5) [probably means section 2(a)(5)]; and

“(5) an identification of methods for promoting collaboration with the Government of Canada, States, and other interested persons.

“(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this

section \$1,000,000 for each of fiscal years 2000 through 2002.

“SEC. 5. DEFINITIONS.

“In this Act:

“(1) **MID-CONTINENT LIGHT GEESE.**—The term ‘mid-continent light geese’ means Lesser snow geese (*Anser caerulescens caerulescens*) and Ross’ geese (*Anser rossii*) that primarily migrate between Canada and the States of Alabama, Arkansas, Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, Texas, Wisconsin, and Wyoming.

“(2) **SECRETARY.**—The term ‘Secretary’ means the Secretary of the Interior.

“(3) **SERVICE.**—The term ‘Service’ means the United States Fish and Wildlife Service.”

(b) It shall be unlawful for any person to—

(1) take any migratory game bird by the aid of baiting, or on or over any baited area, if the person knows or reasonably should know that the area is a baited area; or

(2) place or direct the placement of bait on or adjacent to an area for the purpose of causing, inducing, or allowing any person to take or attempt to take any migratory game bird by the aid of baiting on or over the baited area.

§715s. Participation of local governments in revenue from areas administered by the United States Fish and Wildlife Service

(a) Separate fund in the United States Treasury; availability of funds until expended; “National Wildlife Refuge System” defined

Beginning with the next full fiscal year and for each fiscal year thereafter, all revenues received by the Secretary of the Interior from the sale or other disposition of animals, salmonoid carcasses,¹ timber, hay, grass, or other products of the soil, minerals, shells, sand, or gravel, from other privileges, or from leases for public accommodations or facilities incidental to but not in conflict with the basic purposes for which those areas of the National Wildlife Refuge System were established, during each fiscal year in connection with the operation and management of those areas of the National Wildlife Refuge System, National Fish Hatcheries, or other areas, that are solely or primarily administered by him, through the United States Fish and Wildlife Service, shall be covered into the United States Treasury and be reserved in a separate fund for disposition as hereafter prescribed. Amounts in the fund shall remain available until expended, and may be expended by the Secretary without further appropriation in the manner hereafter prescribed. The National Wildlife Refuge System (hereafter referred to as the “System”) includes those lands and waters administered by the Secretary as wildlife refuges, lands acquired or reserved for the protection and conservation of fish and wildlife that are listed pursuant to section 1533 of this title as endangered species or threatened species, wildlife ranges, game ranges, wildlife management areas, and waterfowl production areas established under any law, proclamation, Executive, or public land order.

(b) Deduction of expenses

The Secretary may pay from the fund any necessary expenses incurred by him in connection with the revenue-producing and revenue-sharing measures.

(c) Payment to counties

(1) The Secretary shall pay out the fund, for each fiscal year beginning with the fiscal year ending September 30, 1979, to each county in which is situated any fee area whichever of the following amounts is greater:

(A) An amount equal to the product of 75 cents multiplied by the total acreage of that portion of the fee area which is located within such county.

(B) An amount equal to three-fourths of 1 per centum of the fair market value, as determined by the Secretary, of that portion of the fee area (excluding any improvements thereto made after the date of Federal acquisition) which is located within such county.

(C) An amount equal to 25 per centum of the net receipts collected by the Secretary in connection with the operation and management of such fee area during such fiscal year; but if a fee area is located in two or more counties, the amount each such county is entitled to shall be the amount which bears to such 25 per centum the same ratio as that portion of the fee area acreage which is within such county bears to the total acreage of such fee area.

(2) At the end of each fiscal year the Secretary shall pay out of the fund for such fiscal year to each county in which any reserve area is situated, an amount equal to 25 per centum of the net receipts collected by the Secretary in connection with the operation and management of such area during such fiscal year: *Provided*, That when any such area is situated in more than one county the distributive share to each county from the aforesaid receipts shall be proportional to its acreage of such reserve area.

(3) For purposes of this section, the Commonwealth of Puerto Rico, Guam, and the Virgin Islands shall each be treated as a county.

(4)(A) For purposes of determining the fair market value of fee areas under paragraph (1)(B), the Secretary shall—

(i) appraise before September 30, 1979, all fee areas for which payments under this section were not authorized for fiscal years occurring before October 1, 1977; and

(ii) appraise all other fee areas, within five years after October 17, 1978, in the order in which such areas were first established by the Service.

After initial appraisal under clause (i) or (ii), each fee area shall thereafter be reappraised by the Secretary at least once during each five-year period occurring after the date of the initial appraisal. Until any fee area referred to in clause (ii) is initially appraised under this subparagraph, the fair market value of such area shall be deemed to be that adjusted cost of the area which was used to determine payments under this subsection for fiscal year 1977; and in no case may the amount of any payment to any local government under paragraph (1)(B) with respect to any fee area be less than the amount paid under paragraph (2)(A) of this subsection (as in effect on September 30, 1977) with respect to such area.

(B) The Secretary shall make the determinations required under this subsection in such manner as the Secretary considers to be equitable and in the public interest. All such determinations shall be final and conclusive.

(5)(A) Each county which receives payments under paragraphs (1) and (2) with respect to any fee area or reserve area shall distribute, under guidelines established by the Secretary, such payments on a proportional basis to those units of local government (including, but not limited to, school districts and the county itself in appropriate cases) which have incurred the loss or reduction of real property tax revenues by reason of the existence of such area. In any case in which a unit of local government other than the county acts as the collecting and distributing agency for real property taxes, the payments under paragraphs (1) and (2) shall be made to such other unit which shall distribute the payments in accordance with the guidelines.

(B) The Secretary may prescribe regulations under which payments under this paragraph may be made to units of local government in cases in which subparagraph (A) will not effect the purposes of this paragraph.

(C) Payments received by units of local government under this subsection may be used by such units for any governmental purpose.

(d) Authorization of appropriations equal to difference between amount of net receipts and aggregate amount of required payments

If the net receipts in the fund which are attributable to revenue collections for any fiscal year do not equal the aggregate amount of payments required to be made for such fiscal year under subsection (c) of this section to counties, there are authorized to be appropriated to the fund an amount equal to the difference between the total amount of net receipts and such aggregate amount of payments.

(e) Transfer and use of excess of net receipts over aggregate amount of required payments

If the net receipts in the fund which are attributable to revenue collections for any fiscal year exceed the aggregate amount of payments required to be made for such fiscal year under subsection

(c) of this section to counties, the amount of such excess shall be transferred to the Migratory Bird Conservation Fund for use in the acquisition of suitable areas for migratory bird refuges under the provisions of the Migratory Bird Conservation Act (16 U.S.C. 715–715r).

(f) Terms, conditions, and regulations for execution of revenue producing activities; disposal of animals

The Secretary shall carry out any revenue producing activity referred to in subsection (a)(1), (2), and (3) of this section within any fee area or reserve area subject to such terms, conditions, or regulations, including sales in the open markets, as the Secretary determines to be in the best interest of the United States. The Secretary may, in accordance with such regulations as the Secretary may prescribe, dispose of animals which are surplus to any such area by exchange of the same or other kinds, gift or loan to public institutions for exhibition or propagation purposes, and for the advancement of knowledge and the dissemination of information relating to the conservation of wildlife.

L. 95–469, §1(a)(3), substituted provision for authorization of appropriations equal to difference between amount of net receipts and aggregate amount of required payments for prior provision limiting amount payable to the counties to amount of net receipts in the fund for any fiscal year and a proportionate reduction of payments when net receipts are insufficient for aggregate amount of payments for any fiscal year.

Subsec. (e). Pub. L. 95–469, §1(a)(3), in revising subsec. (e), substituted provision authorizing use of surplus funds for acquisition of suitable areas for migratory bird refuges for prior provision making remaining funds available for such land acquisition and eliminated provision prohibiting funds available for the Management of the National Wildlife Refuge System or for enforcement of the Migratory Bird Treaty Act from being diminished by the amendments made by Pub. L. 93–509 to this subsection unless by specific congressional enactment.

By virtue of and pursuant to the authority vested in me as President of the United States, it is hereby ordered that the Secretary of State and the Secretary of the Interior shall from time to time jointly recommend the establishment by Executive orders of fishery conservation zones in areas of the high seas contiguous to the coasts of the United States, pursuant to the proclamation entitled "Policy of the United States With Respect to Coastal Fisheries in Certain Areas of the High Seas" [Proc. HARRY S TRUMAN.

§742a. Declaration of policy

The Congress declares that the fish, shellfish, and wildlife resources of the Nation make a material contribution to our national economy and food supply, as well as a material contribution to the health, recreation, and well-being of our citizens; that such resources are a living, renewable form of national wealth that is capable of being maintained and greatly increased with proper management, but equally capable of destruction if neglected or unwisely exploited; that such resources afford outdoor recreation throughout the Nation and provide employment, directly or indirectly, to a substantial number of citizens; that the fishing industries strengthen the defense of the United States through the provision of a trained seafaring citizenry and action-ready fleets of seaworthy vessels; that the training and sport afforded by fish and wildlife resources strengthen the national defense by contributing to the general health and physical fitness of millions of citizens; and that properly developed, such fish and wildlife resources are capable of steadily increasing these valuable contributions to the life of the Nation.

The Congress further declares that the fishing industry, in its several branches, can prosper and thus fulfill its proper function in national life only if certain fundamental needs are satisfied by means that are consistent with the public interest and in accord with constitutional functions of governments. Among these needs are:

- (1) Freedom of enterprise—freedom to develop new areas, methods, products, and markets in accordance with sound economic principles, as well as freedom from unnecessary administrative or legal restrictions that unreasonably conflict with or ignore economic needs;
- (2) Protection of opportunity—maintenance of an economic atmosphere in which domestic production and processing can prosper; protection from subsidized competing products; protection of opportunity to fish on the high seas in accordance with international law;
- (3) Assistance—assistance consistent with that provided by the Government for industry generally, such as is involved in promoting good industrial relations, fair trade standards, harmonious labor relations, better health standards and sanitation; and including, but not limited to—
 - (a) services to provide current information on production and trade, market promotion and development, and an extension service,
 - (b) research services for economic and technologic development and resource conservation, and
 - (c) resource management to assure the maximum sustainable production for the fisheries.

The Congress further declares that the provisions of this Act are necessary in order to accomplish

the objective of proper resource development, and that this Act shall be administered with due regard to the inherent right of every citizen and resident of the United States to engage in fishing for his own pleasure, enjoyment, and betterment, and with the intent of maintaining and increasing the public opportunities for recreational use of our fish and wildlife resources, and stimulating the development of a strong, prosperous, and thriving fishery and fish processing industry.

§742c. Loans for financing or refinancing of cost of purchasing, constructing, equipping, maintaining, repairing, or operating commercial fishing vessels or gear

(a) Authorization

The Secretary of the Interior is authorized, under such rules and regulations and under such terms and conditions as he may prescribe, to make loans for financing or refinancing of the cost of

purchasing, constructing, equipping, maintaining, repairing, or operating new or used commercial fishing vessels or gear.

(b) Conditions

Any loans made under the provisions of this section shall be subject to the following restrictions:

(1) Bear an interest rate of not less than (a) a rate determined by the Secretary of the Treasury, taking into consideration the average market yield on outstanding Treasury obligations of comparable maturity, plus (b) such additional charge, if any, toward covering other costs of the program as the Secretary may determine to be consistent with its purpose.

(2) Mature in not more than ten years, except that where a loan is for all or part of the costs of constructing a new fishing vessel, such period may be fourteen years.

(3) No financial assistance shall be extended pursuant to this section unless reasonable financial assistance applied for is not otherwise available on reasonable terms.

(4) Loans shall be approved only upon the furnishing of such security or other reasonable assurance of repayment as the Secretary may require considering the objectives of this section which are to upgrade commercial fishing vessels and gear and to provide reasonable financial assistance not otherwise available to commercial fishermen. The proposed collateral for a loan must be of such a nature that, when considered with the integrity and ability of the management, and the applicant's past and prospective earnings, repayment of the loan will be reasonably assured.

(5) The applicant shall possess the ability, experience, resources, and other qualifications necessary to enable him to operate and maintain new or used commercial fishing vessels or gear.

(6) Before the Secretary approves a loan for the purchase or construction of a new or used vessel which will not replace an existing commercial fishing vessel, he shall determine that the applicant's contemplated operation of such vessel in a fishery will not cause economic hardship or injury to the efficient vessel operators already operating in that fishery.

(7) An applicant for a fishery loan must be a citizen or national of the United States.

(8) Within the meaning of this section, a corporation, partnership, or association shall not be deemed to be a citizen of the United States unless the Secretary determines that it satisfactorily meets all of the requirements set forth in section 50501 of title 46 for determining the United States citizenship of a corporation, partnership, or association operating a vessel in the coastwise trade.

(9)(A) The nationality of an applicant shall be established to the satisfaction of the Secretary. Within the meaning of this section, no corporation, partnership, or association organized under the laws of American Samoa shall be deemed a national of the United States unless 75 per centum of the interest therein is owned by nationals of the United States, citizens of the United States, or both, and in the case of a corporation, unless its president or other chief executive officer and the chairman of its board are nationals or citizens of the United States and unless no more of its directors than a minority of the number necessary to constitute a quorum are nonnationals and noncitizens.

(B) Seventy-five per centum of the interest in a corporation shall not be deemed to be owned by nationals of the United States, citizens of the United States, or both, (i) if the title to 75 per centum of its stock is not vested in such nationals and citizens free from any trust or fiduciary obligation in favor of any person not a national or citizen of the United States; or (ii) if 75 per centum of the voting power in such corporation is not vested in nationals of the United States, citizens of the United States, or both; or (iii) if through any contract or understanding it is so arranged that more than 25 per centum of the voting power may be exercised, directly or indirectly, in behalf of any person who is not a national or citizen of the United States; or (iv) if by any other means whatsoever control of any interest in the corporation in excess of 25 per centum is conferred upon or permitted to be exercised by any person who is not a national or citizen of the United States.

(c) Fisheries loan fund; interest payments on appropriations available as capital to the fund less average undispersed cash balance

There is created a fisheries loan fund, which shall be used by the Secretary as a revolving fund to

make loans for financing and refinancing under this section. Any funds received by the Secretary on or before September 30, 1986, in payment of principal or interest on any loans so made shall be deposited in the fund and be available for making additional loans under this section. Any funds received in the fisheries loan fund after September 30, 1986, shall be covered into the Treasury as miscellaneous receipts. There is authorized to be appropriated to the fisheries loan fund the sum of \$20,000,000 to provide initial capital.

(d) Modification of loan contract

The Secretary, subject to the specific limitations in this section, may consent to the modification, with respect to the rate of interest, time of payment of any installment of principal, or security, of any loan contract to which he is a party.

(e) Chartering vessels; loans to Alaskan earthquake victims; termination date

The Secretary is authorized under such terms and conditions and pursuant to regulations prescribed by him to use the funds appropriated under this section to make loans to commercial fishermen for the purpose of chartering fishing vessels pending the construction or repair of vessels lost, destroyed, or damaged by the earthquake of March 27, 1964, and subsequent tidal waves related thereto: *Provided*, That any loans made under this subsection shall only be repaid from the net profits of the operations of such chartered vessels, which profits shall be reduced by such reasonable amount as determined by the Secretary for the salary of the fishermen chartering such vessels. The funds authorized herein shall not be available for such loans after June 30, 1966.

§757a. Anadromous, Great Lakes, and Lake Champlain fisheries

(a) Conservation, development, and enhancement; cooperative agreements; costs

For the purpose of conserving, developing, and enhancing within the several States the anadromous fishery resources of the Nation that are subject to depletion from water resources developments and other causes, or with respect to which the United States has made conservation commitments by international agreements, and for the purpose of conserving, developing, and enhancing the fish in the Great Lakes and Lake Champlain that ascend streams to spawn, the Secretary of the Interior is authorized to enter into cooperative agreements with one or more States, acting jointly or severally, that are concerned with the development, conservation, and enhancement of such fish, and, whenever he deems it appropriate, with other non-Federal interests. Such agreements shall describe (1) the actions to be taken by the Secretary and the cooperating parties, (2) the benefits that are expected to be derived by the States and other non-Federal interests, (3) the estimated cost of these actions, (4) the share of such costs to be borne by the Federal Government and by the States and other non-Federal interests: *Provided*, That, except as provided in subsection (c) of this section, the Federal share, including the operation and maintenance costs of any facilities constructed by the Secretary pursuant to sections 757a to 757f of this title, which he annually determines to be a proper Federal cost, shall not exceed 50 per centum of such costs exclusive of the value of any Federal land involved: *Provided further*, That the non-Federal share may be in the form of real or personal property, the value of which will be determined by the Secretary, as well as money, (5) the term of the agreement, (6) the terms and conditions for disposing of any real or personal property acquired by the Secretary during or at the end of the term of the agreement, and (7) such other terms and conditions as he deems desirable.

(b) Operation, management, and administration of property; research

(1) The Secretary may also enter into agreements with the States for the operation of any facilities and management and administration of any lands or interests therein acquired or facilities constructed pursuant to sections 757a to 757f of this title.

(2) In carrying out responsibilities under this section, the Secretary shall conduct, promote, and encourage research in preparation for the implementation of the use of ecosystems and interspecies approaches to the conservation and management of anadromous and Great Lakes fishery resources.

(c) Increase of Federal share

(1) Whenever two or more States having a common interest in any basin jointly enter into a cooperative agreement with the Secretary under subsection (a) of this section to carry out a research and development program to conserve, develop, and enhance anadromous fishery resources of the Nation, or fish in the Great Lakes and Lake Champlain that ascend streams to spawn, the Federal share of the program costs shall be increased to a maximum of 66²/₃ per centum. For the purpose of this subsection, the term “basin” includes rivers and their tributaries, lakes, and other bodies of water or portions thereof.

(2) In the case of any State that has implemented an interstate fisheries management plan for anadromous fishery resources, prepared by an interstate commission, the Federal share of any grant made under this section to carry out activities required by such plan shall be up to 90 percent. For purposes of this paragraph, the term “interstate commission” means—

(A) the commission established by the Atlantic States Marine Fisheries Compact (as consented to and approved by Public Law 80–77¹), approved May 4, 1942 (56 Stat. 267);

(B) the commission established by the Pacific Marine Fisheries Compact (as consented to and approved by Public Law 80–232¹), approved July 24, 1947 (16 Stat. 419); and

§757e. Application to Columbia River basin

(Pub. L. 89–304, §5, Oct. 30, 1965, 79 Stat. 1126; Pub. L. 98–146, title I, Nov. 4, 1983, 97 Stat. 922.)

CODIFICATION

Although the intent of Congress to amend this section is clear from the directory language of Pub. L.

98–146 which states that the sentence relating to the eligibility of the State of Idaho be added to “16 U.S.C. 757e”, that directory language has been editorially interpreted as directing the addition of that sentence to section 5 of Pub. L. 89–304, because Title 16 of the United States Code [this title] has never been enacted into positive law and its sections are therefore not susceptible of amendment as sections of “16 U.S.C.—” and because section 5 of Pub. L. 89–304 is the statute which was classified to, and serves as the source for 16 U.S.C. 757e [this section].

AMENDMENTS

1983—Pub. L. 98–146 inserted provision that the State of Idaho shall be eligible on an equal standing with other States for Federal funding for purposes authorized by sections 757a to 757f of this title.

The Secretary of the Interior shall, on the basis of studies carried out pursuant to sections 757a to 757f of this title and section 665 of this title, make recommendations to the Secretary of Health and Human Services concerning the elimination or reduction of polluting substances detrimental to fish and wildlife in interstate or navigable waters or the tributaries thereof. Such recommendations and any enforcement measures initiated pursuant thereto by the Secretary of Health and Human Services shall be designed to enhance the quality of such waters, and shall take into consideration all other legitimate uses of such waters.

(Pub. L. 89–304, §6, Oct. 30, 1965, 79 Stat. 1126; Pub. L. 96–88, title V, §509(b), Oct. 17, 1979, 93 Stat. 695.)

CHANGE OF NAME

(1) The National Fish Hatchery System (in this chapter referred to as the “System”)—

(A) consists of more than 60 hatcheries, seven fish technology centers, 9 fish health centers, and other fisheries program offices;

(B) plays an integral role in the recovery of more than 50 threatened species and endangered species and the restoration of over 100 native species;

(C) provides healthy fish populations that support recreational fishing opportunities, many of which are related to Federal water control structures; and

(D) works with over 250 partners to help mitigate the impacts of aquatic habitat loss and invasive species.

(2) The System faces many challenges, including aging facilities, some of which date back to the late 1800s, and maintenance of intensive infrastructures such as wells, pumps, valves, pipes, filters, heaters, chillers, and treatment systems that must keep clean water moving 24 hours a day, 365 days a year.

(3) By encouraging volunteer programs and donations and fostering non-Federal partnerships with hatchery facilities, Federal funding for the hatcheries can be supplemented.

(4) By encouraging hatchery educational programs, public awareness of the resources of the System and public participation in the conservation of aquatic resources can be promoted.

(b) Purposes

The purposes of this chapter are the following:

(1) To encourage the use of volunteers to assist the United States Fish and Wildlife Service in the management of hatcheries within the System.

(2) To facilitate partnerships between the System and non-Federal entities to promote public awareness of the resources of the System and public participation in the conservation of those

resources.

(3) To encourage donations and other contributions by individuals and organizations to the System.

(Pub. L. 109–360, §2, Oct. 16, 2006, 120 Stat. 2058.)

SHORT TITLE

Pub. L. 109–360, §1, Oct. 16, 2006, 120 Stat. 2058, provided that: “This Act [enacting this chapter] may be cited as the ‘National Fish Hatchery System Volunteer Act of 2006’.”

§760aa–1. Gifts to system and particular national fish hatcheries

In furtherance of the purposes of this chapter, the Secretary of the Interior may accept any gifts, devises, or bequests of real and personal property, or proceeds therefrom, or interests therein, for the benefit of the National Fish Hatchery System. Such acceptance may be subject to the terms of any restrictive or affirmative covenant, or condition of servitude, if such terms are deemed by the Secretary to be in accordance with law and compatible with the purpose for which acceptance is sought.

(b) Use of gifts, devises, and bequests

(1) In general

Any gifts and bequests of money and proceeds from the sales of other property received as gifts or bequests pursuant to this subsection shall be deposited in a separate account in the Treasury and may be expended without further appropriation by the Secretary for the benefit of the System programs administered by the United States Fish and Wildlife Service.

(2) Gifts, devises, and bequests for particular facilities

(A) Disbursal

Any gift, devise, or bequest made for the benefit of a facility of the System shall be disbursed only for the benefit of that facility and without further appropriations.

(B) Matching

Subject to the availability of appropriations and the requirements of the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) and other applicable law, the Secretary may provide funds to match gifts, devises, and bequests made for the benefit of a facility of the System. With respect to each gift, devise, or bequest, the amount of Federal funds may not exceed the amount (or, in the case of property or in-kind services, the fair market value) of the gift, devise, or bequest.

(b) Treasury account

Amounts received by the Secretary of the Interior as a result of projects and programs under subsection (a) shall be deposited in a separate account in the Treasury. Amounts in the account that are attributable to activities at a particular facility of the System shall be available to the Secretary of the Interior, without further appropriation, to pay the costs of incidental expenses related to volunteer activities, and to carry out cooperative agreements for the hatchery facility.

§773f. Civil penalties

(a) Liability; continuing violations; notice; determination of amount

Any person who is found by the Secretary, after notice and opportunity for a hearing in accordance with section 554 of title 5, to have committed an act prohibited by section 773e of this title shall be liable to the United States for a civil penalty. The amount of the civil penalty shall not exceed \$200,000 for each violation. Each day of a continuing violation shall constitute a separate offense. The amount of such civil penalty shall be assessed by the Secretary, or his designee, by written notice. In determining the amount of such penalty, the Secretary shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, and such other matters as justice may require. In assessing such penalty, the Secretary may also consider any information provided by the violator relating to the ability of the violator to pay if the information is provided to the Secretary at least 30 days prior to an administrative hearing.

(b) Judicial review

Any person against whom a civil penalty is assessed under subsection (a) of this section may obtain review thereof in the appropriate court of the United States by filing a notice of appeal in such court within 30 days from the date of such order and by simultaneously sending a copy of such notice by certified mail to the Secretary and the Attorney General. The Secretary shall promptly file in such court a certified copy of the record upon which such violation was found or such penalty imposed, in accordance with rules prescribed pursuant to section 2112 of title 28. The findings and order of the Secretary shall be set aside by such court if they are not found to be supported by substantial evidence, as provided in section 706(2) of title 5.

(c) Recovery of assessed penalties by Attorney General

If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or after the appropriate court has entered final judgment in favor of the Secretary, the Secretary shall refer the matter to the Attorney General of the United States, who shall recover the amount assessed in any appropriate district court of the United States. In such action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(d) Compromise, modification, and remission of penalties

The Secretary may compromise, modify, or remit, with or without conditions, any civil penalty which is subject to imposition or which has been imposed under this section.

(4) Transfers of ownership

Transfer of ownership of a vessel, a permit, or any interest in a permit, by sale or otherwise, shall not extinguish any permit sanction that is in effect or is pending at the time of transfer of ownership. Before executing the transfer of ownership of a vessel, permit, or interest in a permit, by sale or otherwise, the owner shall disclose in writing to the prospective transferee the existence of any permit sanction that will be in effect or pending with respect to the vessel, permit, or interest at the time of the transfer.

(5) Reinstatement

In the case of any permit that is suspended under this subsection for nonpayment of a civil penalty, criminal fine, or any amount in settlement of a civil forfeiture, the Secretary shall reinstate the permit upon payment of the penalty, fine, or settlement amount and interest thereon at the prevailing rate.

(6) Hearing

The Secretary of the Interior and the State fish and game department of each State accepting the benefits of this chapter shall agree upon the fish restoration and management projects to be aided in such State under the terms of this chapter, and all projects shall conform to the standards fixed by the Secretary of the Interior.

(b) Allocation of amounts by coastal States between marine fish projects and freshwater fish projects

Subject to paragraph (2), each coastal State, to the extent practicable, shall equitably allocate amounts apportioned to such State under this chapter between marine fish projects and freshwater fish projects in the same proportion as the estimated number of resident marine anglers and the estimated number of resident freshwater anglers, respectively, bear to the estimated number of all resident anglers in that State.

§777e. Submission and approval of plans and projects

(a) Apportionment of funds

Any State desiring to avail itself of the benefits of this chapter shall, by its State fish and game department, submit programs or projects for fish restoration in either of the following two ways:

(1) The State shall prepare and submit to the Secretary of the Interior a comprehensive fish and wildlife resource management plan which shall insure the perpetuation of these resources for the economic, scientific, and recreational enrichment of the people. Such plan shall be for a period of not less than five years and be based on projections of desires and needs of the people for a period of not less than fifteen years. It shall include provisions for updating at intervals of not more than three years and be provided in a format as may be required by the Secretary of the Interior. If the Secretary of the Interior finds that such plans conform to standards established by him and approves such plans, he may finance up to 75 per centum of the cost of implementing segments of those plans meeting the purposes of this chapter from funds apportioned under this chapter upon his approval of an annual agreement submitted to him.

(2) A State may elect to avail itself of the benefits of this chapter by its State fish and game department submitting to the Secretary of the Interior full and detailed statements of any fish restoration and management project proposed for that State. If the Secretary of the Interior finds that such project meets with the standards set by him and approves said project, the State fish and game department shall furnish to him such surveys, plans, specifications, and estimates therefor as he may require. If the Secretary of the Interior approves the plans, specifications, and estimates for the project, he shall notify the State fish and game department and immediately set aside so much of said appropriation as represents the share of the United States payable under this chapter on account of such project, which sum so set aside shall not exceed 75 per centum of the total estimated cost thereof.

The Secretary of the Interior shall approve only such comprehensive plans or projects as may be substantial in character and design and the expenditure of funds hereby authorized shall be applied only to such approved comprehensive fishery plan or projects and if otherwise applied they shall be replaced by the State before it may participate in any further apportionment under this chapter. No payment of any money apportioned under this chapter shall be made on any comprehensive fishery plan or project until an agreement to participate therein shall have been submitted to and approved by the Secretary of the Interior.

(b) “Project” defined

If the State elects to avail itself of the benefits of this chapter by preparing a comprehensive fish and wildlife plan under option (1) of subsection (a) of this section, then the term “project” may be defined for the purpose of this chapter as a fishery program, all other definitions notwithstanding.

(c) Costs

Administrative costs in the form of overhead or indirect costs for services provided by State central service activities outside of the State fish and game department charged against programs or projects supported by funds made available under this chapter shall not exceed in any one fiscal year 3 per centum of the annual apportionment to the State.

(d) Agreements to finance initial costs of acquisition of lands and construction of structures

The Secretary of the Interior may enter into agreements to finance up to 75 per centum of the initial costs of the acquisition of lands or interests therein and the construction of structures or facilities for ¹ appropriations currently available for the purposes of this chapter; and to agree to finance up to 75 per centum of the remaining costs over such a period of time as the Secretary may consider necessary. The liability of the United States in any such agreement is contingent upon the continued availability of funds for the purposes of this chapter.

L. 91–503 added an alternative method of application for funds by submission of a comprehensive fish and wildlife resource management plan for a period of five years based on projections for fifteen years, to be updated every three years, laid down a maximum limit of assistance of 75 percent of the estimated cost of the implementation of plan, and in existing method of application struck out reference to Secretary of the Treasury and requirement that State pay 10 percent of costs.

(a) Short title

This section may be cited as the “New England Fishery Resources Restoration Act of 1990”.

(b) Purposes

The purposes of this section are to—

(1) ensure timely and effective implementation of restoration plans and programs for Atlantic salmon and other fishery resources of selected river systems in New England;

(2) complete a study of fish passage impediments and requirements on small streams and rivers in New England; and

(3) develop an inventory of important fish and wildlife habitat and other natural areas of river basins in New England.

(c) Implementation of fishery resource restoration plans

The Director of the United States Fish and Wildlife Service, hereinafter referred to as the Director,

in consultation with the Assistant Administrator for Fisheries of the National Oceanic and Atmospheric Administration shall formulate, establish and implement programs to restore and maintain nationally significant, interjurisdictional fishery resources originating in New England river systems, including the Connecticut, Thames, Pawcatuck, Merrimack, Saco, Androscoggin, Kennebec, Sheepscot, Duck Trap, St. George, Penobscot, Union, Narraguagus, Pleasant, Machias, Dennys, St. Croix, Meduxnekeag and Aroostock and their tributaries. These programs shall be in accordance with the schedule and responsibilities established in comprehensive basin-wide restoration plans prepared by the Director in cooperation with State, local, and other entities involved and interested in the conservation and management of the affected fishery resources. Preparation and periodic revision of restoration plans, and their implementation, shall be based on a Memorandum of Agreement for each restoration program which shall be entered into by the Director and cooperating entities. The Director shall prepare and submit to the House Committee on Merchant Marine and Fisheries and the Senate Committee on Environment and Public Works an annual report documenting activities undertaken and accomplishments achieved in fulfillment of this section, including an assessment of the prognosis for restoration of each of the stocks and species involved.

(d) Fish passage study

The Director shall conduct a study to identify impediments to upstream and downstream passage of fish in rivers and streams in the New England States due to dams that are not licensed by the Federal Energy Regulatory Commission or other human-caused obstructions. In addition, the study shall identify actions needed to alleviate those impediments where desirable and feasible. The study shall include, but not be limited to, identifying—

- (1) all dams not licensed by the Federal Energy Regulatory Commission and other human-caused obstructions on New England rivers and streams where construction of upstream or downstream fish passage facilities or their removal would benefit fishery resources, including an estimate of the degree of benefits expected; and
- (2) the proposed nature and size and estimated cost of appropriate fish passage facilities or other actions determined to be necessary and feasible for each dam or other obstruction identified in response to paragraph (1).

The Director shall provide notice to the public of the extent and nature of the study by publication of such information in major newspapers in the region and by other appropriate means. Within three years of November 16, 1990, the Director shall submit a report containing the findings, conclusions and recommendations of the study to the House Committee on Merchant Marine and Fisheries and the Senate Committee on Environment and Public Works.

(e) New England rivers fish and wildlife inventory

The Director shall inventory the natural values of river basins in New England, including the Connecticut, Pawcatuck, Acushnet, North and South (in Plymouth County, Massachusetts), Charles, Merrimack, Saco, Androscoggin, Kennebec, Penobscot, Union, St. Croix, and Aroostock Rivers and their tributaries, and identify fish and wildlife habitat in most need of protection or where public access to the rivers should be provided. In addition, the Director shall, in cooperation with appropriate State agencies and local governments and after providing notice and opportunity for public comment, identify appropriate public or private measures for providing the necessary protection or access for each area included in the inventory. Within two years of November 16, 1990, the Director shall submit a report containing the findings, conclusions, and recommendations of the inventory and assessment to the House Committee on Merchant Marine and Fisheries and the Senate Committee on Environment and Public Works.

(f) Authorization of appropriations

There are authorized to be appropriated to the Director—

- (1) \$5,000,000 per year for fiscal years 1991, 1992, 1993, 1994, and 1995 to implement fishery resource restoration plans and programs, except for activities related to the design and construction of fish passage facilities, as directed by subsection (c) of this section;

(2) \$500,000 per year for fiscal years 1991, 1992, and 1993 to conduct the study required under subsection (d) of this section; and

FINDINGS

Pub. L. 113–23, §2, Aug. 9, 2013, 127 Stat. 493, provided that: “Congress finds that—

“(1) the hydropower industry currently employs approximately 300,000 workers across the United States;

“(2) hydropower is the largest source of clean, renewable electricity in the United States;

“(3) as of the date of enactment of this Act [Aug. 9, 2013], hydropower resources, including pumped storage facilities, provide—

“(A) nearly 7 percent of the electricity generated in the United States; and

“(B) approximately 100,000 megawatts of electric capacity in the United States;

“(4) only 3 percent of the 80,000 dams in the United States generate electricity, so there is substantial potential for adding hydropower generation to nonpowered dams; and

“(5) according to one study, by utilizing currently untapped resources, the United States could add approximately 60,000 megawatts of new hydropower capacity by 2025, which could create 700,000 new jobs over the next 13 years.”

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith Reorganization Plan No. 10 of 1950, prepared in accordance with the Reorganization Act of 1949 and providing for reorganizations in the Securities and Exchange Commission. My reasons for transmitting this plan are stated in an accompanying general message.

After investigation I have found and hereby declare that each reorganization included in Reorganization Plan No. 10 of 1950 is necessary to accomplish one or more of the purposes set forth in section 2(a) of the Reorganization Act of 1949.

The taking effect of the reorganizations included in this plan may not in itself result in substantial immediate savings. However, many benefits in improved operations are probable during the next years which will result in a reduction in expenditures as compared with those that would be otherwise necessary. An itemization of these reductions in advance of actual experience under this plan is not practicable.

HARRY S. TRUMAN.

THE WHITE HOUSE, March 13, 1950.

§793. Appointment of officers and employees of Commission; duties, and salaries; detail of officers and employees from other departments; expenditures authorized

The commission shall have authority to appoint, prescribe the duties, and fix the salaries of, a secretary, a chief engineer, a general counsel, a solicitor, and a chief accountant; and may, subject to the civil service laws, appoint such other officers and employees as are necessary in the execution of its functions and fix their salaries in accordance with chapter 51 and subchapter III of chapter 53 of title 5. The commission may request the President to detail an officer or officers from the Corps of Engineers, or other branches of the United States Army, to serve the commission as engineer officer or officers, or in any other capacity, in field work outside the seat of government, their duties to be prescribed by the commission; and such detail is authorized. The President may also, at the request of the commission, detail, assign, or transfer to the commission, engineers in or under the Departments of the Interior or Agriculture for field work outside the seat of government under the direction of the commission.

The commission may make such expenditures (including expenditures for rent and personal services at the seat of government and elsewhere, for law books, periodicals, and books of reference, and for printing and binding) as are necessary to execute its functions. Expenditures by the commission shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the commission or by such other member or officer as may be authorized by the commission for that purpose subject to applicable regulations under chapters 1 to 11 of title 40 and division C (except sections 3302, 3306(f), 3307(e), 3501(b), 3509, 3906, 4104, 4710, and 4711) of subtitle I of title 41.

§797. General powers of Commission

The Commission is authorized and empowered—

(a) Investigations and data

To make investigations and to collect and record data concerning the utilization of the water resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development costs, and relation to markets of power sites, and whether the power from Government dams can be advantageously used by the United States for its public purposes, and what is a fair value of such power, to the extent the Commission may deem necessary or useful for the purposes of this chapter.

(b) Statements as to investment of licensees in projects; access to projects, maps, etc.

To determine the actual legitimate original cost of and the net investment in a licensed project, and to aid the Commission in such determinations, each licensee shall, upon oath, within a reasonable period of time to be fixed by the Commission, after the construction of the original project or any addition thereto or betterment thereof, file with the Commission in such detail as the Commission may require, a statement in duplicate showing the actual legitimate original cost of construction of such project addition, or betterment, and of the price paid for water rights, rights-of-way, lands, or interest in lands. The licensee shall grant to the Commission or to its duly authorized agent or agents, at all reasonable times, free access to such project, addition, or betterment, and to all maps, profiles, contracts, reports of engineers, accounts, books, records, and all other papers and documents relating thereto. The statement of actual legitimate original cost of said project, and revisions thereof as determined by the Commission, shall be filed with the Secretary of the Treasury.

(c) Cooperation with executive departments; information and aid furnished Commission

To cooperate with the executive departments and other agencies of State or National Governments in such investigations; and for such purpose the several departments and agencies of the National Government are authorized and directed upon the request of the Commission, to furnish such records, papers, and information in their possession as may be requested by the Commission, and temporarily to detail to the Commission such officers or experts as may be necessary in such investigations.

(d) Publication of information, etc.; reports to Congress

To make public from time to time the information secured hereunder, and to provide for the publication of its reports and investigations in such form and manner as may be best adapted for public information and use. The Commission, on or before the 3d day of January of each year, shall

submit to Congress for the fiscal year preceding a classified report showing the permits and licenses issued under this subchapter, and in each case the parties thereto, the terms prescribed, and the moneys received if any, or account thereof.

(e) Issue of licenses for construction, etc., of dams, conduits, reservoirs, etc.

To issue licenses to citizens of the United States, or to any association of such citizens, or to any corporation organized under the laws of the United States or any State thereof, or to any State or municipality for the purpose of constructing, operating, and maintaining dams, water conduits, reservoirs, power houses, transmission lines, or other project works necessary or convenient for the development and improvement of navigation and for the development, transmission, and utilization of power across, along, from, or in any of the streams or other bodies of water over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States, or upon any part of the public lands and reservations of the United States (including the Territories), or for the purpose of utilizing the surplus water or water power from any Government dam, except as herein provided: *Provided*, That licenses shall be issued within any reservation only after a finding by the Commission that the license will not interfere or be inconsistent with the purpose for which such reservation was created or acquired, and shall be subject to and contain such conditions as the Secretary of the department under whose supervision such reservation falls shall deem necessary for the adequate protection and utilization of such reservation: ¹ The license applicant and any party to the proceeding shall be entitled to a determination on the record, after opportunity for an agency trial-type hearing of no more than 90 days, on any disputed issues of material fact with respect to such conditions. All disputed issues of material fact raised by any party shall be determined in a single trial-type hearing to be conducted by the relevant resource agency in accordance with the regulations promulgated under this subsection and within the time frame established by the Commission for each license proceeding. Within 90 days of August 8, 2005, the Secretaries of the Interior, Commerce, and Agriculture shall establish jointly, by rule, the procedures for such expedited trial-type hearing, including the opportunity to undertake discovery and cross-examine witnesses, in consultation with the Federal Energy Regulatory Commission.² *Provided further*, That no license affecting the navigable capacity of any navigable waters of the United States shall be issued until the plans of the dam or other structures affecting the navigation have been approved by the Chief of Engineers and the Secretary of the Army. Whenever the contemplated improvement is, in the judgment of the Commission, desirable and justified in the public interest for the purpose of improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, a finding to that effect shall be made by the Commission and shall become a part of the records of the Commission: *Provided further*, That in case the Commission shall find that any Government dam may be advantageously used by the United States for public purposes in addition to navigation, no license therefor shall be issued until two years after it shall have reported to Congress the facts and conditions relating thereto, except that this provision shall not apply to any Government dam constructed prior to June 10, 1920: *And provided further*, That upon the filing of any application for a license which has not been preceded by a preliminary permit under subsection (f) of this section, notice shall be given and published as required by the proviso of said subsection. In deciding whether to issue any license under this subchapter for any project, the Commission, in addition to the power and development purposes for which licenses are issued, shall give equal consideration to the purposes of energy conservation, the protection, mitigation of damage to, and enhancement of, fish and wildlife (including related spawning grounds and habitat), the protection of recreational opportunities, and the preservation of other aspects of environmental quality.

(f) Preliminary permits; notice of application

To issue preliminary permits for the purpose of enabling applicants for a license hereunder to secure the data and to perform the acts required by section 802 of this title: *Provided, however*, That upon the filing of any application for a preliminary permit by any person, association, or corporation the Commission, before granting such application, shall at once give notice of such application in writing to any State or municipality likely to be interested in or affected by such application; and

shall also publish notice of such application once each week for four weeks in a daily or weekly newspaper published in the county or counties in which the project or any part hereof or the lands affected thereby are situated.

(g) Investigation of occupancy for developing power; orders

Upon its own motion to order an investigation of any occupancy of, or evidenced intention to occupy, for the purpose of developing electric power, public lands, reservations, or streams or other bodies of water over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States by any person, corporation, State, or municipality and to issue such order as it may find appropriate, expedient, and in the public interest to conserve and utilize the navigation and water-power resources of the region.

The Secretary of the Interior is further authorized and directed to conduct feasibility investigations of opportunities to mitigate damages to or enhance fish and wildlife as a result of increasing the amount of water available for such purposes because of water conservation efforts on Federal reclamation projects. Such feasibility investigations shall include, but not be limited to—

“(1) an analysis of the technical, environmental, and economic feasibility of reducing the amount of water diverted upstream of such Federal hydroelectric power generation facilities by Federal reclamation projects;

“(2) an estimate of the reduction, if any, of project power consumed as a result of the decreased amount of diversion;

“(3) an estimate of the increase in the amount of electrical energy and related revenues which would result from the marketing of such power by the Secretary;

“(4) an estimate of the fish and wildlife benefits which would result from the decreased or modified diversions;

“(5) a finding by the Secretary of the Interior that the activities proposed in the feasibility study can be carried out in accordance with applicable Federal and State law, interstate compacts and the contractual obligations of the Secretary; and

“(6) a finding by the affected Federal Power Marketing Administrator that the hydroelectric component of the proposed water conservation feature is cost-effective and that the affected Administrator is able to market the hydro-electric power expected to be generated.

“(b) CONSULTATION.—In preparing feasibility studies pursuant to this section, the Secretary of the Interior shall consult with, and seek the recommendations of, affected State, local and Indian tribal interests, and shall provide for appropriate public comment.

§803. Conditions of license generally

All licenses issued under this subchapter shall be on the following conditions:

(a) Modification of plans; factors considered to secure adaptability of project; recommendations for proposed terms and conditions

(1) That the project adopted, including the maps, plans, and specifications, shall be such as in the judgment of the Commission will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, for the adequate protection, mitigation, and enhancement of fish and wildlife (including related spawning grounds and habitat), and for other beneficial public uses, including irrigation, flood control, water supply, and recreational and other purposes referred to in section 797(e) of this title ¹ if necessary in order to secure such plan the Commission shall have authority to require the modification of any project and of the plans and specifications of the project works before approval.

(2) In order to ensure that the project adopted will be best adapted to the comprehensive plan described in paragraph (1), the Commission shall consider each of the following:

(A) The extent to which the project is consistent with a comprehensive plan (where one exists) for improving, developing, or conserving a waterway or waterways affected by the project that is prepared by—

(i) an agency established pursuant to Federal law that has the authority to prepare such a plan;

or

(ii) the State in which the facility is or will be located.

(B) The recommendations of Federal and State agencies exercising administration over flood control, navigation, irrigation, recreation, cultural and other relevant resources of the State in which the project is located, and the recommendations (including fish and wildlife recommendations) of Indian tribes affected by the project.

(C) In the case of a State or municipal applicant, or an applicant which is primarily engaged in

the generation or sale of electric power (other than electric power solely from cogeneration facilities or small power production facilities), the electricity consumption efficiency improvement program of the applicant, including its plans, performance and capabilities for encouraging or assisting its customers to conserve electricity cost-effectively, taking into account the published policies, restrictions, and requirements of relevant State regulatory authorities applicable to such applicant.

(3) Upon receipt of an application for a license, the Commission shall solicit recommendations from the agencies and Indian tribes identified in subparagraphs (A) and (B) of paragraph (2) for proposed terms and conditions for the Commission's consideration for inclusion in the license.

(b) Alterations in project works

That except when emergency shall require for the protection of navigation, life, health, or property, no substantial alteration or addition not in conformity with the approved plans shall be made to any dam or other project works constructed hereunder of an installed capacity in excess of two thousand horsepower without the prior approval of the Commission; and any emergency alteration or addition so made shall thereafter be subject to such modification and change as the Commission may direct.

(c) Maintenance and repair of project works; liability of licensee for damages

That the licensee shall maintain the project works in a condition of repair adequate for the purposes of navigation and for the efficient operation of said works in the development and transmission of power, shall make all necessary renewals and replacements, shall establish and maintain adequate depreciation reserves for such purposes, shall so maintain, and operate said works as not to impair navigation, and shall conform to such rules and regulations as the Commission may from time to time prescribe for the protection of life, health, and property. Each licensee hereunder shall be liable for all damages occasioned to the property of others by the construction, maintenance, or operation of the project works or of the works appurtenant or accessory thereto, constructed under the license and in no event shall the United States be liable therefor.

(d) Amortization reserves

That after the first twenty years of operation, out of surplus earned thereafter, if any, accumulated in excess of a specified reasonable rate of return upon the net investment of a licensee in any project or projects under license, the licensee shall establish and maintain amortization reserves, which reserves shall, in the discretion of the Commission, be held until the termination of the license or be applied from time to time in reduction of the net investment. Such specified rate of return and the proportion of such surplus earnings to be paid into and held in such reserves shall be set forth in the license. For any new license issued under section 808 of this title, the amortization reserves under this subsection shall be maintained on and after the effective date of such new license.

(e) Annual charges payable by licensees; maximum rates; application; review and report to Congress

(1) That the licensee shall pay to the United States reasonable annual charges in an amount to be fixed by the Commission for the purpose of reimbursing the United States for the costs of the administration of this subchapter, including any reasonable and necessary costs incurred by Federal and State fish and wildlife agencies and other natural and cultural resource agencies in connection with studies or other reviews carried out by such agencies for purposes of administering their responsibilities under this subchapter; for recompensing it for the use, occupancy, and enjoyment of its lands or other property; and for the expropriation to the Government of excessive profits until the respective States shall make provision for preventing excessive profits or for the expropriation thereof to themselves, or until the period of amortization as herein provided is reached, and in fixing such charges the Commission shall seek to avoid increasing the price to the consumers of power by such charges, and any such charges may be adjusted from time to time by the Commission as conditions may require: *Provided*, That, subject to annual appropriations Acts, the portion of such annual charges imposed by the Commission under this subsection to cover the reasonable and

necessary costs of such agencies shall be available to such agencies (in addition to other funds appropriated for such purposes) solely for carrying out such studies and reviews and shall remain available until expended: *Provided*, That when licenses are issued involving the use of Government dams or other structures owned by the United States or tribal lands embraced within Indian reservations the Commission shall, subject to the approval of the Secretary of the Interior in the case of such dams or structures in reclamation projects and, in the case of such tribal lands, subject to the approval of the Indian tribe having jurisdiction of such lands as provided in section 476 of title 25, fix a reasonable annual charge for the use thereof, and such charges may with like approval be readjusted by the Commission at the end of twenty years after the project is available for service and at periods of not less than ten years thereafter upon notice and opportunity for hearing: *Provided further*, That licenses for the development, transmission, or distribution of power by States or municipalities shall be issued and enjoyed without charge to the extent such power is sold to the public without profit or is used by such State or municipality for State or municipal purposes, except that as to projects constructed or to be constructed by States or municipalities primarily designed to provide or improve navigation, licenses therefor shall be issued without charge; and that licenses for the development, transmission, or distribution of power for domestic, mining, or other beneficial use in projects of not more than two thousand horsepower installed capacity may be issued without charge, except on tribal lands within Indian reservations; but in no case shall a license be issued free of charge for the development and utilization of power created by any Government dam and that the amount charged therefor in any license shall be such as determined by the Commission: *Provided however*, That no charge shall be assessed for the use of any Government dam or structure by any licensee if, before January 1, 1985, the Secretary of the Interior has entered into a contract with such licensee that meets each of the following requirements:

(A) The contract covers one or more projects for which a license was issued by the Commission before January 1, 1985.

(B) The contract contains provisions specifically providing each of the following:

(i) A powerplant may be built by the licensee utilizing irrigation facilities constructed by the United States.

(ii) The powerplant shall remain in the exclusive control, possession, and ownership of the licensee concerned.

(iii) All revenue from the powerplant and from the use, sale, or disposal of electric energy from the powerplant shall be, and remain, the property of such licensee.

(C) The contract is an amendatory, supplemental and replacement contract between the United States and: (i) the Quincy-Columbia Basin Irrigation District (Contract No. 14-06-100-6418); (ii) the East Columbia Basin Irrigation District (Contract No. 14-06-100-6419); or, (iii) the South Columbia Basin Irrigation District (Contract No. 14-06-100-6420).

This paragraph shall apply to any project covered by a contract referred to in this paragraph only during the term of such contract unless otherwise provided by subsequent Act of Congress. In the event an overpayment of any charge due under this section shall be made by a licensee, the Commission is authorized to allow a credit for such overpayment when charges are due for any subsequent period.

(2) In the case of licenses involving the use of Government dams or other structures owned by the United States, the charges fixed (or readjusted) by the Commission under paragraph (1) for the use of such dams or structures shall not exceed 1 mill per kilowatt-hour for the first 40 gigawatt-hours of energy a project produces in any year, 1½ mills per kilowatt-hour for over 40 up to and including 80 gigawatt-hours in any year, and 2 mills per kilowatt-hour for any energy the project produces over 80 gigawatt-hours in any year. Except as provided in subsection (f) of this section, such charge shall be the only charge assessed by any agency of the United States for the use of such dams or structures.

(3) The provisions of paragraph (2) shall apply with respect to—

(A) all licenses issued after October 16, 1986; and

(B) all licenses issued before October 16, 1986, which—

- (i) did not fix a specific charge for the use of the Government dam or structure involved; and
- (ii) did not specify that no charge would be fixed for the use of such dam or structure.

(4) Every 5 years, the Commission shall review the appropriateness of the annual charge limitations provided for in this subsection and report to Congress concerning its recommendations thereon.

(f) Reimbursement by licensee of other licensees, etc.

That whenever any licensee hereunder is directly benefited by the construction work of another licensee, a permittee, or of the United States of a storage reservoir or other headwater improvement, the Commission shall require as a condition of the license that the licensee so benefited shall reimburse the owner of such reservoir or other improvements for such part of the annual charges for interest, maintenance, and depreciation thereon as the Commission may deem equitable. The proportion of such charges to be paid by any licensee shall be determined by the Commission. The licensees or permittees affected shall pay to the United States the cost of making such determination as fixed by the Commission.

Whenever such reservoir or other improvement is constructed by the United States the Commission shall assess similar charges against any licensee directly benefited thereby, and any amount so assessed shall be paid into the Treasury of the United States, to be reserved and appropriated as a part of the special fund for headwater improvements as provided in section 810 of this title.

Whenever any power project not under license is benefited by the construction work of a licensee or permittee, the United States or any agency thereof, the Commission, after notice to the owner or owners of such unlicensed project, shall determine and fix a reasonable and equitable annual charge to be paid to the licensee or permittee on account of such benefits, or to the United States if it be the owner of such headwater improvement.

(g) Conditions in discretion of commission

Such other conditions not inconsistent with the provisions of this chapter as the commission may require.

(h) Monopolistic combinations; prevention or minimization of anticompetitive conduct; action by Commission regarding license and operation and maintenance of project

(1) Combinations, agreements, arrangements, or understandings, express or implied, to limit the output of electrical energy, to restrain trade, or to fix, maintain, or increase prices for electrical energy or service are hereby prohibited.

(2) That conduct under the license that: (A) results in the contravention of the policies expressed in the antitrust laws; and (B) is not otherwise justified by the public interest considering regulatory policies expressed in other applicable law (including but not limited to those contained in subchapter II of this chapter) shall be prevented or adequately minimized by means of conditions included in the license prior to its issuance. In the event it is impossible to prevent or adequately minimize the contravention, the Commission shall refuse to issue any license to the applicant for the project and, in the case of an existing project, shall take appropriate action to provide thereafter for the operation and maintenance of the affected project and for the issuing of a new license in accordance with section 808 of this title.

(i) Waiver of conditions

In issuing licenses for a minor part only of a complete project, or for a complete project of not more than two thousand horsepower installed capacity, the Commission may in its discretion waive such conditions, provisions, and requirements of this subchapter, except the license period of fifty years, as it may deem to be to the public interest to waive under the circumstances: *Provided*, That the provisions hereof shall not apply to annual charges for use of lands within Indian reservations.

(j) Fish and wildlife protection, mitigation and enhancement; consideration of recommendations; findings

(1) That in order to adequately and equitably protect, mitigate damages to, and enhance, fish and wildlife (including related spawning grounds and habitat) affected by the development, operation, and management of the project, each license issued under this subchapter shall include conditions for such protection, mitigation, and enhancement. Subject to paragraph (2), such conditions shall be based on recommendations received pursuant to the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) from the National Marine Fisheries Service, the United States Fish and Wildlife Service, and State fish and wildlife agencies.

(2) Whenever the Commission believes that any recommendation referred to in paragraph (1) may be inconsistent with the purposes and requirements of this subchapter or other applicable law, the Commission and the agencies referred to in paragraph (1) shall attempt to resolve any such inconsistency, giving due weight to the recommendations, expertise, and statutory responsibilities of such agencies. If, after such attempt, the Commission does not adopt in whole or in part a recommendation of any such agency, the Commission shall publish each of the following findings (together with a statement of the basis for each of the findings):

(A) A finding that adoption of such recommendation is inconsistent with the purposes and requirements of this subchapter or with other applicable provisions of law.

(B) A finding that the conditions selected by the Commission comply with the requirements of paragraph (1).

Subsection (i) of this section shall not apply to the conditions required under this subsection.

§804. Project works affecting navigable waters; requirements insertable in license

If the dam or other project works are to be constructed across, along, or in any of the navigable waters of the United States, the commission may, insofar as it deems the same reasonably necessary to promote the present and future needs of navigation and consistent with a reasonable investment cost to the licensee, include in the license any one or more of the following provisions or requirements:

(a) That such licensee shall, to the extent necessary to preserve and improve navigation facilities, construct, in whole or in part, without expense to the United States, in connection with such dam, a lock or locks, booms, sluices, or other structures for navigation purposes, in accordance with plans and specifications approved by the Chief of Engineers and the Secretary of the Army and made part of such license.

(b) That in case such structures for navigation purposes are not made a part of the original construction at the expense of the licensee, then whenever the United States shall desire to complete such navigation facilities the licensee shall convey to the United States, free of cost, such of its land and its rights-of-way and such right of passage through its dams or other structures, and permit such control of pools as may be required to complete such navigation facilities.

The licensee shall commence the construction of the project works within the time fixed in the license, which shall not be more than two years from the date thereof, shall thereafter in good faith and with due diligence prosecute such construction, and shall within the time fixed in the license complete and put into operation such part of the ultimate development as the commission shall deem necessary to supply the reasonable needs of the then available market, and shall from time to time thereafter construct such portion of the balance of such development as the commission may direct, so as to supply adequately the reasonable market demands until such development shall have been completed. The periods for the commencement of construction may be extended once but not longer than two additional years and the period for the completion of construction carried on in good faith and with reasonable diligence may be extended by the commission when not incompatible with the public interests. In case the licensee shall not commence actual construction of the project works, or of any specified part thereof, within the time prescribed in the license or as extended by the commission, then, after due notice given, the license shall, as to such project works or part thereof, be terminated upon written order of the commission. In case the construction of the project works, or of any specified part thereof, has been begun but not completed within the time prescribed in the license, or as extended by the commission, then the Attorney General, upon the request of the commission, shall institute proceedings in equity in the district court of the United States for the district in which any part of the project is situated for the revocation of said license, the sale of the works constructed, and such other equitable relief as the case may demand, as provided for in section 820 of this title.

The net investment of the licensee in the project or projects so taken and the amount of such severance damages, if any, shall be determined by the Commission after notice and opportunity for hearing. Such net investment shall not include or be affected by the value of any lands, rights-of-way, or other property of the United States licensed by the Commission under this chapter, by the license or by good will, going value, or prospective revenues; nor shall the values allowed for water rights, rights-of-way, lands, or interest in lands be in excess of the actual reasonable cost thereof at the time of acquisition by the licensee: *Provided*, That the right of the United States or any State or municipality to take over, maintain, and operate any project licensed under this chapter at any time by condemnation proceedings upon payment of just compensation is expressly reserved.

(b) Relicensing proceedings; Federal agency recommendations of take over by Government; stay of orders for new licenses; termination of stay; notice to Congress

In any relicensing proceeding before the Commission any Federal department or agency may timely recommend, pursuant to such rules as the Commission shall prescribe, that the United States exercise its right to take over any project or projects. Thereafter, the Commission, if its ¹ does not itself recommend such action pursuant to the provisions of section 800(c) of this title, shall upon motion of such department or agency stay the effective date of any order issuing a license, except an order issuing an annual license in accordance with the proviso of section 808(a) of this title, for two years after the date of issuance of such order, after which period the stay shall terminate, unless terminated earlier upon motion of the department or agency requesting the stay or by action of Congress. The Commission shall notify the Congress of any stay granted pursuant to this subsection.

§808. New licenses and renewals

(a) Relicensing procedures; terms and conditions; issuance to applicant with proposal best adapted to serve public interest; factors considered

(1) If the United States does not, at the expiration of the existing license, exercise its right to take over, maintain, and operate any project or projects of the licensee, as provided in section 807 of this title, the commission is authorized to issue a new license to the existing licensee upon such terms and conditions as may be authorized or required under the then existing laws and regulations, or to issue a new license under said terms and conditions to a new licensee, which license may cover any project or projects covered by the existing license, and shall be issued on the condition that the new licensee shall, before taking possession of such project or projects, pay such amount, and assume such contracts as the United States is required to do in the manner specified in section 807 of this title: *Provided*, That in the event the United States does not exercise the right to take over or does not issue a license to a new licensee, or issue a new license to the existing licensee, upon reasonable terms, then the commission shall issue from year to year an annual license to the then licensee under the terms and conditions of the existing license until the property is taken over or a new license is issued as aforesaid.

(2) Any new license issued under this section shall be issued to the applicant having the final proposal which the Commission determines is best adapted to serve the public interest, except that in making this determination the Commission shall ensure that insignificant differences with regard to subparagraphs (A) through (G) of this paragraph between competing applications are not determinative and shall not result in the transfer of a project. In making a determination under this section (whether or not more than one application is submitted for the project), the Commission shall, in addition to the requirements of section 803 of this title, consider (and explain such consideration in writing) each of the following:

(A) The plans and abilities of the applicant to comply with (i) the articles, terms, and conditions of any license issued to it and (ii) other applicable provisions of this subchapter.

(B) The plans of the applicant to manage, operate, and maintain the project safely.

(C) The plans and abilities of the applicant to operate and maintain the project in a manner most likely to provide efficient and reliable electric service.

(D) The need of the applicant over the short and long term for the electricity generated by the project or projects to serve its customers, including, among other relevant considerations, the reasonable costs and reasonable availability of alternative sources of power, taking into consideration conservation and other relevant factors and taking into consideration the effect on the provider (including its customers) of the alternative source of power, the effect on the applicant's operating and load characteristics, the effect on communities served or to be served by the project, and in the case of an applicant using power for the applicant's own industrial facility and related operations, the effect on the operation and efficiency of such facility or related operations, its workers, and the related community. In the case of an applicant that is an Indian tribe applying for a license for a project located on the tribal reservation, a statement of the need of such tribe for electricity generated by the project to foster the purposes of the reservation may be included.

(E) The existing and planned transmission services of the applicant, taking into consideration system reliability, costs, and other applicable economic and technical factors.

(F) Whether the plans of the applicant will be achieved, to the greatest extent possible, in a cost effective manner.

(G) Such other factors as the Commission may deem relevant, except that the terms and conditions in the license for the protection, mitigation, or enhancement of fish and wildlife resources affected by the development, operation, and management of the project shall be determined in accordance with section 803 of this title, and the plans of an applicant concerning fish and wildlife shall not be subject to a comparative evaluation under this subsection.

(3) In the case of an application by the existing licensee, the Commission shall also take into consideration each of the following:

(A) The existing licensee's record of compliance with the terms and conditions of the existing license.

(B) The actions taken by the existing licensee related to the project which affect the public.

(b) Notification of intention regarding renewal; public availability of documents; notice to public and Federal agencies; identification of Federal or Indian lands included; additional information required

(1) Each existing licensee shall notify the Commission whether the licensee intends to file an application for a new license or not. Such notice shall be submitted at least 5 years before the expiration of the existing license.

(2) At the time notice is provided under paragraph (1), the existing licensee shall make each of the following reasonably available to the public for inspection at the offices of such licensee: current maps, drawings, data, and such other information as the Commission shall, by rule, require regarding the construction and operation of the licensed project. Such information shall include, to the greatest extent practicable pertinent energy conservation, recreation, fish and wildlife, and other environmental information. Copies of the information shall be made available at reasonable costs of reproduction. Within 180 days after October 16, 1986, the Commission shall promulgate regulations regarding the information to be provided under this paragraph.

(3) Promptly following receipt of notice under paragraph (1), the Commission shall provide public notice of whether an existing licensee intends to file or not to file an application for a new license. The Commission shall also promptly notify the National Marine Fisheries Service and the United States Fish and Wildlife Service, and the appropriate State fish and wildlife agencies.

(4) The Commission shall require the applicant to identify any Federal or Indian lands included in the project boundary, together with a statement of the annual fees paid as required by this subchapter for such lands, and to provide such additional information as the Commission deems appropriate to carry out the Commission's responsibilities under this section.

(c) Time of filing application; consultation and participation in studies with fish and wildlife agencies; notice to applicants; adjustment of time periods

(1) Each application for a new license pursuant to this section shall be filed with the Commission at least 24 months before the expiration of the term of the existing license. Each applicant shall consult with the fish and wildlife agencies referred to in subsection (b) of this section and, as appropriate, conduct studies with such agencies. Within 60 days after the statutory deadline for the submission of applications, the Commission shall issue a notice establishing expeditious procedures for relicensing and a deadline for submission of final amendments, if any, to the application.

(2) The time periods specified in this subsection and in subsection (b) of this section shall be adjusted, in a manner that achieves the objectives of this section, by the Commission by rule or order with respect to existing licensees who, by reason of the expiration dates of their licenses, are unable to comply with a specified time period.

(d) Adequacy of transmission facilities; provision of services to successor by existing licensee; tariff; final order; modification, extension or termination of order

(1) In evaluating applications for new licenses pursuant to this section, the Commission shall not consider whether an applicant has adequate transmission facilities with regard to the project.

(2) When the Commission issues a new license (pursuant to this section) to an applicant which is not the existing licensee of the project and finds that it is not feasible for the new licensee to utilize the energy from such project without provision by the existing licensee of reasonable services, including transmission services, the Commission shall give notice to the existing licensee and the new licensee to immediately enter into negotiations for such services and the costs demonstrated by the existing licensee as being related to the provision of such services. It is the intent of the Congress that such negotiations be carried out in good faith and that a timely agreement be reached between the parties in order to facilitate the transfer of the license by the date established when the

Commission issued the new license. If such parties do not notify the Commission that within the time established by the Commission in such notice (and if appropriate, in the judgment of the Commission, one 45-day extension thereof), a mutually satisfactory arrangement for such services that is consistent with the provisions of this chapter has been executed, the Commission shall order the existing licensee to file (pursuant to section 824d of this title) with the Commission a tariff, subject to refund, ensuring such services beginning on the date of transfer of the project and including just and reasonable rates and reasonable terms and conditions. After notice and opportunity for a hearing, the Commission shall issue a final order adopting or modifying such tariff for such services at just and reasonable rates in accordance with section 824d of this title and in accordance with reasonable terms and conditions. The Commission, in issuing such order, shall ensure the services necessary for the full and efficient utilization and benefits for the license term of the electric energy from the project by the new licensee in accordance with the license and this subchapter, except that in issuing such order the Commission—

(A) shall not compel the existing licensee to enlarge generating facilities, transmit electric energy other than to the distribution system (providing service to customers) of the new licensee identified as of the date one day preceding the date of license award, or require the acquisition of new facilities, including the upgrading of existing facilities other than any reasonable enhancement or improvement of existing facilities controlled by the existing licensee (including any acquisition related to such enhancement or improvement) necessary to carry out the purposes of this paragraph;

(B) shall not adversely affect the continuity and reliability of service to the customers of the existing licensee;

(C) shall not adversely affect the operational integrity of the transmission and electric systems of the existing licensee;

(D) shall not cause any reasonably quantifiable increase in the jurisdictional rates of the existing licensee; and

(E) shall not order any entity other than the existing licensee to provide transmission or other services.

Such order shall be for such period as the Commission deems appropriate, not to exceed the term of the license. At any time, the Commission, upon its own motion or upon a petition by the existing or new licensee and after notice and opportunity for a hearing, may modify, extend, or terminate such order.

(e) License term on relicensing

Except for an annual license, any license issued by the Commission under this section shall be for a term which the Commission determines to be in the public interest but not less than 30 years, nor more than 50 years, from the date on which the license is issued.

(f) Nonpower use licenses; recordkeeping

In issuing any licenses under this section except an annual license, the Commission, on its own motion or upon application of any licensee, person, State, municipality, or State commission, after notice to each State commission and licensee affected, and after opportunity for hearing, whenever it finds that in conformity with a comprehensive plan for improving or developing a waterway or waterways for beneficial public uses all or part of any licensed project should no longer be used or adapted for use for power purposes, may license all or part of the project works for nonpower use. A license for nonpower use shall be issued to a new licensee only on the condition that the new licensee shall, before taking possession of the facilities encompassed thereunder, pay such amount and assume such contracts as the United States is required to do, in the manner specified in section 807 of this title. Any license for nonpower use shall be a temporary license. Whenever, in the judgment of the Commission, a State, municipality, interstate agency, or another Federal agency is authorized and willing to assume regulatory supervision of the lands and facilities included under the nonpower license and does so, the Commission shall thereupon terminate the license. Consistent with the provisions of subchapter IV of this chapter, every licensee for nonpower use shall keep such

accounts and file such annual and other periodic or special reports concerning the removal, alteration, nonpower use, or other disposition of any project works or parts thereof covered by the nonpower use license as the Commission may by rules and regulations or order prescribe as necessary or appropriate.

subdivision that owns the lands or property, that the license will not interfere or be inconsistent with the purposes for which such lands or property are owned.

CODIFICATION

As originally enacted, this section contained the further proviso: “That section 18 of an Act making appropriations for the construction, repair and preservation, of certain public works on rivers and harbors, and for other purposes, approved August 8, 1917, is hereby repealed.”

§823a. Conduit hydroelectric facilities

(a) Qualifying conduit hydropower facilities

(1) A qualifying conduit hydropower facility shall not be required to be licensed under this subchapter.

(2)(A) Any person, State, or municipality proposing to construct a qualifying conduit hydropower facility shall file with the Commission a notice of intent to construct such facility. The notice shall include sufficient information to demonstrate that the facility meets the qualifying criteria.

(B) Not later than 15 days after receipt of a notice of intent filed under subparagraph (A), the Commission shall—

- (i) make an initial determination as to whether the facility meets the qualifying criteria; and
- (ii) if the Commission makes an initial determination, pursuant to clause (i), that the facility meets the qualifying criteria, publish public notice of the notice of intent filed under subparagraph (A).

(C) If, not later than 45 days after the date of publication of the public notice described in subparagraph (B)(ii)—

- (i) an entity contests whether the facility meets the qualifying criteria, the Commission shall promptly issue a written determination as to whether the facility meets such criteria; or
- (ii) no entity contests whether the facility meets the qualifying criteria, the facility shall be deemed to meet such criteria.

(3) For purposes of this section:

(A) The term “conduit” means any tunnel, canal, pipeline, aqueduct, flume, ditch, or similar manmade water conveyance that is operated for the distribution of water for agricultural, municipal, or industrial consumption and not primarily for the generation of electricity.

(B) The term “qualifying conduit hydropower facility” means a facility (not including any dam or other impoundment) that is determined or deemed under paragraph (2)(C) to meet the qualifying criteria.

(C) The term “qualifying criteria” means, with respect to a facility—

- (i) the facility is constructed, operated, or maintained for the generation of electric power and uses for such generation only the hydroelectric potential of a non-federally owned conduit;
- (ii) the facility has an installed capacity that does not exceed 5 megawatts; and
- (iii) on or before August 9, 2013, the facility is not licensed under, or exempted from the license requirements contained in, this subchapter.

(b) Exemption qualifications

Subject to subsection (c), the Commission may grant an exemption in whole or in part from the requirements of this subchapter, including any license requirements contained in this subchapter, to any facility (not including any dam or other impoundment) constructed, operated, or maintained for the generation of electric power which the Commission determines, by rule or order—

- (1) utilizes for such generation only the hydroelectric potential of a conduit; and

(2) has an installed capacity that does not exceed 40 megawatts.

(c) Consultation with Federal and State agencies

In making the determination under subsection (b) of this section the Commission shall consult with the United States Fish and Wildlife Service ¹ National Marine Fisheries Service ¹ and the State agency exercising administration over the fish and wildlife resources of the State in which the facility is or will be located, in the manner provided by the Fish and Wildlife Coordination Act (16 U.S.C. 661, et seq.), and shall include in any such exemption—

(1) such terms and conditions as the Fish and Wildlife Service ¹ National Marine Fisheries Service ¹ and the State agency each determine are appropriate to prevent loss of, or damage to, such resources and to otherwise carry out the purposes of such Act, and

(2) such terms and conditions as the Commission deems appropriate to insure that such facility continues to comply with the provisions of this section and terms and conditions included in any such exemption.

(d) Violation of terms of exemption

Any violation of a term or condition of any exemption granted under subsection (b) of this section shall be treated as a violation of a rule or order of the Commission under this chapter.

(e) Fees for studies

The Commission, in addition to the requirements of section 803(e) of this title, shall establish fees which shall be paid by an applicant for a license or exemption for a project that is required to meet terms and conditions set by fish and wildlife agencies under subsection (c) of this section. Such fees shall be adequate to reimburse the fish and wildlife agencies referred to in subsection (c) of this section for any reasonable costs incurred in connection with any studies or other reviews carried out by such agencies for purposes of compliance with this section. The fees shall, subject to annual appropriations Acts, be transferred to such agencies by the Commission for use solely for purposes of carrying out such studies and shall remain available until expended.

2013—Subsecs. (a), (b). Pub. L. 113–23, §4(a)(1), added subsecs. (a) and (b) and struck out former subsecs. (a) and (b) which authorized the Commission to grant exemptions from the requirements of this subchapter for certain hydroelectric facilities and prohibited the granting of exemptions to facilities with certain capacities.

Subsec. (c). Pub. L. 113–23, §4(a)(2), substituted “subsection (b)” for “subsection (a)” in introductory provisions.

Subsec. (d). Pub. L. 113–23, §4(a)(3), substituted “subsection (b)” for “subsection (a)”.

1986—Subsec. (b). Pub. L. 99–495, §7(a), inserted provision setting the maximum installation capacity for exemptions under subsec. (a) at 40 megawatts in the case of a facility constructed, operated, and maintained by an agency or instrumentality of a State or local government solely for water supply for municipal purposes.

Subsec. (c). Pub. L. 99–495, §7(b), which directed the insertion of “National Marine Fisheries Service” after “the Fish and Wildlife Service” in both places such term appears, was executed by inserting “National Marine Fisheries Service” after “the United States Fish and Wildlife Service” and “the Fish and Wildlife Service”, as the probable intent of Congress.

¹ So in original. Probably should be followed by a comma.

§823b. Enforcement

(a) Monitoring and investigation

The Commission shall monitor and investigate compliance with each license and permit issued under this subchapter and with each exemption granted from any requirement of this subchapter. The Commission shall conduct such investigations as may be necessary and proper in accordance with this chapter. After notice and opportunity for public hearing, the Commission may issue such orders as necessary to require compliance with the terms and conditions of licenses and permits issued under this subchapter and with the terms and conditions of exemptions granted from any requirement of this subchapter.

(b) Revocation orders

After notice and opportunity for an evidentiary hearing, the Commission may also issue an order revoking any license issued under this subchapter or any exemption granted from any requirement of this subchapter where any licensee or exemptee is found by the Commission:

- (1) to have knowingly violated a final order issued under subsection (a) of this section after completion of judicial review (or the opportunity for judicial review); and
- (2) to have been given reasonable time to comply fully with such order prior to commencing any revocation proceeding.

In any such proceeding, the order issued under subsection (a) of this section shall be subject to de novo review by the Commission. No order shall be issued under this subsection until after the Commission has taken into consideration the nature and seriousness of the violation and the efforts of the licensee to remedy the violation.

(c) Civil penalty

Any licensee, permittee, or exemptee who violates or fails or refuses to comply with any rule or regulation under this subchapter, any term, or condition of a license, permit, or exemption under this subchapter, or any order issued under subsection (a) of this section shall be subject to a civil penalty in an amount not to exceed \$10,000 for each day that such violation or failure or refusal continues. Such penalty shall be assessed by the Commission after notice and opportunity for public hearing. In determining the amount of a proposed penalty, the Commission shall take into consideration the nature and seriousness of the violation, failure, or refusal and the efforts of the licensee to remedy the violation, failure, or refusal in a timely manner. No civil penalty shall be assessed where revocation is ordered.

(d) Assessment

(1) Before issuing an order assessing a civil penalty against any person under this section, the Commission shall provide to such person notice of the proposed penalty. Such notice shall, except in the case of a violation of a final order issued under subsection (a) of this section, inform such person of his opportunity to elect in writing within 30 days after the date of receipt of such notice to have

the procedures of paragraph (3) (in lieu of those of paragraph (2)) apply with respect to such assessment.

(2)(A) In the case of the violation of a final order issued under subsection (a) of this section, or unless an election is made within 30 calendar days after receipt of notice under paragraph (1) to have paragraph (3) apply with respect to such penalty, the Commission shall assess the penalty, by order, after a determination of violation has been made on the record after an opportunity for an agency hearing pursuant to section 554 of title 5 before an administrative law judge appointed under section 3105 of such title 5. Such assessment order shall include the administrative law judge's findings and the basis for such assessment.

(B) Any person against whom a penalty is assessed under this paragraph may, within 60 calendar days after the date of the order of the Commission assessing such penalty, institute an action in the United States court of appeals for the appropriate judicial circuit for judicial review of such order in accordance with chapter 7 of title 5. The court shall have jurisdiction to enter a judgment affirming, modifying, or setting aside in whole or in Part,¹ the order of the Commission, or the court may remand the proceeding to the Commission for such further action as the court may direct.

(3)(A) In the case of any civil penalty with respect to which the procedures of this paragraph have been elected, the Commission shall promptly assess such penalty, by order, after the date of the receipt of the notice under paragraph (1) of the proposed penalty.

(B) If the civil penalty has not been paid within 60 calendar days after the assessment order has been made under subparagraph (A), the Commission shall institute an action in the appropriate district court of the United States for an order affirming the assessment of the civil penalty. The court shall have authority to review de novo the law and the facts involved, and shall have jurisdiction to enter a judgment enforcing, modifying, and enforcing as so modified, or setting aside in whole or in Part,¹ such assessment.

(C) Any election to have this paragraph apply may not be revoked except with the consent of the Commission.

(4) The Commission may compromise, modify, or remit, with or without conditions, any civil penalty which may be imposed under this subsection, taking into consideration the nature and seriousness of the violation and the efforts of the licensee to remedy the violation in a timely manner at any time prior to a final decision by the court of appeals under paragraph (2) or by the district court under paragraph (3).

(5) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order under paragraph (2), or after the appropriate district court has entered final judgment in favor of the Commission under paragraph (3), the Commission shall institute an action to recover the amount of such penalty in any appropriate district court of the United States. In such action, the validity and appropriateness of such final assessment order or judgment shall not be subject to review.

(6)(A) Notwithstanding the provisions of title 28 or of this chapter, the Commission may be represented by the general counsel of the Commission (or any attorney or attorneys within the Commission designated by the Chairman) who shall supervise, conduct, and argue any civil litigation to which paragraph (3) of this subsection applies (including any related collection action under paragraph (5)) in a court of the United States or in any other court, except the Supreme Court. However, the Commission or the general counsel shall consult with the Attorney General concerning such litigation, and the Attorney General shall provide, on request, such assistance in the conduct of such litigation as may be appropriate.

(B) The Commission shall be represented by the Attorney General, or the Solicitor General, as appropriate, in actions under this subsection, except to the extent provided in subparagraph (A) of this paragraph.

(June 10, 1920, ch. 285, pt. I, §31, as added Pub. L. 99–495, §12, Oct. 16, 1986, 100 Stat. 1255.)

§823c. Alaska State jurisdiction over small hydroelectric projects

(a) Discontinuance of regulation by the Commission

Notwithstanding sections 797(e) and 817 of this title, the Commission shall discontinue exercising licensing and regulatory authority under this subchapter over qualifying project works in the State of Alaska, effective on the date on which the Commission certifies that the State of Alaska has in place a regulatory program for water-power development that—

(1) protects the public interest, the purposes listed in paragraph (2), and the environment to the same extent provided by licensing and regulation by the Commission under this subchapter and other applicable Federal laws, including the Endangered Species Act (16 U.S.C. 1531 et seq.) and the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.);

(2) gives equal consideration to the purposes of—

(A) energy conservation;

(B) the protection, mitigation of damage to, and enhancement of, fish and wildlife (including related spawning grounds and habitat);

(C) the protection of recreational opportunities;

(D) the preservation of other aspects of environmental quality;

(E) the interests of Alaska Natives; and

(F) other beneficial public uses, including irrigation, flood control, water supply, and navigation; and

(3) requires, as a condition of a license for any project works—

(A) the construction, maintenance, and operation by a licensee at its own expense of such lights and signals as may be directed by the Secretary of the Department in which the Coast Guard is operating, and such fishways as may be prescribed by the Secretary of the Interior or the Secretary of Commerce, as appropriate;

(B) the operation of any navigation facilities which may be constructed as part of any project to be controlled at all times by such reasonable rules and regulations as may be made by the Secretary of the Army; and

(C) except as provided in subsection (j) of this section, conditions for the protection, mitigation, and enhancement of fish and wildlife based on recommendations received pursuant to the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) from the National Marine Fisheries Service, the United States Fish and Wildlife Service, and State fish and wildlife agencies.

(b) Definition of “qualifying project works”

For purposes of this section, the term “qualifying project works” means project works—

(1) that are not part of a project licensed under this part or exempted from licensing under this subchapter or section 2705 of this title prior to November 9, 2000;

(2) for which a preliminary permit, a license application, or an application for an exemption from licensing has not been accepted for filing by the Commission prior to November 9, 2000 (unless such application is withdrawn at the election of the applicant);

(3) that are part of a project that has a power production capacity of 5,000 kilowatts or less;

(4) that are located entirely within the boundaries of the State of Alaska; and

(5) that are not located in whole or in part on any Indian reservation, a conservation system unit (as defined in section 3102(4) of this title), or segment of a river designated for study for addition to the Wild and Scenic Rivers System.

(c) Election of State licensing

In the case of nonqualifying project works that would be a qualifying project works but for the fact

that the project has been licensed (or exempted from licensing) by the Commission prior to November 9, 2000, the licensee of such project may in its discretion elect to make the project subject to licensing and regulation by the State of Alaska under this section.

(d) Project works on Federal lands

With respect to projects located in whole or in part on a reservation, a conservation system unit, or the public lands, a State license or exemption from licensing shall be subject to—

- (1) the approval of the Secretary having jurisdiction over such lands; and
- (2) such conditions as the Secretary may prescribe.

(e) Consultation with affected agencies

The Commission shall consult with the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Commerce before certifying the State of Alaska's regulatory program.

(f) Application of Federal laws

Nothing in this section shall preempt the application of Federal environmental, natural resources, or cultural resources protection laws according to their terms.

(g) Oversight by the Commission

The State of Alaska shall notify the Commission not later than 30 days after making any significant modification to its regulatory program. The Commission shall periodically review the State's program to ensure compliance with the provisions of this section.

(h) Resumption of Commission authority

Notwithstanding subsection (a) of this section, the Commission shall reassert its licensing and regulatory authority under this subchapter if the Commission finds that the State of Alaska has not complied with one or more of the requirements of this section.

(i) Determination by the Commission

(1) Upon application by the Governor of the State of Alaska, the Commission shall within 30 days commence a review of the State of Alaska's regulatory program for water-power development to determine whether it complies with the requirements of subsection (a) of this section.

(2) The Commission's review required by paragraph (1) shall be completed within 1 year of initiation, and the Commission shall within 30 days thereafter issue a final order determining whether or not the State of Alaska's regulatory program for water-power development complies with the requirements of subsection (a) of this section.

(3) If the Commission fails to issue a final order in accordance with paragraph (2) the State of Alaska's regulatory program for water-power development shall be deemed to be in compliance with subsection (a) of this section.

(j) Fish and wildlife

If the State of Alaska determines that a recommendation under subsection (a)(3)(C) of this section is inconsistent with paragraphs (1) and (2) of subsection (a) of this section, the State of Alaska may decline to adopt all or part of the recommendations in accordance with the procedures established under section 803(j)(2) of this title.

§823d. Alternative conditions and prescriptions

(a) Alternative conditions

(1) Whenever any person applies for a license for any project works within any reservation of the United States, and the Secretary of the department under whose supervision such reservation falls (referred to in this subsection as the “Secretary”) deems a condition to such license to be necessary under the first proviso of section 797(e) of this title, the license applicant or any other party to the license proceeding may propose an alternative condition.

(2) Notwithstanding the first proviso of section 797(e) of this title, the Secretary shall accept the proposed alternative condition referred to in paragraph (1), and the Commission shall include in the license such alternative condition, if the Secretary determines, based on substantial evidence provided by the license applicant, any other party to the proceeding, or otherwise available to the Secretary, that such alternative condition—

(A) provides for the adequate protection and utilization of the reservation; and

(B) will either, as compared to the condition initially by the Secretary—

(i) cost significantly less to implement; or

(ii) result in improved operation of the project works for electricity production.

(3) In making a determination under paragraph (2), the Secretary shall consider evidence provided for the record by any party to a licensing proceeding, or otherwise available to the Secretary, including any evidence provided by the Commission, on the implementation costs or operational impacts for electricity production of a proposed alternative.

(4) The Secretary concerned shall submit into the public record of the Commission proceeding with any condition under section 797(e) of this title or alternative condition it accepts under this section, a written statement explaining the basis for such condition, and reason for not accepting any alternative condition under this section. The written statement must demonstrate that the Secretary gave equal consideration to the effects of the condition adopted and alternatives not accepted on energy supply, distribution, cost, and use; flood control; navigation; water supply; and air quality (in addition to the preservation of other aspects of environmental quality); based on such information as may be available to the Secretary, including information voluntarily provided in a timely manner by the applicant and others. The Secretary shall also submit, together with the aforementioned written statement, all studies, data, and other factual information available to the Secretary and relevant to the Secretary's decision.

(5) If the Commission finds that the Secretary's final condition would be inconsistent with the purposes of this subchapter, or other applicable law, the Commission may refer the dispute to the Commission's Dispute Resolution Service. The Dispute Resolution Service shall consult with the Secretary and the Commission and issue a non-binding advisory within 90 days. The Secretary may accept the Dispute Resolution Service advisory unless the Secretary finds that the recommendation will not adequately protect the reservation. The Secretary shall submit the advisory and the Secretary's final written determination into the record of the Commission's proceeding.

(b) Alternative prescriptions

(1) Whenever the Secretary of the Interior or the Secretary of Commerce prescribes a fishway under section 811 of this title, the license applicant or any other party to the license proceeding may propose an alternative to such prescription to construct, maintain, or operate a fishway.

(2) Notwithstanding section 811 of this title, the Secretary of the Interior or the Secretary of Commerce, as appropriate, shall accept and prescribe, and the Commission shall require, the proposed alternative referred to in paragraph (1), if the Secretary of the appropriate department determines, based on substantial evidence provided by the license applicant, any other party to the proceeding, or otherwise available to the Secretary, that such alternative—

(A) will be no less protective than the fishway initially prescribed by the Secretary; and

(B) will either, as compared to the fishway initially prescribed by the Secretary—

(i) cost significantly less to implement; or

(ii) result in improved operation of the project works for electricity production.

(3) In making a determination under paragraph (2), the Secretary shall consider evidence provided for the record by any party to a licensing proceeding, or otherwise available to the Secretary, including any evidence provided by the Commission, on the implementation costs or operational impacts for electricity production of a proposed alternative.

(4) The Secretary concerned shall submit into the public record of the Commission proceeding with any prescription under section 811 of this title or alternative prescription it accepts under this section, a written statement explaining the basis for such prescription, and reason for not accepting any alternative prescription under this section. The written statement must demonstrate that the Secretary gave equal consideration to the effects of the prescription adopted and alternatives not accepted on energy supply, distribution, cost, and use; flood control; navigation; water supply; and air quality (in addition to the preservation of other aspects of environmental quality); based on such information as may be available to the Secretary, including information voluntarily provided in a timely manner by the applicant and others. The Secretary shall also submit, together with the aforementioned written statement, all studies, data, and other factual information available to the Secretary and relevant to the Secretary's decision.

(5) If the Commission finds that the Secretary's final prescription would be inconsistent with the purposes of this subchapter, or other applicable law, the Commission may refer the dispute to the Commission's Dispute Resolution Service. The Dispute Resolution Service shall consult with the Secretary and the Commission and issue a non-binding advisory within 90 days. The Secretary may accept the Dispute Resolution Service advisory unless the Secretary finds that the recommendation will not adequately protect the fish resources. The Secretary shall submit the advisory and the Secretary's final written determination into the record of the Commission's proceeding.

SUBCHAPTER II—REGULATION OF ELECTRIC UTILITY COMPANIES ENGAGED IN INTERSTATE COMMERCE

§824. Declaration of policy; application of subchapter

(a) Federal regulation of transmission and sale of electric energy

It is declared that the business of transmitting and selling electric energy for ultimate distribution to the public is affected with a public interest, and that Federal regulation of matters relating to generation to the extent provided in this subchapter and subchapter III of this chapter and of that part of such business which consists of the transmission of electric energy in interstate commerce and the

sale of such energy at wholesale in interstate commerce is necessary in the public interest, such Federal regulation, however, to extend only to those matters which are not subject to regulation by the States.

(b) Use or sale of electric energy in interstate commerce

(1) The provisions of this subchapter shall apply to the transmission of electric energy in interstate commerce and to the sale of electric energy at wholesale in interstate commerce, but except as provided in paragraph (2) shall not apply to any other sale of electric energy or deprive a State or State commission of its lawful authority now exercised over the exportation of hydroelectric energy which is transmitted across a State line. The Commission shall have jurisdiction over all facilities for such transmission or sale of electric energy, but shall not have jurisdiction, except as specifically provided in this subchapter and subchapter III of this chapter, over facilities used for the generation of electric energy or over facilities used in local distribution or only for the transmission of electric energy in intrastate commerce, or over facilities for the transmission of electric energy consumed wholly by the transmitter.

(2) Notwithstanding subsection (f) of this section, the provisions of sections 824b(a)(2), 824e(e), 824i, 824j, 824j-1, 824k, 824o, 824p, 824q, 824r, 824s, 824t, 824u, and 824v of this title shall apply to the entities described in such provisions, and such entities shall be subject to the jurisdiction of the Commission for purposes of carrying out such provisions and for purposes of applying the enforcement authorities of this chapter with respect to such provisions. Compliance with any order or rule of the Commission under the provisions of section 824b(a)(2), 824e(e), 824i, 824j, 824j-1, 824k, 824o, 824p, 824q, 824r, 824s, 824t, 824u, or 824v of this title, shall not make an electric utility or other entity subject to the jurisdiction of the Commission for any purposes other than the purposes specified in the preceding sentence.

(c) Electric energy in interstate commerce

For the purpose of this subchapter, electric energy shall be held to be transmitted in interstate commerce if transmitted from a State and consumed at any point outside thereof; but only insofar as such transmission takes place within the United States.

(d) “Sale of electric energy at wholesale” defined

The term “sale of electric energy at wholesale” when used in this subchapter, means a sale of electric energy to any person for resale.

(e) “Public utility” defined

The term “public utility” when used in this subchapter and subchapter III of this chapter means any person who owns or operates facilities subject to the jurisdiction of the Commission under this subchapter (other than facilities subject to such jurisdiction solely by reason of section 824e(e), 824e(f), ¹824i, 824j, 824j-1, 824k, 824o, 824p, 824q, 824r, 824s, 824t, 824u, or 824v of this title).

(f) United States, State, political subdivision of a State, or agency or instrumentality thereof exempt

No provision in this subchapter shall apply to, or be deemed to include, the United States, a State or any political subdivision of a State, an electric cooperative that receives financing under the Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) or that sells less than 4,000,000 megawatt hours of electricity per year, or any agency, authority, or instrumentality of any one or more of the foregoing, or any corporation which is wholly owned, directly or indirectly, by any one or more of the foregoing, or any officer, agent, or employee of any of the foregoing acting as such in the course of his official duty, unless such provision makes specific reference thereto.

(g) Books and records

(1) Upon written order of a State commission, a State commission may examine the books, accounts, memoranda, contracts, and records of—

(A) an electric utility company subject to its regulatory authority under State law,

(B) any exempt wholesale generator selling energy at wholesale to such electric utility, and

(C) any electric utility company, or holding company thereof, which is an associate company or affiliate of an exempt wholesale generator which sells electric energy to an electric utility company referred to in subparagraph (A),

wherever located, if such examination is required for the effective discharge of the State commission's regulatory responsibilities affecting the provision of electric service.

(2) Where a State commission issues an order pursuant to paragraph (1), the State commission shall not publicly disclose trade secrets or sensitive commercial information.

(3) Any United States district court located in the State in which the State commission referred to in paragraph (1) is located shall have jurisdiction to enforce compliance with this subsection.

(4) Nothing in this section shall—

(A) preempt applicable State law concerning the provision of records and other information; or

(B) in any way limit rights to obtain records and other information under Federal law, contracts, or otherwise.

(5) As used in this subsection the terms “affiliate”, “associate company”, “electric utility company”, “holding company”, “subsidiary company”, and “exempt wholesale generator” shall have the same meaning as when used in the Public Utility Holding Company Act of 2005 [42 U.S.C. 16451 et seq.].

§824a. Interconnection and coordination of facilities; emergencies; transmission to foreign countries

(a) Regional districts; establishment; notice to State commissions

For the purpose of assuring an abundant supply of electric energy throughout the United States with the greatest possible economy and with regard to the proper utilization and conservation of natural resources, the Commission is empowered and directed to divide the country into regional districts for the voluntary interconnection and coordination of facilities for the generation, transmission, and sale of electric energy, and it may at any time thereafter, upon its own motion or upon application, make such modifications thereof as in its judgment will promote the public interest. Each such district shall embrace an area which, in the judgment of the Commission, can economically be served by such interconnection and coordinated electric facilities. It shall be the duty of the Commission to promote and encourage such interconnection and coordination within each such district and between such districts. Before establishing any such district and fixing or modifying the boundaries thereof the Commission shall give notice to the State commission of each State situated wholly or in part within such district, and shall afford each such State commission reasonable opportunity to present its views and recommendations, and shall receive and consider such views and recommendations.

(b) Sale or exchange of energy; establishing physical connections

Whenever the Commission, upon application of any State commission or of any person engaged in the transmission or sale of electric energy, and after notice to each State commission and public utility affected and after opportunity for hearing, finds such action necessary or appropriate in the public interest it may by order direct a public utility (if the Commission finds that no undue burden will be placed upon such public utility thereby) to establish physical connection of its transmission facilities with the facilities of one or more other persons engaged in the transmission or sale of electric energy, to sell energy to or exchange energy with such persons: *Provided*, That the Commission shall have no authority to compel the enlargement of generating facilities for such purposes, nor to compel such public utility to sell or exchange energy when to do so would impair its

ability to render adequate service to its customers. The Commission may prescribe the terms and conditions of the arrangement to be made between the persons affected by any such order, including the apportionment of cost between them and the compensation or reimbursement reasonably due to any of them.

(c) Temporary connection and exchange of facilities during emergency

During the continuance of any war in which the United States is engaged, or whenever the Commission determines that an emergency exists by reason of a sudden increase in the demand for electric energy, or a shortage of electric energy or of facilities for the generation or transmission of electric energy, or of fuel or water for generating facilities, or other causes, the Commission shall have authority, either upon its own motion or upon complaint, with or without notice, hearing, or report, to require by order such temporary connections of facilities and such generation, delivery, interchange, or transmission of electric energy as in its judgment will best meet the emergency and serve the public interest. If the parties affected by such order fail to agree upon the terms of any arrangement between them in carrying out such order, the Commission, after hearing held either before or after such order takes effect, may prescribe by supplemental order such terms as it finds to be just and reasonable, including the compensation or reimbursement which should be paid to or by any such party.

(d) Temporary connection during emergency by persons without jurisdiction of Commission

During the continuance of any emergency requiring immediate action, any person engaged in the transmission or sale of electric energy and not otherwise subject to the jurisdiction of the Commission may make such temporary connections with any public utility subject to the jurisdiction of the Commission or may construct such temporary facilities for the transmission of electric energy in interstate commerce as may be necessary or appropriate to meet such emergency, and shall not become subject to the jurisdiction of the Commission by reason of such temporary connection or temporary construction: *Provided*, That such temporary connection shall be discontinued or such temporary construction removed or otherwise disposed of upon the termination of such emergency: *Provided further*, That upon approval of the Commission permanent connections for emergency use only may be made hereunder.

(e) Transmission of electric energy to foreign country

After six months from August 26, 1935, no person shall transmit any electric energy from the United States to a foreign country without first having secured an order of the Commission authorizing it to do so. The Commission shall issue such order upon application unless, after opportunity for hearing, it finds that the proposed transmission would impair the sufficiency of electric supply within the United States or would impede or tend to impede the coordination in the public interest of facilities subject to the jurisdiction of the Commission. The Commission may by its order grant such application in whole or in part, with such modifications and upon such terms and conditions as the Commission may find necessary or appropriate, and may from time to time, after opportunity for hearing and for good cause shown, make such supplemental orders in the premises as it may find necessary or appropriate.

(f) Transmission or sale at wholesale of electric energy; regulation

The ownership or operation of facilities for the transmission or sale at wholesale of electric energy which is (a) generated within a State and transmitted from the State across an international boundary and not thereafter transmitted into any other State, or (b) generated in a foreign country and transmitted across an international boundary into a State and not thereafter transmitted into any other State, shall not make a person a public utility subject to regulation as such under other provisions of this subchapter. The State within which any such facilities are located may regulate any such transaction insofar as such State regulation does not conflict with the exercise of the Commission's powers under or relating to subsection (e) of this section.

(g) Continuance of service

In order to insure continuity of service to customers of public utilities, the Commission shall

require, by rule, each public utility to—

(1) report promptly to the Commission and any appropriate State regulatory authorities any anticipated shortage of electric energy or capacity which would affect such utility's capability of serving its wholesale customers,

(2) submit to the Commission, and to any appropriate State regulatory authority, and periodically revise, contingency plans respecting—

(A) shortages of electric energy or capacity, and

(B) circumstances which may result in such shortages, and

(3) accommodate any such shortages or circumstances in a manner which shall—

(A) give due consideration to the public health, safety, and welfare, and

(B) provide that all persons served directly or indirectly by such public utility will be treated, without undue prejudice or disadvantage.

§824a–1. Pooling

(a) State laws

The Commission may, on its own motion, and shall, on application of any person or governmental entity, after public notice and notice to the Governor of the affected State and after affording an opportunity for public hearing, exempt electric utilities, in whole or in part, from any provision of State law, or from any State rule or regulation, which prohibits or prevents the voluntary coordination of electric utilities, including any agreement for central dispatch, if the Commission determines that such voluntary coordination is designed to obtain economical utilization of facilities and resources in any area. No such exemption may be granted if the Commission finds that such provision of State law, or rule or regulation—

(1) is required by any authority of Federal law, or

(2) is designed to protect public health, safety, or welfare, or the environment or conserve energy or is designed to mitigate the effects of emergencies resulting from fuel shortages.

(b) Pooling study

(1) The Commission, in consultation with the reliability councils established under section 202(a) of the Federal Power Act [16 U.S.C. 824a], the Secretary, and the electric utility industry shall study the opportunities for—

- (A) conservation of energy,
- (B) optimization in the efficiency of use of facilities and resources, and
- (C) increased reliability,

through pooling arrangements. Not later than 18 months after November 9, 1978, the Commission shall submit a report containing the results of such study to the President and the Congress.

(2) The Commission may recommend to electric utilities that such utilities should voluntarily enter into negotiations where the opportunities referred to in paragraph (1) exist. The Commission shall report annually to the President and the Congress regarding any such recommendations and subsequent actions taken by electric utilities, by the Commission, and by the Secretary under this Act, the Federal Power Act [16 U.S.C. 791a et seq.], and any other provision of law. Such annual reports shall be included in the Commission's annual report required under the Department of Energy Organization Act [42 U.S.C. 7101 et seq.].

§824a–2. Reliability

(a) Study

(1) The Secretary, in consultation with the Commission, shall conduct a study with respect to—

- (A) the level of reliability appropriate to adequately serve the needs of electric consumers, taking into account cost effectiveness and the need for energy conservation,
- (B) the various methods which could be used in order to achieve such level of reliability and the cost effectiveness of such methods, and
- (C) the various procedures that might be used in case of an emergency outage to minimize the public disruption and economic loss that might be caused by such an outage and the cost effectiveness of such procedures.

Such study shall be completed and submitted to the President and the Congress not later than 18 months after November 9, 1978. Before such submittal the Secretary shall provide an opportunity for public comment on the results of such study.

(2) The study under paragraph (1) shall include consideration of the following:

- (A) the cost effectiveness of investments in each of the components involved in providing

adequate and reliable electric service, including generation, transmission, and distribution facilities, and devices available to the electric consumer;

(B) the environmental and other effects of the investments considered under subparagraph (A);

(C) various types of electric utility systems in terms of generation, transmission, distribution and customer mix, the extent to which differences in reliability levels may be desirable, and the cost-effectiveness of the various methods which could be used to decrease the number and severity of any outages among the various types of systems;

(D) alternatives to adding new generation facilities to achieve such desired levels of reliability (including conservation);

(E) the cost-effectiveness of adding a number of small, decentralized conventional and nonconventional generating units rather than a small number of large generating units with a similar total megawatt capacity for achieving the desired level of reliability; and

(F) any standards for electric utility reliability used by, or suggested for use by, the electric utility industry in terms of cost-effectiveness in achieving the desired level of reliability, including equipment standards, standards for operating procedures and training of personnel, and standards relating the number and severity of outages to periods of time.

(b) Examination of reliability issues by reliability councils

The Secretary, in consultation with the Commission, may, from time to time, request the reliability councils established under section 202(a) of the Federal Power Act [16 U.S.C. 824a(a) of this title] or other appropriate persons (including Federal agencies) to examine and report to him concerning any electric utility reliability issue. The Secretary shall report to the Congress (in its annual report or in the report required under subsection (a) of this section if appropriate) the results of any examination under the preceding sentence.

(c) Department of Energy recommendations

The Secretary, in consultation with the Commission, and after opportunity for public comment, may recommend industry standards for reliability to the electric utility industry, including standards with respect to equipment, operating procedures and training of personnel, and standards relating to the level or levels of reliability appropriate to adequately and reliably serve the needs of electric consumers. The Secretary shall include in his annual report—

(1) any recommendations made under this subsection or any recommendations respecting electric utility reliability problems under any other provision of law, and

(2) a description of actions taken by electric utilities with respect to such recommendations.

(Pub. L. 95–617, title II, §209, Nov. 9, 1978, 92 Stat. 3143.)

CODIFICATION

Section was enacted as part of the Public Utility Regulatory Policies Act of 1978, and not as part of the Federal Power Act which generally comprises this chapter.

DEFINITIONS

For definitions of terms used in this section, see section 2602 of this title.

§824a–3. Cogeneration and small power production

(a) Cogeneration and small power production rules

Not later than 1 year after November 9, 1978, the Commission shall prescribe, and from time to time thereafter revise, such rules as it determines necessary to encourage cogeneration and small power production, and to encourage geothermal small power production facilities of not more than 80 megawatts capacity, which rules require electric utilities to offer to—

(1) sell electric energy to qualifying cogeneration facilities and qualifying small power production facilities ¹ and

(2) purchase electric energy from such facilities.

Such rules shall be prescribed, after consultation with representatives of Federal and State regulatory agencies having ratemaking authority for electric utilities, and after public notice and a reasonable opportunity for interested persons (including State and Federal agencies) to submit oral as well as written data, views, and arguments. Such rules shall include provisions respecting minimum reliability of qualifying cogeneration facilities and qualifying small power production facilities (including reliability of such facilities during emergencies) and rules respecting reliability of electric energy service to be available to such facilities from electric utilities during emergencies. Such rules may not authorize a qualifying cogeneration facility or qualifying small power production facility to make any sale for purposes other than resale.

(b) Rates for purchases by electric utilities

The rules prescribed under subsection (a) of this section shall insure that, in requiring any electric utility to offer to purchase electric energy from any qualifying cogeneration facility or qualifying small power production facility, the rates for such purchase—

(1) shall be just and reasonable to the electric consumers of the electric utility and in the public interest, and

(2) shall not discriminate against qualifying cogenerators or qualifying small power producers.

No such rule prescribed under subsection (a) of this section shall provide for a rate which exceeds the incremental cost to the electric utility of alternative electric energy.

(c) Rates for sales by utilities

The rules prescribed under subsection (a) of this section shall insure that, in requiring any electric utility to offer to sell electric energy to any qualifying cogeneration facility or qualifying small power production facility, the rates for such sale—

(1) shall be just and reasonable and in the public interest, and

(2) shall not discriminate against the qualifying cogenerators or qualifying small power producers.

(d) “Incremental cost of alternative electric energy” defined

For purposes of this section, the term “incremental cost of alternative electric energy” means, with respect to electric energy purchased from a qualifying cogenerator or qualifying small power producer, the cost to the electric utility of the electric energy which, but for the purchase from such cogenerator or small power producer, such utility would generate or purchase from another source.

(e) Exemptions

(1) Not later than 1 year after November 9, 1978, and from time to time thereafter, the Commission shall, after consultation with representatives of State regulatory authorities, electric utilities, owners of cogeneration facilities and owners of small power production facilities, and after public notice and a reasonable opportunity for interested persons (including State and Federal agencies) to submit oral as well as written data, views, and arguments, prescribe rules under which geothermal small power production facilities of not more than 80 megawatts capacity, qualifying cogeneration facilities, and qualifying small power production facilities are exempted in whole or part from the Federal Power Act [16 U.S.C. 791a et seq.], from the Public Utility Holding Company Act,² from State laws and regulations respecting the rates, or respecting the financial or organizational regulation, of electric utilities, or from any combination of the foregoing, if the Commission determines such exemption is necessary to encourage cogeneration and small power production.

(2) No qualifying small power production facility (other than a qualifying small power production facility which is an eligible solar, wind, waste, or geothermal facility as defined in section 3(17)(E) of the Federal Power Act [16 U.S.C. 796(17)(E)]) which has a power production capacity which, together with any other facilities located at the same site (as determined by the Commission), exceeds 30 megawatts, or 80 megawatts for a qualifying small power production facility using geothermal energy as the primary energy source, may be exempted under rules under paragraph (1) from any provision of law or regulation referred to in paragraph (1), except that any qualifying small

power production facility which produces electric energy solely by the use of biomass as a primary energy source, may be exempted by the Commission under such rules from the Public Utility Holding Company Act ² and from State laws and regulations referred to in such paragraph (1).

(3) No qualifying small power production facility or qualifying cogeneration facility may be exempted under this subsection from—

(A) any State law or regulation in effect in a State pursuant to subsection (f) of this section,

(B) the provisions of section 210, 211, or 212 of the Federal Power Act [16 U.S.C. 824i, 824j, or 824k] or the necessary authorities for enforcement of any such provision under the Federal Power Act [16 U.S.C. 791a et seq.], or

(C) any license or permit requirement under part I of the Federal Power Act [16 U.S.C. 791a et seq.] any provision under such Act related to such a license or permit requirement, or the necessary authorities for enforcement of any such requirement.

(f) Implementation of rules for qualifying cogeneration and qualifying small power production facilities

(1) Beginning on or before the date one year after any rule is prescribed by the Commission under subsection (a) of this section or revised under such subsection, each State regulatory authority shall, after notice and opportunity for public hearing, implement such rule (or revised rule) for each electric utility for which it has ratemaking authority.

(2) Beginning on or before the date one year after any rule is prescribed by the Commission under subsection (a) of this section or revised under such subsection, each nonregulated electric utility shall, after notice and opportunity for public hearing, implement such rule (or revised rule).

(g) Judicial review and enforcement

(1) Judicial review may be obtained respecting any proceeding conducted by a State regulatory authority or nonregulated electric utility for purposes of implementing any requirement of a rule under subsection (a) of this section in the same manner, and under the same requirements, as judicial review may be obtained under section 2633 of this title in the case of a proceeding to which section 2633 of this title applies.

(2) Any person (including the Secretary) may bring an action against any electric utility, qualifying small power producer, or qualifying cogenerator to enforce any requirement established by a State regulatory authority or nonregulated electric utility pursuant to subsection (f) of this section. Any such action shall be brought only in the manner, and under the requirements, as provided under section 2633 of this title with respect to an action to which section 2633 of this title applies.

(h) Commission enforcement

(1) For purposes of enforcement of any rule prescribed by the Commission under subsection (a) of this section with respect to any operations of an electric utility, a qualifying cogeneration facility or a qualifying small power production facility which are subject to the jurisdiction of the Commission under part II of the Federal Power Act [16 U.S.C. 824 et seq.], such rule shall be treated as a rule under the Federal Power Act [16 U.S.C. 791a et seq.]. Nothing in subsection (g) of this section shall apply to so much of the operations of an electric utility, a qualifying cogeneration facility or a qualifying small power production facility as are subject to the jurisdiction of the Commission under part II of the Federal Power Act.

(2)(A) The Commission may enforce the requirements of subsection (f) of this section against any State regulatory authority or nonregulated electric utility. For purposes of any such enforcement, the requirements of subsection (f)(1) of this section shall be treated as a rule enforceable under the Federal Power Act [16 U.S.C. 791a et seq.]. For purposes of any such action, a State regulatory authority or nonregulated electric utility shall be treated as a person within the meaning of the Federal Power Act. No enforcement action may be brought by the Commission under this section other than—

(i) an action against the State regulatory authority or nonregulated electric utility for failure to comply with the requirements of subsection (f) of this section ³ or

(ii) an action under paragraph (1).

(B) Any electric utility, qualifying cogenerator, or qualifying small power producer may petition the Commission to enforce the requirements of subsection (f) of this section as provided in subparagraph (A) of this paragraph. If the Commission does not initiate an enforcement action under subparagraph (A) against a State regulatory authority or nonregulated electric utility within 60 days following the date on which a petition is filed under this subparagraph with respect to such authority, the petitioner may bring an action in the appropriate United States district court to require such State regulatory authority or nonregulated electric utility to comply with such requirements, and such court may issue such injunctive or other relief as may be appropriate. The Commission may intervene as a matter of right in any such action.

(i) Federal contracts

No contract between a Federal agency and any electric utility for the sale of electric energy by such Federal agency for resale which is entered into after November 9, 1978, may contain any provision which will have the effect of preventing the implementation of any rule under this section with respect to such utility. Any provision in any such contract which has such effect shall be null and void.

(j) New dams and diversions

Except for a hydroelectric project located at a Government dam (as defined in section 3(10) of the Federal Power Act [16 U.S.C. 796(10)]) at which non-Federal hydroelectric development is permissible, this section shall not apply to any hydroelectric project which impounds or diverts the water of a natural watercourse by means of a new dam or diversion unless the project meets each of the following requirements:

(1) No substantial adverse effects

At the time of issuance of the license or exemption for the project, the Commission finds that the project will not have substantial adverse effects on the environment, including recreation and water quality. Such finding shall be made by the Commission after taking into consideration terms and conditions imposed under either paragraph (3) of this subsection or section 10 of the Federal Power Act [16 U.S.C. 803] (whichever is appropriate as required by that Act [16 U.S.C. 791a et seq.] or the Electric Consumers Protection Act of 1986) and compliance with other environmental requirements applicable to the project.

(2) Protected rivers

At the time the application for a license or exemption for the project is accepted by the Commission (in accordance with the Commission's regulations and procedures in effect on January 1, 1986, including those relating to environmental consultation), such project is not located on either of the following:

(A) Any segment of a natural watercourse which is included in (or designated for potential inclusion in) a State or national wild and scenic river system.

(B) Any segment of a natural watercourse which the State has determined, in accordance with applicable State law, to possess unique natural, recreational, cultural, or scenic attributes which would be adversely affected by hydroelectric development.

(3) Fish and wildlife terms and conditions

The project meets the terms and conditions set by fish and wildlife agencies under the same procedures as provided for under section 30(c) of the Federal Power Act [16 U.S.C. 823a(c)].

(k) "New dam or diversion" defined

For purposes of this section, the term "new dam or diversion" means a dam or diversion which requires, for purposes of installing any hydroelectric power project, any construction, or enlargement of any impoundment or diversion structure (other than repairs or reconstruction or the addition of flashboards or similar adjustable devices) ⁴

(l) Definitions

For purposes of this section, the terms “small power production facility”, “qualifying small power production facility”, “qualifying small power producer”, “primary energy source”, “cogeneration facility”, “qualifying cogeneration facility”, and “qualifying cogenerator” have the respective meanings provided for such terms under section 3(17) and (18) of the Federal Power Act [16 U.S.C. 796(17), (18)].

(m) Termination of mandatory purchase and sale requirements

(1) Obligation to purchase

After August 8, 2005, no electric utility shall be required to enter into a new contract or obligation to purchase electric energy from a qualifying cogeneration facility or a qualifying small power production facility under this section if the Commission finds that the qualifying cogeneration facility or qualifying small power production facility has nondiscriminatory access to—

(A)(i) independently administered, auction-based day ahead and real time wholesale markets for the sale of electric energy; and (ii) wholesale markets for long-term sales of capacity and electric energy; or

(B)(i) transmission and interconnection services that are provided by a Commission-approved regional transmission entity and administered pursuant to an open access transmission tariff that affords nondiscriminatory treatment to all customers; and (ii) competitive wholesale markets that provide a meaningful opportunity to sell capacity, including long-term and short-term sales, and electric energy, including long-term, short-term and real-time sales, to buyers other than the utility to which the qualifying facility is interconnected. In determining whether a meaningful opportunity to sell exists, the Commission shall consider, among other factors, evidence of transactions within the relevant market; or

(C) wholesale markets for the sale of capacity and electric energy that are, at a minimum, of comparable competitive quality as markets described in subparagraphs (A) and (B).

(2) Revised purchase and sale obligation for new facilities

(A) After August 8, 2005, no electric utility shall be required pursuant to this section to enter into a new contract or obligation to purchase from or sell electric energy to a facility that is not an existing qualifying cogeneration facility unless the facility meets the criteria for qualifying cogeneration facilities established by the Commission pursuant to the rulemaking required by subsection (n) of this section.

(B) For the purposes of this paragraph, the term “existing qualifying cogeneration facility” means a facility that—

(i) was a qualifying cogeneration facility on August 8, 2005; or

(ii) had filed with the Commission a notice of self-certification, self recertification or an application for Commission certification under 18 CFR 292.207 prior to the date on which the Commission issues the final rule required by subsection (n) of this section.

(3) Commission review

Any electric utility may file an application with the Commission for relief from the mandatory purchase obligation pursuant to this subsection on a service territory-wide basis. Such application shall set forth the factual basis upon which relief is requested and describe why the conditions set forth in subparagraph (A), (B), or (C) of paragraph (1) of this subsection have been met. After notice, including sufficient notice to potentially affected qualifying cogeneration facilities and qualifying small power production facilities, and an opportunity for comment, the Commission shall make a final determination within 90 days of such application regarding whether the conditions set forth in subparagraph (A), (B), or (C) of paragraph (1) have been met.

(4) Reinstatement of obligation to purchase

At any time after the Commission makes a finding under paragraph (3) relieving an electric utility of its obligation to purchase electric energy, a qualifying cogeneration facility, a qualifying

small power production facility, a State agency, or any other affected person may apply to the Commission for an order reinstating the electric utility's obligation to purchase electric energy under this section. Such application shall set forth the factual basis upon which the application is based and describe why the conditions set forth in subparagraph (A), (B), or (C) of paragraph (1) of this subsection are no longer met. After notice, including sufficient notice to potentially affected utilities, and opportunity for comment, the Commission shall issue an order within 90 days of such application reinstating the electric utility's obligation to purchase electric energy under this section if the Commission finds that the conditions set forth in subparagraphs (A), (B) or (C) of paragraph (1) which relieved the obligation to purchase, are no longer met.

(5) Obligation to sell

After August 8, 2005, no electric utility shall be required to enter into a new contract or obligation to sell electric energy to a qualifying cogeneration facility or a qualifying small power production facility under this section if the Commission finds that—

(A) competing retail electric suppliers are willing and able to sell and deliver electric energy to the qualifying cogeneration facility or qualifying small power production facility; and

(B) the electric utility is not required by State law to sell electric energy in its service territory.

(6) No effect on existing rights and remedies

Nothing in this subsection affects the rights or remedies of any party under any contract or obligation, in effect or pending approval before the appropriate State regulatory authority or non-regulated electric utility on August 8, 2005, to purchase electric energy or capacity from or to sell electric energy or capacity to a qualifying cogeneration facility or qualifying small power production facility under this Act (including the right to recover costs of purchasing electric energy or capacity).

(7) Recovery of costs

(A) The Commission shall issue and enforce such regulations as are necessary to ensure that an electric utility that purchases electric energy or capacity from a qualifying cogeneration facility or qualifying small power production facility in accordance with any legally enforceable obligation entered into or imposed under this section recovers all prudently incurred costs associated with the purchase.

(B) A regulation under subparagraph (A) shall be enforceable in accordance with the provisions of law applicable to enforcement of regulations under the Federal Power Act (16 U.S.C. 791a et seq.).

(n) Rulemaking for new qualifying facilities

(1)(A) Not later than 180 days after August 8, 2005, the Commission shall issue a rule revising the criteria in 18 CFR 292.205 for new qualifying cogeneration facilities seeking to sell electric energy pursuant to this section to ensure—

(i) that the thermal energy output of a new qualifying cogeneration facility is used in a productive and beneficial manner;

(ii) the electrical, thermal, and chemical output of the cogeneration facility is used fundamentally for industrial, commercial, or institutional purposes and is not intended fundamentally for sale to an electric utility, taking into account technological, efficiency, economic, and variable thermal energy requirements, as well as State laws applicable to sales of electric energy from a qualifying facility to its host facility; and

(iii) continuing progress in the development of efficient electric energy generating technology.

(B) The rule issued pursuant to paragraph (1)(A) of this subsection shall be applicable only to facilities that seek to sell electric energy pursuant to this section. For all other purposes, except as specifically provided in subsection (m)(2)(A) of this section, qualifying facility status shall be determined in accordance with the rules and regulations of this Act.

(2) Notwithstanding rule revisions under paragraph (1), the Commission's criteria for qualifying

cogeneration facilities in effect prior to the date on which the Commission issues the final rule required by paragraph (1) shall continue to apply to any cogeneration facility that—

(A) was a qualifying cogeneration facility on August 8, 2005, or

(B) had filed with the Commission a notice of self-certification, self-recertification or an application for Commission certification under 18 CFR 292.207 prior to the date on which the Commission issues the final rule required by paragraph (1).

EFFECTIVE DATE OF 1986 AMENDMENT

Pub. L. 99–495, §8(b), Oct. 16, 1986, 100 Stat. 1250, provided that:

“(1) Subsection (j) of section 210 of the Public Utility Regulatory Policies Act of 1978 (as amended by subsection (a) of this section) [16 U.S.C. 824a–3(j)] shall apply to any project for which benefits under section 210 of the Public Utility Regulatory Policies Act of 1978 are sought and for which a license or exemption is issued by the Federal Energy Regulatory Commission after the enactment of this Act [Oct. 16, 1986], except as otherwise provided in paragraph (2), (3) or (4) of this subsection.

“(2) Subsection (j) shall not apply to the project if the application for license or exemption for the project was filed, and accepted for filing by the Commission, before the enactment of this Act [Oct. 16, 1986].

“(3) Paragraphs (1) and (3) of such subsection (j) shall not apply if the application for the license or exemption for the project was filed before the enactment of this Act [Oct. 16, 1986] and accepted for filing by the Commission (in accordance with the Commission's regulations and procedures in effect on January 1, 1986, including those relating to the requirement for environmental consultation) within 3 years after such enactment.

“(4)(A) Paragraph (3) of subsection (j) shall not apply for projects where the license or exemption application was filed after enactment of this Act [Oct. 16, 1986] if, based on a petition filed by the applicant for such project within 18 months after such enactment, the Commission determines (after public notice and opportunity for public comment of at least 45 days) that the applicant has demonstrated that he had committed (prior to the enactment of this Act) substantial monetary resources directly related to the development of the project and to the diligent and timely completion of all requirements of the Commission for filing an acceptable application for license or exemption. Such petition shall be publicly available and shall be filed in such form as the Commission shall require by rule issued within 120 days after the enactment of this Act. The public notice required under this subparagraph shall include written notice by the petitioner to affected Federal and State agencies.

“(B) In the case of any petition referred to in subparagraph (A), if the applicant had a preliminary permit and had completed environmental consultations (required by Commission regulations and procedures in effect on January 1, 1986) prior to enactment, there shall be a rebuttable presumption that such applicant had committed substantial monetary resources prior to enactment.

“(C) The applicant for a license or exemption for a project described in subparagraph (A) may petition the Commission for an initial determination under paragraph (1) of section 210(j) of the Public Utility Regulatory Policies Act of 1978 [16 U.S.C. 824a-3(j)(1)] prior to the time the license or exemption is issued. If the Commission initially finds that the project will have substantial adverse effects on the environment within the meaning of such paragraph (1), prior to making a final finding under that paragraph the Commission shall afford the applicant a reasonable opportunity to provide for mitigation of such adverse effects. The Commission shall make a final finding under such paragraph (1) at the time the license or exemption is issued. If the Federal Energy Regulatory Commission has notified the State of its initial finding and the State has not taken any action described in paragraph (2) of section 210(j) before such final finding, the failure to take such action shall be the basis for a rebuttable presumption that there is not a substantial adverse effect on the environment related to natural, recreational, cultural, or scenic attributes for purposes of such finding.

“(D) If a petition under subparagraph (A) is denied, all provisions of section 210(j) of the Public Utility Regulatory Policies Act of 1978 [16 U.S.C. 824a-3(j)] shall apply to the project regardless of when the license or exemption is issued.”

Amendment by Pub. L. 99-495 effective with respect to each license, permit, or exemption issued under this chapter after Oct. 16, 1986, see section 18 of Pub. L. 99-495, set out as a note under section 797 of this title.

CALCULATION OF AVOIDED COST

Pub. L. 102-486, title XIII, §1335, Oct. 24, 1992, 106 Stat. 2984, provided that: “Nothing in section 210 of the Public Utility Regulatory Policies Act of 1978 (Public Law 95-617) [16 U.S.C. 824a-3] requires a State regulatory authority or nonregulated electric utility to treat a cost reasonably identified to be incurred or to have been incurred in the construction or operation of a facility or a project which has been selected by the Department of Energy and provided Federal funding pursuant to the Clean Coal Program authorized by Public Law 98-473 [see Tables for classification] as an incremental cost of alternative electric energy.”

APPLICABILITY OF 1980 AMENDMENT TO FACILITIES USING SOLAR ENERGY AS PRIMARY ENERGY SOURCE

Pub. L. 100-202, §101(d) [title III, §310], Dec. 22, 1987, 101 Stat. 1329-104, 1329-126, provided that:

“(a) The amendments made by section 643(b) of the Energy Security Act (Public Law 96-294) [amending this section] and any regulations issued to implement such amendment shall apply to qualifying small power production facilities (as such term is defined in the Federal Power Act [16 U.S.C. 791a et seq.]) using solar energy as the primary energy source to the same extent such amendments and regulations apply to qualifying small power production facilities using geothermal energy as the primary energy source, except that nothing in this Act [see Tables for classification] shall preclude the Federal Energy Regulatory Commission from revising its regulations to limit the availability of exemptions authorized under this Act as it determines to be required in the public interest and consistent with its obligations and duties under section 210 of the Public Utility Regulatory Policies Act of 1978 [this section].

“(b) The provisions of subsection (a) shall apply to a facility using solar energy as the primary energy source only if either of the following is submitted to the Federal Energy Regulatory Commission during the

two-year period beginning on the date of enactment of this Act [Dec. 22, 1987]:

“(1) An application for certification of the facility as a qualifying small power production facility.

“(2) Notice that the facility meets the requirements for qualification.”

STUDY AND REPORT TO CONGRESSIONAL COMMITTEES ON APPLICATION OF PROVISIONS RELATING TO COGENERATION, SMALL POWER PRODUCTION, AND INTERCONNECTION AUTHORITY TO HYDROELECTRIC POWER FACILITIES

Pub. L. 99–495, §8(d), Oct. 16, 1986, 100 Stat. 1251, provided that:

“(1) The Commission shall conduct a study (in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 [42 U.S.C. 4332(2)(C)]) of whether the benefits of section 210 of the Public Utility Regulatory Policies Act of 1978 [16 U.S.C. 824a–3] and section 210 of the Federal Power Act [16 U.S.C. 824i] should be applied to hydroelectric power facilities utilizing new dams or diversions (within the meaning of section 210(k) of the Public Utility Regulatory Policies Act of 1978).

“(2) The study under this subsection shall take into consideration the need for such new dams or diversions for power purposes, the environmental impacts of such new dams and diversions (both with and without the application of the amendments made by this Act to sections 4, 10, and 30 of the Federal Power Act [16 U.S.C. 797, 803, 823a] and section 210 of the Public Utility Regulatory Policies Act of 1978 [16 U.S.C. 824a–3]), the environmental effects of such facilities alone and in combination with other existing or proposed dams or diversions on the same waterway, the intent of Congress to encourage and give priority to the application of section 210 of Public Utility Regulatory Policies Act of 1978 to existing dams and diversions rather than such new dams or diversions, and the impact of such section 210 on the rates paid by electric power consumers.

“(3) The study under this subsection shall be initiated within 3 months after enactment of this Act [Oct. 16, 1986] and completed as promptly as practicable.

“(4) A report containing the results of the study conducted under this subsection shall be submitted to the Committee on Energy and Commerce of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate while both Houses are in session.

“(5) The report submitted under paragraph (4) shall include a determination (and the basis thereof) by the Commission, based on the study and a public hearing and subject to review under section 313(b) of the Federal Power Act [16 U.S.C. 825l(b)], whether any of the benefits referred to in paragraph (1) should be available for such facilities and whether applications for preliminary permits (or licenses where no preliminary permit has been issued) for such small power production facilities utilizing new dams or diversions should be accepted by the Commission after the moratorium period specified in subsection (e). The report shall include such other administrative and legislative recommendations as the Commission deems appropriate.

“(6) If the study under this subsection has not been completed within 18 months after its initiation, the Commission shall notify the Committees referred to in paragraph (4) of the reasons for the delay and specify a date when it will be completed and a report submitted.”

MORATORIUM ON APPLICATION OF THIS SECTION TO NEW DAMS

Pub. L. 99–495, §8(e), Oct. 16, 1986, 100 Stat. 1251, provided that: “Notwithstanding the amendments made by subsection (a) of this section [amending section 824a–3 of this title], in the case of a project for which a license or exemption is issued after the enactment of this Act [Oct. 16, 1986], section 210 of the Public Utility Regulatory Policies Act of 1978 [16 U.S.C. 824a–3] shall not apply during the moratorium period if the project utilizes a new dam or diversion (as defined in section 210(k) of such Act) unless the project is either—

“(1) a project located at a Government dam (as defined in section 3(10) of the Federal Power Act [16 U.S.C. 796(10)]) at which non-Federal hydroelectric development is permissible, or

“(2) a project described in paragraphs (2), (3), or (4) of subsection (b) [set out as a note above].

For purposes of this subsection, the term ‘moratorium period’ means the period beginning on the date of the enactment of this Act and ending at the expiration of the first full session of Congress after the session during which the report under subsection (d) [set out as a note above] has been submitted to the Congress.”

§824a–4. Seasonal diversity electricity exchange

(a) Authority

The Secretary may acquire rights-of-way by purchase, including eminent domain, through North Dakota, South Dakota, and Nebraska for transmission facilities for the seasonal diversity exchange of electric power to and from Canada if he determines—

(1) after opportunity for public hearing—

(A) that the exchange is in the public interest and would further the purposes referred to in section 2611(1) and (2) of this title and that the acquisition of such rights-of-way and the construction and operation of such transmission facilities for such purposes is otherwise in the public interest,

(B) that a permit has been issued in accordance with subsection (b) of this section for such construction, operation, maintenance, and connection of the facilities at the border for the transmission of electric energy between the United States and Canada as is necessary for such exchange of electric power, and

(C) that each affected State has approved the portion of the transmission route located in each State in accordance with applicable State law, or if there is no such applicable State law in such State, the Governor has approved such portion; and

(2) after consultation with the Secretary of the Interior and the heads of other affected Federal agencies, that the Secretary of the Interior and the heads of such,¹ other agencies concur in writing in the location of such portion of the transmission facilities as crosses Federal land under the jurisdiction of such Secretary or such other Federal agency, as the case may be.

The Secretary shall provide to any State such cooperation and technical assistance as the State may request and as he determines appropriate in the selection of a transmission route. If the transmission route approved by any State does not appear to be feasible and in the public interest, the Secretary shall encourage such State to review such route and to develop a route that is feasible and in the public interest. Any exercise by the Secretary of the power of eminent domain under this section shall be in accordance with other applicable provisions of Federal law. The Secretary shall provide public notice of his intention to acquire any right-of-way before exercising such power of eminent domain with respect to such right-of-way.

(b) Permit

Notwithstanding any transfer of functions under the first sentence of section 301(b) of the Department of Energy Organization Act [42 U.S.C. 7151(b)], no permit referred to in subsection (a)(1)(B) may be issued unless the Commission has conducted hearings and made the findings required under section 202(e) of the Federal Power Act [16 U.S.C. 824a(e)] and under the applicable execution order respecting the construction, operation, maintenance, or connection at the borders of the United States of facilities for the transmission of electric energy between the United States and a foreign country. Any finding of the Commission under an applicable executive order referred to in this subsection shall be treated for purposes of judicial review as an order issued under section 202(e) of the Federal Power Act.

(c) Timely acquisition by other means

The Secretary may not acquire any rights-of-way ² under this section unless he determines that the holder or holders of a permit referred to in subsection (a)(1)(B) of this section are unable to acquire such rights-of-way under State condemnation authority, or after reasonable opportunity for

negotiation, without unreasonably delaying construction, taking into consideration the impact of such delay on completion of the facilities in a timely fashion.

(d) Payments by permittees

(1) The property interest acquired by the Secretary under this section (whether by eminent domain or other purchase) shall be transferred by the Secretary to the holder of a permit referred to in subsection (b) of this section if such holder has made payment to the Secretary of the entire costs of the acquisition of such property interest, including administrative costs. The Secretary may accept, and expend, for purposes of such acquisition, amounts from any such person before acquiring a property interest to be transferred to such person under this section.

(2) If no payment is made by a permit holder under paragraph (1), within a reasonable time, the Secretary shall offer such rights-of-way to the original owner for reacquisition at the original price paid by the Secretary. If such original owner refuses to reacquire such property after a reasonable period, the Secretary shall dispose of such property in accordance with applicable provisions of law governing disposal of property of the United States.

(e) Federal law governing Federal lands

This section shall not affect any Federal law governing Federal lands.

(Pub. L. 95–617, title VI, §602, Nov. 9, 1978, 92 Stat. 3164.)

CODIFICATION

Subsection (f), which required the Secretary to report annually to Congress on actions taken pursuant to this section, terminated, effective May 15, 2000, pursuant to section 3003 of Pub. L. 104–66, as amended, set out as a note under section 1113 of Title 31, Money and Finance. See, also, page 90 of House Document No. 103–7.

§824b. Disposition of property; consolidations; purchase of securities

(a) Authorization

(1) No public utility shall, without first having secured an order of the Commission authorizing it to do so—

(A) sell, lease, or otherwise dispose of the whole of its facilities subject to the jurisdiction of the Commission, or any part thereof of a value in excess of \$10,000,000;

(B) merge or consolidate, directly or indirectly, such facilities or any part thereof with those of any other person, by any means whatsoever;

(C) purchase, acquire, or take any security with a value in excess of \$10,000,000 of any other public utility; or

(D) purchase, lease, or otherwise acquire an existing generation facility—

(i) that has a value in excess of \$10,000,000; and

(ii) that is used for interstate wholesale sales and over which the Commission has jurisdiction for ratemaking purposes.

(2) No holding company in a holding company system that includes a transmitting utility or an electric utility shall purchase, acquire, or take any security with a value in excess of \$10,000,000 of, or, by any means whatsoever, directly or indirectly, merge or consolidate with, a transmitting utility,

an electric utility company, or a holding company in a holding company system that includes a transmitting utility, or an electric utility company, with a value in excess of \$10,000,000 without first having secured an order of the Commission authorizing it to do so.

(3) Upon receipt of an application for such approval the Commission shall give reasonable notice in writing to the Governor and State commission of each of the States in which the physical property affected, or any part thereof, is situated, and to such other persons as it may deem advisable.

(4) After notice and opportunity for hearing, the Commission shall approve the proposed disposition, consolidation, acquisition, or change in control, if it finds that the proposed transaction will be consistent with the public interest, and will not result in cross-subsidization of a non-utility associate company or the pledge or encumbrance of utility assets for the benefit of an associate company, unless the Commission determines that the cross-subsidization, pledge, or encumbrance will be consistent with the public interest.

(5) The Commission shall, by rule, adopt procedures for the expeditious consideration of applications for the approval of dispositions, consolidations, or acquisitions, under this section. Such rules shall identify classes of transactions, or specify criteria for transactions, that normally meet the standards established in paragraph (4). The Commission shall provide expedited review for such transactions. The Commission shall grant or deny any other application for approval of a transaction not later than 180 days after the application is filed. If the Commission does not act within 180 days, such application shall be deemed granted unless the Commission finds, based on good cause, that further consideration is required to determine whether the proposed transaction meets the standards of paragraph (4) and issues an order tolling the time for acting on the application for not more than 180 days, at the end of which additional period the Commission shall grant or deny the application.

(6) For purposes of this subsection, the terms “associate company”, “holding company”, and “holding company system” have the meaning given those terms in the Public Utility Holding Company Act of 2005 [42 U.S.C. 16451 et seq.].

(b) Orders of Commission

The Commission may grant any application for an order under this section in whole or in part and upon such terms and conditions as it finds necessary or appropriate to secure the maintenance of adequate service and the coordination in the public interest of facilities subject to the jurisdiction of the Commission. The Commission may from time to time for good cause shown make such orders supplemental to any order made under this section as it may find necessary or appropriate.

2005—Subsec. (a). Pub. L. 109–58 amended subsec. (a) generally. Prior to amendment, subsec. (a) read as follows: “No public utility shall sell, lease, or otherwise dispose of the whole of its facilities subject to the jurisdiction of the Commission, or any part thereof of a value in excess of \$50,000, or by any means whatsoever, directly or indirectly, merge or consolidate such facilities or any part thereof with those of any other person, or purchase, acquire, or take any security of any other public utility, without first having secured an order of the Commission authorizing it to do so. EFFECTIVE DATE OF 2005 AMENDMENT

Pub. L. 109–58, title XII, §1289(b), (c), Aug. 8, 2005, 119 Stat. 983, provided that:

“(b) **EFFECTIVE DATE.**—The amendments made by this section [amending this section] shall take effect

6 months after the date of enactment of this Act [Aug. 8, 2005].

“(c) TRANSITION PROVISION.—The amendments made by subsection (a) [amending this section] shall not apply to any application under section 203 of the Federal Power Act (16 U.S.C. 824b) that was filed on or before the date of enactment of this Act [Aug. 8, 2005].”

§824c. Issuance of securities; assumption of liabilities

(a) Authorization by Commission

No public utility shall issue any security, or assume any obligation or liability as guarantor, indorser, surety, or otherwise in respect of any security of another person, unless and until, and then only to the extent that, upon application by the public utility, the Commission by order authorizes such issue or assumption of liability. The Commission shall make such order only if it finds that such issue or assumption (a) is for some lawful object, within the corporate purposes of the applicant and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the applicant of service as a public utility and which will not impair its ability to perform that service, and (b) is reasonably necessary or appropriate for such purposes. The provisions of this section shall be effective six months after August 26, 1935.

(b) Application approval or modification; supplemental orders

The Commission, after opportunity for hearing, may grant any application under this section in whole or in part, and with such modifications and upon such terms and conditions as it may find necessary or appropriate, and may from time to time, after opportunity for hearing and for good cause shown, make such supplemental orders in the premises as it may find necessary or appropriate, and may by any such supplemental order modify the provisions of any previous order as to the particular purposes, uses, and extent to which, or the conditions under which, any security so theretofore authorized or the proceeds thereof may be applied, subject always to the requirements of subsection (a) of this section.

(c) Compliance with order of Commission

No public utility shall, without the consent of the Commission, apply any security or any proceeds thereof to any purpose not specified in the Commission's order, or supplemental order, or to any purpose in excess of the amount allowed for such purpose in such order, or otherwise in contravention of such order.

(d) Authorization of capitalization not to exceed amount paid

The Commission shall not authorize the capitalization of the right to be a corporation or of any franchise, permit, or contract for consolidation, merger, or lease in excess of the amount (exclusive of any tax or annual charge) actually paid as the consideration for such right, franchise, permit, or contract.

(e) Notes or drafts maturing less than one year after issuance

Subsection (a) of this section shall not apply to the issue or renewal of, or assumption of liability on, a note or draft maturing not more than one year after the date of such issue, renewal, or assumption of liability, and aggregating (together with all other then outstanding notes and drafts of a maturity of one year or less on which such public utility is primarily or secondarily liable) not more than 5 per centum of the par value of the other securities of the public utility then outstanding. In the case of securities having no par value, the par value for the purpose of this subsection shall be the fair market value as of the date of issue. Within ten days after any such issue, renewal, or assumption of liability, the public utility shall file with the Commission a certificate of notification, in such form as may be prescribed by the Commission, setting forth such matters as the Commission shall by regulation require.

(f) Public utility securities regulated by State not affected

The provisions of this section shall not extend to a public utility organized and operating in a State under the laws of which its security issues are regulated by a State commission.

(g) Guarantee or obligation on part of United States

Nothing in this section shall be construed to imply any guarantee or obligation on the part of the United States in respect of any securities to which the provisions of this section relate.

(h) Filing duplicate reports with the Securities and Exchange Commission

Any public utility whose security issues are approved by the Commission under this section may file with the Securities and Exchange Commission duplicate copies of reports filed with the Federal Power Commission in lieu of the reports, information, and documents required under sections 77g, 78l, and 78m of title 15.

(June 10, 1920, ch. 285, pt. II, §204, as added Aug. 26, 1935, ch. 687, title II, §213, 49 Stat. 850.)

TRANSFER OF FUNCTIONS

Executive and administrative functions of Securities and Exchange Commission, with certain exceptions, transferred to Chairman of such Commission, with authority vested in him to authorize their performance by any officer, employee, or administrative unit under his jurisdiction, by Reorg. Plan No. 10 of 1950, §§1, 2, eff. May 24, 1950, 15 F.R. 3175, 64 Stat. 1265, set out in the Appendix to Title 5, Government Organization and Employees.

§824d. Rates and charges; schedules; suspension of new rates; automatic adjustment clauses

(a) Just and reasonable rates

All rates and charges made, demanded, or received by any public utility for or in connection with the transmission or sale of electric energy subject to the jurisdiction of the Commission, and all rules and regulations affecting or pertaining to such rates or charges shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful.

(b) Preference or advantage unlawful

No public utility shall, with respect to any transmission or sale subject to the jurisdiction of the Commission, (1) make or grant any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage, or (2) maintain any unreasonable difference in rates, charges, service, facilities, or in any other respect, either as between localities or as between classes of service.

(c) Schedules

Under such rules and regulations as the Commission may prescribe, every public utility shall file with the Commission, within such time and in such form as the Commission may designate, and shall keep open in convenient form and place for public inspection schedules showing all rates and charges for any transmission or sale subject to the jurisdiction of the Commission, and the classifications, practices, and regulations affecting such rates and charges, together with all contracts which in any manner affect or relate to such rates, charges, classifications, and services.

(d) Notice required for rate changes

Unless the Commission otherwise orders, no change shall be made by any public utility in any such rate, charge, classification, or service, or in any rule, regulation, or contract relating thereto, except after sixty days' notice to the Commission and to the public. Such notice shall be given by filing with the Commission and keeping open for public inspection new schedules stating plainly the change or changes to be made in the schedule or schedules then in force and the time when the change or changes will go into effect. The Commission, for good cause shown, may allow changes to take effect without requiring the sixty days' notice herein provided for by an order specifying the changes so to be made and the time when they shall take effect and the manner in which they shall be filed and published.

(e) Suspension of new rates; hearings; five-month period

Whenever any such new schedule is filed the Commission shall have authority, either upon complaint or upon its own initiative without complaint, at once, and, if it so orders, without answer or formal pleading by the public utility, but upon reasonable notice, to enter upon a hearing concerning the lawfulness of such rate, charge, classification, or service; and, pending such hearing and the decision thereon, the Commission, upon filing with such schedules and delivering to the public utility affected thereby a statement in writing of its reasons for such suspension, may suspend the operation of such schedule and defer the use of such rate, charge, classification, or service, but not for a longer period than five months beyond the time when it would otherwise go into effect; and after full hearings, either completed before or after the rate, charge, classification, or service goes into effect, the Commission may make such orders with reference thereto as would be proper in a proceeding initiated after it had become effective. If the proceeding has not been concluded and an order made at the expiration of such five months, the proposed change of rate, charge, classification, or service shall go into effect at the end of such period, but in case of a proposed increased rate or charge, the Commission may by order require the interested public utility or public utilities to keep accurate account in detail of all amounts received by reason of such increase, specifying by whom and in whose behalf such amounts are paid, and upon completion of the hearing and decision may by further order require such public utility or public utilities to refund, with interest, to the persons in whose behalf such amounts were paid, such portion of such increased rates or charges as by its decision shall be found not justified. At any hearing involving a rate or charge sought to be increased, the burden of proof to show that the increased rate or charge is just and reasonable shall be upon the public utility, and the Commission shall give to the hearing and decision of such questions preference over other questions pending before it and decide the same as speedily as possible.

(f) Review of automatic adjustment clauses and public utility practices; action by Commission; “automatic adjustment clause” defined

(1) Not later than 2 years after November 9, 1978, and not less often than every 4 years thereafter, the Commission shall make a thorough review of automatic adjustment clauses in public utility rate schedules to examine—

(A) whether or not each such clause effectively provides incentives for efficient use of resources (including economical purchase and use of fuel and electric energy), and

(B) whether any such clause reflects any costs other than costs which are—

(i) subject to periodic fluctuations and

(ii) not susceptible to precise determinations in rate cases prior to the time such costs are incurred.

Such review may take place in individual rate proceedings or in generic or other separate proceedings applicable to one or more utilities.

(2) Not less frequently than every 2 years, in rate proceedings or in generic or other separate proceedings, the Commission shall review, with respect to each public utility, practices under any automatic adjustment clauses of such utility to insure efficient use of resources (including economical purchase and use of fuel and electric energy) under such clauses.

(3) The Commission may, on its own motion or upon complaint, after an opportunity for an evidentiary hearing, order a public utility to—

(A) modify the terms and provisions of any automatic adjustment clause, or

(B) cease any practice in connection with the clause,

if such clause or practice does not result in the economical purchase and use of fuel, electric energy, or other items, the cost of which is included in any rate schedule under an automatic adjustment clause.

(4) As used in this subsection, the term “automatic adjustment clause” means a provision of a rate schedule which provides for increases or decreases (or both), without prior hearing, in rates reflecting increases or decreases (or both) in costs incurred by an electric utility. Such term does not include any rate which takes effect subject to refund and subject to a later determination of the appropriate amount of such rate.

(June 10, 1920, ch. 285, pt. II, §205, as added Aug. 26, 1935, ch. 687, title II, §213, 49 Stat. 851; amended Pub. L. 95–617, title II, §§207(a), 208, Nov. 9, 1978, 92 Stat. 3142.)

AMENDMENTS

1978—Subsec. (d). Pub. L. 95–617, §207(a), substituted “sixty” for “thirty” in two places.
Subsec. (f). Pub. L. 95–617, §208, added subsec. (f).

STUDY OF ELECTRIC RATE INCREASES UNDER FEDERAL POWER ACT

Section 207(b) of Pub. L. 95–617 directed chairman of Federal Energy Regulatory Commission, in consultation with Secretary, to conduct a study of legal requirements and administrative procedures involved in consideration and resolution of proposed wholesale electric rate increases under Federal Power Act, section 791a et seq. of this title, for purposes of providing for expeditious handling of hearings consistent with due process, preventing imposition of successive rate increases before they have been determined by Commission to be just and reasonable and otherwise lawful, and improving procedures designed to prohibit anticompetitive or unreasonable differences in wholesale and retail rates, or both, and that chairman report to Congress within nine months from Nov. 9, 1978, on results of study, on administrative actions taken as a result of this study, and on any recommendations for changes in existing law that will aid purposes of this section.

§824e. Power of Commission to fix rates and charges; determination of cost of production or transmission

(a) Unjust or preferential rates, etc.; statement of reasons for changes; hearing; specification of issues

Whenever the Commission, after a hearing held upon its own motion or upon complaint, shall find that any rate, charge, or classification, demanded, observed, charged, or collected by any public utility for any transmission or sale subject to the jurisdiction of the Commission, or that any rule, regulation, practice, or contract affecting such rate, charge, or classification is unjust, unreasonable, unduly discriminatory or preferential, the Commission shall determine the just and reasonable rate, charge, classification, rule, regulation, practice, or contract to be thereafter observed and in force, and shall fix the same by order. Any complaint or motion of the Commission to initiate a proceeding under this section shall state the change or changes to be made in the rate, charge, classification, rule, regulation, practice, or contract then in force, and the reasons for any proposed change or changes therein. If, after review of any motion or complaint and answer, the Commission shall decide to hold a hearing, it shall fix by order the time and place of such hearing and shall specify the issues to be adjudicated.

(b) Refund effective date; preferential proceedings; statement of reasons for delay; burden of proof; scope of refund order; refund orders in cases of dilatory behavior; interest

Whenever the Commission institutes a proceeding under this section, the Commission shall establish a refund effective date. In the case of a proceeding instituted on complaint, the refund effective date shall not be earlier than the date of the filing of such complaint nor later than 5 months after the filing of such complaint. In the case of a proceeding instituted by the Commission on its own motion, the refund effective date shall not be earlier than the date of the publication by the Commission of notice of its intention to initiate such proceeding nor later than 5 months after the publication date. Upon institution of a proceeding under this section, the Commission shall give to the decision of such proceeding the same preference as provided under section 824d of this title and otherwise act as speedily as possible. If no final decision is rendered by the conclusion of the 180-day period commencing upon initiation of a proceeding pursuant to this section, the Commission shall state the reasons why it has failed to do so and shall state its best estimate as to when it reasonably expects to make such decision. In any proceeding under this section, the burden of proof to show that any rate, charge, classification, rule, regulation, practice, or contract is unjust, unreasonable, unduly discriminatory, or preferential shall be upon the Commission or the complainant. At the conclusion of any proceeding under this section, the Commission may order refunds of any amounts paid, for the period subsequent to the refund effective date through a date

fifteen months after such refund effective date, in excess of those which would have been paid under the just and reasonable rate, charge, classification, rule, regulation, practice, or contract which the Commission orders to be thereafter observed and in force: *Provided*, That if the proceeding is not concluded within fifteen months after the refund effective date and if the Commission determines at the conclusion of the proceeding that the proceeding was not resolved within the fifteen-month period primarily because of dilatory behavior by the public utility, the Commission may order refunds of any or all amounts paid for the period subsequent to the refund effective date and prior to the conclusion of the proceeding. The refunds shall be made, with interest, to those persons who have paid those rates or charges which are the subject of the proceeding.

(c) Refund considerations; shifting costs; reduction in revenues; “electric utility companies” and “registered holding company” defined

Notwithstanding subsection (b) of this section, in a proceeding commenced under this section involving two or more electric utility companies of a registered holding company, refunds which might otherwise be payable under subsection (b) of this section shall not be ordered to the extent that such refunds would result from any portion of a Commission order that (1) requires a decrease in system production or transmission costs to be paid by one or more of such electric companies; and (2) is based upon a determination that the amount of such decrease should be paid through an increase in the costs to be paid by other electric utility companies of such registered holding company: *Provided*, That refunds, in whole or in part, may be ordered by the Commission if it determines that the registered holding company would not experience any reduction in revenues which results from an inability of an electric utility company of the holding company to recover such increase in costs for the period between the refund effective date and the effective date of the Commission's order. For purposes of this subsection, the terms “electric utility companies” and “registered holding company” shall have the same meanings as provided in the Public Utility Holding Company Act of 1935, as amended.¹

(d) Investigation of costs

The Commission upon its own motion, or upon the request of any State commission whenever it can do so without prejudice to the efficient and proper conduct of its affairs, may investigate and determine the cost of the production or transmission of electric energy by means of facilities under the jurisdiction of the Commission in cases where the Commission has no authority to establish a rate governing the sale of such energy.

(e) Short-term sales

(1) In this subsection:

(A) The term “short-term sale” means an agreement for the sale of electric energy at wholesale in interstate commerce that is for a period of 31 days or less (excluding monthly contracts subject to automatic renewal).

(B) The term “applicable Commission rule” means a Commission rule applicable to sales at wholesale by public utilities that the Commission determines after notice and comment should also be applicable to entities subject to this subsection.

(2) If an entity described in section 824(f) of this title voluntarily makes a short-term sale of electric energy through an organized market in which the rates for the sale are established by Commission-approved tariff (rather than by contract) and the sale violates the terms of the tariff or applicable Commission rules in effect at the time of the sale, the entity shall be subject to the refund authority of the Commission under this section with respect to the violation.

(3) This section shall not apply to—

(A) any entity that sells in total (including affiliates of the entity) less than 8,000,000 megawatt hours of electricity per year; or

(B) an electric cooperative.

(4)(A) The Commission shall have refund authority under paragraph (2) with respect to a

voluntary short term sale of electric energy by the Bonneville Power Administration only if the sale is at an unjust and unreasonable rate.

(B) The Commission may order a refund under subparagraph (A) only for short-term sales made by the Bonneville Power Administration at rates that are higher than the highest just and reasonable rate charged by any other entity for a short-term sale of electric energy in the same geographic market for the same, or most nearly comparable, period as the sale by the Bonneville Power Administration.

(C) In the case of any Federal power marketing agency or the Tennessee Valley Authority, the Commission shall not assert or exercise any regulatory authority or power under paragraph (2) other than the ordering of refunds to achieve a just and reasonable rate.

§824f. Ordering furnishing of adequate service

Whenever the Commission, upon complaint of a State commission, after notice to each State commission and public utility affected and after opportunity for hearing, shall find that any interstate service of any public utility is inadequate or insufficient, the Commission shall determine the proper, adequate, or sufficient service to be furnished, and shall fix the same by its order, rule, or regulation: *Provided*, That the Commission shall have no authority to compel the enlargement of generating facilities for such purposes, nor to compel the public utility to sell or exchange energy when to do so would impair its ability to render adequate service to its customers.

(June 10, 1920, ch. 285, pt. II, §207, as added Aug. 26, 1935, ch. 687, title II, §213, 49 Stat. 853.)

§824g. Ascertainment of cost of property and depreciation

(a) Investigation of property costs

The Commission may investigate and ascertain the actual legitimate cost of the property of every public utility, the depreciation therein, and, when found necessary for rate-making purposes, other facts which bear on the determination of such cost or depreciation, and the fair value of such property.

(b) Request for inventory and cost statements

Every public utility upon request shall file with the Commission an inventory of all or any part of its property and a statement of the original cost thereof, and shall keep the Commission informed regarding the cost of all additions, betterments, extensions, and new construction.

(June 10, 1920, ch. 285, pt. II, §208, as added Aug. 26, 1935, ch. 687, title II, §213, 49 Stat. 853.)

§824h. References to State boards by Commission

(a) Composition of boards; force and effect of proceedings

The Commission may refer any matter arising in the administration of this subchapter to a board to be composed of a member or members, as determined by the Commission, from the State or each of the States affected or to be affected by such matter. Any such board shall be vested with the same power and be subject to the same duties and liabilities as in the case of a member of the Commission when designated by the Commission to hold any hearings. The action of such board shall have such force and effect and its proceedings shall be conducted in such manner as the Commission shall by regulations prescribe. The board shall be appointed by the Commission from persons nominated by the State commission of each State affected or by the Governor of such State if there is no State

commission. Each State affected shall be entitled to the same number of representatives on the board unless the nominating power of such State waives such right. The Commission shall have discretion to reject the nominee from any State, but shall thereupon invite a new nomination from that State. The members of a board shall receive such allowances for expenses as the Commission shall provide. The Commission may, when in its discretion sufficient reason exists therefor, revoke any reference to such a board.

(b) Cooperation with State commissions

The Commission may confer with any State commission regarding the relationship between rate structures, costs, accounts, charges, practices, classifications, and regulations of public utilities subject to the jurisdiction of such State commission and of the Commission; and the Commission is authorized, under such rules and regulations as it shall prescribe, to hold joint hearings with any State commission in connection with any matter with respect to which the Commission is authorized to act. The Commission is authorized in the administration of this chapter to avail itself of such cooperation, services, records, and facilities as may be afforded by any State commission.

(c) Availability of information and reports to State commissions; Commission experts

The Commission shall make available to the several State commissions such information and reports as may be of assistance in State regulation of public utilities. Whenever the Commission can do so without prejudice to the efficient and proper conduct of its affairs, it may upon request from a State make available to such State as witnesses any of its trained rate, valuation, or other experts, subject to reimbursement to the Commission by such State of the compensation and traveling expenses of such witnesses. All sums collected hereunder shall be credited to the appropriation from which the amounts were expended in carrying out the provisions of this subsection.

(June 10, 1920, ch. 285, pt. II, §209, as added Aug. 26, 1935, ch. 687, title II, §213, 49 Stat. 853.)

§824i. Interconnection authority

(a) Powers of Commission; application by State regulatory authority

(1) Upon application of any electric utility, Federal power marketing agency, geothermal power producer (including a producer which is not an electric utility), qualifying cogenerator, or qualifying small power producer, the Commission may issue an order requiring—

(A) the physical connection of any cogeneration facility, any small power production facility, or the transmission facilities of any electric utility, with the facilities of such applicant,

(B) such action as may be necessary to make effective any physical connection described in subparagraph (A), which physical connection is ineffective for any reason, such as inadequate size, poor maintenance, or physical unreliability,

(C) such sale or exchange of electric energy or other coordination, as may be necessary to carry out the purposes of any order under subparagraph (A) or (B), or

(D) such increase in transmission capacity as may be necessary to carry out the purposes of any order under subparagraph (A) or (B).

(2) Any State regulatory authority may apply to the Commission for an order for any action referred to in subparagraph (A), (B), (C), or (D) of paragraph (1). No such order may be issued by the Commission with respect to a Federal power marketing agency upon application of a State regulatory authority.

(b) Notice, hearing and determination by Commission

Upon receipt of an application under subsection (a) of this section, the Commission shall—

(1) issue notice to each affected State regulatory authority, each affected electric utility, each affected Federal power marketing agency, each affected owner or operator of a cogeneration facility or of a small power production facility, and to the public.¹

(2) afford an opportunity for an evidentiary hearing, and

(3) make a determination with respect to the matters referred to in subsection (c) of this section.

(c) Necessary findings

No order may be issued by the Commission under subsection (a) of this section unless the Commission determines that such order—

- (1) is in the public interest,
- (2) would—
 - (A) encourage overall conservation of energy or capital,
 - (B) optimize the efficiency of use of facilities and resources, or
 - (C) improve the reliability of any electric utility system or Federal power marketing agency to which the order applies, and

(3) meets the requirements of section 824k of this title.

(d) Motion of Commission

The Commission may, on its own motion, after compliance with the requirements of paragraphs (1) and (2) of subsection (b) of this section, issue an order requiring any action described in subsection (a)(1) of this section if the Commission determines that such order meets the requirements of subsection (c) of this section. No such order may be issued upon the Commission's own motion with respect to a Federal power marketing agency.

(e) Definitions

(1) As used in this section, the term “facilities” means only facilities used for the generation or transmission of electric energy.

(2) With respect to an order issued pursuant to an application of a qualifying cogenerator or qualifying small power producer under subsection (a)(1) of this section, the term “facilities of such applicant” means the qualifying cogeneration facilities or qualifying small power production facilities of the applicant, as specified in the application. With respect to an order issued pursuant to an application under subsection (a)(2) of this section, the term “facilities of such applicant” means the qualifying cogeneration facilities, qualifying small power production facilities, or the transmission facilities of an electric utility, as specified in the application. With respect to an order issued by the Commission on its own motion under subsection (d) of this section, such term means the qualifying cogeneration facilities, qualifying small power production facilities, or the transmission facilities of an electric utility, as specified in the proposed order.

STUDY AND REPORT TO CONGRESSIONAL COMMITTEES ON APPLICATION OF PROVISIONS RELATING TO COGENERATION, SMALL POWER PRODUCTION, AND INTERCONNECTION AUTHORITY TO HYDROELECTRIC POWER FACILITIES

For provisions requiring the Federal Energy Regulatory Commission to conduct a study and report to Congress on whether the benefits of this section and section 824a–3 of this title should be applied to hydroelectric power facilities utilizing new dams or diversions, within the meaning of section 824a–3(k) of this title, see section 8(d) of Pub. L. 99–495, set out as a note under section 824a–3 of this title.

§824j. Wheeling authority

(a) Transmission service by any electric utility; notice, hearing and findings by Commission

Any electric utility, Federal power marketing agency, or any other person generating electric

energy for sale for resale, may apply to the Commission for an order under this subsection requiring a transmitting utility to provide transmission services (including any enlargement of transmission capacity necessary to provide such services) to the applicant. Upon receipt of such application, after public notice and notice to each affected State regulatory authority, each affected electric utility, and each affected Federal power marketing agency, and after affording an opportunity for an evidentiary hearing, the Commission may issue such order if it finds that such order meets the requirements of section 824k of this title, and would otherwise be in the public interest. No order may be issued under this subsection unless the applicant has made a request for transmission services to the transmitting utility that would be the subject of such order at least 60 days prior to its filing of an application for such order.

(b) Reliability of electric service

No order may be issued under this section or section 824i of this title if, after giving consideration to consistently applied regional or national reliability standards, guidelines, or criteria, the Commission finds that such order would unreasonably impair the continued reliability of electric systems affected by the order.

(c) Replacement of electric energy

No order may be issued under subsection (a) or (b) of this section which requires the transmitting utility subject to the order to transmit, during any period, an amount of electric energy which replaces any amount of electric energy—

- (1) required to be provided to such applicant pursuant to a contract during such period, or
- (2) currently provided to the applicant by the utility subject to the order pursuant to a rate schedule on file during such period with the Commission: *Provided*, That nothing in this subparagraph shall prevent an application for an order hereunder to be filed prior to termination or modification of an existing rate schedule: *Provided*, That such order shall not become effective until termination of such rate schedule or the modification becomes effective.

(d) Termination or modification of order; notice, hearing and findings of Commission; contents of order; inclusion in order of terms and conditions agreed upon by parties

(1) Any transmitting utility ordered under subsection (a) or (b) of this section to provide transmission services may apply to the Commission for an order permitting such transmitting utility to cease providing all, or any portion of, such services. After public notice, notice to each affected State regulatory authority, each affected Federal power marketing agency, each affected transmitting utility, and each affected electric utility, and after an opportunity for an evidentiary hearing, the Commission shall issue an order terminating or modifying the order issued under subsection (a) or (b) of this section, if the transmitting utility providing such transmission services has demonstrated, and the Commission has found, that—

(A) due to changed circumstances, the requirements applicable, under this section and section 824k of this title, to the issuance of an order under subsection (a) or (b) of this section are no longer met, or ¹

(B) any transmission capacity of the utility providing transmission services under such order which was, at the time such order was issued, in excess of the capacity necessary to serve its own customers is no longer in excess of the capacity necessary for such purposes, or

(C) the ordered transmission services require enlargement of transmission capacity and the transmitting utility subject to the order has failed, after making a good faith effort, to obtain the necessary approvals or property rights under applicable Federal, State, and local laws.

No order shall be issued under this subsection pursuant to a finding under subparagraph (A) unless the Commission finds that such order is in the public interest.

(2) Any order issued under this subsection terminating or modifying an order issued under subsection (a) or (b) of this section shall—

- (A) provide for any appropriate compensation, and
- (B) provide the affected electric utilities adequate opportunity and time to—

- (i) make suitable alternative arrangements for any transmission services terminated or modified, and
- (ii) insure that the interests of ratepayers of such utilities are adequately protected.

(3) No order may be issued under this subsection terminating or modifying any order issued under subsection (a) or (b) of this section if the order under subsection (a) or (b) of this section includes terms and conditions agreed upon by the parties which—

(A) fix a period during which transmission services are to be provided under the order under subsection (a) or (b) of this section, or

(B) otherwise provide procedures or methods for terminating or modifying such order (including, if appropriate, the return of the transmission capacity when necessary to take into account an increase, after the issuance of such order, in the needs of the transmitting utility subject to such order for transmission capacity).

(e) “Facilities” defined

As used in this section, the term “facilities” means only facilities used for the generation or transmission of electric energy.

(June 10, 1920, ch. 285, pt. II, §211, as added Pub. L. 95–617, title II, §203, Nov. 9, 1978, 92 Stat. 3136; amended Pub. L. 96–294, title VI, §643(a)(3), June 30, 1980, 94 Stat. 770; Pub. AMENDMENTS

2005—Subsec. (c). Pub. L. 109–58, §1295(c)(1), struck out par. (2) designation before introductory provisions, redesignated former subpars. (A) and (B) as pars. (1) and (2), respectively, and in par. (2) substituted “termination or modification” for “termination of modification”.

Subsec. (d)(1). Pub. L. 109–58, §1295(c)(2), substituted “if the transmitting utility providing” for “if the electric utility providing” in introductory provisions.

1992—Subsec. (a). Pub. L. 102–486, §721(1), amended first sentence generally. Prior to amendment, first sentence read as follows: “Any electric utility, geothermal power producer (including a producer which is not an electric utility), or Federal power marketing agency may apply to the Commission for an order under this subsection requiring any other electric utility to provide transmission services to the applicant (including any enlargement of transmission capacity necessary to provide such services).”

Pub. L. 102–486, §721(2), in second sentence, substituted “the Commission may issue such order if it finds that such order meets the requirements of section 824k of this title, and would otherwise be in the public interest. No order may be issued under this subsection unless the applicant has made a request for transmission services to the transmitting utility that would be the subject of such order at least 60 days prior to its filing of an application for such order.” for “the Commission may issue such order if it finds that such order—

“(1) is in the public interest,

“(2) would—

“(A) conserve a significant amount of energy,

“(B) significantly promote the efficient use of facilities and resources, or

“(C) improve the reliability of any electric utility system to which the order applies, and

“(3) meets the requirements of section 824k of this title.”

Subsec. (b). Pub. L. 102–486, §721(3), amended subsec. (b) generally, substituting provisions relating to reliability of electric service for provisions which related to transmission service by sellers of electric energy for resale and notice, hearing, and determinations by Commission.

Subsec. (c). Pub. L. 102–486, §721(4), struck out pars. (1), (3), and (4), and substituted “which requires the transmitting” for “which requires the electric” in introductory provisions of par. (2). Prior to amendment, pars. (1), (3), and (4) read as follows:

“(1) No order may be issued under subsection (a) of this section unless the Commission determines that such order would reasonably preserve existing competitive relationships.

“(3) No order may be issued under the authority of subsection (a) or (b) of this section which is inconsistent with any State law which governs the retail marketing areas of electric utilities.

“(4) No order may be issued under subsection (a) or (b) of this section which provides for the transmission of electric energy directly to an ultimate consumer.”

Subsec. (d). Pub. L. 102–486, §721(5), in first sentence substituted “transmitting” for “electric” before

“utility” in two places, in second sentence inserted “each affected transmitting utility,” before “and each affected electric utility”, in par. (1) substituted “, or” for period at end of subpar. (B) and added subpar. (C), and in par. (3)(B) substituted “transmitting” for “electric” before “utility”.

1986—Subsec. (c)(2)(B). Pub. L. 99–495 inserted provisions that nothing in this subparagraph shall prevent an application for an order hereunder to be filed prior to termination or modification of an existing rate schedule, provided that such order shall not become effective until termination of such rate schedule or the modification becomes effective.

1980—Subsec. (a). Pub. L. 96–294 added applicability to geothermal power producers.

EFFECTIVE DATE OF 1986 AMENDMENT

Amendment by Pub. L. 99–495 effective with respect to each license, permit, or exemption issued under this chapter after Oct. 16, 1986, see section 18 of Pub. L. 99–495, set out as a note under section 797 of this title.

STATE AUTHORITIES; CONSTRUCTION

Nothing in amendment by Pub. L. 102–486 to be construed as affecting or intending to affect, or in any way to interfere with, authority of any State or local government relating to environmental protection or siting of facilities, see section 731 of Pub. L. 102–486, set out as a note under section 796 of this title.

§824j–1. Open access by unregulated transmitting utilities

(a) Definition of unregulated transmitting utility

In this section, the term “unregulated transmitting utility” means an entity that—

- (1) owns or operates facilities used for the transmission of electric energy in interstate commerce; and
- (2) is an entity described in section 824(f) of this title.

(b) Transmission operation services

Subject to section 824k(h) of this title, the Commission may, by rule or order, require an unregulated transmitting utility to provide transmission services—

- (1) at rates that are comparable to those that the unregulated transmitting utility charges itself; and
- (2) on terms and conditions (not relating to rates) that are comparable to those under which the unregulated transmitting utility provides transmission services to itself and that are not unduly discriminatory or preferential.

(c) Exemption

The Commission shall exempt from any rule or order under this section any unregulated transmitting utility that—

- (1) sells not more than 4,000,000 megawatt hours of electricity per year;
- (2) does not own or operate any transmission facilities that are necessary for operating an interconnected transmission system (or any portion of the system); or
- (3) meets other criteria the Commission determines to be in the public interest.

(d) Local distribution facilities

The requirements of subsection (b) of this section shall not apply to facilities used in local distribution.

(e) Exemption termination

If the Commission, after an evidentiary hearing held on a complaint and after giving consideration to reliability standards established under section 824o of this title, finds on the basis of a

preponderance of the evidence that any exemption granted pursuant to subsection (c) of this section unreasonably impairs the continued reliability of an interconnected transmission system, the Commission shall revoke the exemption granted to the transmitting utility.

(f) Application to unregulated transmitting utilities

The rate changing procedures applicable to public utilities under subsections (c) and (d) of section 824d of this title are applicable to unregulated transmitting utilities for purposes of this section.

(g) Remand

In exercising authority under subsection (b)(1) of this section, the Commission may remand transmission rates to an unregulated transmitting utility for review and revision if necessary to meet the requirements of subsection (b) of this section.

(h) Other requests

The provision of transmission services under subsection (b) of this section does not preclude a request for transmission services under section 824j of this title.

(i) Limitation

The Commission may not require a State or municipality to take action under this section that would violate a private activity bond rule for purposes of section 141 of title 26.

(j) Transfer of control of transmitting facilities

Nothing in this section authorizes the Commission to require an unregulated transmitting utility to transfer control or operational control of its transmitting facilities to a Transmission Organization that is designated to provide nondiscriminatory transmission access.

(June 10, 1920, ch. 285, pt. II, §211A, as added Pub. L. 109–58, title XII, §1231, Aug. 8, 2005, 119 Stat. 955.)

§824k. Orders requiring interconnection or wheeling

(a) Rates, charges, terms, and conditions for wholesale transmission services

An order under section 824j of this title shall require the transmitting utility subject to the order to provide wholesale transmission services at rates, charges, terms, and conditions which permit the recovery by such utility of all the costs incurred in connection with the transmission services and necessary associated services, including, but not limited to, an appropriate share, if any, of legitimate, verifiable and economic costs, including taking into account any benefits to the transmission system of providing the transmission service, and the costs of any enlargement of transmission facilities. Such rates, charges, terms, and conditions shall promote the economically efficient transmission and generation of electricity and shall be just and reasonable, and not unduly discriminatory or preferential. Rates, charges, terms, and conditions for transmission services provided pursuant to an order under section 824j of this title shall ensure that, to the extent practicable, costs incurred in providing the wholesale transmission services, and properly allocable to the provision of such services, are recovered from the applicant for such order and not from a transmitting utility's existing wholesale, retail, and transmission customers.

(b) Repealed. Pub. L. 102–486, title VII, §722(1), Oct. 24, 1992, 106 Stat. 2916

(c) Issuance of proposed order; agreement by parties to terms and conditions of order; approval by Commission; inclusion in final order; failure to agree

(1) Before issuing an order under section 824i of this title or subsection (a) or (b) of section 824j of this title, the Commission shall issue a proposed order and set a reasonable time for parties to the proposed interconnection or transmission order to agree to terms and conditions under which such order is to be carried out, including the apportionment of costs between them and the compensation or reimbursement reasonably due to any of them. Such proposed order shall not be reviewable or enforceable in any court. The time set for such parties to agree to such terms and conditions may be

shortened if the Commission determines that delay would jeopardize the attainment of the purposes of any proposed order. Any terms and conditions agreed to by the parties shall be subject to the approval of the Commission.

(2)(A) If the parties agree as provided in paragraph (1) within the time set by the Commission and the Commission approves such agreement, the terms and conditions shall be included in the final order. In the case of an order under section 824i of this title, if the parties fail to agree within the time set by the Commission or if the Commission does not approve any such agreement, the Commission shall prescribe such terms and conditions and include such terms and conditions in the final order.

(B) In the case of any order applied for under section 824j of this title, if the parties fail to agree within the time set by the Commission, the Commission shall prescribe such terms and conditions in the final order.

(d) Statement of reasons for denial

If the Commission does not issue any order applied for under section 824i or 824j of this title, the Commission shall, by order, deny such application and state the reasons for such denial.

(e) Savings provisions

(1) No provision of section 824i, 824j, 824m of this title, or this section shall be treated as requiring any person to utilize the authority of any such section in lieu of any other authority of law. Except as provided in section 824i, 824j, 824m of this title, or this section, such sections shall not be construed as limiting or impairing any authority of the Commission under any other provision of law.

(2) Sections 824i, 824j, 824l, 824m of this title, and this section, shall not be construed to modify, impair, or supersede the antitrust laws. For purposes of this section, the term “antitrust laws” has the meaning given in subsection (a) of the first sentence of section 12 of title 15, except that such term includes section 45 of title 15 to the extent that such section relates to unfair methods of competition.

(f) Effective date of order; hearing; notice; review

(1) No order under section 824i or 824j of this title requiring the Tennessee Valley Authority (hereinafter in this subsection referred to as the “TVA”) to take any action shall take effect for 60 days following the date of issuance of the order. Within 60 days following the issuance by the Commission of any order under section 824i or of section 824j of this title requiring the TVA to enter into any contract for the sale or delivery of power, the Commission may on its own motion initiate, or upon petition of any aggrieved person shall initiate, an evidentiary hearing to determine whether or not such sale or delivery would result in violation of the third sentence of section 15d(a) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831n–4), hereinafter in this subsection referred to as the TVA Act [16 U.S.C. 831 et seq.].

(2) Upon initiation of any evidentiary hearing under paragraph (1), the Commission shall give notice thereof to any applicant who applied for and obtained the order from the Commission, to any electric utility or other entity subject to such order, and to the public, and shall promptly make the determination referred to in paragraph (1). Upon initiation of such hearing, the Commission shall stay the effectiveness of the order under section 824i or 824j of this title until whichever of the following dates is applicable—

(A) the date on which there is a final determination (including any judicial review thereof under paragraph (3)) that no such violation would result from such order, or

(B) the date on which a specific authorization of the Congress (within the meaning of the third sentence of section 15d(a) of the TVA Act [16 U.S.C. 831n–4(a)]) takes effect.

(3) Any determination under paragraph (1) shall be reviewable only in the appropriate court of the United States upon petition filed by any aggrieved person or municipality within 60 days after such determination, and such court shall have jurisdiction to grant appropriate relief. Any applicant who applied for and obtained the order under section 824i or 824j of this title, and any electric utility or other entity subject to such order shall have the right to intervene in any such proceeding in such court. Except for review by such court (and any appeal or other review by an appellate court of the

United States), no court shall have jurisdiction to consider any action brought by any person to enjoin the carrying out of any order of the Commission under section 824i or section 824j of this title requiring the TVA to take any action on the grounds that such action requires a specific authorization of the Congress pursuant to the third sentence of section 15d(a) of the TVA Act [16 U.S.C. 831n–4(a)].

(g) Prohibition on orders inconsistent with retail marketing areas

No order may be issued under this chapter which is inconsistent with any State law which governs the retail marketing areas of electric utilities.

(h) Prohibition on mandatory retail wheeling and sham wholesale transactions

No order issued under this chapter shall be conditioned upon or require the transmission of electric energy:

- (1) directly to an ultimate consumer, or
- (2) to, or for the benefit of, an entity if such electric energy would be sold by such entity directly to an ultimate consumer, unless:

(A) such entity is a Federal power marketing agency; the Tennessee Valley Authority; a State or any political subdivision of a State (or an agency, authority, or instrumentality of a State or a political subdivision); a corporation or association that has ever received a loan for the purposes of providing electric service from the Administrator of the Rural Electrification Administration under the Rural Electrification Act of 1936 [7 U.S.C. 901 et seq.]; a person having an obligation arising under State or local law (exclusive of an obligation arising solely from a contract entered into by such person) to provide electric service to the public; or any corporation or association which is wholly owned, directly or indirectly, by any one or more of the foregoing; and

(B) such entity was providing electric service to such ultimate consumer on October 24, 1992, or would utilize transmission or distribution facilities that it owns or controls to deliver all such electric energy to such electric consumer.

Nothing in this subsection shall affect any authority of any State or local government under State law concerning the transmission of electric energy directly to an ultimate consumer.

(i) Laws applicable to Federal Columbia River Transmission System

(1) The Commission shall have authority pursuant to section 824i of this title, section 824j of this title, this section, and section 824l of this title to (A) order the Administrator of the Bonneville Power Administration to provide transmission service and (B) establish the terms and conditions of such service. In applying such sections to the Federal Columbia River Transmission System, the Commission shall assure that—

(i) the provisions of otherwise applicable Federal laws shall continue in full force and effect and shall continue to be applicable to the system; and

(ii) the rates for the transmission of electric power on the system shall be governed only by such otherwise applicable provisions of law and not by any provision of section 824i of this title, section 824j of this title, this section, or section 824l of this title, except that no rate for the transmission of power on the system shall be unjust, unreasonable, or unduly discriminatory or preferential, as determined by the Commission.

(2) Notwithstanding any other provision of this chapter with respect to the procedures for the determination of terms and conditions for transmission service—

(A) when the Administrator of the Bonneville Power Administration either (i) in response to a written request for specific transmission service terms and conditions does not offer the requested terms and conditions, or (ii) proposes to establish terms and conditions of general applicability for transmission service on the Federal Columbia River Transmission System, then the Administrator may provide opportunity for a hearing and, in so doing, shall—

(I) give notice in the Federal Register and state in such notice the written explanation of the reasons why the specific terms and conditions for transmission services are not being offered or

are being proposed;

(II) adhere to the procedural requirements of paragraphs (1) through (3) of section 839e(i) of this title, except that the hearing officer shall, unless the hearing officer becomes unavailable to the agency, make a recommended decision to the Administrator that states the hearing officer's findings and conclusions, and the reasons or basis thereof, on all material issues of fact, law, or discretion presented on the record; and

(III) make a determination, setting forth the reasons for reaching any findings and conclusions which may differ from those of the hearing officer, based on the hearing record, consideration of the hearing officer's recommended decision, section 824j of this title and this section, as amended by the Energy Policy Act of 1992, and the provisions of law as preserved in this section; and

(B) if application is made to the Commission under section 824j of this title for transmission service under terms and conditions different than those offered by the Administrator, or following the denial of a request for transmission service by the Administrator, and such application is filed within 60 days of the Administrator's final determination and in accordance with Commission procedures, the Commission shall—

(i) in the event the Administrator has conducted a hearing as herein provided for (I) accord parties to the Administrator's hearing the opportunity to offer for the Commission record materials excluded by the Administrator from the hearing record, (II) accord such parties the opportunity to submit for the Commission record comments on appropriate terms and conditions, (III) afford those parties the opportunity for a hearing if and to the extent that the Commission finds the Administrator's hearing record to be inadequate to support a decision by the Commission, and (IV) establish terms and conditions for or deny transmission service based on the Administrator's hearing record, the Commission record, section 824j of this title and this section, as amended by the Energy Policy Act of 1992, and the provisions of law as preserved in this section, or

(ii) in the event the Administrator has not conducted a hearing as herein provided for, determine whether to issue an order for transmission service in accordance with section 824j of this title and this section, including providing the opportunity for a hearing.

(3) Notwithstanding those provisions of section 8251(b) of this title which designate the court in which review may be obtained, any party to a proceeding concerning transmission service sought to be furnished by the Administrator of the Bonneville Power Administration seeking review of an order issued by the Commission in such proceeding shall obtain a review of such order in the United States Court of Appeals for the Pacific Northwest, as that region is defined by section 839a(14) of this title.

(4) To the extent the Administrator of the Bonneville Power Administration cannot be required under section 824j of this title, as a result of the Administrator's other statutory mandates, either to (A) provide transmission service to an applicant which the Commission would otherwise order, or (B) provide such service under rates, terms, and conditions which the Commission would otherwise require, the applicant shall not be required to provide similar transmission services to the Administrator or to provide such services under similar rates, terms, and conditions.

(5) The Commission shall not issue any order under section 824i of this title, section 824j of this title, this section, or section 824l of this title requiring the Administrator of the Bonneville Power Administration to provide transmission service if such an order would impair the Administrator's ability to provide such transmission service to the Administrator's power and transmission customers in the Pacific Northwest, as that region is defined in section 839a(14) of this title, as is needed to assure adequate and reliable service to loads in that region.

(j) Equitability within territory restricted electric systems

With respect to an electric utility which is prohibited by Federal law from being a source of power supply, either directly or through a distributor of its electric energy, outside an area set forth in such law, no order issued under section 824j of this title may require such electric utility (or a distributor

of such electric utility) to provide transmission services to another entity if the electric energy to be transmitted will be consumed within the area set forth in such Federal law, unless the order is in furtherance of a sale of electric energy to that electric utility: *Provided, however*, That the foregoing provision shall not apply to any area served at retail by an electric transmission system which was such a distributor on October 24, 1992, and which before October 1, 1991, gave its notice of termination under its power supply contract with such electric utility.

(k) ERCOT utilities

(1) Rates

Any order under section 824j of this title requiring provision of transmission services in whole or in part within ERCOT shall provide that any ERCOT utility which is not a public utility and the transmission facilities of which are actually used for such transmission service is entitled to receive compensation based, insofar as practicable and consistent with subsection (a) of this section, on the transmission ratemaking methodology used by the Public Utility Commission of Texas.

(2) Definitions

For purposes of this subsection—
