The Continental Scientific Drilling Program is an important national scientific endeavor that is vital to the understanding of the geologic evolution of the Earth and the economic value of its resources; the most effective and efficient means of realizing the fullest potential in the Continental Scientific Drilling Program is through a cooperative effort by the Department of Energy, the National Science Foundation, and the United States Geological Survey; many important commercial and scientific advances may result from the Continental Scientific Drilling Program; and many foreign nations are engaged in a comparable deep drilling program, and cooperation and coordination would be beneficial to United States efforts. It is the sense of the Congress that—

"(1) the Continental Scientific Drilling Program is an important national scientific endeavor by the United States which should be enthusiastically implemented through a joint cooperative effort among the United States Department of Energy, the National Science Foundation, and the United States Geological Survey;

"(2) the private sector should be encouraged to support the Continental Scientific Drilling Program and the participating agencies should solicit appropriate private sector participation in such program; and

"(3) the United States Government should cooperate to the extent practicable with the international community in developing this important scientific and technical activity."

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of functions of other officers, employees, and agencies of Department of the Interior, with certain exceptions, to Secretary of the Interior, with power to delegate, see Reorg. Plan No. 3 of 1950, §§1, 2, eff. May 24, 1950, 15 F.R. 3174, 64 Stat. 1262, set out under section 1451 of this title.

§31a. Findings and purpose

(a) Findings

The Congress finds and declares that—

(1) although significant progress has been made in the production of geologic maps since the

establishment of the national cooperative geologic mapping program in 1992, no modern, digital, geologic map exists for approximately 75 percent of the United States;

(2) geologic maps are the primary data base for virtually all applied and basic earth-science investigations, including—

(A) exploration for and development of mineral, energy, and water resources;

(B) screening and characterizing sites for toxic and nuclear waste disposal;

(C) land use evaluation and planning for homeland and environmental protection;

(D) earthquake hazards reduction;

(E) identifying volcanic hazards;

(F) design and construction of infrastructure requirements such as utility lifelines, transportation corridors, and surface-water impoundments;

(G) reducing losses from landslides and other ground failures;

(H) mitigating effects of coastal and stream erosion;

(I) siting of critical facilities;

(J) recreation and public awareness; and

(K) basic earth-science research;

(3) Federal agencies, State and local governments, private industry, and the general public depend on the information provided by geologic maps to determine the extent of potential environmental damage before embarking on projects that could lead to preventable, costly environmental problems or litigation;

(4) the combined capabilities of State, Federal, and academic groups to provide geologic mapping are not sufficient to meet the present and future needs of the United States for national security, environmental protection, and energy self-sufficiency of the Nation;

(5) States are willing to contribute 50 percent of the funding necessary to complete the mapping of the geology within the State;

(6) the lack of proper geologic maps has led to the poor design of such structures as dams and waste-disposal facilities;

(7) geologic maps have proven indispensable in the search for needed fossil-fuel and mineral resources;

(8) geologic map information is required for the sustainable and balanced development of natural resources of all types, including energy, minerals, land, water, and biological resources;

(9) advances in digital technology and geographical information system science have made geologic map databases increasingly available as decision support tools for land and resource management; and

(10) a comprehensive nationwide program of geologic mapping of surficial and bedrock deposits is required in order to systematically build the Nation's geologic-map data base at a pace that responds to increasing demand.

(b) Purpose

The purpose of sections 31a to 31h of this title is to expedite the production of a geologic-map data base for the Nation, to be located within the United States Geological Survey, which can be applied to land-use management, assessment, and utilization, conservation of natural resources, groundwater management, and environmental protection and management.

"(1) in enacting the National Geologic Mapping Act of 1992 (43 U.S.C. 31a et seq.), Congress found, among other things, that—

"(A) during the 2 decades preceding enactment of that Act, the production of geologic maps had been drastically curtailed;

"(B) geologic maps are the primary data base for virtually all applied and basic earth-science investigations;

"(C) Federal agencies, State and local governments, private industry, and the general public depend on the information provided by geologic maps to determine the extent of potential environmental damage before embarking on projects that could lead to preventable, costly environmental problems or litigation;

"(D) the lack of proper geologic maps has led to the poor design of such structures as dams and waste-disposal facilities;

"(E) geologic maps have proven indispensable in the search for needed fossil fuel and mineral resources; and

"(F) a comprehensive nationwide program of geologic mapping is required in order to systematically build the Nation's geologic-map data base at a pace that responds to increasing demand;

"(2) the geologic mapping program called for by that Act has not been fully implemented; and

"(3) it is time for this important program to be fully implemented."

EDITORIAL NOTES

CODIFICATION

Section, act Mar. 3, 1925, ch. 462, 43 Stat. 1144, which abolished office of surveyor general and transferred its functions to Field Surveying Service under Supervisor of Surveys, was superseded by Reorg. Plan No. 3 of 1946, §403, eff. July 16, 1946, 11 F.R. 7876, 60 Stat. 1100. See note set out under section 1 of this title.

The office of surveyor general abolished in certain States by acts July 31, 1876, ch. 246, 19 Stat. 121, and Oct. 2, 1888, ch. 1069, 25 Stat. 525, and discontinued in others pursuant to R.S. §2218.

So far as they were not already superseded or obsolete by reason of abolition or discontinuance of the office, or otherwise, the following provisions were superseded by former provisions of this section:

R.S. §2207, providing for appointment of surveyors general in States and territories therein named, and acts Apr. 10, 1890, ch. 77, §1, 26 Stat. 53, and July 24, 1897, ch. 14, §2, 30 Stat. 215, providing for surveyors general in North and South Dakota and Alaska;

R.S. §§2208 to 2211; acts Apr. 10, 1890, ch. 77, §2, 26 Stat. 53; July 24, 1897, ch. 14, §3, 30 Stat. 215, concerning salaries of particular surveyors general;

R.S. §§2212 to 2214, concerning number and location, of offices, and place of residence, of surveyors general.

R.S. §§2215 and 2216, concerning bonds of surveyors general;

R.S. §2217, concerning duration of term of office of surveyors general;

R.S. §§2226 and 2227, concerning allowances for clerk hire and office expenses;

Act Mar. 3, 1893, ch. 211, 27 Stat. 709, relative to consolidation of offices of two or more surveyors general; and provisions of act May 24, 1922, ch. 199, 42 Stat. 556, and prior acts concerning detail of clerks from office of one surveyor general to another.

§52. Surveying duties

The Secretary of the Interior or such officer as he may designate shall engage a sufficient number of skillful surveyors as his deputies, to whom he is authorized to administer the necessary oaths upon

their appointments. He shall have authority to frame regulations for their direction, not inconsistent with law or the instructions of the Bureau of Land Management, and to remove them for negligence or misconduct in office.

Second. He shall cause to be surveyed, measured, and marked, without delay, all base and meridian lines through such points and perpetuated by such monuments, and such other correction parallels and meridians as may be prescribed by law or by instructions from the Bureau of Land Management, in respect to the public lands to which the Indian title has been or may be extinguished.

Third. He shall cause to be surveyed all private land claims after they have been confirmed by authority of Congress, so far as may be necessary to complete the survey of the public lands.

Fourth. He shall transmit to the officer, as the Secretary of the Interior may designate, of the respective land offices general and particular plats of all lands surveyed by him for each land district; and he shall forward copies of such plats to such officer as the Secretary may designate.

Fifth. He shall, so far as is compatible with the desk duties of his office, occasionally inspect the surveying operations while in progress in the field, sufficiently to satisfy himself of the fidelity of the execution of the work according to contract, and the actual and necessary expenses incurred by him while so engaged shall be allowed; and where it is incompatible with his other duties for the Secretary of the Interior or such officer as he may designate to devote the time necessary to make a personal inspection of the work in progress, then he is authorized to depute a confidential agent to make such examination; and the actual and necessary expenses of such person shall be allowed and paid for that service, and $5 a day during the examination in the field; but such examination shall not be protracted beyond thirty days; and in no case longer than is actually necessary; and when the Secretary or such officer, or any person employed in his office at a regular salary, is engaged in such special service, he shall receive only his necessary expenses in addition to his regular salary.

§299. Reservation of coal and mineral rights

(a) General provisions

All entries made and patents issued under the provisions of this subchapter shall be subject to and contain a reservation to the United States of all the coal and other minerals in the lands so entered and patented, together with the right to prospect for, mine, and remove the same. The coal and other mineral deposits in such lands shall be subject to disposal by the United States in accordance with the provisions of the coal and mineral land laws in force at the time of such disposal. Any person qualified to locate and enter the coal or other mineral deposits, or having the right to mine and remove the same under the laws of the United States, shall have the right at all times to enter upon the lands entered or patented, as provided by this subchapter, for the purpose of prospecting for coal or other mineral therein, provided he shall not injure, damage, or destroy the permanent improvements of the entryman or patentee, and shall be liable to and shall compensate the entryman or patentee for all damages to the crops on such lands by reason of such prospecting. Any person who has acquired from the United States the coal or other mineral deposits in any such land, or the right to mine and remove the same, may reenter and occupy so much of the surface thereof as may be required for all purposes reasonably incident to the mining or removal of the coal or other minerals, first, upon securing the written consent or waiver of the homestead entryman or patentee; second, upon payment of the damages to crops or other tangible improvements to the owner thereof,

where agreement may be had as to the amount thereof; or, third, in lieu of either of the foregoing provisions, upon the execution of a good and sufficient bond or undertaking to the United States for the use and benefit of the entryman or owner of the land, to secure the payment of such damages to the crops or tangible improvements of the entryman or owner, as may be determined and fixed in an action brought upon the bond or undertaking in a court of competent jurisdiction against the principal and sureties thereon, such bond or undertaking to be in form and in accordance with rules and regulations prescribed by the Secretary of the Interior and to be filed with and approved by the officer designated by the Secretary of the Interior of the local land office of the district wherein the land is situate, subject to appeal to the Secretary of the Interior or such officer as he may designate: *Provided*, That all patents issued for the coal or other mineral deposits herein reserved shall contain appropriate notations declaring them to be subject to the provisions of this subchapter with reference to the disposition, occupancy, and use of the land as permitted to an entryman under this subchapter.

(b) Exploration; location of mining claims; notices

(1) In general

(A) Notwithstanding subsection (a) and any other provision of law to the contrary, after the effective date of this subsection no person other than the surface owner may enter lands subject to this subchapter to explore for, or to locate, a mining claim on such lands without—

(i) filing a notice of intention to locate a mining claim pursuant to paragraph (2); and

(ii) providing notice to the surface owner pursuant to paragraph (3).

(B) Any person who has complied with the requirements referred to in subparagraph (A) may, during the authorized exploration period, in order to locate a mining claim, enter lands subject to this subchapter to undertake mineral activities related to exploration that cause no more than a minimal disturbance of surface resources and do not involve the use of mechanized earthmoving equipment, explosives, the construction of roads, drill pads, or the use of toxic or hazardous materials.

(C) The authorized exploration period referred to in subparagraph (B) shall begin 30 days after notice is provided under paragraph (3) with respect to lands subject to such notice and shall end with the expiration of the 90-day period referred to in paragraph (2)(A) or any extension provided under paragraph (2).

(2) Notice of intention to locate a mining claim

Any person seeking to locate a mining claim on lands subject to this subchapter in order to engage in the mineral activities relating to exploration referred to under paragraph (1)(B) shall file with the Secretary of the Interior a notice of intention to locate a claim on the lands concerned. The notice shall be in such form as the Secretary shall prescribe. The notice shall contain the name and mailing address of the person filing the notice and a legal description of the lands to which the notice applies. The legal description shall be based on the public land survey or on such other description as is sufficient to permit the Secretary to record the notice on the land status records of the Secretary. Whenever any person has filed a notice under this paragraph with respect to any lands, during the 90-day period following the date of such filing, or any extension thereof pursuant to this paragraph, no other person (including the surface owner) may—

(A) file such a notice with respect to any portions of such lands;

(B) explore for minerals or locate a mining claim on any portion of such lands; or

(C) file an application to acquire any interest in any portion of such lands pursuant to section 1719 of this title.

If, within such 90-day period, the person who filed a notice under this paragraph files a plan of operations with the Secretary pursuant to subsection (f), such 90-day period shall be extended until the approval or disapproval of the plan by the Secretary pursuant to subsection (f).

(3) Notice to surface owner

Any person who has filed a notice of intention to locate a mining claim under paragraph (2) for

any lands subject to this subchapter shall provide written notice of such filing, by registered or certified mail with return receipt, to the surface owner (as evidenced by local tax records) of the lands covered by the notice under paragraph (2). The notice shall be provided at least 30 days before entering such lands and shall contain each of the following:

(A) A brief description of the proposed mineral activities.

(B) A map and legal description of the lands to be subject to mineral exploration.

(C) The name, address and phone number of the person managing such activities.

(D) A statement of the dates on which such activities will take place.

(4) Acreage limitations

The total acreage covered at any time by notices of intention to locate a mining claim under paragraph (2) filed by any person and by affiliates of such person may not exceed 6,400 acres of lands subject to this subchapter in any one State and 1,280 acres of such lands for a single surface owner. For purposes of this paragraph, the term "affiliate" means, with respect to any person, any other person which controls, is controlled by, or is under common control with, such person.

(c) Consent

Notwithstanding subsection (a) and any other provision of law, after the effective date of this subsection no person may engage in the conduct of mineral activities (other than those relating to exploration referred to in subsection (b)(1)B)) [1] on a mining claim located on lands subject to this subchapter without the written consent of the surface owner thereof unless the Secretary has authorized the conduct of such activities under subsection (d).

(d) Authorized mineral activities

The Secretary shall authorize a person to conduct mineral activities (other than those relating to exploration referred to in subsection (b)(1)(B)) on lands subject to this subchapter without the consent of the surface owner thereof if such person complies with the requirements of subsections (e) and (f).

(e) Bond

(1) Before the Secretary may authorize any person to conduct mineral activities the Secretary shall require such person to post a bond or other financial guarantee in an amount to insure the completion of reclamation pursuant to this subchapter. Such bond or other financial guarantee shall ensure—

(A) payment to the surface owner, after the completion of such mineral activities and reclamation, compensation for any permanent damages to crops and tangible improvements of the surface owner that resulted from mineral activities; and

(B) payment to the surface owner of compensation for any permanent loss of income of the surface owner due to loss or impairment of grazing, or other uses of the land by the surface owner to the extent that reclamation required by the plan of operations would not permit such uses to continue at the level existing prior to the commencement of mineral activities.

(2) In determining the bond amount to cover permanent loss of income under paragraph (1)(B), the Secretary shall consider, where appropriate, the potential loss of value due to the estimated permanent reduction in utilization of the land.

(f) Plan of operations

(1) Before the Secretary may authorize any person to conduct mineral activities on lands subject to this subchapter, the Secretary shall require such person to submit a plan of operations. Such plan shall include procedures for—

(A) the minimization of damages to crops and tangible improvements of the surface owner;

(B) the minimization of disruption to grazing or other uses of the land by the surface owner; and

(C) payment of a fee for the use of surface during mineral activities equivalent to the loss of income to the ranch operation as established pursuant to subsection (g).

(2) The Secretary shall provide a copy of the proposed plan of operations to the surface owner at

least 45 days prior to the date the Secretary makes a determination as to whether such plan complies with the requirements of this subsection. During such 45-day period the surface owner may submit comments and recommend modifications to the proposed plan of operations to the Secretary.

(3)(A) The Secretary shall, within 60 days of receipt of the plan, approve the plan of operations if it complies with the requirements of this subchapter, including each of the following:

(i) The proposed plan of operations is complete and accurate.

(ii) The person submitting the proposed plan of operations has demonstrated that all other applicable Federal and State requirements have been met.

(B) The Secretary shall notify the person submitting a plan of operations of any modifications to such plan required to bring it into compliance with the requirements of this subchapter. If the person submitting the plan agrees to modify such plan in a manner acceptable to the Secretary, the Secretary shall approve the plan as modified. In the event no agreement can be reached on the modifications to the plan which, in the opinion of the Secretary, will bring such plan into compliance with the requirements of this subchapter, then the Secretary shall disapprove the plan and notify both the surface owner and the person submitting the plan of the decision.

(C) The 60-day period referred to in subparagraph (A) may be extended by the Secretary where additional time is required to comply with other applicable requirements of law.

(D) The Secretary shall suspend or revoke a plan of operation whenever the Secretary determines, on the Secretary's own motion or on a motion made by the surface owner, that the person conducting mineral activities is in substantial noncompliance with the terms and conditions of an approved plan of operations and has failed to remedy a violation after notice from the Secretary within the time required by the Secretary.

(4) Final approval of a plan of operations under this subsection shall be conditioned upon compliance with subsections (e) and (g).

(g) Fee

The fee referred to in subsection (f)(1) shall be—

(1) paid to the surface owner by the person submitting the plan of operations;

(2) paid in advance of any mineral activities or at such other time or times as may be agreed to by the surface owner and the person conducting such activities; and

(3) established by the Secretary taking into account the acreage involved and the degree of potential disruption to existing surface uses during mineral activities (including the loss of income to the surface owner and such surface owner's operations due to the loss or impairment of existing surface uses for the duration of the mineral activities), except that such fee shall not exceed the fair market value for the surface of the land.

(h) Reclamation

Lands affected by mineral activities under a plan of operations approved pursuant to subsection (f)(3) shall be reclaimed, to the maximum extent practicable, to a condition capable of supporting the uses to which such lands were capable of supporting prior to surface disturbance. Reclamation shall proceed as contemporaneously as practicable with the conduct of mineral activities.

(i) State law

(1) Nothing in this subchapter shall be construed as affecting any reclamation, bonding, inspection, enforcement, air or water quality standard or requirement of any State law or regulation which may be applicable to mineral activities on lands subject to this subchapter to the extent that such law or regulation is not inconsistent with this title.[2]

(2) Nothing in this subchapter shall be construed as affecting in any way the right of any person to enforce or protect, under applicable law, the interest of such person in water resources affected by mineral activities.

(j) Inspections

Should any surface owner of land subject to this subchapter have reason to believe that they are or may be adversely affected by mineral activities due to any violation of the terms and conditions of a

plan of operations approved under subsection (f), such surface owner may request an inspection of such lands. The Secretary shall determine within 10 days of the receipt of the request whether the request states a reason to believe that a violation exists, except in the event the surface owner alleges and provides reason to believe that an imminent danger exists, the 10-day period shall be waived and the inspection conducted immediately. When an inspection is conducted under this paragraph, the Secretary shall notify the surface owner and such surface owner shall be allowed to accompany the inspector on the inspection.

(k) Damages for failure to comply

(1) Whenever the surface owner of any land subject to this subchapter has suffered any permanent damages to crops or tangible improvements of the surface owner, or any permanent loss of income due to loss or impairment of grazing, or other uses of the land by the surface owner, if such damages or loss result from—

(A) any mineral activity undertaken without the consent of the surface owner under subsection (c) or an authorization by the Secretary under subsection (d); or

(B) the failure of the person conducting mineral activities to remedy to the satisfaction of the Secretary any substantial noncompliance with the terms and conditions of a plan under subsection (f);

the surface owner may bring an action in the appropriate United States district court for, and the court may award, double damages plus costs for willful misconduct or gross negligence.

(2) The surface owner of any land subject to this subchapter may also bring an action in the appropriate United States district court for double damages plus costs for willful misconduct or gross negligence against any person undertaking any mineral activities on lands subject to this subchapter in violation of any requirement of subsection (b).

(3) Any double damages plus costs awarded by the court under this subsection shall be reduced by the amount of any compensation which the surface owner has received (or is eligible to receive) pursuant to the bond or financial guarantee required under subsection (e).

(l) Payment of financial guarantee

The surface owner of any land subject to this subchapter may petition the Secretary for payment of all or any portion of a bond or other financial guarantee required under subsection (e) as compensation for any permanent damages to crops and tangible improvements of the surface owner, or any permanent loss of income due to loss or impairment of grazing, or other uses of the land by the surface owner. Pursuant to such a petition, the Secretary may use such bond or other guarantee to provide compensation to the surface owner for such damages and to insure the required reclamation.

(m) Bond release

The Secretary shall release the bond or other financial guarantee required under subsection (e) upon the successful completion of all requirements pursuant to a plan of operations approved under subsection (f).

(n) Conveyance to surface owner

The Secretary shall take such actions as may be necessary to simplify the procedures which must be complied with by surface owners of lands subject to this subchapter who apply to the Secretary to obtain title to interests in such lands owned by the United States.

SUBCHAPTER I—GENERALLY

§315. Grazing districts; establishment; restrictions; prior rights; rights-of-way; hearing and notice; hunting or fishing rights

In order to promote the highest use of the public lands pending its final disposal, the Secretary of the Interior is authorized, in his discretion, by order to establish grazing districts or additions thereto and/or to modify the boundaries thereof, of vacant, unappropriated, and unreserved lands from any part of the public domain of the United States (exclusive of Alaska), which are not in national forests, national parks and monuments, Indian reservations, revested Oregon and California Railroad grant lands, or revested Coos Bay Wagon Road grant lands, and which in his opinion are chiefly valuable for grazing and raising forage crops: *Provided*, That no lands withdrawn or reserved for any other purpose shall be included in any such district except with the approval of the head of the department having jurisdiction thereof. Nothing in this subchapter shall be construed in any way to diminish, restrict, or impair any right which has been heretofore or may be hereafter initiated under existing law validly affecting the public lands, and which is maintained pursuant to such law except as otherwise expressly provided in this subchapter nor to affect any land heretofore or hereafter surveyed which, except for the provisions of this subchapter, would be a part of any grant to any State, nor as limiting or restricting the power or authority of any State as to matters within its jurisdiction. Whenever any grazing district is established pursuant to this subchapter, the Secretary shall grant to owners of land adjacent to such district, upon application of any such owner, such rights-of-way over the lands included in such district for stock-driving purposes as may be necessary

for the convenient access by any such owner to marketing facilities or to lands not within such district owned by such person or upon which such person has stock-grazing rights. Neither this subchapter nor the Act of December 29, 1916 (39 Stat. 862; U.S.C., title 43, secs. 291 and following), commonly known as the "Stock Raising Homestead Act", shall be construed as limiting the authority or policy of Congress or the President to include in national forests public lands of the character described in section 471 [1] of title 16, for the purposes set forth in section 475 of title 16, or such other purposes as Congress may specify. Before grazing districts are created in any State as herein provided, a hearing shall be held in the State, after public notice thereof shall have been given, at such location convenient for the attendance of State officials, and the settlers, residents, and livestock owners of the vicinity, as may be determined by the Secretary of the Interior. No such district shall be established until the expiration of ninety days after such notice shall have been given, nor until twenty days after such hearing shall be held: *Provided, however*, That the publication of such notice shall have the effect of withdrawing all public lands within the exterior boundary of such proposed grazing districts from all forms of entry of settlement. Nothing in this subchapter shall be construed as in any way altering or restricting the right to hunt or fish within a grazing district in accordance with the laws of the United States or of any State, or as vesting in any permittee any right whatsoever to interfere with hunting or fishing within a grazing district.

SHORT TITLE

Act June 28, 1934, which enacted this subchapter, is popularly known as the "Taylor Grazing Act".

[1] *See References in Text note below.*

§315a. Protection, administration, regulation, and improvement of districts; rules and regulations; study of erosion and flood control; offenses

The Secretary of the Interior shall make provision for the protection, administration, regulation, and improvement of such grazing districts as may be created under the authority of section 315 of this title, and he shall make such rules and regulations and establish such service, enter into such cooperative agreements, and do any and all things necessary to accomplish the purposes of this subchapter and to insure the objects of such grazing districts, namely, to regulate their occupancy and use, to preserve the land and its resources from destruction or unnecessary injury, to provide for the orderly use, improvement, and development of the range; and the Secretary of the Interior is authorized to continue the study of erosion and flood control and to perform such work as may be

necessary amply to protect and rehabilitate the areas subject to the provisions of this subchapter, through such funds as may be made available for that purpose, and any willful violation of the provisions of this subchapter or of such rules and regulations thereunder after actual notice thereof shall be punishable by a fine of not more than $500.

(June 28, 1934, ch. 865, §2, 48 Stat. 1270.)

§315b. Grazing permits; fees; vested water rights; permits not to create right in land

The Secretary of the Interior is authorized to issue or cause to be issued permits to graze livestock on such grazing districts to such bona fide settlers, residents, and other stock owners as under his rules and regulations are entitled to participate in the use of the range, upon the payment annually of reasonable fees in each case to be fixed or determined from time to time in accordance with governing law. Grazing permits shall be issued only to citizens of the United States or to those who have filed the necessary declarations of intention to become such, as required by the naturalization laws, and to groups, associations, or corporations authorized to conduct business under the laws of the State in which the grazing district is located. Preference shall be given in the issuance of grazing permits to those within or near a district who are landowners engaged in the livestock business, bona fide occupants or settlers, or owners of water or water rights, as may be necessary to permit the proper use of lands, water or water rights owned, occupied, or leased by them, except that until July 1, 1935, no preference shall be given in the issuance of such permits to any such owner, occupant, or settler, whose rights were acquired between January 1, 1934, and December 31, 1934, both dates, inclusive, except that no permittee complying with the rules and regulations laid down by the Secretary of the Interior shall be denied the renewal of such permit, if such denial will impair the value of the grazing unit of the permittee, when such unit is pledged as security for any bona fide loan. Such permits shall be for a period of not more than ten years, subject to the preference right of the permittees to renewal in the discretion of the Secretary of the Interior, who shall specify from time to time numbers of stock and seasons of use. During periods of range depletion due to severe drought or other natural causes, or in case of a general epidemic of disease, during the life of the permit, the Secretary of the Interior is authorized, in his discretion to remit, reduce, refund in whole or in part, or authorize postponement of payment of grazing fees for such depletion period so long as the emergency exists: *Provided further*, That nothing in this subchapter shall be construed or administered in any way to diminish or impair any right to the possession and use of water for mining, agriculture, manufacture, or other purposes which has heretofore vested or accrued under existing law validly affecting the public lands or which may be hereafter initiated or acquired and maintained in accordance with such law. So far as consistent with the purposes and provisions of this subchapter, grazing privileges recognized and acknowledged shall be adequately safeguarded, but the creation of a grazing district or the issuance of a permit pursuant to the provisions of this subchapter shall not create any right, title, interest, or estate in or to the lands.

(June 28, 1934, ch. 865, §3, 48 Stat. 1270; Aug. 6, 1947, ch. 507, §1, 61 Stat. 790; Pub. L. 94–579, title IV, §401(b)(3), Oct. 21, 1976, 90 Stat. 2773.)

EDITORIAL NOTES

AMENDMENTS

1976—Pub. L. 94–579 substituted provisions authorizing fees to be fixed in accordance with governing law, for provisions authorizing fees to take into account public benefits to users of grazing districts over and above benefits accruing to users of forage resources and provisions requiring fees to consist of a grazing fee and a range-improvement fee.

1947—Act Aug. 6, 1947, provided for method to be used by Secretary of the Interior in fixing amount of grazing fees and by assessing a separate grazing fee and a range-improvement fee.

STATUTORY NOTES AND RELATED SUBSIDIARIES

SAVINGS PROVISION

Amendment by Pub. L. 94–579 not to be construed as terminating any valid lease, permit, patent, etc., existing on Oct. 21, 1976, see section 701 of Pub. L. 94–579, set out as a note under section 1701 of this title.

§315c. Fences, wells, reservoirs, and other improvements; construction; permits; partition fences

Fences, wells, reservoirs, and other improvements necessary to the care and management of the permitted livestock may be constructed on the public lands within such grazing districts under permit issued by the authority of the Secretary, or under such cooperative arrangement as the Secretary may approve. Permittees shall be required by the Secretary of the Interior to comply with the provisions of law of the State within which the grazing district is located with respect to the cost and maintenance of partition fences. No permit shall be issued which shall entitle the permittee to the use of such improvements constructed and owned by a prior occupant until the applicant has paid to such prior occupant the reasonable value of such improvements to be determined under rules and regulations of the Secretary of the Interior. The decision of the Secretary in such cases is to be final and conclusive.

(June 28, 1934, ch. 865, §4, 48 Stat. 1271.)

§315d. Grazing stock for domestic purposes; use of natural resources

The Secretary of the Interior shall permit, under regulations to be prescribed by him, the free grazing within such districts of livestock kept for domestic purposes; and provided that so far as authorized by existing law or laws hereinafter enacted, nothing contained in this subchapter shall prevent the use of timber, stone, gravel, clay, coal, and other deposits by miners, prospectors for mineral, bona fide settlers and residents, for firewood, fencing, buildings, mining, prospecting, and domestic purposes within areas subject to the provisions of this subchapter.

(June 28, 1934, ch. 865, §5, 48 Stat. 1271.)

§315e. Rights of way; development of mineral resources

Nothing contained in this subchapter shall restrict the acquisition, granting or use of permits or rights of way within grazing districts under existing law; or ingress or egress over the public lands in such districts for all proper and lawful purposes; and nothing contained in this subchapter shall restrict prospecting, locating, developing, mining, entering, leasing, or patenting the mineral resources of such districts under law applicable thereto.

(June 28, 1934, ch. 865, §6, 48 Stat. 1272.)

§315f. Homestead entry within district or withdrawn lands; classification; preferences

The Secretary of the Interior is authorized, in his discretion, to examine and classify any lands withdrawn or reserved by Executive order of November 26, 1934 (numbered 6910), and amendments thereto, and Executive order of February 5, 1935 (numbered 6964), or within a grazing district, which are more valuable or suitable for the production of agricultural crops than for the production of native grasses and forage plants, or more valuable or suitable for any other use than for the use provided for under this subchapter or proper for acquisition in satisfaction of any outstanding lieu, exchange or script [1] rights or land grant, and to open such lands to entry, selection, or location for

disposal in accordance with such classification under applicable public-land laws, except that homestead entries shall not be allowed for tracts exceeding three hundred and twenty acres in area. Such lands shall not be subject to disposition, settlement, or occupation until after the same have been classified and opened to entry: *Provided*, That locations and entries under the mining laws including the Act of February 25, 1920, as amended [30 U.S.C. 181 et seq.], may be made upon such withdrawn and reserved areas without regard to classification and without restrictions or limitation by any provision of this subchapter. Where such lands are located within grazing districts reasonable notice shall be given by the Secretary of the Interior to any grazing permittee of such lands. The applicant, after his entry, selection, or location is allowed, shall be entitled to the possession and use of such lands: *Provided*, That upon the application of any applicant qualified to make entry, selection, or location, under the public-land laws, filed in the land office of the proper district, the Secretary of the Interior shall cause any tract to be classified, and such application, if allowed by the Secretary of the Interior, shall entitle the applicant to a preference right to enter, select, or locate such lands if opened to entry as herein provided.

(June 28, 1934, ch. 865, §7, 48 Stat. 1272; June 26, 1936, ch. 842, title I, §2, 49 Stat. 1976.)

EXECUTIVE DOCUMENTS

TRANSFER OF FUNCTIONS

For transfer of functions of other officers, employees, and agencies of Department of the Interior, with certain exceptions, to Secretary of the Interior, with power to delegate, see Reorg. Plan No. 3 of 1950, §§1, 2, eff. May 24, 1950, 15 F.R. 3174, 64 Stat. 1262, set out under section 1451 of this title.

EX. ORD. NO. 14172. RESTORING NAMES THAT HONOR AMERICAN GREATNESS

Ex. Ord. No. 14172, Jan. 20, 2025, 90 F.R. 8629, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered:

SECTION 1. *Purpose and Policy*. It is in the national interest to promote the extraordinary heritage of our Nation and ensure future generations of American citizens celebrate the legacy of our American heroes. The naming of our national treasures, including breathtaking natural wonders and historic works of art, should honor the contributions of visionary and patriotic Americans in our Nation's rich past.

SEC. 2. *Appointments to the U.S. Board on Geographic Names*. (a) Within seven days of the date of this order [Jan. 20, 2025], each agency head with authority to appoint members to the Board on Geographic Names (Board) pursuant to 43 U.S.C. 364a [section 2 of act July 25, 1947], shall review their respective appointees and consider replacing those appointees in accordance with applicable law.

(b) The Secretary of the Interior shall review and consider additional appointments to the Board to assist in fulfilling all aspects of this order, subject to all applicable laws.

(c) With respect to all applications for naming and renaming submitted to the newly constituted Board, the Board shall advance the policy established in section 1 of this order to honor the contributions of visionary and patriotic Americans and may update its principles, policies, and procedures as needed to achieve this policy.

(d) Where Congressional action is required to establish a renaming in public law, following Board approval on renaming, the Board shall provide guidance to all relevant Federal agencies to use the Board-approved name in the interim in federal documents and achieve consistency across the federal government.

SEC. 3. *Renaming of Mount McKinley*. (a) President William McKinley, the 25th President of the United States, heroically led our Nation to victory in the Spanish-American War. Under his leadership, the United States enjoyed rapid economic growth and prosperity, including an expansion of territorial gains for the Nation. President McKinley championed tariffs to protect U.S. manufacturing, boost domestic production, and drive U.S. industrialization and global reach to new heights. He was tragically assassinated in an attack on our Nation's values and our success, and he should be honored for his steadfast commitment to American greatness.

In 1917, the country officially honored President McKinley through the naming of North America's highest peak. Yet after nearly a century, President Obama's administration, in 2015, stripped the McKinley name from federal nomenclature, an affront to President McKinley's life, his achievements, and his sacrifice.

This order honors President McKinley for giving his life for our great Nation and dutifully recognizes his historic legacy of protecting America's interests and generating enormous wealth for all Americans.

(b) Within 30 days of the date of this order, the Secretary of the Interior shall, consistent with 43 U.S.C. 364 through 364f [sections 1 to 7 of act July 25, 1947], reinstate the name "Mount McKinley." The Secretary shall subsequently update the Geographic Names Information System (GNIS) to reflect the renaming and

reinstatement of Mount McKinley. The national park area surrounding Mount McKinley shall retain the name Denali National Park and Preserve.

(c) The Secretary of the Interior shall work with Alaska Native entities and state and local organizations to adopt names for landmarks to honor the history and culture of the Alaskan people.

SEC. 4. *Gulf of America*. (a) The area formerly known as the Gulf of Mexico has long been an integral asset to our once burgeoning Nation and has remained an indelible part of America. The Gulf was a crucial artery for America's early trade and global commerce. It is the largest gulf in the world, and the United States coastline along this remarkable body of water spans over 1,700 miles and contains nearly 160 million acres. Its natural resources and wildlife remain central to America's economy today. The bountiful geology of this basin has made it one of the most prodigious oil and gas regions in the world, providing roughly 14% of our Nation's crude-oil production and an abundance of natural gas, and consistently driving new and innovative technologies that have allowed us to tap into some of the deepest and richest oil reservoirs in the world. The Gulf is also home to vibrant American fisheries teeming with snapper, shrimp, grouper, stone crab, and other species, and it is recognized as one of the most productive fisheries in the world, with the second largest volume of commercial fishing landings by region in the Nation, contributing millions of dollars to local American economies. The Gulf is also a favorite destination for American tourism and recreation activities. Further, the Gulf is a vital region for the multi-billion-dollar U.S. maritime industry, providing some of the largest and most impressive ports in the world. The Gulf will continue to play a pivotal role in shaping America's future and the global economy, and in recognition of this flourishing economic resource and its critical importance to our Nation's economy and its people, I am directing that it officially be renamed the Gulf of America.

(b) As such, within 30 days of the date of this order, the Secretary of the Interior shall, consistent with 43 U.S.C. 364 through 364f, take all appropriate actions to rename as the "Gulf of America" the U.S. Continental Shelf area bounded on the northeast, north, and northwest by the States of Texas, Louisiana, Mississippi, Alabama and Florida and extending to the seaward boundary with Mexico and Cuba in the area formerly named as the Gulf of Mexico. The Secretary shall subsequently update the GNIS to reflect the renaming of the Gulf and remove all references to the Gulf of Mexico from the GNIS, consistent with applicable law. The Board shall provide guidance to ensure all federal references to the Gulf of America, including on agency maps, contracts, and other documents and communications shall reflect its renaming.

SEC. 5. *Additional Action*. The Secretary of Interior may solicit public and intergovernmental input regarding additional patriots to honor, particularly in light of America's semiquincentennial celebration, and shall recommend action to me, through the Assistant to the President for Domestic Policy.

SEC. 6. *General Provisions*. (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

DONALD J. TRUMP.

§364a. Board on Geographic Names; establishment and membership; appointment and term of office

There is established a Board on Geographic Names, hereinafter called the Board. The membership of the Board shall include one representative from each of the Departments of State, Defense, Interior, Agriculture, and Commerce, and from the Government Publishing Office, the United States Postal Service, and the Library of Congress. The Board may also include representatives from such Federal agencies as the Secretary, upon recommendation of the Board, shall from time to time find desirable, even though these agencies are in the departments otherwise represented on the Board. The members of the Board shall be appointed by the respective heads of the departments or independent agencies that they represent. Each member shall be appointed for a two-year term but may be

reappointed to successive terms. The members of the Board shall serve without additional compensation. The Board shall nominate a Chairman to be appointed by the Secretary, and shall establish such working committees as are found desirable.

"SEC. 3001. SHORT TITLE.

"This title may be cited as the 'Western Water Policy Review Act of 1992'.

"SEC. 3002. CONGRESSIONAL FINDINGS.

"The Congress finds that—

"(1) the Nation needs an adequate water supply for all states [States] at a reasonable cost;

"(2) the demands on the Nation's finite water supply are increasing;

"(3) coordination on both the Federal level and the local level is needed to achieve water policy objectives;

"(4) not less than fourteen agencies of the Federal Government are currently charged with functions relating to the oversight of water policy;

"(5) the diverse authority over Federal water policy has resulted in unclear goals and an inefficient handling of the Nation's water policy;

"(6) the conflict between competing goals and objectives by Federal, State, and local agencies as well as by private water users is particularly acute in the nineteen Western States which have arid climates which include the seventeen reclamation States, Hawaii, and Alaska;

"(7) the appropriations doctrine of water allocation which characterizes most western water management regimes varies from State to State, and results in many instances in increased competition for limited resources;

"(8) the Federal Government has recognized and continues to recognize the primary jurisdiction of the several States over the allocation, priority, and use of water resources of the States, except to the extent such jurisdiction has been preempted in whole or in part by the Federal Government, including, but not limited to, express or implied Federal reserved water rights either for itself or for the benefit of Indian Tribes, and that the Federal Government will, in exercising its authorities, comply with applicable State laws;

"(9) the Federal Government recognizes its trust responsibilities to protect Indian water rights and assist Tribes in the wise use of those resources;

"(10) Federal agencies, such as the Bureau of Reclamation, have had, and will continue to have major responsibilities in assisting States in the wise management and allocation of scarce water resources; and

"(11) the Secretary of the Interior, given his responsibilities for management of public land, trust responsibilities for Indians, administration of the reclamation program, investigations and reviews into ground water resources through the Geologic Survey [now United States Geological Survey], and the Secretary of the Army, given his responsibilities for flood control, water supply, hydroelectric power, recreation, and fish and wildlife enhancement, have the resources to assist in a comprehensive review, in consultation with appropriate officials from the nineteen Western States, into the problems and potential solutions facing the nineteen Western States and the Federal Government in the increasing competition for the scarce water resources of the Western States.

"SEC. 3003. PRESIDENTIAL REVIEW.

"(a) The President is directed to undertake a comprehensive review of Federal activities in the nineteen Western States which directly or indirectly affect the allocation and use of water resources, whether surface or subsurface, and to submit a report on the President's findings, together with recommendations, if any, to the Committees on Energy and Natural Resources, Environment and Public Works and Appropriations of the Senate and the Committees on Natural Resources, Public Works and Transportation [now Transportation and Infrastructure], Merchant Marine and Fisheries and Appropriations of the House of Representatives.

"(b) Such report shall be submitted within three years from the date of enactment of this Act [Oct. 30, 1992].

"(c) In conducting the review and preparing the report, the President is directed to consult with the Advisory Commission established under section 3004 of this title, and may request the Secretary of the Interior and the Secretary of the Army or other Federal officials or the Commission to undertake such studies or other analyses as the President determines would assist in the review.

"(d) The President shall consult periodically with the Commission, and upon the request of the President, the heads of other Federal agencies are directed to cooperate with and assist the Commission in its activities.

"SEC. 3004. THE ADVISORY COMMISSION.

§390. Utilization of dams and reservoir projects for irrigation purposes; additional construction; necessity of authorization; apportionment of cost; limitation

On and after December 22, 1944, whenever the Secretary of the Army determines, upon recommendation by the Secretary of the Interior that any dam and reservoir project operated under the direction of the Secretary of the Army may be utilized for irrigation purposes, the Secretary of the Interior is authorized to construct, operate, and maintain, under the provisions of the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto), such additional works in connection therewith as he may deem necessary for irrigation purposes. Such irrigation works may be undertaken only after a report and findings thereon have been made by the Secretary of the Interior as provided in said Federal reclamation laws and after subsequent specific authorization of the Congress by an authorization Act; and, within the limits of the water users' repayment ability such report may be predicated on the allocation to irrigation of an appropriate portion of the cost of structures and facilities used for irrigation and other purposes. Dams and reservoirs operated under the direction of the Secretary of the Army may be utilized after December 22, 1944, for irrigation purposes only in conformity with the provisions of this section, but the foregoing requirement shall not prejudice lawful uses now existing: *Provided*, That this section shall not apply to any dam or reservoir heretofore constructed in whole or in part by the Army engineers, which provides conservation storage of water for irrigation purposes. In the case of any reservoir project constructed and operated by the Corps of Engineers, the Secretary of the Army is authorized to allocate water which was allocated in the project purpose for municipal and industrial water supply and which is not under contract for delivery, for such periods as he may deem reasonable, for the interim use for irrigation purposes of such storage until such storage is required for municipal and industrial water supply. No contracts for the interim use of such storage shall be entered into which would significantly affect then-existing uses of such storage.

§390b. Development of water supplies for domestic, municipal, industrial, and other purposes

(a) Declaration of policy

It is declared to be the policy of the Congress to recognize the primary responsibilities of the States and local interests in developing water supplies for domestic, municipal, industrial, and other purposes and that the Federal Government should participate and cooperate with States and local interests in developing such water supplies in connection with the construction, maintenance, and operation of Federal navigation, flood control, irrigation, or multiple purpose projects.

(b) Storage in reservoir projects; agreements for payment of cost of construction or modification of projects

In carrying out the policy set forth in this section, it is provided that storage may be included in any reservoir project surveyed, planned, constructed or to be planned, surveyed and/or constructed by the Corps of Engineers or the Bureau of Reclamation to impound water for present or anticipated future demand or need for municipal or industrial water, and the reasonable value thereof may be taken into account in estimating the economic value of the entire project: *Provided*, That the cost of any construction or modification authorized under the provisions of this section shall be determined on the basis that all authorized purposes served by the project shall share equitably in the benefits of multiple purpose construction, as determined by the Secretary of the Army or the Secretary of the Interior, as the case may be: *Provided further*, That before construction or modification of any project including water supply provisions for present demand is initiated, State or local interests shall agree to pay for the cost of such provisions in accordance with the provisions of this section: *And*

provided further, That (1) for Corps of Engineers projects, not to exceed 30 percent of the total estimated cost of any project may be allocated to anticipated future demands, and, (2) for Bureau of Reclamation projects, not to exceed 30 per centum of the total estimated cost of any project may be allocated to anticipated future demands where State or local interests give reasonable assurances, and there is reasonable evidence, that such demands for the use of such storage will be made within a period of time which will permit paying out the costs allocated to water supply within the life of the project: *And provided further*, That for Corps of Engineers projects, the Secretary of the Army may permit the full non-Federal contribution to be made, without interest, during construction of the project, or, with interest, over a period of not more than thirty years from the date of completion, with repayment contracts providing for recalculation of the interest rate at, five-year intervals, and for Bureau of Reclamation projects, the entire amount of the construction costs, including interest during construction, allocated to water supply shall be repaid within the life of the project but in no event to exceed fifty years after the project is first used for the storage of water for water supply purposes, except that (1) no payment need be made with respect to storage for future water supply until such supply is first used, and (2) no interest shall be charged on such cost until such supply is first used, but in no case shall the interest-free period exceed ten years. For Corps of Engineers projects, all annual operation and maintenance costs for municipal and industrial water supply storage under this section shall be reimbursed from State or local interests on an annual basis, and all repair, rehabilitation, and replacement costs for municipal and industrial water supply storage under this section shall be reimbursed from State or local interests (1) without interest, during construction of the repair, rehabilitation, or replacement, (2) with interest, in lump sum on the completion of the repair, rehabilitation, or replacement, or (3) at the request of the State or local interest, with interest, over a period of not more than 25 years beginning on the date of completion of the repair, rehabilitation, or replacement, with repayment contracts providing for recalculation of the interest rate at 5-year intervals. At the request of the State or local interest, the Secretary of the Army shall amend a repayment contract entered into under this section on or before December 23, 2022, for the purpose of incorporating the terms and conditions described in paragraph (3) of the preceding sentence. For Corps of Engineers projects, any repayment by a State or local interest shall be made with interest at a rate to be determined by the Secretary of the Treasury, taking into consideration the average market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period, during the month preceding the fiscal year in which costs for the construction of the project are first incurred (or, when a recalculation is made), plus a premium of one-eighth of one percentage point for transaction costs. For Bureau of Reclamation projects, the interest rate used for purposes of computing interest during construction and interest on the unpaid balance shall be determined by the Secretary of the Treasury, as of the beginning of the fiscal year in which construction is initiated, on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations, which are neither due nor callable for redemption for fifteen years from date of issue. The provisions of this subsection insofar as they relate to the Bureau of Reclamation and the Secretary of the Interior shall be alternative to and not a substitute for the provisions of the Reclamation Projects Act of 1939 (53 Stat. 1187) [43 U.S.C. 485 et seq.] relating to the same subject.

(c) Release of future water storage

(1) Establishment of 10-year plans for the utilization of future storage

(A) In general

For the period beginning 180 days after June 10, 2014, and ending on January 1, 2016, the Secretary may accept from a State or local interest a plan for the utilization of allocated water storage for future use under this Act.

(B) Contents

A plan submitted under subparagraph (A) shall include—

(i) a 10-year timetable for the conversion of future use storage to present use; and

(ii) a schedule of actions that the State or local interest agrees to carry out over a 10-year

period, in cooperation with the Secretary, to seek new and alternative users of future water storage that is contracted to the State or local interest on June 10, 2014.

(2) Future water storage

For water resource development projects managed by the Secretary, a State or local interest that the Secretary determines has complied with paragraph (1) may request from the Secretary a release to the United States of any right of the State or local interest to future water storage under this Act that was allocated for future use water supply prior to November 17, 1986.

(3) Administration

(A) In general

Not later than 180 days after receiving a request under paragraph (2), the Secretary shall provide to the applicable State or local interest a written decision on whether the Secretary recommends releasing future water storage rights.

(B) Recommendation

If the Secretary recommends releasing future water storage rights, the Secretary shall include that recommendation in the annual plan submitted under section 2282d of title 33.

(4) Savings clause

Nothing in this subsection authorizes the Secretary to release a State or local interest from a contractual obligation unless specifically authorized by Congress.

(d) Application to other laws

The provisions of this section shall not be construed to modify the provisions of section 701–1 of title 33 and section 390 of this title, as amended and extended, or the provisions of sections 372 and 383 of this title.

(e) Approval of Congress of modifications of reservoir projects

Modifications of a reservoir project heretofore authorized, surveyed, planned, or constructed to include storage as provided in subsection (b) which would seriously affect the purposes for which the project was authorized, surveyed, planned, or constructed, or which would involve major structural or operational changes shall be made only upon the approval of Congress as now provided by law.

STATUTORY NOTES AND RELATED SUBSIDIARIES

"SECRETARY" DEFINED

Secretary means the Secretary of the Army, see section 1002 of Pub. L. 114–322, set out as a note under section 2201 of Title 33, Navigation and Navigable Waters.

§390c. Water reservoirs; interests of States and local agencies in storage space

Cognizant that many States and local interests have in the past contributed to the Government, or have contracted to pay to the Government over a specified period of years, money equivalent to the cost of providing for them water storage space at Government-owned dams and reservoirs, constructed by the Corps of Engineers of the United States Army, and that such practices will continue, and, that no law defines the duration of their interest in such storage space, and realizing that such States and local interests assume the obligation of paying substantially their portion of the cost of providing such facilities, their right to use may be continued during the existence of the facility as hereinafter provided.

(Pub. L. 88–140, §1, Oct. 16, 1963, 77 Stat. 249.)

§390d. Dams and reservoirs wherein costs thereof, or rights thereto, have been acquired by local interests

Sections 390c to 390f of this title are applicable to all dams and reservoirs heretofore or hereafter constructed by the United States Government (acting through the Corps of Engineers of the United States Army) wherein either a part of the construction cost thereof shall have been contributed or may be contributed by States or local interests (hereinafter called "local interests") or local interests have acquired or may acquire rights to utilize certain storage space thereof by making payments during the period of such use as specified in the agreement with the Government and wherein the

amount of money paid, exclusive of interest, is equivalent to the cost of providing that part of such dam and reservoir which is allocated to such use, whether such share of cost shall have been determined by the "incremental cost" method or by the "separable costs-remaining benefits" method or by any other method. Included among the dams and reservoirs affected by sections 390c to 390f of this title are those constructed by the Corps of Engineers of the Department of the Army, but nothing in sections 390c to 390f of this title shall be construed to affect or modify section 390 of this title.

(Pub. L. 88–140, §2, Oct. 16, 1963, 77 Stat. 249.)

§390e. Rights, acquisition and availability of; obligation for operation and maintenance; costs for reconstruction, rehabilitation, or replacement; use during Government operation or by contract

The right thus acquired by any such local interest is declared to be available to the local interest so long as the space designated for that purpose may be physically available, taking into account such equitable reallocation of reservoir storage capacities among the purposes served by the project as may be necessary due to sedimentation, and not limited to the term of years which may be prescribed in any lease agreement or other agreement with the Government, but the enjoyment of such right will remain subject to performance of its obligations prescribed in such lease agreement or agreement executed in reference thereto. Such obligations will include continued payment of annual operation and maintenance costs allocated to water supply. In addition, local interests shall bear the costs allocated to the water supply of any necessary reconstruction, rehabilitation, or replacement of project features which may be required to continue satisfactory operation of the project. Any affected local interest may utilize such facility so long as it is operated by the Government. In the event that the Government concludes that it can no longer usefully and economically maintain and operate such facility, the responsible department or agency of the Government is authorized to negotiate a contract with the affected local interest under which the local interest may continue to operate such part of the facility as is necessary for utilization of the storage space allocated to it, under terms which will protect the public interest and provided that the Government is effectively absolved from all liability in connection with such operation.

(Pub. L. 88–140, §3, Oct. 16, 1963, 77 Stat. 249.)

§390f. Revision of leases or agreements to evidence conversion of rights to use of storage rights

Upon application of any affected local interest its existing lease or agreement with the Government will be revised to evidence the conversion of its rights to the use of the storage as prescribed in sections 390c to 390f of this title.

(Pub. L. 88–140, §4, Oct. 16, 1963, 77 Stat. 250.)

§390g. Groundwater recharge of aquifers; demonstration program

The Secretary of the Interior (hereinafter referred to as the "Secretary"), acting through the Bureau of Reclamation (hereinafter referred to as the "Bureau"), shall, in two phases, conduct an investigation of and establish demonstration projects for groundwater recharge of aquifers in the States of Colorado, Kansas, Nebraska, New Mexico, Oklahoma, South Dakota, Texas, and Wyoming (such States to be hereinafter referred to as the "High Plains States") and in the other States referred to in section 391 of this title (hereinafter referred to as "other Reclamation Act States"), as provided by sections 390g to 390g–8 of this title: *Provided*, That funds made available pursuant to sections 390g to 390g–8 of this title shall not be used for the study or construction of groundwater recharge

demonstration projects in the High Plains States and other Reclamation Act States which would utilize water originating in the drainage basin of the Great Lakes. The Bureau shall consult with the United States Geological Survey and other appropriate agencies and departments of the United States and of the High Plains States and other Reclamation Act States in order to carry out sections 390g to 390g–8 of this title.

SHORT TITLE

Pub. L. 98–434, §1, Sept. 28, 1984, 98 Stat. 1675, provided: "That this Act [enacting sections 390g to 390g–8 of this title] may be cited as the 'High Plains States Groundwater Demonstration Program Act of 1983'."

§390g–1. Phase I of groundwater recharge demonstration program

(a) Development of detailed plan of demonstration projects; requisite features of plan

During phase I, the Bureau, in consultation with the High Plains States and other Reclamation Act States and other appropriate departments and agencies of the United States, including the United States Geological Survey, shall develop a detailed plan of demonstration projects the purpose of which is to determine whether various recharge technologies may be applied to diverse geologic and hydrologic conditions represented in the High Plains States and other Reclamation Act States. In the preparation and development of such plan, the Bureau shall make maximum use of data, planning studies and other technical resources and assistance available from State and local entities: *Provided*, That contributions of such technical resources and assistance may be counted as part of the inkind services or other State contribution, but shall otherwise be provided without compensation to the State or local entity. This plan shall contain the selection of not less than a total of twelve demonstration project sites in High Plains States and not less than a total of nine demonstration project sites in other Reclamation Act States. Demonstration project sites shall be confined to areas having a declining water table, an available surface water supply, and a high probability of physical, chemical, and economic feasibility for recharge of the groundwater reservoir. The plan shall provide for demonstration of the application of recharge technology and the selection of water sources, determination of necessary physical works and the operation of water replacement systems, formulation of a monitoring program, identification of any economic, legal, intergovernmental, and environmental issues and projection of planning problems associated with such systems, and recommendation of legislative and administrative actions as may be necessary to carry out phase II.

(b) Recommendation of demonstration projects

During phase I the Bureau is authorized and directed to recommend demonstration projects to be designed, constructed, and operated during phase II.

(c) Preliminary selection of projects

Within six months, after the enactment of an appropriation Act to carry out phase I, the Secretary shall make a preliminary selection of projects to receive further planning and development and shall initiate such further planning and development for those selected projects.

(Pub. L. 98–434, §3, Sept. 28, 1984, 98 Stat. 1675; Pub. L. 104–66, title I, §1081(c), Dec. 21, 1995, 109 Stat. 721.)

(b) Alternative means of cost allocation; economic feasibility of projects

During phase II the Secretary, acting through the Bureau, shall contract with the various High Plains States and other Reclamation Act States to conduct a study to identify and evaluate alternative means by which the costs of groundwater recharge projects could be allocated among the beneficiaries of the projects within the respective States and identify and evaluate the economic feasibility of and the legal authority for utilizing groundwater recharge in water resource development projects.

(c) Reports to Congress

(1) Within twelve months after the initiation of phase II, and at annual intervals thereafter, the Secretary shall submit interim reports to Congress. Each report shall contain a detailed statement of his findings and progress respecting the design, construction, and operation of the demonstration projects referred to in subsection (a) and the study referred to in subsection (b).

(2) Within five years after the initiation of phase II, the Secretary shall submit a summary report to Congress. The summary report shall contain—

(A) a detailed evaluation of the demonstration projects referred to in subsection (a);

(B) the results of the studies referred to in subsection (b);

(C) specific recommendations regarding the location, scope, and feasibility of operational groundwater recharge projects to be constructed and maintained by the Bureau; and

(D) an evaluation of the feasibility of integrating these groundwater recharge projects into existing reclamation projects.

(3) In addition to recommendations made under section 390g–1 of this title, the Secretary shall make additional recommendations for design, construction, and operation of demonstration projects. Such projects are authorized to be designed, constructed, and operated in accordance with subsection (a).

(5) Exemption

This section shall not apply to the State of California.

(6) Advisory group

The Secretary may participate in any State-led collaborative, multi-stakeholder advisory group created in any watershed the purpose of which is to monitor, review, and assess aquifer recharge activities.

In addition to the requirements of other Federal laws, feasibility studies conducted by the Secretary or the non-Federal project sponsor under sections 390h to 390h–39 of this title shall consider, among other things—

(1) near- and long-term water demand and supplies in the study area;

(2) all potential uses for reclaimed water;

(3) at least two alternative measures or technologies available for water reclamation, distribution, and reuse for the project under consideration;

(4) public health and environmental quality issues associated with use of reclaimed water;

(5) whether development of the water reclamation and reuse measures under study would—

(A) reduce, postpone, or eliminate development of new or expanded water supplies,

(B) reduce or eliminate the use of existing diversions from natural watercourses or withdrawals from aquifers, or

(C) reduce the demand on existing Federal water supply facilities;

(6) the market or dedicated use for reclaimed water in the project's service area; and

(2) The term "district" means any individual or any legal entity established under State law which has entered into a contract or is eligible to contract with the Secretary for irrigation water.

(3)(A) The term "full cost" means an annual rate as determined by the Secretary that shall amortize the expenditures for construction properly allocable to irrigation facilities in service, including all operation and maintenance deficits funded, less payments, over such periods as may be required under Federal reclamation law or applicable contract provisions, with interest on both accruing from October 12, 1982, on costs outstanding at that date, or from the date incurred in the case of costs arising subsequent to October 12, 1982: *Provided*, That operation, maintenance, and replacement charges required under Federal reclamation law, including this subchapter, shall be collected in addition to the full cost charge.

(B) The interest rate used for expenditures made on or before October 12, 1982, shall be determined by the Secretary of the Treasury on the basis of the weighted average yield of all interest bearing, marketable issues sold by the Treasury during the fiscal year in which the expenditures by the United States were made, but shall not be less than 7½ per centum per annum.

(C) The interest rate used for expenditures made after October 12, 1982, shall be determined by the Secretary of the Treasury on the basis of the arithmetic average of—

(i) the rate as of the beginning of the fiscal year in which expenditures are made on the basis of the computed average interest rate payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for fifteen years from the date of issuance; and

(ii) the weighted average yield on all interest-bearing, marketable issues sold by the Treasury during the fiscal year preceding the fiscal year in which the expenditures are made.

(3) which amends its contract for the purpose of conforming to the provisions of this subchapter.

(b) Amendment of existing contracts

Any district which has an existing contract with the Secretary as of October 12, 1982, which does not enter into an amendment of such contract as specified in subsection (a) shall be subject to Federal reclamation law in effect immediately prior to October 12, 1982, as that law is amended or supplemented by sections 209 through 230 of this title [43 U.S.C. 390ii—390zz–1, 373a, 422e, 425b, 485h]. §390gg. Equivalency

Upon the request of any district, the ownership and pricing limitations imposed by this subchapter shall apply to the irrigable lands classified within such district by the Secretary as having class I productive potential or the equivalent thereof in larger acreage of less productive potential, as determined by the Secretary, taking into account all factors which significantly affect productivity, including but not limited to topography, soil characteristics, length of growing season, elevation, adequacy of water supply, and crop adaptability.

(Pub. L. 97–293, title II, §207, Oct. 12, 1982, 96 Stat. 1266.)

§390hh. Operation and maintenance charges

(a) Price adequate to recover charges

The price of irrigation water delivered by the Secretary pursuant to a contract or an amendment to a contract with a district, as specified in section 390cc of this title, shall be at least sufficient to recover all operation and maintenance charges which the district is obligated to pay to the United States.

(b) Modification of price

Whenever a district enters into a contract or requests that its contract be amended as specified in section 390cc of this title, and each year thereafter, the Secretary shall calculate such operation and maintenance charges and shall modify the price of irrigation water delivered under the contract as necessary to reflect any changes in such costs by amending the district's contract accordingly.

(c) Districts not operating from Federal funds

This section shall not apply to districts which operate and maintain project facilities and finance the operation and maintenance thereof from non-Federal funds.

(Pub. L. 97–293, title II, §208, Oct. 12, 1982, 96 Stat. 1267.)

§390ii. Disposition of excess lands

(a) Disposal of lands in excess of ownership limitations within reasonable time

Irrigation water made available in the operation of reclamation project facilities may not be delivered for use in the irrigation of lands held in excess of the ownership limitations imposed by Federal reclamation law, including this subchapter, unless and until the owners thereof shall have executed a recordable contract with the Secretary, in accordance with the terms and conditions required by Federal reclamation law, requiring the disposal of their interest in such excess lands within a reasonable time to be established by the Secretary. In the case of recordable contracts entered into prior to October 12, 1982, such reasonable time shall not exceed ten years after the recordable contract is executed by the Secretary. In the case of recordable contracts entered into after October 12, 1982, except as provided in section 390rr of this title, such reasonable time shall not exceed five years after the recordable contract is executed by the Secretary.

(b) Continued delivery of irrigation water to lands held in excess of ownership limitations

Lands held in excess of the ownership limitations imposed by Federal reclamation law, including this subchapter, which, on October 12, 1982, are, or are capable of, receiving delivery of irrigation water made available by the operation of existing reclamation project facilities may receive such deliveries only—

(1) if the disposal of the owner's interest in such lands is required by an existing recordable contract with the Secretary, or

(2) if the owners of such lands have requested that a recordable contract be executed by the Secretary.

(c) Amendment of existing recordable contracts

Recordable contracts existing on October 12, 1982, shall be amended at the request of the landowner to conform with the ownership limitations contained in this subchapter: *Provided*, That the time period for disposal of excess lands specified in the existing recordable contract shall not be extended except as provided in subsection (e).

(d) Power of attorney requirement in contracts; exercise of power by Secretary

Any recordable contract covering excess lands sales shall provide that a power of attorney shall vest in the Secretary to sell any excess lands not disposed of by the owners thereof within the period of time specified in the recordable contract. In the exercise of that power, the Secretary shall sell such lands through an impartial selection process only to qualified purchasers according to such reasonable rules and regulations as the Secretary may establish: *Provided*, That the Secretary shall recover for the owner the fair market value of the land unrelated to irrigation water deliveries plus the fair market value of improvements thereon.

(e) Extension of time for disposal of excess lands

In the event that the owner of any lands in excess of the ownership limitations of Federal reclamation law has heretofore entered into a recordable contract with the Secretary for the disposition of such excess lands and has been prevented from disposing of them because the Secretary may have withheld the processing or approval of the disposition of the lands (whether he may have been compelled to do so by court order or for other reasons), the period of time for the disposal of such lands by the owner thereof pursuant to the contract shall be extended from the date on which the Secretary again commences the processing or the approval of the disposition of such lands for a period which shall be equal to the remaining period of time under the recordable contract for the disposal thereof by the owner at the time the decision of the Secretary to withhold the processing or approval of such disposition first became effective.

(f) Eligibility of excess lands for irrigation water after disposition

Excess lands which have been or may be disposed of in compliance with Federal reclamation law, including this subchapter, shall not be considered eligible to receive irrigation water unless—

(1) they are held by nonexcess owners; and

(2) in the case of disposals made after October 12, 1982, their title is burdened by a covenant

prohibiting their sale, for a period of ten years after their original disposal to comply with Federal reclamation law, including this subchapter, for values exceeding the sum of the value of newly added improvements and the value of the land as increased by market appreciation unrelated to the delivery of irrigation water. Upon expiration of the terms of such covenant, the title to such lands shall be freed of the burden of any limitations on subsequent sale values which might otherwise be imposed by the operation of section 423e of this title.

EDITORIAL NOTES

AMENDMENTS

1986—Pub. L. 99–546 substituted "$5,000" for "$1,000".

§422d. Contents of proposals

(a) Plans and estimates; review by States; allocation of capital costs

Any proposal with respect to the construction of a project which has not theretofore been authorized for construction under the Federal reclamation laws shall set forth, among other things, a plan and estimated cost in detail comparable to those included in preauthorization reports required for a Federal reclamation project; shall have been submitted for review by the States of the drainage basin in which the project is located in like manner as provided in section 701–1(c) of title 33, except that the review may be limited to the State or States in which the project is located if the proposal is one solely for rehabilitation and betterment of an existing project; and shall include a proposed allocation of capital costs to functions such that costs for facilities used for a single purpose shall be allocated to that purpose and costs for facilities used for more than one purpose shall be so allocated among the purposes served that each purpose will share equitably in the costs of such joint facilities. The costs of means and measures to prevent loss of and damage to fish and wildlife resources shall be considered as project costs and allocated as may be appropriate among project functions.

(b) Lands and water rights; ownership; financing

(1) Every such proposal shall include a showing that the organization already holds or can acquire all lands and interests in land (except public and other lands and interests in land owned by the United States which are within the administrative jurisdiction of the Secretary and subject to disposition by him) and rights, pursuant to applicable State law, to the use of water necessary for the successful construction, operation, and maintenance of the project and that it is ready, able, and willing to finance otherwise than by loan and grant of Federal funds such portion of the cost of the project (which portion shall include all costs of acquiring lands, interests in land, and rights to the use of water), except as provided in section 422e(b)(2) of this title as the Secretary shall have advised is proper in the circumstances.

(2) The Secretary shall require each organization to contribute toward the cost of the project (other than by loan and/or grant of Federal funds) an amount equal to 25 percent or more of the allowable estimated cost of the project: *Provided*, That the Secretary, at his discretion, may reduce the amount of such contribution to the extent that he determines that the organization is unable to secure financing from other sources under reasonable terms and conditions, and shall include letters from lenders or other written evidence in support of any funding of an applicant's inability to secure such financing in any project proposal transmitted to the Congress: *Provided further*, That under no circumstances shall the Secretary reduce the amount of such contribution to less than 10 percent of the allowable estimated total project costs. In determining the amount of the contribution as required by this paragraph, the Secretary shall credit toward that amount the cost of investigations, surveys, engineering, and other services necessary to the preparation of proposals and plans for the project as required by the Secretary, and the costs of lands and rights-of-way required for the project, and the $5,000 fee described in section 422c of this title. In determining the allowable estimated cost of the project, the Secretary shall not include the amount of grants accorded to the organization under section 422e(b) of this title.

(c) Transmittal of findings and approval to Congress; certification of soil survey; reservation of land

At such time as a project is found by the Secretary and the Governor of the State in which it is located (or an appropriate State agency designated by him) to be financially feasible, is determined by the Secretary to constitute a reasonable risk under the provisions of this subchapter, and is approved by the Secretary, such findings and approval shall be transmitted to the Congress. Each project proposal transmitted by the Secretary to the Congress shall include a certification by the Secretary that an adequate soil survey and land classification has been made, or that the successful irrigability of those lands and their susceptibility to sustained production of agricultural crops by means of irrigation has been demonstrated in practice. Such proposal shall also include an investigation of soil characteristics which might result in toxic or hazardous irrigation return flows. The Secretary, at the time of submitting the project proposal to Congress or at the time of his

determination that the requested project constitutes a reasonable risk under the provisions of this subchapter, may reserve from use or disposition inimical to the project any lands and interests in land owned by the United States which are within his administrative jurisdiction and subject to disposition by him and which are required for use by the project. Any such reservation shall expire at the end of two years unless the contract provided for in section 422e of this title shall have been executed.

(d) Amount of loan and/or grant; increase by Secretary

At the time of his submitting the project proposal to the Congress, or at any subsequent time prior to completion of construction of the project, including projects heretofore approved, the Secretary may increase the amount of the requested loan and/or grant to an amount within the maximum allowed by section 422e(a) of this title, as amended by Pub. L. 94–181, to compensate for increases in construction costs due to price escalation.

(e) Appropriation; nonapplicability

No appropriation shall be made for financial participation in any such project prior to sixty calendar days (which sixty days, however, shall not include days on which either the House of Representatives or the Senate is not in session because of an adjournment of more than three calendar days to a day certain) from the date on which the Secretary's findings and approval are submitted to the Congress and then only if, within said sixty days, neither the Committee on Natural Resources of the House of Representatives nor the Committee on Energy and Natural Resources of the Senate disapproves the project proposal by committee resolution. The provisions of this subsection (e) shall not be applicable to proposals made under section 422f of this title.

(f) Consideration of financial feasibility, emergency, or urgent need; jurisdiction and control of project works and facilities

The Secretary shall give due consideration to financial feasibility, emergency, or urgent need for the project. All project works and facilities constructed under this subchapter shall remain under the jurisdiction and control of the local contracting organization subject to the terms of the repayment contract.

SUBCHAPTER V—ADMINISTRATION OF EXISTING PROJECTS

§423. Permanently unproductive lands; exclusion from project; disposition of water right

All lands found by the classification made under the supervision of the Board of Survey and Adjustments (House Document 201, 69th Congress, 1st Session, checked and modified as outlined in General Recommendations numbered 2 and 4, Page 60 of said document), to be permanently

unproductive shall be excluded from the project and no water shall be delivered to them after the date of such exclusion unless and until they are restored to the project. Except as herein otherwise provided, the water right formerly appurtenant to such permanently unproductive lands shall be disposed of by the United States under the reclamation law: *Provided*, That the water users on the projects shall have a preference right to the use of the water: *And provided further*, That any surplus water temporarily available may be furnished upon a rental basis for use on lands excluded from the project under this section, on terms and conditions to be approved by the Secretary of the Interior.

STATUTORY NOTES AND RELATED SUBSIDIARIES

SECTIONS 423 TO 423G AND 610 UNAFFECTED BY SECTIONS 451 TO 451K OF THIS TITLE

Act Aug. 13, 1953, ch. 428, §10, 67 Stat. 568, provided in part that: "Nothing contained in this Act [enacting sections 451 to 451k of this title] shall be held to repeal, supersede, or supplement the provisions for exchange and matters related thereto contained in the Act of May 25, 1926 (44 Stat. 636), as amended and supplemented [sections 423 to 423g and 610 of this title]."

§423a. Construction charges on permanently unproductive lands already paid; disposition

The construction charges prior to May 25, 1926, paid on permanently unproductive lands excluded from the project shall be applied as a credit on charges due or to become due on any remaining irrigable land covered by the same water-right contract or land taken in exchange as provided in section 423c of this title. If the charges so paid exceed the amount of all water-right charges due and unpaid, plus the construction charges not yet due, the balance shall be paid in cash to the holder of the water-right contract covering the land so excluded or to the irrigation district affected; which in turn shall be charged with the responsibility of making suitable adjustment with the landowners involved. Should all the irrigable lands of a water-right applicant be excluded from the project as permanently unproductive, and no exchange be made as provided in said section, the total construction charges paid before May 25, 1926, less any accrued charges on account of operation and maintenance, shall be refunded in cash, the water-right contract shall be canceled, and all liens on account of water-right charges shall be released.

(May 25, 1926, ch. 383, §42, 44 Stat. 647.)

§423b. Suspension of payment of construction charges against areas temporarily unproductive

The payment of all construction charges against said areas temporarily unproductive shall remain suspended until the Secretary of the Interior shall declare them to be possessed of sufficient productive power properly to be placed in a paying class, whereupon payment of construction charges against such areas shall be resumed or shall begin, as the case may be. Any payments made on such areas shall be credited to the unpaid balance of the construction charge on the productive area of each unit. Such credit shall be applied on and after April 23, 1930, which shall not be construed to require revision of accounts adjusted before April 23, 1930, under the provisions of this section as originally enacted. While said lands so classified as temporarily unproductive and the construction charges against them are suspended, water for irrigation purposes may be furnished upon payment of the usual operation and maintenance charges, or such other charges as may be fixed by the Secretary of the Interior the advance payment of which may be required, in the discretion of the said Secretary. Should said lands temporarily classed as unproductive, or any of them, in the future be found by the Secretary of the Interior to be permanently unproductive, the charges against them shall be charged off as a permanent loss to the reclamation fund and they shall thereupon be

treated in the same manner as other permanently unproductive lands as provided in sections 423 to 423g and 610 of this title except that no refund shall be made of the construction charges paid on such unproductive areas and applied as a credit on productive areas as herein authorized.

1930—Act Apr. 23, 1930, provided that the credit shall be applied on or after April 23, 1930, and was not to be construed as requiring revision of accounts adjusted before such date, and that no refund shall be made of the charges on unproductive areas and applied as a credit on productive areas.

§423c. Exchange of unpatented entries; entries, farms or private lands, eliminated from project; rights not assignable; rights of lienholders; preference to ex-service men

Settlers who have unpatented entries under any of the public land laws embracing lands which have been eliminated from the project, or whose entries under water rights have been so reduced that the remaining area is insufficient to support a family, shall be entitled to exchange their entries for other public lands within the same project or any other existing Federal reclamation project, with credit under the homestead laws for residence, improvement, and cultivation made or performed by them upon their original entries and with credit upon the new entry for any construction charges paid upon or in connection with the original entry: *Provided*, That when satisfactory final proof has been made on the original entry it shall not be necessary to submit final proof upon the lieu entry. Any entryman whose entry or farm unit is reduced by the elimination of permanently unproductive land shall be entitled to enter an equal amount of available public land on the same project contiguous to or in the vicinity of the farm unit reduced by elimination, with all credits in this section hereinbefore specified in lieu of the lands eliminated. Owners of private lands so eliminated from the project may, subject to the approval of the Secretary of the Interior, and free from all encumbrances, relinquish and convey to the United States lands so owned and held by them, not exceeding an area of one hundred and sixty acres, and select an equal area of vacant public land within the irrigable area of the same or any other Federal reclamation project, with credit upon the construction costs of the lands selected to the extent and in the amount paid upon or in connection with their relinquished lands, and the Secretary of the Interior is authorized to revise and consolidate farm units, so far as this may be made necessary or advisable, with a view to carrying out the provisions of this section: *Provided further*, That the rights extended under this section shall not be assignable: *And provided further*, That in administering the provisions of this section and section 423a of this title, the Secretary of the Interior shall take into consideration the rights and interests of lien holders, as to him may seem just and equitable: *Provided further*, That where two entrymen apply for the same farm unit under the exchange provisions of this section, only one whom [1] is an ex-service man, as defined by section 438 [2] of this title, the ex-service man shall have a preference in making such exchange.

The Secretary of the Interior is authorized, in his discretion, to amend any existing water-right contract to the extent necessary to carry out the provisions of sections 423 to 423g and 610 of this title, upon request of the holder of such contract. The Secretary of the Interior, as a condition precedent to the amendment of any existing water-right contract, shall require the execution of a contract by a water-users' association or irrigation district whereby such association or irrigation district shall be required to pay to the United States, without regard to default in the payment of charges against any individual farm unit or tract of irrigable land, the entire charges against all productive lands remaining in the project after the permanently unproductive lands shall have been eliminated and the charges against temporarily unproductive areas shall have been suspended in the manner and to the extent authorized and directed by sections 423 to 423g and 610 of this title.

The Secretary is authorized, in his discretion, upon request of individual water users or districts, and upon performance of the condition precedent above set forth, to amend any existing water-right contract to provide for increase in the time for payment of construction charges, which have not been accrued, to the extent that may be necessary under the conditions in each case, subject to the limitation that there shall be allowed for repayment not more than forty years from the date the first payment matured under the original contract, and also to extend the time for payment of operation and maintenance or water-rental charges due and unpaid for such period as in his judgment may be necessary not exceeding five years, the charges so extended to bear interest payable annually at the rate of 6 per centum per annum until paid, and to contract for the payment of the construction charges then due and unpaid within such term of years as the Secretary may find to be necessary, with interest payable annually at the rate of 6 per centum per annum until paid.

The Secretary of the Interior is authorized to complete and execute the supplemental contract, being negotiated on May 25, 1926, and which had, on that date, been approved as to form by the Secretary, between the United States and the Belle Fourche Irrigation District and at the expiration of said supplemental contract to enter into a permanent contract on behalf of the United States with said District in accordance with the terms of said supplemental contract.

§451b. Irrigation construction charges

(a) Credits to entryman

If an entryman making an exchange under the provisions of this subchapter becomes the direct obligor for payment to the United States of irrigation construction charges for his lieu farm unit or undertakes a contract under which the equivalent, in whole or in part, of such charges is returned to the United States, the Secretary, to the extent to which such charges upon the original farm unit or the equivalent thereof have actually been paid to the United States or to an irrigation district or other form of organization under contract with the United States, may give him credit for such charges upon the lieu unit.

(b) Credits to district; reduction of costs

If an irrigation district or other form of organization within the boundaries of which is located the lieu farm unit of an entryman making an exchange under the provisions of this subchapter is or becomes the direct obligor for payment to the United States of irrigation construction charges or undertakes or has undertaken a contract under which the equivalent, in whole or in part, of such charges is returned to the United States, the Secretary may, to the extent to which it gives credit to the entryman for such charges or the equivalent thereof actually paid upon the original farm unit, give the district or other form of organization credit for payment of such charges. Upon the making of an exchange pursuant to the provisions of this subchapter, the Secretary may reduce (i) the reimbursable construction costs of the project or division thereof upon which the original farm unit was located by the amount of such costs which were properly assignable to the original farm unit and which were not then due and payable, and (ii) the reimbursable construction costs of the project or division thereof upon which the lieu farm unit is located by the amount of credit which might be given under the provisions of this section.

(c) Extension of benefits to districts

In any case in which the benefits of this subchapter are extended to an assignee of an unpatented farm unit or to a resident owner of private lands, as provided in subsection (b) of section 451a of this title, an appropriate extension of benefits may also be made to an irrigation district or other form of organization under subsection (b) of this section.

(Aug. 13, 1953, ch. 428, §3, 67 Stat. 566.)

§451c. Cancellation of charges or liens; credits

(a) After his approval of any application for an exchange as provided in this subchapter, the Secretary may cancel and release, in whole or in part, any and all charges or liens against the entryman or against the relinquished farm unit which are within his administrative jurisdiction. In administering the provisions of this subsection the Secretary shall take into consideration other

charges and liens and the rights and interests of other lien holders as to him may seem just and equitable.

(b) An entryman making an exchange under the provisions of this subchapter may be given credit by the Secretary upon any land development charges made by the United States in connection with the lieu farm unit for any such charges paid to the United States in connection with the original unit. A resident owner making an exchange under the provisions of this subchapter may, to the extent, to which he or, in the case of a widow, widower, heir, or devisee, his spouse or ancestor, as the case may be, has paid to the United States the purchase price of the original farm unit, be given credit by the Secretary upon the purchase price of his lieu farm unit; such credit may also be applied in the manner and circumstances provided in section 451b of this title upon irrigation construction charges for or properly assignable to his lieu farm unit.

(Aug. 13, 1953, ch. 428, §4, 67 Stat. 567.)

§451d. Disposal of improvements; water rights; revertibility of relinquished land

Within ninety days after receipt of notice of the approval by the Secretary of the application for exchange of entry and subject to the rights and interests of other parties, the entryman may dispose of, and he or his transferee or vendee may remove, any and all improvements placed on the relinquished unit. Upon the making of an exchange under this subchapter, any water right appurtenant to the original lands under the Federal reclamation laws shall cease and the water supply theretofore used or required to satisfy such right shall be available for disposition under those laws. Any land relinquished or conveyed to the United States under this subchapter shall revert to or become a part of the public domain and be subject to disposition by the Secretary under any of the provisions of the Federal reclamation laws.

SUBCHAPTER X—PAYMENT OF CONSTRUCTION CHARGES

§485. Declaration of policy

For the purpose of providing for United States reclamation projects a feasible and comprehensive plan for an economical and equitable treatment of repayment problems and for variable payments of construction charges which can be met regularly and fully from year to year during periods of

decline in agricultural income and unsatisfactory conditions of agriculture as well as during periods of prosperity and good prices for agricultural products, and which will protect adequately the financial interest of the United States in said projects, obligations to pay construction charges may be revised or undertaken pursuant to the provisions of this subchapter.

1958—Subsecs. (h) to (k). Pub. L. 85–611 repealed subsec. (h) which defined "annual returns" and "normal returns", and redesignated subsecs. (i) to (k) as (h) to (j), respectively.

EXTENSION OF DATE OF MODIFICATION OF REPAYMENT CONTRACTS

Act Mar. 6, 1952, ch. 94, 66 Stat. 16, as amended by acts Aug. 31, 1954, ch. 1168, 68 Stat. 1044; Pub. L. 85–156, Aug. 21, 1957, 71 Stat. 390; Pub. L. 85–611, §3, Aug. 8, 1958, 72 Stat. 543; Pub. L. 86–308, §2, Sept. 21, 1959, 73 Stat. 585, provided that the authority vested in the Secretary of the Interior by sections 485b and 485f of this title should be extended through Dec. 31, 1960.

§485b–1. Deferment of installments under repayment contracts; determination of undue burden; conditions; supplemental contract; report to Congress

(a) The authority granted in section 485b of this title for modification of existing repayment contracts or other forms of obligations to pay construction charges shall continue through December 31, 1960.

(b) The Secretary is authorized, subject to the provisions of this subsection to defer the time for the payment of such part of any installments of construction charges under any repayment contract or other form of obligation as he deems necessary to adjust such installments to amounts within the probable ability of the water users to pay. Any such deferment shall be effected only after findings by the Secretary that the installments under consideration probably cannot be paid on their due date without undue burden on the water users, considering the various factors which in the Secretary's judgment bear on the ability of the water users so to pay.

The Secretary may effect the deferments hereunder subject to such conditions and provisions relating to the operation and maintenance of the project involved as he deems to be in the interest of the United States. If, however, any deferments would affect installments to accrue more than twelve months after the action of deferment, they shall be effected only by a formal supplemental contract. Such a contract shall provide by its terms that, it being only an interim solution of the repayment problems dealt with therein, its terms are not, in themselves, to be construed as a criterion of the terms of any amendatory contract that may be negotiated and that any such amendatory contract must be approved by the Congress unless it does not lengthen the repayment period for the project in question beyond that permitted by the laws applicable to that project, involves no reduction in the total amount payable by the water users, and is not in other respects less advantageous to the Government than the existing contract arrangements. The Secretary shall report to the Congress all deferments granted under this subsection.

Subsec. (b). Act Apr. 24, 1945, authorized Secretary, subject to provisions of this subsection, to defer the time for the payment of such part of any installments of construction charges under any repayment contract or other form of obligation that are due and unpaid as of Apr. 24, 1945, or which would become due prior to the expiration of authority under subsec. §485d. Time of payments to the United States

The Secretary in this discretion may require, in connection with any contract entered into pursuant to the authority of this subchapter, that the contract provide (1) that the payments for each year to be made to the United States shall become due and payable on such date or dates, not exceeding two, in each year as the Secretary determines will be substantially contemporaneous with the time or times in each year when water users receive crop returns and (2) if the contract be with an organization, that assessments or levies for the purpose of obtaining moneys sufficient to meet the organization's payments under said contract shall be made and shall become due and payable within a certain period or periods of time prior to the date or dates on which the organization's payments to the United States are due and payable, said period or periods of time to be agreed upon in each said contract.

The Secretary may provide such deferments of construction charges as in his judgment are necessary to prevent said requirements from resulting in inequitable pyramiding of payments of said charges.

STATUTORY NOTES AND RELATED SUBSIDIARIES

EXTENSION OF SECRETARY'S AUTHORITY TO ENTER INTO AMENDATORY CONTRACTS

Secretary's authority extended through Dec. 31, 1960, see section 485b–1 of this title.

§485e. Maintenance and operation of project works; delinquency penalties

In connection with any contract, relating to construction charges, entered into pursuant to the authority of this subchapter, the Secretary is authorized to require such provisions as he deems proper to secure the adoption of proper accounting, to protect the condition of project works and to provide for the proper use thereof, and to protect project lands against deterioration due to improper use of water. Any such contract shall require advance payment of adequate operation and maintenance charges. The Secretary is further authorized, in his discretion, to require such provisions as he deems proper to penalize delinquencies in payments of construction charges or operation and maintenance charges: *Provided*, That in any event there shall be penalties imposed on account of delinquencies of not less than one-half of 1 per centum per month of the delinquent charge from and after the date when such charge becomes due and payable: *Provided further*, That any such contract shall require that no water shall be delivered to lands or parties which are in arrears in the advance payment of operation and maintenance or toll charges, or to lands or parties which are in arrears for more than twelve months in the payment of construction charges due from such lands or parties to the United States or to the organization in which the lands or parties are included, or to any lands or parties included in an organization which is in arrears in the advance payment of operation and maintenance or toll charges or in arrears more than twelve months in the payment of construction charges due from such organization to the United States.

(Aug. 4, 1939, ch. 418, §6, 53 Stat. 1191.)

§485f. Negotiation of equitable contracts by Secretary

(a) Existing project contract unit

The Secretary is authorized and directed to investigate the repayment problems of any existing project contract unit in connection with which, in his judgment, a contract under section 485b or 485c [1] of this title would not be practicable nor provide an economically sound adjustment, and to negotiate a contract which, in his judgment, both would provide fair and equitable treatment of the repayment problems involved and would be in keeping with the general purpose of this subchapter.

(b) New projects or projects under construction; public lands; development periods

For any project, division of a project, development unit of a project, or supplemental works on a project, under construction on August 4, 1939, or for which appropriations had been made, and in connection with which a repayment contract had not been executed, allocations of costs may be made in accordance with the provisions of section 485h of this title and a repayment contract may be negotiated, in the discretion of the Secretary, (1) pursuant to the authority of subsection (a) of this section or (2) in accordance, as near as may be, with the provisions in section 485h(d) or 485h(e) of this title. In connection with any such project, division, or development unit, on which the majority of the lands involved are public lands of the United States, the Secretary, prior to entering into a repayment contract, may fix a development period for each irrigation block, if any, of not to exceed ten years from and including the first year in which water is delivered for the lands in said block: *Provided*, That in the event a development period is fixed prior to execution of a repayment contract, execution thereof shall be a condition precedent to delivery of water after the close of the development period. During any such development period water shall be delivered to the lands in the irrigation block involved only on a toll-charge basis, at a charge per annum per acre-foot to be fixed by the Secretary each year and to be collected in advance of delivery of water. Pending negotiation and execution of a repayment contract for any other such project, division, or development unit, water may be delivered for a period of not more than five years from August 4, 1939, on the same toll-charge basis. Any such toll charges collected and which the Secretary determines to be in excess of the cost of operation and maintenance during the toll-charge period shall be credited to the construction cost of the project in the manner determined by the Secretary.

(c) Report of proposed contracts to Congress; approval; amendment after approval

The Secretary from time to time shall report to the Congress on any proposed contracts negotiated pursuant to the authority of subsection (a) or (b)(1) of this section, and he may execute any such contract on behalf of the United States only after approval thereof has been given by Act of Congress. Contracts, so approved, however, may be amended from time to time by mutual agreement and without further approval by Congress if such amendments are within the scope of authority granted prior to or after April 24, 1945, to the Secretary under any Act, except that amendments providing for repayment of construction charges in a period of years longer than authorized by this subchapter, as it may be amended, shall be effective only when approved by Congress.

EXTENSION OF SECRETARY'S AUTHORITY TO ENTER INTO AMENDATORY CONTRACTS

Secretary's authority extended through Dec. 31, 1960, see section 485b–1 of this title.

§485g. Classification of lands

(a) Generally

The Secretary is authorized and directed in the manner hereinafter provided to classify or to reclassify, from time to time but not more often than at five-year intervals, as to irrigability and productivity those lands which have been, are, or may be included within any project.

(b) Necessity for request

No classification or reclassification pursuant to the authority of this subchapter shall be undertaken unless a request therefor, by an organization or duly authorized representatives of the water users, in the form required by subsection (c) of this section has been made of the Secretary. The Secretary shall plan the classification work, undertaken pursuant to the authority of this section, in such manner as in his judgment will result in the most expeditious completion of the work.

(c) Furnishing data

In any request made to the Secretary for a land classification or reclassification under this section, the organization or representatives of the water users shall furnish a list of those lands which are considered to be of comparatively low productivity or to be nonproductive, and of those lands which are considered to be of greater or lesser productivity than indicated by existing classifications, if any, made pursuant to the Federal reclamation laws, and shall furnish also such data relating thereto as the Secretary by regulation may require.

(d) Primary determination

Upon receipt of any such request the Secretary shall make a preliminary determination whether the requested land classification or reclassification probably is justified by reason of the conditions of the lands involved and other pertinent conditions of the project, including its contractual relations with the United States.

(e) Probable justification

If the Secretary finds probable justification and if the advance to the United States hereinafter required is made, he shall undertake as soon as practicable the classification or reclassification of the lands listed in the request, and of any other lands which have been, are, or may be included within the project involved and which in his judgment should be classified or reclassified.

(f) Expenses

One-half of the expense involved in any classification work undertaken pursuant to this section shall be charged to operation and maintenance administration nonreimbursable; and one-half shall be paid in advance by the organization involved. On determining probable justification for the requested classification or reclassification as provided in this section, the Secretary shall estimate the cost of the work involved and shall submit a statement of the estimated cost to said organization. Said organization, before commencement of the work, shall advance to the United States one-half of the amount set forth in said statement and also shall advance one-half of the amount of supplementary estimates of costs which the Secretary may find it necessary to make from time to time during the progress of the work; and said amounts shall be and remain available for expenditure by the Secretary for the purposes for which they are advanced, until the work is completed or abandoned. After completion or abandonment of the work, the Secretary, shall determine the actual costs thereof; and said organization shall pay any additional amount required to make its total payments hereunder equal to one-half of the actual cost or shall be credited with any amount by which advances made by it exceed one-half of said actual cost, as the case may be.

(g) Classification as prerequisite to contract

If in the judgment of the Secretary a classification or reclassification pursuant to the provisions of this section is a necessary preliminary to entering into a contract under section 485b or 485c [1] of this title, he may require the same as a condition precedent to entering into such a contract.

(h) Modification of existing obligations

No modification of any existing obligation to pay construction charges on any project shall be made by reason of any classification or reclassification undertaken pursuant to this section without express authority therefor granted by Congress upon recommendations of the Secretary made in a report under subsection (f) of this section.

(Aug. 4, 1939, ch. 418, §8, 53 Stat. 1192; Pub. L. 93–608, §1(18), Jan. 2, 1975, 88 Stat. 1970.)

§485h. New projects; sale of water and electric power; lease of power privileges

(a) Findings of Secretary

No expenditures for the construction of any new project, new division of a project, or new supplemental works on a project shall be made, nor shall estimates be submitted therefor, by the Secretary until after he has made an investigation thereof and has submitted to the President and to the Congress his report and findings on—

(1) the engineering feasibility of the proposed construction;

(2) the estimated cost of the proposed construction;

(3) the part of the estimated cost which can properly be allocated to irrigation and probably be repaid by the water users;

(4) the part of the estimated cost which can properly be allocated to power and probably be returned to the United States in net power revenues;

(5) the part of the estimated cost which can properly be allocated to municipal water supply or other miscellaneous purposes and probably be returned to the United States.

If the proposed construction is found by the Secretary to have engineering feasibility and if the repayable and returnable allocations to irrigation, power, and municipal water supply or other miscellaneous purposes found by the Secretary to be proper, together with any allocation to flood control or navigation made under subsection (b) of this section, equal the total estimated cost of construction as determined by the Secretary, then the new project, new division of a project, or supplemental works on a project, covered by his findings, shall be deemed authorized and may be undertaken by the Secretary. If all such allocations do not equal said total estimated cost, then said new project, new division, or new supplemental works may be undertaken by the Secretary only after provision therefor has been made by Act of Congress enacted after the Secretary has submitted to the President and the Congress the report and findings involved.

(b) Allocation of part of cost to flood control or navigation

In connection with any new project, new division of a project, or supplemental works on a project there may be allocated to flood control or navigation the part of said total estimated cost which the Secretary may find to be proper. Items for any such allocations made in connection with projects which may be undertaken pursuant to subsection (a) of this section shall be included in the estimates of appropriations submitted by the Secretary for said projects, and funds for such portions of the projects shall not become available except as directly appropriated or allotted to the Department of the Interior. In connection with the making of such an allocation, the Secretary shall consult with the Chief of Engineers and the Secretary of the Army, and may perform any of the necessary investigations or studies under a cooperative agreement with the Secretary of the Army. In the event of such an allocation the Secretary of the Interior shall operate the project for purposes of flood control or navigation, to the extent justified by said allocation therefor.

(c) Furnishing water to municipalities; sale of electric power; lease of power privileges

(1) The Secretary is authorized to enter into contracts to furnish water for municipal water supply or miscellaneous purposes: *Provided*, That any such contract either (A) shall require repayment to the United States, over a period of not to exceed forty years from the year in which water is first delivered for the use of the contracting party, with interest not exceeding the rate of 3½ per centum per annum if the Secretary determines an interest charge to be proper, of an appropriate share as determined by the Secretary of that part of the construction costs allocated by him to municipal water supply or other miscellaneous purposes; or (B) shall be for such periods, not to exceed forty years, and at such rates as in the Secretary's judgment will produce revenues at least sufficient to cover an appropriate share of the annual operation and maintenance cost and an appropriate share of such fixed charges as the Secretary deems proper, and shall require the payment of said rates each year in advance of delivery of water for said year. Any sale of electric power or lease of power privileges, made by the Secretary in connection with the operation of any project or division of a project, shall be for such periods, not to exceed forty years, and at such rates as in his judgment will produce power revenues at least sufficient to cover an appropriate share of the annual operation and maintenance cost, interest on an appropriate share of the construction investment at not less than 3 per centum per annum, and such other fixed charges as the Secretary deems proper: *Provided further* , That in said sales or leases preference shall be given to municipalities and other public corporations or agencies; and also to cooperatives and other nonprofit organizations financed in whole or in part by loans made pursuant to the Rural Electrification Act of 1936 [7 U.S.C. 901 et seq.]. Nothing in this subsection shall be applicable to provisions in existing contracts, made pursuant to law, for the use of power and miscellaneous revenues of a project for the benefit of users of water from such project. The provisions of this subsection respecting the sales of electric power and leases of power privileges shall be an authorization in addition to and alternative to any authority in existing laws related to particular projects and reserve to the Secretary the exclusive authority to develop small conduit hydropower using Bureau of Reclamation facilities and pumped storage hydropower exclusively using Bureau of Reclamation reservoirs. No contract relating to municipal water supply or miscellaneous purposes or to electric power or power privileges shall be made unless, in the judgment of the Secretary, it will not impair the efficiency of the project for irrigation purposes.

(2)(A) When carrying out this subsection, the Secretary shall first offer the lease of power privilege to an irrigation district or water users association operating the applicable transferred conduit, or to the irrigation district or water users association receiving water from the applicable reserved conduit. The Secretary shall determine a reasonable time frame for the irrigation district or water users association to accept or reject a lease of power privilege offer for a small conduit hydropower project.

(B) If the irrigation district or water users association elects not accept [1] a lease of power privilege offer under subparagraph (A), the Secretary shall offer the lease of power privilege to other parties in accordance with this subsection.

(3) The Bureau of Reclamation shall apply its categorical exclusion process under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) to small conduit hydropower development under this subsection, excluding siting of associated transmission facilities on Federal lands.

(4) The Power Resources Office of the Bureau of Reclamation shall be the lead office of small conduit hydropower policy and procedure-setting activities conducted under this subsection.

(5) Nothing in this subsection shall obligate the Western Area Power Administration, the Bonneville Power Administration, or the Southwestern Power Administration to purchase or market any of the power produced by the facilities covered under this subsection and none of the costs associated with production or delivery of such power shall be assigned to project purposes for inclusion in project rates.

(6) Nothing in this subsection shall alter or impede the delivery and management of water by Bureau of Reclamation facilities, as water used for conduit hydropower generation shall be deemed incidental to use of water for the original project purposes. Lease of power privilege shall be made only when, in the judgment of the Secretary, the exercise of the lease will not be incompatible with

the purposes of the project or division involved, nor shall it create any unmitigated financial or physical impacts to the project or division involved. The Secretary shall notify and consult with the irrigation district or water users association operating the transferred conduit before offering the lease of power privilege and shall prescribe terms and conditions that will adequately protect the planning, design, construction, operation, maintenance, and other interests of the United States and the project or division involved.

(7) Nothing in this subsection shall alter or affect any existing agreements for the development of conduit hydropower projects or disposition of revenues.

(8) Nothing in this subsection shall alter or affect any existing preliminary permit, license, or exemption issued by the Federal Energy Regulatory Commission under Part I of the Federal Power Act (16 U.S.C. 792 et seq.) or any project for which an application was filed with the Federal Energy Regulatory Commission before August 9, 2013, and is still pending.

(9) In this subsection:

(A) CONDUIT.—The term "conduit" means any Bureau of Reclamation tunnel, canal, pipeline, aqueduct, flume, ditch, or similar manmade water conveyance that is operated for the distribution of water for agricultural, municipal, or industrial consumption and not primarily for the generation of electricity.

(B) IRRIGATION DISTRICT.—The term "irrigation district" means any irrigation, water conservation or conservancy, multicounty water conservation or conservancy district, or any separate public entity composed of two or more such districts and jointly exercising powers of its member districts.

(C) RESERVED CONDUIT.—The term "reserved conduit" means any conduit that is included in project works the care, operation, and maintenance of which has been reserved by the Secretary, through the Commissioner of the Bureau of Reclamation.

(D) TRANSFERRED CONDUIT.—The term "transferred conduit" means any conduit that is included in project works the care, operation, and maintenance of which has been transferred to a legally organized water users association or irrigation district.

(E) SMALL CONDUIT HYDROPOWER.—The term "small conduit hydropower" means a facility capable of producing 5 megawatts or less of electric capacity.

(d) Delivery of water for irrigation; repayment contract prerequisites

No water may be delivered for irrigation of lands in connection with any new project, new division of a project, or supplemental works on a project until an organization, satisfactory in form and powers to the Secretary, has entered into a repayment contract with the United States, in a form satisfactory to the Secretary, providing among other things—

(1) That the Secretary may fix a development period for each irrigation block, if any, of not to exceed ten years from and including the first calendar year in which water is delivered for the lands in said block; and that during the development period water shall be delivered to the lands in the irrigation block involved at a charge per annum per acre-foot, or other charge, to be fixed by the Secretary each year and to be paid in advance of delivery of water: *Provided*, That where the lands included in an irrigation block are for the most part lands owned by the United States, the Secretary, prior to execution of a repayment contract, may fix a development period, but in such case execution of such a contract shall be a condition precedent to delivery of water after the close of the development period: *Provided further*, That when the Secretary, by contract or by notice given thereunder, shall have fixed a development period of less than ten years, and at any time thereafter but before commencement of the repayment period conditions arise which in the judgment of the Secretary would have justified the fixing of a longer period, he may amend such contract or notice to extend such development period to a date not to exceed ten years from its commencement, and in a case where no development period was provided, he may amend such contract within the same limits: *Provided further*, That when the Secretary shall have deferred the payment of all or any part of any installments of construction charges under any repayment contract pursuant to the authority of the Act of September 21, 1959 (73 Stat. 584), he may, at any time prior to the due date prescribed for the first installment not reduced by such deferment, and by agreement with the contracting organization, terminate the supplemental contract by which

such deferment was effected, credit the construction payments made, and exercise the authority granted in this section. After the close of the development period, any such charges collected and which the Secretary determines to be in excess of the cost of the operation and maintenance during the development period shall be credited to the construction cost of the project in the manner determined by the Secretary.

(2) That the part of the construction costs allocated by the Secretary to irrigation shall be included in a general repayment obligation of the organization; and that the organization may vary its distribution of construction charges in a manner that takes into account the productivity of the various classes of lands and the benefits accruing to the lands by reason of the construction: *Provided*, That no distribution of construction charges over the lands included in the organization shall in any manner be deemed to relieve the organization or any party or any land therein of the organization's general obligation to the United States.

(3) That the general repayment obligation of the organization shall be spread in annual installments, of the number and amounts fixed by the Secretary, over a period of not more than 40 years, exclusive of any development period fixed under paragraph (1) of this subsection, for any project contract unit or, if the project contract unit be divided into two or more irrigation blocks, for any such block, or as near to said period of not more than forty years as is consistent with the adoption and operation of a variable payment formula which, being based on full repayment within such period under average conditions, permits variance in the required annual payments in the light of economic factors pertinent to the ability of the organization to pay.

(4) That the first annual installment for any project contract unit, or for any irrigation block, as the case may be, shall accrue, on the date fixed by the Secretary, in the year after the last year of the development period or, if there be not development period, in the calendar year after the Secretary announces that the construction contemplated in the repayment contract is substantially completed or is advanced to a point where delivery of water can be made to substantially all of the lands in said unit or block to be irrigated; and if there be no development period fixed, that prior to and including the year in which the Secretary makes said announcement water shall be delivered only on the toll charge basis hereinbefore provided for development periods.

(e) Contracts to furnish water

In lieu of entering into a repayment contract pursuant to the provisions of subsection (d) of this section to cover that part of the cost of the construction of works connected with water supply and allocated to irrigation, the Secretary, in his discretion, may enter into either short- or long-term contracts to furnish water for irrigation purposes. Each such contract shall be for such period, not to exceed forty years, and at such rates as in the Secretary's judgment will produce revenues at least sufficient to cover an appropriate share of the annual operation and maintenance cost and an appropriate share of such fixed charges as the Secretary deems proper, due consideration being given to that part of the cost of construction of works connected with water supply and allocated to irrigation; and shall require payment of said rates each year in advance of delivery of water for said year. In the event such contracts are made for furnishing water for irrigation purposes, the costs of any irrigation water distribution works constructed by the United States in connection with the new project, new division of a project, or supplemental works on a project, shall be covered by a repayment contract entered into pursuant to said subsection (d).

(f) Public participation

No less than sixty days before entering into or amending any repayment contract or any contract for the delivery of irrigation water (except any contract for the delivery of surplus or interim irrigation water whose duration is for one year or less) the Secretary shall—

(1) publish notice of the proposed contract or amendment in newspapers of general circulation in the affected area and shall make reasonable efforts to otherwise notify interested parties which may be affected by such contract or amendment, together with information indicating to whom comments or inquiries concerning the proposed actions can be addressed; and

(2) provide an opportunity for submission of written data, views and arguments, and shall consider all substantive comments so received.

§485h–1. Administration of repayment contracts and long-term contracts to

furnish water; renewal and conversion; credit for payments; right to available water supply; rates; construction component

In administering subsections (d) and (e) of section 485h of this title, the Secretary of the Interior shall—

(1) include in any long-term contract hereafter entered into under subsection (e) of section 485h of this title provision, if the other contracting party so requests, for renewal thereof under stated terms and conditions mutually agreeable to the parties. Such terms and conditions shall provide for an increase or decrease in the charges set forth in the contract to reflect, among other things, increases or decreases in construction, operation, and maintenance costs and improvement or deterioration in the party's repayment capacity. Any right of renewal shall be exercised within such reasonable time prior to the expiration of the contract as the parties shall have agreed upon and set forth therein;

(2) include in any long-term contract hereafter entered into under subsection (e) of section 485h of this title with a contracting organization provision, if the organization so requests, for conversion of said contract, under stated terms and conditions mutually agreeable to the parties, to a contract under subsection (d) of section 485h of this title at such time as, account being taken of the amount credited to return by the organization as hereinafter provided, the remaining amount of construction cost which is properly assignable for ultimate return by it can probably be repaid to the United States within the term of a contract under subsection (d) of section 485h of this title;

(3) credit each year to every party which has entered into or which shall enter into a long-term contract pursuant to subsection (e) of section 485h of this title so much of the amount paid by said party on or before the due date as is in excess of the share of the operation and maintenance costs of the project which the Secretary finds is properly chargeable to that party. Credit for payments heretofore made under any such contract shall be established by the Secretary as soon after July 2, 1956 as it is feasible for him to do so. After the sum of such credits is equal to the amount which would have been for repayment by the party if a repayment contract under subsection (d) of section 485h of this title had been entered into, which amount shall be established by the Secretary upon completion of the project concerned or as far in advance thereof as is feasible, no construction component shall be included in any charges made for the furnishing of water to the contracting party and any charges theretofore fixed by contract or otherwise shall be reduced accordingly;

(4) provide that the other party to any contract entered into pursuant to subsection (d) of section 485h of this title or to any long-term contract entered into pursuant to subsection (e) of section 485h of this title shall, during the term of the contract and of any renewal thereof and subject to fulfillment of all obligations thereunder, have a first right (to which right the rights of the holders of any other type of irrigation water contract shall be subordinate) to a stated share or quantity of the project's available water supply for beneficial use on the irrigable lands within the boundaries of, or owned by, the party and a permanent right to such share or quantity upon completion of payment of the amount assigned for ultimate return by the party subject to payment of an appropriate share of such costs, if any, as may thereafter be incurred by the United States in its operation and maintenance of the project works; and [1]

(5) Provide [2] for payment of rates under any contract entered into pursuant to said subsection (e) in advance of delivery of water on an annual, semiannual, bimonthly, or monthly basis as specified in the contract.[3]

(6) include a reasonable construction component in the rates set out in any long-term contract hereafter entered into under subsection (e) of section 485h of this title prior to amortization of that part of the cost of constructing the project which is assigned to be repaid by the contracting party.

(July 2, 1956, ch. 492, §1, 70 Stat. 483; Pub. L. 96–375, §8, Oct. 3, 1980, 94 Stat. 1507.)

§492. Operation and maintenance charges generally

In addition to the construction charge, every water-right applicant, entryman, or landowner under or upon a reclamation project shall also pay, whenever water service is available for the irrigation of his land, an operation and maintenance charge based upon the total cost of operation and maintenance of the project, or each separate unit thereof, and such charge shall be made for each acre-foot of water delivered; but each acre of irrigable land, whether irrigated or not, shall be charged with a minimum operation and maintenance charge based upon the charge for delivery of not less than one acre-foot of water. §504. Rehabilitation and betterment of Federal reclamation projects, including small reclamation projects; return of costs; interest; definitions; performance of work

Expenditures of funds hereafter specifically appropriated for rehabilitation and betterment of any project constructed under authority of the Small Reclamation Projects Act (Act of August 6, 1956, 70 Stat. 1044, and Acts amendatory thereof and supplementary thereto) [43 U.S.C. 422a et seq.] and of irrigation systems on projects governed by the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto), shall be made only after the organizations concerned shall have obligated themselves for the return thereof, in installments fixed in accordance with their ability to pay, as determined by the Secretary of the Interior in the light of their outstanding repayment obligations, and which shall, to the fullest practicable extent, be scheduled for return with their construction charge installments or otherwise scheduled as he shall determine: *Provided*, That repayment of such loans made for small reclamation projects shall include interest in accordance with the provisions of said Small Reclamation Projects Act. No such determination of the Secretary of the Interior shall become effective until the expiration of sixty days

after it has been submitted to the Committee on Energy and Natural Resources of the Senate and the Committee on Natural Resources of the House of Representatives; except that, any such determination may become effective prior to the expiration of such sixty days in any case in which each such committee approves an earlier date and notifies the Secretary in writing, of such approval: *Provided*, That when Congress is not in session the Secretary's determination, if accompanied by a finding by the Secretary that substantial hardship to the water users concerned or substantial further injury to the project works will result, shall become effective when the chairman and ranking minority member of each such committee shall file with the Secretary their written approval of said findings. The term "rehabilitation and betterment", as used in this section, shall mean maintenance, including replacements, which cannot be financed currently, as otherwise contemplated by the Federal reclamation laws in the case of operation and maintenance costs, but shall not include construction, the costs of which are returnable, in whole or in part, through "construction charges" as that term is defined in section 485a(d) of this title. Such rehabilitation and betterment work may be performed by contract, by force-account, or, notwithstanding any other law and subject to such reasonable terms and conditions as the Secretary of the Interior shall deem appropriate for the protection of the United States, by contract entered into with the organization concerned whereby such organization shall perform such work.

§508. Costs incurred in the modification of structures

(a) Costs resulting from age and normal deterioration or lack of maintenance of structures

Costs heretofore or hereafter incurred in the modification of structures under this subchapter, the cause of which results from age and normal deterioration of the structure or from nonperformance of reasonable and normal maintenance of the structure by the operating entity shall be considered as project costs and will be allocated to the purposes for which the structure was authorized initially to be constructed and will be reimbursable as provided by existing law.

(b) Nonreimbursable costs resulting from new hydrologic or seismic data or changes in criteria

With respect to the $100,000,000 authorized to be appropriated in the Reclamation Safety of Dams Act of 1978 [43 U.S.C. 509], costs heretofore or hereafter incurred in the modification of structures under this subchapter, the cause of which results from new hydrologic or seismic data or changes in state-of-the-art criteria deemed necessary for safety purposes shall be nonreimbursable and nonreturnable under the Federal Reclamation law.

(c) Reimbursement of certain modification costs

With respect to the additional amounts authorized to be appropriated by section 509 of this title, costs incurred in the modification of structures under this subchapter, the cause of which results from new hydrologic or seismic data or changes in state-of-the-art criteria deemed necessary for safety purposes, shall be reimbursed to the extent provided in this subsection.

(1) Fifteen percent of such costs shall be allocated to the authorized purposes of the structure, except that in the case of Jackson Lake Dam, Minidoka Project, Idaho-Wyoming, such costs shall be allocated in accordance with the allocation of operation and maintenance charges.

(2) Costs allocated to irrigation water service and capable of being repaid by the irrigation water users shall be reimbursed within 50 years of the year in which the work undertaken pursuant to this subchapter is substantially complete. Costs allocated to irrigation water service which are beyond the water users' ability to pay shall be reimbursed in accordance with existing law.

The interest rate used shall be determined by the Secretary of the Treasury, taking into consideration average market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the applicable reimbursement period during the month preceding the fiscal year in which the costs are incurred. To the extent that more than one interest rate is determined pursuant to the preceding sentence, the Secretary of the Treasury shall establish an interest rate at the weighted average of the rates so determined.

(d) Contracts for return of costs

The Secretary is authorized to negotiate appropriate contracts with project beneficiaries providing for the return of reimbursable costs under this subchapter: *Provided, however*, That no contract entered into pursuant to this subchapter shall be deemed to be a new or amended contract for the purposes of section 390cc(a) of this title.

(a) Guidelines and inspections

(1) Development of guidelines

Not later than 1 year after March 30, 2009, the Secretary in consultation with transferred works operating entities shall develop, consistent with existing transfer contracts, specific inspection guidelines for project facilities which are in proximity to urbanized areas and which could pose a risk to public safety or property damage if such project facilities were to fail.

(2) Conduct of inspections

Not later than 3 years after March 30, 2009, the Secretary shall conduct inspections of those project facilities, which are in proximity to urbanized areas and which could pose a risk to public safety or property damage if such facilities were to fail, using such specific inspection guidelines and criteria developed pursuant to paragraph (1). In selecting project facilities to inspect, the Secretary shall take into account the potential magnitude of public safety and economic damage posed by each project facility.

(3) Treatment of costs

The costs incurred by the Secretary in conducting these inspections shall be nonreimbursable.

(b) Use of inspection data

of such technical assistance, with the balance of such costs being advanced by the transferred works operating entity or other non-Federal source. (b) Reimbursement of costs arising from extraordinary operation and maintenance work

(1) Treatment of costs

For reserved works, costs incurred by the Secretary in conducting extraordinary operation and maintenance work will be allocated to the authorized reimbursable purposes of the project and shall be repaid within 50 years, with interest, from the year in which work undertaken pursuant to this subchapter is substantially complete.

(2) Authority of Secretary

For transferred works, the Secretary is authorized to advance the costs incurred by the transferred works operating entity in conducting extraordinary operation and maintenance work and negotiate appropriate 50-year repayment contracts with project beneficiaries providing for the return of reimbursable costs, with interest, under this subsection: Provided, however, That no contract entered into pursuant to this subchapter shall be deemed to be a new or amended contract for the purposes of section 390cc(a) of this title.

In the event of such contract being made with an irrigation district, the Secretary of the Interior, in his discretion, may contract that the payments, both for the construction of irrigation works and for operation and maintenance, on the part of the district shall be made upon such dates as will best conform to the district and taxation laws of the respective States under which such irrigation districts shall be formed, and if he deem it advisable he may contract for such penalties or interest charges in case of delinquency in payments as he may deem proper and consistent with such State laws, notwithstanding the provisions of sections 471, 472, 475, 478 to 481, 492, 493, 494 to 497 and 499 of this title. §591a. Boise project, Idaho; Arrowrock Dam; installment payments of costs of repairs, resurfacing, improvement, etc.

For the purpose of avoiding an unduly high operation and maintenance assessment in any one year and to keep the operation and maintenance charges in connection with the Arrowrock Division of the Boise reclamation project within the ability of the water users to pay, the Secretary of the Interior is authorized to allow the irrigation districts of the said Arrowrock Division and the irrigation districts ditch companies, and water users who have assumed obligations to pay proportionate parts of the estimated cost of the operation and maintenance of the Arrowrock Reservoir, to pay the costs, as

determined conclusively by said Secretary, incurred in the repair, resurfacing, and improvement of the Arrowrock Dam and in increasing the height thereof (to provide additional capacity to offset past and, to some extent, future losses of capacity resulting from the deposit of silt in the said reservoir) in twenty annual installments instead of requiring the payment of all of such operation and maintenance costs in one year as provided in section 492 of this title: *Provided*, That such costs, for the purpose of any amendatory contracts affecting the construction charges of Arrowrock Dam that may be entered into as authorized by subchapter X of this chapter, may, in the discretion of the Secretary, be treated as part of the construction charges of said dam, and as payable in the same manner as such charges.

§617c. Condition precedent to taking effect of provisions

(a) Ratification by interested States of Colorado River compact; agreements for apportionment of waters

This subchapter shall not take effect and no authority shall be exercised under this subchapter and no work shall be begun and no moneys expended on or in connection with the works or structures provided for in this subchapter, and no water rights shall be claimed or initiated thereunder, and no steps shall be taken by the United States or by others to initiate or perfect any claims to the use of water pertinent to such works or structures unless and until (1) the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming shall have ratified the Colorado River compact, mentioned in section 617l of this title, and the President by public proclamation shall have so declared, or (2) if said States fail to ratify the said compact within six months from December 21, 1928, then, until six of said States, including the State of California, shall ratify said compact and shall consent to waive the provisions of the first paragraph of Article XI of said compact, which makes the same binding and obligatory only when approved by each of the seven States signatory thereto, and shall have approved said compact without conditions, save that of such six-State approval, and the President by public proclamation shall have so declared, and, further, until the State of California, by act of its legislature, shall agree irrevocably and unconditionally with the United States and for the benefit of the States of Arizona, Colorado, Nevada, New Mexico, Utah, and Wyoming, as an express covenant and in consideration of the passage of this subchapter, that the aggregate annual consumptive use (diversions less returns to the river) of water of and from the Colorado River for use in the State of California, including all uses under contracts made under the provisions of this subchapter and all water necessary for the supply of any rights which existed on December 21, 1928, shall not exceed four million four hundred thousand acre-feet of the waters apportioned to the lower basin States by paragraph (a) of Article III of the Colorado River compact, plus not more than one-half of any excess or surplus waters unapportioned by said compact, such uses always to be subject to the terms of said compact.

The States of Arizona, California, and Nevada are authorized to enter into an agreement which shall provide (1) that of the 7,500,000 acre-feet annually apportioned to the lower basin by paragraph (a) of Article III of the Colorado River compact, there shall be apportioned to the State of Nevada 300,000 acre-feet and to the State of Arizona 2,800,000 acre-feet for exclusive beneficial consumptive use in perpetuity, and (2) that the State of Arizona may annually use one-half of the excess or surplus waters unapportioned by the Colorado River compact, and (3) that the State of Arizona shall have the exclusive beneficial consumptive use of the Gila River and its tributaries

within the boundaries of said State, and (4) that the waters of the Gila River and its tributaries, except return flow after the same enters the Colorado River, shall never be subject to any diminution whatever by any allowance of water which may be made by treaty or otherwise to the United States of Mexico but if, as provided in paragraph (c) of Article III of the Colorado River compact, it shall become necessary to supply water to the United States of Mexico from waters over and above the quantities which are surplus as defined by said compact, then the State of California shall and will mutually agree with the State of Arizona to supply out of the main stream of the Colorado River, one-half of any deficiency which must be supplied to Mexico by the lower basin, and (5) that the State of California shall and will further mutually agree with the States of Arizona and Nevada that none of said three States shall withhold water and none shall require the delivery of water, which cannot reasonably be applied to domestic and agricultural uses, and (6) that all of the provisions of said tri-State agreement shall be subject in all particulars to the provisions of the Colorado River compact and (7) said agreement to take effect upon the ratification of the Colorado River compact by Arizona, California, and Nevada.

(b) Agreements for revenues to meet expenses of construction, operation, and maintenance of works

Before any money is appropriated for the construction of said dam or power plant, or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues by contract, in accordance with the provisions of this subchapter, adequate in his judgment to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within fifty years from the date of the completion of said works, of all amounts advanced to the fund under subdivision (b) of section 617a of this title for such works together with interest thereon made reimbursable under this subchapter.

Before any money is appropriated for the construction of said main canal and appurtenant structures to connect the Laguna Dam with the Imperial and Coachella Valleys in California, or any construction work is done upon said canal or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, adequate in his judgment to insure payment of all expenses of construction, operation, and maintenance of said main canal and appurtenant structures in the manner provided in the reclamation law.

If during the period of amortization the Secretary of the Interior shall receive revenues in excess of the amount necessary to meet the periodical payments to the United States as provided in the contract, or contracts, executed under this subchapter, then, immediately after the settlement of such periodical payments, he shall pay to the State of Arizona 18¾ per centum of such excess revenues and to the State of Nevada 18¾ per centum of such excess revenues.

The reclamation law, referred to in text, is defined in section 617k of this title.

§617d. Contracts for storage and use of waters for irrigation and domestic purposes; generation and sale of electrical energy

The Secretary of the Interior is authorized, under such general regulations as he may prescribe, to contract for the storage of water in said reservoir and for the delivery thereof at such points on the river and on said canal as may be agreed upon, for irrigation and domestic uses, and generation of electrical energy and delivery at the switchboard to States, municipal corporations, political subdivisions, and private corporations of electrical energy generated at said dam, upon charges that will provide revenue which, in addition to other revenue accruing under the reclamation law and under this subchapter, will in his judgment cover all expenses of operation and maintenance incurred by the United States on account of works constructed under this subchapter and the payments to the

United States under subdivision (b) of section 617c of this title. Contracts respecting water for irrigation and domestic uses shall be for permanent service and shall conform to paragraph (a) of section 617c of this title. No person shall have or be entitled to have the use for any purpose of the water stored as aforesaid except by contract made as herein stated.

After the repayments to the United States of all money advanced with interest, charges shall be on such basis and the revenues derived therefrom shall be kept in a separate fund to be expended within the Colorado River Basin as may hereafter be prescribed by the Congress.

General and uniform regulations shall be prescribed by the said Secretary for the awarding of contracts for the sale and delivery of electrical energy, and for renewals under subdivision (b) of this section, and in making such contracts the following shall govern:

(a) Duration of contracts for electrical energy; price of water and electrical energy to yield reasonable returns; readjustments of prices

No contract for electrical energy or for generation of electrical energy shall be of longer duration than fifty years from the date at which such energy is ready for delivery.

Contracts made pursuant to subdivision (a) of this section shall be made with a view to obtaining reasonable returns and shall contain provisions whereby at the end of fifteen years from the date of their execution and every ten years thereafter, there shall be readjustment of the contract, upon the demand of either party thereto, either upward or downward as to price, as the Secretary of the Interior may find to be justified by competitive conditions at distributing points or competitive centers, and with provisions under which disputes or disagreements as to interpretation or performance of such contract shall be determined either by arbitration or court proceedings, the Secretary of the Interior being authorized to act for the United States in such readjustments or proceedings.

(b) Renewal of contracts for electrical energy

The holder of any contract for electrical energy not in default thereunder shall be entitled to a renewal thereof upon such terms and conditions as may be authorized or required under the then existing laws and regulations, unless the property of such holder dependent for its usefulness on a continuation of the contract be purchased or acquired and such holder be compensated for damages to its property, used and useful in the transmission and distribution of such electrical energy and not taken, resulting from the termination of the supply.

(c) Applicants for purchase of water and electrical energy; preferences

Contracts for the use of water and necessary privileges for the generation and distribution of hydroelectric energy or for the sale and delivery of electrical energy shall be made with responsible applicants therefor who will pay the price fixed by the said Secretary with a view to meeting the revenue requirements herein provided for. In case of conflicting applications, if any, such conflicts shall be resolved by the said Secretary, after hearing, with due regard to the public interest, and in conformity with the policy expressed in the Federal Power Act [16 U.S.C. 791a et seq.] as to conflicting applications for permits and licenses, except that preference to applicants for the use of water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy, or for delivery at the switchboard of a hydroelectric plant, shall be given, first, to a State for the generation or purchase of electric energy for use in the State, and the States of Arizona, California, and Nevada shall be given equal opportunity as such applicants.

The rights covered by such preference shall be contracted for by such State within six months after notice by the Secretary of the Interior and to be paid for on the same terms and conditions as may be provided in other similar contracts made by said Secretary: *Provided, however*, That no application of a State or a political subdivision for an allocation of water for power purposes or of electrical energy shall be denied or another application in conflict therewith be granted on the ground that the bond issue of such State or political subdivision necessary to enable the applicant to utilize such water and appurtenant works and privileges necessary for the generation and distribution of

hydroelectric energy or the electrical energy applied for, has not been authorized or marketed, until after a reasonable time, to be determined by the said Secretary, has been given to such applicant to have such bond issue authorized and marketed.

(d) Transmission lines for electrical energy; use; rights of way over public and reserved lands

Any agency receiving a contract for electrical energy equivalent to one hundred thousand firm horsepower, or more, may, when deemed feasible by the said Secretary, from engineering and economic considerations and under general regulations prescribed by him, be required to permit any other agency having contracts hereunder for less than the equivalent of twenty-five thousand firm horsepower, upon application to the Secretary of the Interior made within sixty days from the execution of the contract of the agency the use of whose transmission line is applied for, to participate in the benefits and use of any main transmission line constructed or to be constructed by the former for carrying such energy (not exceeding, however, one-fourth the capacity of such line), upon payment by such other agencies of a reasonable share of the cost of construction, operation, and maintenance thereof.

The use is authorized of such public and reserved lands of the United States as may be necessary or convenient for the construction, operation, and maintenance of main transmission lines to transmit said electrical energy.

He shall also conform with other provisions of the Federal Power Act and of the rules and regulations of the Federal Power Commission, which have been devised or which may be hereafter devised, for the protection of the investor and consumer.

The Federal Power Commission is directed not to issue or approve any permits or licenses under said Federal Power Act [16 U.S.C. 791a et seq.] upon or affecting the Colorado River or any of its tributaries, except the Gila River, in the States of Colorado, Wyoming, Utah, New Mexico, Nevada, Arizona, and California until this subchapter shall become effective as provided in sections 617c of this title.

CHANGE OF NAME

Act Apr. 30, 1947, changed name of Boulder Dam back to Hoover Dam.

CONSTRUCTION WITH OTHER LAWS

Pub. L. 98–381, title I, §104(b), Aug. 17, 1984, 98 Stat. 1335, provided that: "Except as amended by this Act [amending sections 618, 618a, 618e, and 618k of this title], the Boulder Canyon Project Adjustment Act of 1940 (54 Stat. 774, as amended, 43 U.S.C. 618), as amended and supplemented [this subchapter], shall remain in full force and effect."

§618a. Receipts from project; disposition

All receipts from the project shall be paid into the Colorado River Dam Fund and shall be available, without further appropriation, for:

(a) Defraying operating expenses

Defraying the costs of operation (including purchase of supplemental energy to meet temporary deficiencies in firm energy which the Secretary of Energy is obligated by contract to supply), maintenance and replacements of, and emergency expenditures for, all facilities of the project, within such separate limitations as may be included in annual appropriations Acts;

(b) Repayment of cost of construction

Repayment to the Treasury, with interest (after making provision for the payments and transfers provided in subdivisions (c) and (d) hereof), of advances to the Colorado River Dam Fund for the construction of the project (excluding the amount allocated to flood control by section 2(b) of the Project Act [43 U.S.C. 617a(b)]), and any readvances made to said fund under section 618d of this title; and

(c) Commutation payments to Arizona and Nevada

Payment subject to the provisions of section 618b of this title, in commutation of the payments now provided for the States of Arizona and Nevada in section 4(b) of the Project Act [43 U.S.C. 617c(b)] to each of said States of the sum of $300,000 for each year of operation, beginning with the year of operation ending May 31, 1938, and continuing annually thereafter until and including the year of operation ending May 31, 1987, and such payments for any year of operation which shall have expired at the time when this subdivision shall become effective shall be due immediately, and be paid, without interest, as expeditiously as administration of this subchapter will permit, and each such payment for subsequent years of operation shall be made on or before July 31, following the close of the year of operation for which it is made. All such payments shall be made from revenues received on and after July 19, 1940 in the Colorado River Dam Fund.

Notwithstanding the foregoing provisions of this subsection, in the event that there are levied and collected by or under authority of Arizona or Nevada or by any lawful taxing political subdivision thereof, taxes upon—

(i) the project as herein defined;

(ii) the electrical energy generated at Hoover Dam by means of facilities, machinery, or equipment both owned and operated by the United States, or owned by the United States and operated under contract with the United States;

(iii) the privilege of generating or transforming such electrical energy or of use of such facilities, machinery, or equipment or of falling water for such generation or transforming; or

(iv) the transmission or control of such electrical energy so generated or transformed (as distinguished from the transmission lines and other physical properties used for such transmission or control) or the use of such transmission lines or other physical properties for such transmission or control,

payments made hereunder to the State by or under the authority of which such taxes are collected shall be reduced by an amount equivalent to such taxes. Nothing herein shall in anywise impair the right of either the State of Arizona or the State of Nevada, or any lawful taxing political subdivision of either of them, to collect non-discriminatory taxes upon that portion of the transmission lines and all other physical properties, situated within such State and such political subdivision, respectively, and belonging to any of the lessees and/or allottees under the Project Act [43 U.S.C. 617 et seq.] and/or under this subchapter, and nothing herein shall exempt or be construed so as to exempt any such property from nondiscriminatory taxation, all in the manner provided by the constitution and laws of such State. Sums, if any, received by each State under the provisions of the Project Act [43 U.S.C. 617 et seq.] shall be deducted from the first payment or payments to said State authorized by this subchapter. Payments under this subsection shall be deemed contractual obligations of the United States, subject to the provisions of section 618b of this title.

(d) Transfer of sums to Colorado River Development Fund; expenditure of fund

Transfer, subject to the provisions of section 618b of this title, from the Colorado River Dam Fund to a special fund in the Treasury, established and designated the "Colorado River Development Fund", of the sum of $500,000 for the year of operation ending May 31, 1938, and the like sum of $500,000 for each year of operation thereafter, until and including the year of operation ending May 31, 1987. The transfer of the said sum of $500,000 for each year of operation shall be made on or before July 31 next following the close of the year of operation for which it is made: *Provided*, That any such transfer for any year of operation which shall have ended at the time this subsection shall become effective, shall be made, without interest, from revenues received in the Colorado River Dam Fund, as expeditiously as administration of this subchapter will permit, and without readvances from the general funds of the Treasury. Receipts of the Colorado River Development Fund for the years of operation ending in 1938, 1939, and 1940 (or in the event of reduced receipts during any of said years, due to adjustments under section 618b of this title, then the first receipts of said fund up to $1,500,000), are authorized to be appropriated only for the continuation and extension, under the direction of the Secretary, of studies and investigations by the Bureau of Reclamation for the formulation of a comprehensive plan for the utilization of waters of the Colorado River system for irrigation, electrical power, and other purposes, in the States of the upper division and the States of the lower division, including studies of quantity and quality of water and all other relevant factors. The next such receipts up to and including the receipts for the year of operation ending in 1955 are authorized to be appropriated only for the investigation and construction of projects for such utilization in and equitably distributed among the four States of the upper division: *Provided, however*, That in view of distributions heretofore made, and in order to expedite the development and utilization of water projects within all of the States of the upper division, the distribution of such funds for use in the fiscal years 1949 to 1955, shall be on a basis which is as nearly equal as practicable. Such receipts for the years of operation ending in 1956 to 1987, inclusive, are authorized to be appropriated for the investigation and construction of projects for such utilization in and equitably distributed among the States of the upper division and the States of the lower division. The terms "Colorado River system", "States of the upper division", and "States of the lower division" as so used shall have the respective meanings defined in the Colorado River compact mentioned in the Project Act [43 U.S.C. 617 et seq.]. Such projects shall be only such as are found by the Secretary to be physically feasible, economically justified, and consistent with such formulation of a comprehensive plan. Nothing in this subchapter shall be construed so as to prevent the authorization and construction of any such projects prior to the completion of said plan of comprehensive development; nor shall this subchapter be construed as affecting the right of any State to proceed independently of this subchapter or its provisions with the investigation or construction of any project or projects. Transfers under this subsection shall be deemed contractual obligations of the United States, subject to the provisions of section 618b of this title.

(e) Transfer to Lower Colorado River Basin Development Fund

Transfer to the Lower Colorado River Basin Development Fund established by title IV of the Colorado River Basin Project Act of 1968, as amended and supplemented [43 U.S.C. 1541 et seq.],

(B) The Secretary of Energy shall offer Schedule D contingency capacity and firm energy to entities not receiving contingent capacity and firm energy under subparagraphs (A) and (B) of paragraph (1) (referred to in this section as "new allottees") for delivery commencing October 1, 2017 pursuant to this subsection. In this subsection, the term "the marketing area for the Boulder City Area Projects" shall have the same meaning as in appendix A of the Conformed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects published in the Federal Register on December 28, 1984 (49 Federal Register 50582 et seq.) (referred to in this section as the "Criteria").

(C)(i) Within 36 months of December 20, 2011, the Secretary of Energy shall allocate through the Western Area Power Administration (referred to in this section as "Western"), for delivery

commencing October 1, 2017, for use in the marketing area for the Boulder City Area Projects 66.7 percent of the Schedule D contingent capacity and firm energy to new allottees that are located within the marketing area for the Boulder City Area Projects and that are—

(I) eligible to enter into contracts under section 5 of the Boulder Canyon Project Act (43 U.S.C. 617d); or

(II) federally recognized Indian tribes.

(ii) In the case of Arizona and Nevada, Schedule D contingent capacity and firm energy for new allottees other than federally recognized Indian tribes shall be offered through the Arizona Power Authority and the Colorado River Commission of Nevada, respectively. Schedule D contingent capacity and firm energy allocated to federally recognized Indian tribes shall be contracted for directly with Western.

(D) Within 1 year of December 20, 2011, the Secretary of Energy also shall allocate, for delivery commencing October 1, 2017, for use in the marketing area for the Boulder City Area Projects 11.1 percent of the Schedule D contingent capacity and firm energy to each of—

(i) the Arizona Power Authority for allocation to new allottees in the State of Arizona;

(ii) the Colorado River Commission of Nevada for allocation to new allottees in the State of Nevada; and

(iii) Western for allocation to new allottees within the State of California, provided that Western shall have 36 months to complete such allocation.

(E) Each contract offered pursuant to this subsection shall include a provision requiring the new allottee to pay a proportionate share of its State's respective contribution (determined in accordance with each State's applicable funding agreement) to the cost of the Lower Colorado River Multi-Species Conservation Program (as defined in section 9401 of the Omnibus Public Land Management Act of 2009 (Public Law 111–11; 123 Stat. 1327)), and to execute the Boulder Canyon Project Implementation Agreement Contract No. 95–PAO–10616 (referred to in this section as the "Implementation Agreement").

(F) Any of the 66.7 percent of Schedule D contingent capacity and firm energy that is to be allocated by Western that is not allocated and placed under contract by October 1, 2017, shall be returned to those contractors shown in Schedule A and Schedule B in the same proportion as those contractors' allocations of Schedule A and Schedule B contingent capacity and firm energy. Any of the 33.3 percent of Schedule D contingent capacity and firm energy that is to be distributed within the States of Arizona, Nevada, and California that is not allocated and placed under contract by October 1, 2017, shall be returned to the Schedule A and Schedule B contractors within the State in which the Schedule D contingent capacity and firm energy were to be distributed, in the same proportion as those contractors' allocations of Schedule A and Schedule B contingent capacity and firm energy.

(3) The total obligation of the Secretary of Energy to deliver firm energy pursuant to paragraphs (1)(A), (1)(B), and (2) is 4,527.001 million kilowatthours in each year of operation. To the extent that the actual generation at Hoover Powerplant in each year of operation (less deliveries thereof to Arizona required by its first priority under Schedule C of subsection (a)(1)(C) whenever actual generation in each year of operation is in excess of 4,501.001 million kilowatthours) is less than 4,527.001 million kilowatthours, such deficiency shall be borne by the holders of contracts under said [1] Schedules A, B, and D in the ratio that the sum of the quantities of firm energy to which each contractor is entitled pursuant to said schedules bears to 4,527.001 million kilowatthours. At the request of any such contractor, the Secretary of Energy will purchase energy to meet that contractor's deficiency at such contractor's expense.

(4) Subdivision C of the Criteria shall be deemed to have been modified to conform to this section, as modified by the Hoover Power Allocation Act of 2011. The Secretary of Energy shall cause to be included in the Federal Register a notice conforming the text of the regulations to such modifications.

(5) Each contract offered under subsection (a)(1) of this section shall:

(A) in accordance with section 5(a) of the Boulder Canyon Project Act (43 U.S.C. 617d(a)), expire September 30, 2067;

(B) not restrict use to which the capacity and energy contracted for by the Metropolitan Water District of Southern California may be placed within the State of California: *Provided*, That to the extent practicable and consistent with sound water management and conservation practice, the Metropolitan Water District of Southern California shall allocate such capacity and energy to pump available Colorado River water prior to using such capacity and energy to pump California State water project water;

(C) conform to the applicable provisions of subdivison [2] E of the Criteria, commencing at 48 Federal Register 20881, modified as provided in this section. To the extent that said provisions of the Criteria, as so modified, are applicable to contracts entered into under this section, those provisions are hereby ratified;

(D) authorize and require Western to collect from new allottees a pro rata share of Hoover Dam repayable advances paid for by contractors prior to October 1, 2017, and remit such amounts to the contractors that paid such advances in proportion to the amounts paid by such contractors as specified in section 6.4 of the Implementation Agreement;

(E) permit transactions with an independent system operator; and

(F) contain the same material terms included in section 5.6 of those long-term contracts for purchases from the Hoover Power Plant that were made in accordance with this subchapter and are in existence on December 20, 2011.

(b) Prejudice of rights of contract holders under Boulder Canyon Project Act

Nothing in the Criteria shall be construed to prejudice any rights conferred by the Boulder Canyon Project Act, as amended and supplemented [43 U.S.C. 617 et seq.], on the holder of a contract described in subsection (a) of this section not in default thereunder on September 30, 2067.

(c) Offer of contract to other entities

If any existing contractor fails to accept an offered contract, the Secretary of Energy shall offer the contingent capacity and firm energy thus available first to other entities in the same State listed in Schedule A and Schedule B, second to other entities listed in Schedule A and Schedule B, third to other entities in the same State which receive contingent capacity and firm energy under subsection (a)(2) of this section, and last to other entities which receive contingent capacity and firm energy under subsection (a)(2) of this section.

(d) Water availability

Except with respect to energy purchased at the request of an allottee pursuant to subsection (a)(3), the obligation of the Secretary of Energy to deliver contingent capacity and firm energy pursuant to contracts entered into pursuant to this section shall be subject to availability of the water needed to produce such contingent capacity and firm energy. In the event that water is not available to produce the contingent capacity and firm energy set forth in Schedule A, Schedule B, and Schedule D, the Secretary of Energy shall adjust the contingent capacity and firm energy offered under those Schedules in the same proportion as those contractors' allocations of Schedule A, Schedule B, and Schedule D contingent capacity and firm energy bears to the full rated contingent capacity and firm energy obligations.

(e) Congressional exercise of reserved right

The provisions of this section constitute an exercise by the Congress of the right reserved by it in section 5(b) of the Boulder Canyon Project Act, as amended and supplemented [43 U.S.C. 617d(b)], to prescribe terms and conditions for contracts for electrical energy generated at Hoover Dam. This section constitutes the exclusive method for disposing of capacity and energy from Hoover Dam for the period beginning October 1, 2017, and ending September 30, 2067.

(f) Court challenges; disputes and disagreements

(1) Notwithstanding any other provision of law, any claim that the provisions of subsection (a) of this section violates any rights to capacity or energy from the Boulder Canyon project is barred

unless the complaint is filed within one year after December 20, 2011, in the United States Court of Federal Claims which shall have exclusive jurisdiction over this action. Any claim that actions taken by any administrative agency of the United States violates any right under this subchapter or the Boulder Canyon Project Act [43 U.S.C. 617 et seq.] or the Boulder Canyon Project Adjustment Act [43 U.S.C. 618 et seq.] is barred unless suit asserting such claim is filed in a Federal court of competent jurisdiction within one year after final refusal of such agency to correct the action complained of.

EDITORIAL NOTES

CODIFICATION

Section was enacted as part of the Colorado River Basin Project Act, and not as part of act Apr. 11, 1956, popularly known as the Colorado River Storage Project Act, which comprises this chapter.

§620e. Cost allocations; Indian lands; report to Congress

Upon completion of each unit, participating project or separable feature thereof, the Secretary shall allocate the total costs (excluding any expenditures authorized by section 620g of this title) of constructing said unit, project or feature to power, irrigation, municipal water supply, flood control, navigation, or any other purposes authorized under reclamation law. Allocations of construction, operation and maintenance costs to authorized nonreimbursable purposes shall be nonreturnable under the provisions of this chapter. In the event that the Navajo participating project is authorized, the costs allocated to irrigation of Indian-owned tribal or restricted lands within, under, or served by such project, and beyond the capability of such lands to repay, shall be determined, and, in recognition of the fact that assistance to the Navajo Indians is the responsibility of the entire nation, such costs shall be nonreimbursable. On January 1 of each year the Secretary shall report to the Congress for the previous fiscal year, beginning with the fiscal year 1957, upon the status of the revenues from, and the cost of, constructing, operating, and maintaining the Colorado River storage project and the participating projects. The Secretary's report shall be prepared to reflect accurately the Federal investment allocated at that time to power, to irrigation, and to other purposes, the progress of return and repayment thereon, and the estimated rate of progress, year by year, in accomplishing full repayment.

To aid the public-land States in the reclamation of the desert lands therein, and the settlement, cultivation and sale thereof in small tracts to actual settlers, the Secretary of the Interior with the approval of the President is, as of August 18, 1894, authorized and empowered, upon proper application of the State to contract and agree, from time to time, with each of the States in which there may be situated desert lands as defined by the Act approved March 3, 1877, and the Act amendatory thereof, approved March 3, 1891, binding the United States to donate, grant, and patent to the State free of cost for survey or price such desert lands, not exceeding one million acres in each State, as the State may cause to be irrigated, reclaimed, occupied, and not less than twenty acres of each one hundred and sixty acre tract cultivated by actual settlers, as thoroughly as is required of citizens who may enter under the desert-land law within ten years from the date of approval by the Secretary of the Interior of the State's application for the segregation of such lands; and if actual construction of reclamation works is not begun within three years after the segregation of the lands or within such further period not exceeding three years, as shall be allowed by the Secretary of the Interior, the said Secretary of the Interior, in his discretion, may restore such lands to the public domain; and if the State fails, within ten years from the date of such segregation, to cause the whole or any part of the lands so segregated to be so irrigated and reclaimed, the Secretary of the Interior may, in his discretion, continue said segregation for a period not exceeding five years, or may, in his discretion, restore such lands not irrigated and reclaimed to the public domain upon the expiration of the ten-year period or of any extension thereof.

Before the application of any State is allowed or any contract or agreement is executed or any segregation of any of the land from the public domain is ordered by the Secretary of the Interior, the State shall file a map of the said land proposed to be irrigated which shall exhibit a plan showing the mode of the contemplated irrigation and which plan shall be sufficient to thoroughly irrigate and reclaim said land and prepare it to raise ordinary agricultural crops and shall also show the source of the water to be used for irrigation and reclamation.

Any State contracting under this section is authorized to make all necessary contracts to cause the said lands to be reclaimed, and to induce their settlement and cultivation in accordance with and subject to the provisions of this section; but the State shall not be authorized to lease any of said lands or to use or dispose of the same in any way whatever, except to secure their reclamation, cultivation, and settlement.

As fast as any State may furnish satisfactory proof according to such rules and regulations as may be prescribed by the Secretary of the Interior, that any of said lands are irrigated, reclaimed, and occupied by actual settlers, patents shall be issued to the State or its assigns for said lands so reclaimed and settled: *Provided*, That said States shall not sell or dispose of more than one hundred and sixty acres of said lands to any one person, and any surplus of money derived by any State from the sale of said lands in excess of the cost of their reclamation, shall be held as a trust fund for and be applied to the reclamation of other desert lands in such State.

§751. Rules of survey

The public lands shall be divided by north and south lines run according to the true meridian, and by others crossing them at right angles, so as to form townships of six miles square, unless where the line of an Indian reservation, or of tracts of land surveyed or patented prior to May 18, 1796, or the course of navigable rivers, may render this impracticable; and in that case this rule must be departed from no further than such particular circumstances require.

Second. The corners of the townships must be marked with progressive numbers from the beginning; each distance of a mile between such corners must be also distinctly marked with marks different from those of the corners.

Third. The township shall be subdivided into sections, containing, as nearly as may be, six hundred and forty acres each, by running parallel lines through the same from east to west and from south to north at the distance of one mile from each other, and marking corners at the distance of

each half mile. The sections shall be numbered, respectively, beginning with the number one in the northeast section and proceeding west and east alternately through the township with progressive numbers, until the thirty-six be completed.

Fourth. The deputy surveyors, respectively, shall cause to be marked on a tree near each corner established in the manner described, and within the section, the number of such section, and over it the number of the township within which such section may be; and the deputy surveyors shall carefully note, in their respective field books, the names of the corner trees marked and the numbers so made.

Fifth. Where the exterior lines of the townships which may be subdivided into sections or half-sections exceed, or do not extend six miles, the excess or deficiency shall be specially noted, and added to or deducted from the western and northern ranges of sections or half-sections in such township, according as the error may be in running the lines from east to west, or from north to south; the sections and half-sections bounded on the northern and western lines of such townships shall be sold as containing only the quantity expressed in the returns and plats respectively, and all others as containing the complete legal quantity.

Sixth. All lines shall be plainly marked upon trees, and measured with chains, containing two perches of sixteen and one-half feet each, subdivided into twenty-five equal links; and the chain shall be adjusted to a standard to be kept for that purpose.

Seventh. Every surveyor shall note in his field book the true situations of all mines, salt licks, salt springs, and mill-seats which come to his knowledge; all watercourses over which the line he runs may pass; and also the quality of the lands.

Eighth. These field books shall be returned to the Secretary of the Interior or such officer as he may designate, who shall cause therefrom a description of the whole lands surveyed to be made out and transmitted to the officers who may superintend the sales. He shall also cause a fair plat to be made of the townships and fractional parts of townships contained in the lands, describing the subdivisions thereof, and the marks of the corners. This plat shall be recorded in books to be kept for that purpose; and a copy thereof shall be kept open at the office of the Secretary of the Interior or of such agency as he may designate for public information, and other copies shall be sent to the places of the sale, and to the Bureau of Land Management.

(a) Restrictions

The lands appropriated by section 851 of this title shall be selected from any unappropriated, surveyed or unsurveyed public lands within the State where such losses or deficiencies occur subject to the following restrictions:

(1) No lands mineral in character may be selected by a State except to the extent that the selection is being made as indemnity for mineral lands lost to the State because of appropriation before title could pass to the State;

(2) No lands on a known geologic structure of a producing oil or gas field may be selected except to the extent that the selection is being made as indemnity for lands on such a structure lost to the State because of appropriation before title could pass to the State; and

(3) Land subject to a mineral lease or permit may be selected if none of the land subject to that lease or permit is in a producing or producible status, subject, however, to the restrictions and conditions of the preceding and following paragraphs of this subsection.

(4) If a selection is consummated as to a portion but not all of the lands subject to any mineral lease or permit, then, as to such portion and for so long only as such lease or permit or any lease issued pursuant to such permit shall remain in effect, there shall be automatically reserved to the United States the mineral or minerals for which the lease or permit was issued, together with such further rights as may be necessary for the full and complete enjoyment of all rights, privileges and benefits under or with respect to the lease or permit: *Provided*, *however*, That after approval of the selection the Secretary of the Interior shall determine what portion of any rents and royalties accruing thereafter which may be paid under the lease or permit is properly applicable to that portion of the land subject to the lease or permit selected by the State, the portion applicable being determined by applying to the sum of the rents and royalties the same ratio as that existing between the acreage selected by the State and the total acreage subject to the lease or permit; of the portion applicable to the selected land 90 per centum shall be paid to the State by the United States annually and 10 per centum shall be deposited in the Treasury of the United States as miscellaneous receipts.

(5) If a selection is consummated as to all of the lands subject to any mineral lease or permit or if, where the selecting State has previously acquired title to a portion of the lands subject to a mineral lease or permit, a selection is consummated as to all of the remaining lands subject to that lease or permit, then and upon condition that the United States shall retain all rents and royalties theretofore paid and that the lessee or permittee shall have and may enjoy under and with respect to that lease or permit all the rights, privileges, and benefits which he would have had or might have enjoyed had the selection not been made and approved, the State shall succeed to all the rights of the United States under the lease or permit as to the mineral or minerals covered thereby, subject, however, to all obligations of the United States under and with respect to that lease or permit.

(b) Adjustments

Where the selections are to compensate for deficiencies of school lands in fractional townships, such selections shall be made in accordance with the following principles of adjustment, to wit: For each township, or fractional township, containing a greater quantity of land than three-quarters of an entire township, one section; for a fractional township, containing a greater quantity of land than one-half, and not more than three-quarters of a township, three-quarters of a section; for a fractional township, containing a greater quantity of land than one-quarter, and not more than one-half of a

township, one-half section; and for a fractional township containing a greater quantity of land than one entire section, and not more than one-quarter of a township, one-quarter section of land: *Provided*, That the States which are, or shall be entitled to both the sixteenth and thirty-sixth sections in place, shall have the right to select double the amounts named, to compensate for deficiencies of school land in fractional townships.

(c) Preference rights for State

Notwithstanding the provisions of section 282 [1] of this title on the revocation not later than 10 years after the date of approval of this Act, of any order of withdrawal, in whole or in part, the order or notice taking such action shall provide for a period of not less than six months before the date on which it otherwise becomes effective in which the State in which the lands are situated shall have a preferred right of application for selection under this section, subject to the requirements of existing law, except as against the prior existing valid settlement rights and preference rights conferred by existing law other than section 282 [1] of this title, or as against equitable claims subject to allowance and confirmation, and except where a revocation of an order of withdrawal is made in order to assist in a Federal land program.

(d) "Unappropriated public lands" defined; determination of mineral character of land

(1) The term "unappropriated public lands" as used in this section shall include, without otherwise affecting the meaning thereof, lands withdrawn for coal, phosphate, nitrate, potash, oil, gas, asphaltic minerals, oil shale, sodium, and sulphur, but otherwise subject to appropriation, location, selection, entry, or purchase under the nonmineral laws of the United States; lands withdrawn by Executive Order Numbered 5327, of April 15, 1930, if otherwise available for selection; and the retained or reserved interest of the United States in lands which have been disposed of with a reservation to the United States of all minerals or any specified mineral or minerals.

(2) The determination, for the purposes of this section of the mineral character of lands lost to a State shall be made as of the date of application for selection and upon the basis of the best evidence available at that time.

§865. Confirmation of certain lands selected by California

All selections of any portion of the public domain, to which, prior to July 23, 1866, no homestead, preemption, or other right had been acquired by any settler under the laws of the United States, and not being mineral land, nor reserved for naval, military, or Indian purposes nor held or claimed under any valid Mexican or Spanish grant, and not included within the limits of any city, town, or village or of the county of San Francisco, made prior to the 23d day of July 1866, and theretofore sold to bona fide purchasers by the State of California are confirmed to the State of California: *Provided, however*, That said State shall not receive any greater quantity of land for school or improvement purposes than she is entitled to by law.

§869. Disposal of lands for public or recreational purposes

(a) Application; conditions; classification; restoration if not applied for

The Secretary of the Interior upon application filed by a duly qualified applicant under section 869–1 of this title may, in the manner prescribed by sections 869 to 869–4 of this title, dispose of any public lands to a State, federally recognized Indian Tribe, Territory, county, municipality, or other State, Tribal, Territorial, or Federal instrumentality or political subdivision for any public purposes, or to a nonprofit corporation or nonprofit association for any recreational or any public purpose consistent with its articles of incorporation or other creating authority. Before the land may be disposed of under sections 869 to 869–4 of this title it must be shown to the satisfaction of the Secretary that the land is to be used for an established or definitely proposed project, that the land involved is not of national significance nor more than is reasonably necessary for the proposed use, and that for proposals of over 640 acres comprehensive land use plans and zoning regulations applicable to the area in which the public lands to be disposed of are located have been adopted by the appropriate State, Tribal, or local authority. The Secretary shall provide an opportunity for participation by affected citizens in disposals under sections 869 to 869–4 of this title, including public hearings or meetings where he deems it appropriate to provide public comments, and shall hold at least one public meeting on any proposed disposal of more than six hundred forty acres under sections 869 to 869–4 of this title. The Secretary may classify public lands in Alaska for disposition under sections 869 to 869–4 of this title. Lands so classified may not be appropriated under any other public land law unless the Secretary revises such classification or authorizes the disposition of an interest in the lands under other applicable law. If, within eighteen months following such classification, no application has been filed for the purpose for which the lands have been so classified, then the Secretary shall restore such lands to appropriation under the applicable public land laws.

(b) Acreage limitations

Conveyances made in any one calendar year shall be limited as follows:

(1) For recreational purposes:

(A) To any State or the State park agency or any other agency having jurisdiction over the State park system of such State designated by the Governor of that State as its sole representative for acceptance of lands under this provision, hereinafter referred to as the State, or to any political subdivision of such State, six thousand four hundred acres, and such additional acreage as may be needed for small roadside parks and rest sites of not more than ten acres each.

(B) To any nonprofit corporation or nonprofit association, six hundred and forty acres.

(C) No more than twenty-five thousand six hundred acres may be conveyed for recreational purposes under sections 869 to 869–4 of this title in any one State per calendar year. Should any State or political subdivision, however, fail to secure, in any one year, six thousand four hundred acres, not counting lands for small roadside parks and rest sites, conveyances may be made thereafter if pursuant to an application on file with the Secretary of the Interior on or before the last day of said year and to the extent that the conveyance would not have exceeded the limitations of said year.

(D) To any federally recognized Indian Tribe, 6,400 acres.

(2) For public purposes other than recreation:

(A) To any State or agency or instrumentality thereof, for any one program, six hundred and forty acres.

(B) To any political subdivision of a State, six hundred and forty acres.

(C) To any nonprofit corporation or nonprofit association, six hundred and forty acres.

(D) To any federally recognized Indian Tribe, 640 acres.

(c) Lands withdrawn in aid of functions of a department, agency, State, etc.; lands excepted from disposal

Where the lands have been withdrawn in aid of a function of a Federal department or agency other than the Department of the Interior, or of a State, Territory, county, municipality, water district, or other local governmental subdivision or agency, the Secretary of the Interior may make disposals under sections 869 to 869–4 of this title only with the consent of such Federal department or agency, or of such State, Territory, or local governmental unit. Nothing in sections 869 to 869–4 of this title shall be construed to apply to lands in any national forest, national park, or national monument, or national wildlife refuge, or to any Indian lands or lands set aside or held for the use or benefit of Indians, including lands over which jurisdiction has been transferred to the Department of the Interior by Executive order for the use of Indians, or, except insofar as sections 869 to 869–4 of this title apply to leases of land to States, federally recognized Indian Tribes, and counties and to State, Tribal, Territorial, and Federal instrumentalities and political subdivisions and to municipal corporations, to the revested Oregon and California Railroad grant lands and the reconveyed Coos Bay Wagon Road grant lands in the State of Oregon. Nor shall any disposition be made under sections 869 to 869–4 of this title for any use authorized under any other law.

SAVINGS PROVISION

Amendment by Pub. L. 94–579 not to be construed as terminating any valid lease, permit, patent, etc., existing on Oct. 21, 1976, see section 701 of Pub. L. 94–579, set out as a note under section 1701 of this title.

L. 89–457, §2, June 20, 1966, 80 Stat. 210, provided that: "Upon application by a lessee holding a lease under the Recreation and Public Purposes Act [sections 869 to 869–4 of this title] the Secretary of the Interior may enter into a new lease for a term not to exceed twenty-five years from the date of the new lease."

§869–2. Conditions of transfer by grantee; solid waste disposal

(a) Conditions of transfer by grantee

Title to lands conveyed by the Government under sections 869 to 869–4 of this title may not be transferred by the grantee or its successor except, with the consent of the Secretary of the Interior, to a transferee which would be a qualified grantee under section 869–1(a) or 869–1(c) of this title and subject to the acreage limitation contained in section 869(b) of this title. A grantee or its successor may not change the use specified in the conveyance to another or additional use except, with the consent of the Secretary, to a use for which such grantee or its successor could obtain a conveyance under sections 869 to 869–4 of this title. If at any time after the lands are conveyed by the Government, the grantee or its successor attempts to transfer title to or control over these lands to another or the lands are devoted to a use other than that for which the lands were conveyed, without the consent of the Secretary, title to the lands shall revert to the United States.

(b) New disposal sites

(1) Notwithstanding the provisions of subsection (a) of this section, if the Secretary receives an application for conveyance of land under sections 869 to 869–4 of this title for the express purpose of solid waste disposal or for another purpose which the Secretary finds may include the disposal, placement, or release of any hazardous substance, the Secretary may convey such land subject only to the provisions of this subsection.

(2) Prior to issuance of any conveyance of land under this subsection the Secretary shall investigate the land covered by an application for such conveyance to determine whether or not any hazardous substance is present on such land. Such investigation shall include a review of any available records as to the use of such land and all appropriate analysis of the soil, water and air associated with such land. No land shall be conveyed under this subsection if such investigation indicates that any hazardous substance is present on such land.

(3) No application for conveyance under this subsection shall be acted on by the Secretary until the applicant has furnished evidence, satisfactory to the Secretary, that a copy of the application and information concerning the proposed use of the land covered by the application has been provided to the Environmental Protection Agency and to all other State and Federal agencies with responsibility for enforcement of State and Federal laws applicable to lands used for the disposal, placement, or release of solid waste or any hazardous substance.

(4) No application for conveyance under this subsection shall be acted on by the Secretary until the applicant has given a warranty that use of the land covered by the application will be consistent with all applicable State and Federal laws, including laws dealing with the disposal, placement, or release of hazardous substances, and that the applicant will hold the United States harmless from any liability that may arise out of any violation of any such law.

(5) A conveyance under this subsection shall be made to the extent that the applicant has demonstrated to the Secretary that the land covered by an application meets all applicable State and local requirements and is appropriate in character and reasonable in acreage in order to meet an existing or reasonably anticipated need for solid waste disposal or for another proposed use that the Secretary finds may include the disposal, placement, or release of any hazardous substance.

(6) A conveyance under this subsection shall be subject to the following conditions:

(A) Except as otherwise provided in subparagraphs (B) and (D) of this paragraph, the document of conveyance shall provide that the lands conveyed under this subsection shall revert to the United States, unless substantially all of the lands have been used, on or before the date five years after the date of conveyance, for the purpose or purposes specified in the application, or for other use or uses authorized under subsection (a) with the consent of the Secretary.

(B) In the event that at any time after such conveyance any portion of such lands has not been used for the purpose or purposes specified in the application, and the party to whom such lands were conveyed by the Secretary shall transfer ownership of such unused portion to any other party, the party to whom such lands were conveyed by the Secretary shall be liable to pay the Secretary, on behalf of the United States, the fair market value of such transferred portion as of the date of such transfer, including the value of any improvements thereon. Subject to appropriations, all amounts received by the Secretary under this subparagraph shall be retained by the Secretary and used for the management of public lands and shall remain available until expended.

(C) Pricing for conveyances of land under this subsection shall be in accordance with the provisions of section 869–1 of this title, except that no compensation shall be required for the inclusion of only the limited reverter specified in this paragraph.

(D) Each patent issued under this subsection shall specify that no portion of the lands covered by such patent shall under any circumstances revert to the United States if such portion has been used for solid waste disposal or for any other purpose that the Secretary finds may result in the disposal, placement, or release of any hazardous substance.

(7) For purposes of this section the term "hazardous substance" has the same meaning as such term has when used in the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601 et seq.).

(c) Existing disposal sites

(1) Upon the application or with the concurrence of any party to whom the Secretary, prior to November 10, 1988, conveyed land under sections 869 to 869–4 of this title, the Secretary may renounce the reversionary interests of the United States in such land, or portion thereof, if the Secretary finds that such land, or portion thereof, has been used for solid waste disposal or for any other purpose which the Secretary finds may result in the disposal, placement, or release of any hazardous substance, and the Secretary may rescind any portion of any patent or other instrument of conveyance inconsistent with such renunciation. After such renunciation, affected lands shall not under any circumstances revert to the United States by the operation of law, and shall cease to be subject to the provisions of subsection (a) of this section.

1959—Pub. L. 86–292 struck out sentence which provided that this section should cease to be in effect as to any lands patented under sections 869 to 869–4 of this title twenty-five years after the issuance of patent for such lands.

§869a. Repealed. Pub. L. 86–66, §1, June 23, 1959, 73 Stat. 110

Section, act Apr. 13, 1928, ch. 370, §§1, 2, 45 Stat. 429, extended provisions of section 869 of this title to former Oregon and California Railroad grant lands revested in the United States and to former Coos Bay Wagon Road grant lands reconveyed to the United States.

§870. Grants of land in aid of common or public schools; extension to those mineral in character; effect of leases

Subject to the provisions of subsections (a), (b), and (c) of this section, the several grants to the States of numbered sections in place for the support or in aid of common or public schools be, and they are, extended to embrace numbered school sections mineral in character, unless land has been granted to and/or selected by and certified or approved, to any such State or States as indemnity or in lieu of any land so granted by numbered sections.

(a) The grant of numbered mineral sections under this section shall be of the same effect as prior grants for the numbered nonmineral sections, and titles to such numbered mineral sections shall vest in the States at the time and in the manner and be subject to all the rights of adverse parties recognized by existing law in the grants of numbered nonmineral sections.

(b) The additional grant made by this section is upon the express condition that all sales, grants, deeds, or patents for any of the lands so granted shall hereafter be subject to and contain a reservation to the State of all the coal and other minerals in the lands so sold, granted, deeded, or patented, together with the right to prospect for, mine, and remove the same. The coal and other mineral deposits in such lands not heretofore disposed of by the State shall be subject to lease by the State as the State legislature may direct, the proceeds and rentals and royalties therefrom to be utilized for the support or in aid of the common or public schools: *Provided*, That any lands or minerals hereafter disposed of contrary to the provisions of this section shall be forfeited to the United States by appropriate proceedings instituted by the Attorney General for that purpose in the United States district court for the district in which the property or some part thereof is located.

(c) Except as provided in subsection (d), any lands included within the limits of existing reservations of or by the United States, or specifically reserved for water-power purposes, or included in any pending suit or proceeding in the courts of the United States, or subject to or included in any valid application, claim, or right initiated or held under any of the existing laws of the United States, unless or until such reservation, application, claim, or right is extinguished, relinquished, or canceled, and all lands in the Territory of Alaska, are excluded from the provisions of this section.

(d)(1) Notwithstanding subsection (c), the fact that there is outstanding on any numbered school section, whether or not mineral in character, at the time of its survey a mineral lease or leases entered into by the United States, or an application therefor, shall not prevent the grant of such numbered school section to the State concerned as provided by this section and section 871 of this title.

(2) Any such numbered school section which has been surveyed prior to July 11, 1956, and which has not been granted to the State concerned solely by reason of the fact that there was outstanding on it at the time of the survey a mineral lease or leases entered into by the United States, or an application therefor, is hereby granted by the United States to such State under this section as if it had not been so leased; and the State shall succeed the position of the United States as lessor under such lease or leases.

(3) Any such numbered school section which is surveyed on or after July 11, 1956, and on which there is outstanding at the time of such survey a mineral lease or leases entered into by the United States, shall (unless excluded from the provisions of this section by subsection (c) for a reason other than the existence of an outstanding lease) be granted to the State concerned immediately upon completion of such survey; and the State shall succeed to the position of the United States as lessor under such lease or leases.

(4) The Secretary of the Interior shall, upon application by a State, issue patents to the State for the lands granted by this section and section 871 of this title, in accordance with section 871a [1] of this title. Such patent shall, if the lease is then outstanding, include a statement that the State succeeded to the position of the United States as lessor at the time the title vested in the State.

(5) Where at the time rents, royalties, and bonuses accrue the lands or deposits covered by a single lease are owned in part by the State and in part by the United States, the rents, royalties, and bonuses shall be allocated between them in proportion to the acreage in said lease owned by each.

(6) As used in this subsection, "lease" includes "permit" and "lessor" includes "grantor".

§888. Selection by railroads of lands in lieu of lands entered subsequent to accrual of rights; title of settlers

In the adjustment of all railroad land grants, whether made directly to any railroad company or to any State for railroad purposes, if any of the lands granted be found in the possession of an actual settler whose entry or filing has been allowed under the preemption or homestead laws of the United States subsequent to the time at which, by the decision of the land office, the right of said road was declared to have attached to such lands, the grantees, upon a proper relinquishment of the lands so entered or filed for, shall be entitled to select an equal quantity of other lands in lieu thereof from any of the public lands not mineral and within the limits of the grant not otherwise appropriated at the date of selection, to which they shall receive title the same as though originally granted. The Secretary of the Interior is authorized and directed as of March 3, 1887, to adjust, in accordance with the decisions of the Supreme Court, each of the railroad land grants made by Congress to aid in the construction of railroads and theretofore unadjusted.

(Mar. 3, 1887, ch. 376, §1, 24 Stat. 556.)

§895. Cancellation of patents erroneously issued; reconveyance

If it shall appear, upon the completion of such adjustments, respectively, or sooner, that lands

were, from any cause, prior to March 3, 1887, erroneously certified or patented, by the United States, to or for the use or benefit of any company claiming by, through, or under grant from the United States, to aid in the construction of a railroad, it shall be the duty of the Secretary of the Interior to thereupon demand from such company a relinquishment or reconveyance to the United States of all such lands, whether within granted or indemnity limits; and if such company shall neglect or fail to so reconvey such lands to the United States within ninety days after the aforesaid demand shall have been made, it shall thereupon be the duty of the Attorney General to commence and prosecute in the proper courts the necessary proceedings to cancel all patents, certification, or other evidence of title prior to March 3, 1887, issued for such lands, and to restore the title thereof to the United States.

(Mar. 3, 1887, ch. 376, §2, 24 Stat. 556.)

If, in the adjustment of said grants, it shall appear that the homestead or preemption entry of any bona fide settler has been erroneously canceled on account of any railroad grant or the withdrawal of public lands from market, such settler upon application shall be reinstated in all his rights and allowed to perfect his entry by complying with the public-land laws: *Provided*, That he has not located another claim or made an entry in lieu of the one so erroneously canceled: *And provided also* , That he did not voluntarily abandon said original entry: *And provided further*, That if any of said settlers do not renew their application to be reinstated within a reasonable time, to be fixed by the Secretary of the Interior, then all such unclaimed lands shall be disposed of under the public-land laws, with priority of right given to bona fide purchasers of said unclaimed lands, if any, and if there be no such purchasers, then to bona fide settlers residing thereon.

§897. Patents to purchasers from railroads; purchase money

As to all lands, except those mentioned in section 896 of this title, which have been so erroneously certified or patented as aforesaid, and which have been sold by the grantee company to citizens of the United States, or to persons who have declared their intention to become such citizens, the person or persons so purchasing in good faith, his heirs or assigns, shall be entitled to the land so purchased, upon making proof of the fact of such purchase at the proper land office, within such time and under such rules as may be prescribed by the Secretary of the Interior, after the grants respectively shall have been adjusted; and patents of the United States shall issue therefor, and shall relate back to the date of the original certification or patenting, and the Secretary of the Interior, on behalf of the United States, shall demand payment from the company which has so disposed of such lands of an amount equal to the Government price of similar lands; and in case of neglect or refusal of such company to make payment as hereafter specified, within ninety days after the demand shall have been made, the Attorney General shall cause suit or suits to be brought against such company for the said amount: *Provided*, That nothing in sections 894 to 899 of this title shall prevent any purchaser of lands erroneously withdrawn, certified, or patented as aforesaid from recovering the purchase money therefor from the grantee company, less the amount paid to the United States by such company as by said sections required: *And provided*, That a mortgage or pledge of said lands by the company shall not be considered as a sale for the purpose of said sections, nor shall said sections be construed as a declaration of forfeiture of any portion of any land grant for conditions broken, or as authorizing an entry for the same, or as a waiver of any rights that the United States may have on account of any breach of said conditions. *Provided further*, That where such purchasers, their heirs or assigns, have paid only a portion of the purchase price to the company, which is less than the Government price of similar lands, they shall be required, before the delivery of patent for their lands, to pay to the Government a sum equal to the difference between the portion of the purchase price so paid and the Government price, and in such case the amount demanded from the company shall be the amount paid to it by such purchaser.

(Mar. 3, 1887, ch. 376, §4, 24 Stat. 557; Feb. 12, 1896, ch. 18, 29 Stat. 6.)

§899. Limitation of quantity to be conveyed

No more lands shall be certified or conveyed to any State or to any corporation or individual, for the benefit of either of the companies herein mentioned, where it shall appear to the Secretary of the Interior that such transfers may create an excess over the quantity of lands to which such State, corporation, or individual would be rightfully entitled.

§901. Claims of bona fide purchasers; establishment of rights

If any person claiming to be a bona fide purchaser of any lands erroneously patented or certified shall present his claim to the Secretary of the Interior prior to the institution of a suit to cancel a patent or certification, and if it shall appear that he is a bona fide purchaser, the Secretary of the Interior shall request that suit be brought in such case against the patentee, or the corporation, company, person, or association of persons for whose benefit the certification was made, for the value of said land, which in no case shall be more than the minimum Government price thereof, and

the title of such claimant shall stand confirmed. An adverse decision by the Secretary of the Interior on the bona fides of such claimant shall not be conclusive of his rights, and if such claimant, or one claiming to be a bona fide purchaser, but who has not submitted his claim to the Secretary of the Interior, is made a party to such suit, and if found by the court to be a bona fide purchaser, the court shall decree a confirmation of the title, and shall render a decree in behalf of the United States against the patentee, corporation, company, person, or association of persons for whose benefit the certification was made for the value of the land as hereinbefore provided. Any bona fide purchaser of lands patented or certified to a railroad company, and who is not made a party to such suit, and who has not submitted his claim to the Secretary of the Interior, may establish his right as such bona fide purchaser in any United States court having jurisdiction of the subject matter, or at his option, as prescribed in sections 896 and 897 of this title.

(Mar. 2, 1896, ch. 39, §2, 29 Stat. 43.)

§902. Cancellation; investigation before suit

If at any time prior to the institution of suit by the Attorney General to cancel any patent or certification of lands erroneously patented or certified a claim or statement is presented to the Secretary of the Interior by or on behalf of any person or persons, corporation or corporations, claiming that such person or persons, corporation or corporations, is a bona fide purchaser or are bona fide purchasers of any patented or certified land by deed or contract or otherwise, from or through the original patentee or corporation to which patent or certification was issued, no suit or action shall be brought to cancel or annul the patent or certification for said land until such claim is investigated in said Department of the Interior; and if it shall appear that such person or corporation is a bona fide purchaser as aforesaid, or that such persons or corporations are such bona fide purchasers, then no such suit shall be instituted and the title of such claimant or claimants shall stand confirmed; but the Secretary of the Interior shall request that suit be brought in such case against the patentee, or the corporation, company, person, or association of persons for whose benefit the patent was issued or certification was made for the value of the land as hereinbefore specified.

§942–2. Rights of several roads through canyons

Any railroad company whose right of way, or whose track or roadbed upon such right of way, passes through any canyon, pass, or defile shall not prevent any other railroad company from the use and occupancy of said canyon, pass, or defile for the purposes of its road, in common with the road first located, or the crossing of other railroads at grade; and the location of such right of way through any canyon, pass, or defile shall not cause the disuse of any tramway, wagon road, or other public highway now located therein, nor prevent the location through the same of any such tramway, wagon road, or highway where such tramway, wagon road, or highway may be necessary for the public accommodation; and where any change in the location of such tramway, wagon road, or highway is necessary to permit the passage of such railroad through any canyon, pass, or defile, said railroad company shall, before entering upon the ground occupied by such tramway, wagon road, or highway, cause the same to be reconstructed at its own expense in the most favorable location, and in as perfect a manner as the original road or tramway: *Provided*, That such expenses shall be equitably divided between any number of railroad companies occupying and using the same canyon, pass, or defile, and that where the space is limited the United States district court shall require the road first constructed to allow any other railroad or tramway to pass over its track or tracks through such canyon, pass, or defile on such equitable basis as the said court may prescribe; and all shippers shall be entitled to equal accommodations as to the movement of their freight and without discrimination in favor of any person or corporation: *Provided*, That nothing herein shall be construed as depriving Congress of the right to regulate the charges for freight, passengers and wharfage.

§942–3. Condemnation of land

Where any company, the right of way to which is granted by sections 687a, 687a–2 to 687a–5,[1] and 942–1 to 942–9 of this title and sections 607a and 615a of title 16, shall in the course of construction find it necessary to pass over private lands or possessory claims on lands of the United States, condemnation of a right of way across the same may be made in the following manner: In case the owner or claimant of such lands or premises and such company can not agree as to the damages, the amount shall be determined by the appraisal of three disinterested commissioners, who may be appointed upon application by any party to any judge of a court of record in Alaska; and said commissioners, in their assessments of damages, shall appraise such premises at what would have been the value thereof if the road had not been built; and upon return into court of such appraisement, and upon the payment to the clerk thereof of the amount so awarded by the commissioners for the use and benefit of the owner thereof, said premises shall be deemed to be taken by said company, which shall thereby acquire full title to the same for the purposes aforesaid. And either party feeling aggrieved by said assessment may, within thirty days, file an appeal therefrom, and demand a jury of twelve men to estimate the damage sustained; but such appeal shall not interfere with the rights of said company to enter upon the premises taken, or to do any act necessary in the construction of its road. And said party appealing shall give bonds with sufficient surety or sureties for the payment of any costs that may arise upon such appeal. And in case the party appealing does not obtain a more favorable verdict, such party shall pay the whole cost incurred by the appellee, as well as its own. And the payment into court for the use of the owner of claimant, of a sum equal to that finally awarded shall be held to vest in said company the title of said land, and the right to use and occupy the same for the construction, maintaining and operating of the road of said company. And in case any of the lands to be taken as aforesaid shall be held by any person residing without the Territory, or subject to any legal disability, the court may appoint a proper person who shall give bonds with sufficient surety or sureties, for the faithful execution of his trust, and who may represent in court the person disqualified or absent as aforesaid, when the same proceeding shall be had in reference to the appraisement of the premises to be taken, and with the same effect as has been already described. And the title of the company to the land taken by virtue of this section shall not be affected nor impaired by reason of any failure by any guardian to discharge faithfully his trust. And in case it shall be necessary for the said company to enter upon lands which are unoccupied, and of which there is no apparent owner or claimant, it may proceed to take and use the same for the purpose of its said railroad, and may institute proceedings in the manner described for the purpose of ascertaining the value of, and acquiring a title to, the same; and the court may determine the kind of notice to be served on such owner or owners, and may in its discretion appoint an agent or guardian to represent such owner or owners in case of his or their incapacity or nonappearance. But in case no claimant shall appear within six years from the time of the opening of said road across any land, all claims to damages against said company shall be barred. It shall be competent for the legal guardian of any infant, or any other person under guardianship, to agree with the said company as to damages sustained by reason of the taking of any lands of any such person under disability, as aforesaid, for the use as aforesaid; and upon such agreement being made, and approved by the court having

supervision of the official acts of said guardian, and said guardian shall have full power to make and execute a conveyance thereof to the said company which shall vest the title thereto in the said company.

§942–6. Rights of way for Alaskan wagon roads, wire rope, aerial, or other tramways; reservations; filing preliminary survey and map of location; alteration, amendment, repeal, or grant of equal rights; forfeiture of rights; reversion of grant; liens

The Secretary of the Interior is authorized to issue a permit, by instrument in writing, in conformity with and subject to the restrictions herein contained, unto any responsible person, company, or corporation, for a right of way over the public domain in Alaska, not to exceed one hundred feet in width, and ground for station and other necessary purposes not to exceed five acres for each station for each five miles of road, to construct wagon roads and wire rope, aerial, or other tramways, and the privilege of taking all necessary material from the public domain in said district for the construction of such wagon roads or tramways, together with the right, subject to supervision and at rates to be approved by said Secretary, to levy and collect toll or freight and passenger charges on passengers, animals, freight, or vehicles passing over the same for a period not exceeding twenty years, and said Secretary is also authorized to sell to the owner or owners of any such wagon road or tramway, upon the completion thereof, not to exceed twenty acres of public land at each terminus at $1.25 per acre, such lands when located at or near tide water not to extend more than forty rods in width along the shore line and the title thereto to be upon such expressed conditions as in his judgment may be necessary to protect the public interest, and all minerals, including coal, in such right of way or station grounds shall be reserved to the United States: *Provided*, That such lands may be located concurrently with the line of such road or tramway, and the plat of preliminary survey and the map of definite location shall be filed as in the case of railroads and subject to the same conditions and limitations: *Provided further*, That such rights of way and privileges shall only be enjoyed by or granted to citizens of the United States or companies or corporations organized under the laws of a State or Territory; and such rights and privileges shall be held subject to the right of Congress to alter, amend, repeal, or grant equal rights to others on contiguous or parallel routes. And no right to construct a wagon road on which toll may be collected shall be granted unless it shall first be made to appear to the satisfaction of the Secretary of the Interior that the public convenience requires the construction of such proposed road, and that the expense of making the same available and convenient for public travel will not be less on an average than $500 per mile: *Provided*, That if the proposed line of road in any case shall be located over any road or trail in common use for public travel, the Secretary of the Interior shall decline to grant such right of way, if, in his opinion, the interests of the public would be injuriously affected thereby. Nor shall any right to collect toll upon any wagon road in Alaska be granted or inure to any person, corporation, or company until it shall be made to appear to the satisfaction of said Secretary that at least an average of $500 per mile has been actually expended in constructing such road: and all persons are prohibited from collecting or attempting to collect toll over any wagon road in Alaska, unless such person or the company or person for whom he acts shall at the time and place the collection is made or attempted to be made possess written authority, signed by the Secretary of the Interior, authorizing the collection and

specifying the rates of toll: *Provided*, That accurate printed copies of said written authority from the Secretary of the Interior, including toll, freight, and passenger charges thereby approved, shall be kept constantly and conspicuously posted at each station where toll is demanded or collected. And any person, corporation, or company collecting or attempting to collect toll without such written authority from the Secretary of the Interior, or failing to keep the same posted as herein required, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be fined for each offense not less than $50 nor more than $500, and in default of payment of such fine and costs of prosecution shall be imprisoned in jail not exceeding ninety days, or until such fine and costs of prosecution shall have been paid.

Any person, corporation, or company qualified to construct a wagon road or tramway under the provisions of this section that may prior to May 14, 1898, have constructed not less than one mile of road, at a cost of not less than $500 per mile, or one-half mile of tramway at a cost of not less than $500, shall have the prior right to apply for such right of way and for lands at stations and terminals and to obtain the same pursuant to the provisions of this section over and along the line hitherto constructed or actually being improved by the applicant, including wharves connected therewith. If any party to whom license has been granted to construct such wagon road or tramway shall, for the period of one year, fail, neglect, or refuse to complete the same, the rights herein granted shall be forfeited as to any such uncompleted section of said wagon road or tramway, and thereupon shall revert to the United States without further action or declaration, the notation of such uncompleted section upon the records of the land office shall be cancelled, and the reservations of such lands for the purposes of said right of way shall cease and become null and void, without further action. And if such road or tramway shall not be kept in good condition for use, the Secretary of the Interior may prohibit the collection of toll thereon pending the making of necessary repairs.

lands which he applies to purchase are not in the legal possession of an adverse claimant or in the actual possession of a person or persons who have improved the property and who have attempted to enter same in compliance with the laws and regulations of the United States land office.

Upon the filing of an application to purchase any lands subject to the operation of this section, together with the required proof, the Secretary of the Interior shall cause the lands described in said application to be appraised, said appraisal to be on the basis of the value of such lands at the date of appraisal, exclusive of any increased value resulting from the development or improvement thereof for agricultural purposes by the applicant or his predecessor in interest, but inclusive of the stumpage value of any timber cut or removed by the applicant or his predecessor in interest.

An applicant who applies to purchase lands under the provisions of this section, in order to be entitled to receive a patent, must within six months from receipt of notice of appraisal by the Secretary of the Interior pay to the officer, as the Secretary of the Interior may designate, of the United States land office of the district in which the lands are situated, the appraised price of the lands, and thereupon a patent shall issue to said applicant for such lands as the Secretary of the Interior shall determine that such applicant is entitled to purchase under this section. The proceeds derived by the Government from the sale of the lands hereunder shall be covered into the United States Treasury and applied as provided by law for the disposal of the proceeds from the sale of public lands.

The Secretary of the Interior is authorized to prescribe all necessary rules and regulations for administering the provisions of this section and determining conflicting claims arising hereunder.

§994. Sale of lands in Wisconsin

The Secretary of the Interior, in his judgment and discretion, is authorized to sell, in the manner hereinafter provided in this section, any of those lands situated in the State of Wisconsin which were originally erroneously meandered and shown upon the official plats as water-covered areas, and which are not lawfully appropriated by a qualified settler or entryman claiming under the public land laws.

Any owner in good faith of land shown by the official public land surveys to be bounded in whole or in part by such erroneously meandered area, and who acquired title to such land prior to February 27, 1925, or any citizen of the United States who in good faith under color of title or claiming as a riparian owner had, prior to said date, placed valuable improvements upon or reduced to cultivation any of the lands subject to the operation of this section, shall have a preferred right to file in the office of the officer, as the Secretary of the Interior may designate, of the United States land office of the district in which the lands are situated, an application to purchase the lands thus improved by them at any time within ninety days from said date if the lands have been surveyed and plats filed in the United States land office; otherwise within ninety days from the filing of such plats. Every such

application must be accompanied with satisfactory proof that the applicant is entitled to such preference right and that the lands which he applies to purchase are not in the legal possession of an adverse claimant under the public land laws.

In event such erroneously meandered land is bounded by two or more tracts of land held in private ownership with apparent riparian rights indicated by the official township plat of survey at date of disposal of title by the United States, the Secretary of the Interior or such officer as he may designate shall have discretionary power to cause such meandered area, when surveyed, to be divided into such tracts or lots as will permit a fair division of such meandered area among the owners of such surrounding or adjacent tracts under the provisions of this section. In administering the provisions of this section, where there shall exist a conflict of claims falling within its operation, if any claimant shall have placed valuable improvements upon the land involved, or shall have reduced the same to cultivation, then to the extent of such improvements or cultivation, such claimant shall be given preference in adjustment of such conflict: *Provided*, That no preference right of entry under this section shall be recognized for a greater area than one hundred and sixty acres, in one body, to any one applicant, whether an individual, an association, or a corporation: *Provided further*, That this section shall not be construed as in any manner abridging the existing rights of any settler or entryman under the public land laws.

Upon the filing of an application to purchase any lands subject to the operation of this section, together with the required proof, the Secretary of the Interior shall cause the lands described in said application to be appraised, said appraisal to be on the basis of the value of such lands at the date of appraisal, exclusive of any increased value resulting from the development or improvement thereof for agricultural purposes by the applicant or his predecessor in interest, but inclusive of the stumpage value of any timber cut or removed by the applicant or his predecessor in interest.

An applicant who applies to purchase lands under the provisions of this section, in order to be entitled to receive a patent, must within thirty days from receipt of notice of appraisal by the Secretary of the Interior pay to the officer, as the Secretary of the Interior may designate, of the United States land office of the district in which the lands are situated the appraisal price of the lands, and thereupon a patent shall issue to said applicant for such lands as the Secretary of the Interior shall determine that such applicant is entitled to purchase under this section. The proceeds derived by the Government from the sale of lands under this section shall be covered into the United States Treasury and applied as provided by law for the disposal of the proceeds from the sale of public lands.

The Secretary of the Interior is authorized to prescribe all necessary rules and regulations for administering the provisions of this section and determining conflicting claims arising thereunder.

SUBCHAPTER I—GENERAL PROVISIONS

§1301. Definitions

When used in this subchapter and subchapter II—

(a) The term "lands beneath navigable waters" means—

(1) all lands within the boundaries of each of the respective States which are covered by nontidal waters that were navigable under the laws of the United States at the time such State became a member of the Union, or acquired sovereignty over such lands and waters thereafter, up to the ordinary high water mark as heretofore or hereafter modified by accretion, erosion, and reliction;

(2) all lands permanently or periodically covered by tidal waters up to but not above the line of mean high tide and seaward to a line three geographical miles distant from the coast line of each such State and to the boundary line of each such State where in any case such boundary as it existed at the time such State became a member of the Union, or as heretofore approved by Congress, extends seaward (or into the Gulf of Mexico) beyond three geographical miles,[1] and

(3) all filled in, made, or reclaimed lands which formerly were lands beneath navigable waters, as hereinabove defined;

(b) The term "boundaries" includes the seaward boundaries of a State or its boundaries in the Gulf of Mexico or any of the Great Lakes as they existed at the time such State became a member of the

Union, or as heretofore approved by the Congress, or as extended or confirmed pursuant to section 1312 of this title but in no event shall the term "boundaries" or the term "lands beneath navigable waters" be interpreted as extending from the coast line more than three geographical miles into the Atlantic Ocean or the Pacific Ocean, or more than three marine leagues into the Gulf of Mexico, except that any boundary between a State and the United States under this subchapter or subchapter II which has been or is hereafter fixed by coordinates under a final decree of the United States Supreme Court shall remain immobilized at the coordinates provided under such decree and shall not be ambulatory;

(c) The term "coast line" means the line of ordinary low water along that portion of the coast which is in direct contact with the open sea and the line marking the seaward limit of inland waters;

(d) The terms "grantees" and "lessees" include (without limiting the generality thereof) all political subdivisions, municipalities, public and private corporations, and other persons holding grants or leases from a State, or from its predecessor sovereign if legally validated, to lands beneath navigable waters if such grants or leases were issued in accordance with the constitution, statutes, and decisions of the courts of the State in which such lands are situated, or of its predecessor sovereign: *Provided, however*, That nothing herein shall be construed as conferring upon said grantees or lessees any greater rights or interests other than are described herein and in their respective grants from the State, or its predecessor sovereign;

(e) The term "natural resources" includes, without limiting the generality thereof, oil, gas, and all other minerals, and fish, shrimp, oysters, clams, crabs, lobsters, sponges, kelp, and other marine animal and plant life but does not include water power, or the use of water for the production of power;

(f) The term "lands beneath navigable waters" does not include the beds of streams in lands now or heretofore constituting a part of the public lands of the United States if such streams were not meandered in connection with the public survey of such lands under the laws of the United States and if the title to the beds of such streams was lawfully patented or conveyed by the United States or any State to any person;

(g) The term "State" means any State of the Union;

(h) The term "person" includes, in addition to a natural person, an association, a State, a political subdivision of a State, or a private, public, or municipal corporation.

STATUTORY NOTES AND RELATED SUBSIDIARIES

SEPARABILITY

Provisions of this section as separable, see section 11 of act May 22, 1953, set out as a note under section 1301 of this title.

§1312. Seaward boundaries of States

The seaward boundary of each original coastal State is approved and confirmed as a line three

geographical miles distant from its coast line or, in the case of the Great Lakes, to the international boundary. Any State admitted subsequent to the formation of the Union which has not already done so may extend its seaward boundaries to a line three geographical miles distant from its coast line, or to the international boundaries of the United States in the Great Lakes or any other body of water traversed by such boundaries. Any claim heretofore or hereafter asserted either by constitutional provision, statute, or otherwise, indicating the intent of a State so to extend its boundaries is approved and confirmed, without prejudice to its claim, if any it has, that its boundaries extend beyond that line. Nothing in this section is to be construed as questioning or in any manner prejudicing the existence of any State's seaward boundary beyond three geographical miles if it was so provided by its constitution or laws prior to or at the time such State became a member of the Union, or if it has been heretofore approved by Congress.

(May 22, 1953, ch. 65, title II, §4, 67 Stat. 31.)

(a) The United States retains all its navigational servitude and rights in and powers of regulation and control of said lands and navigable waters for the constitutional purposes of commerce, navigation, national defense, and international affairs, all of which shall be paramount to, but shall not be deemed to include, proprietary rights of ownership, or the rights of management, administration, leasing, use, and development of the lands and natural resources which are specifically recognized, confirmed, established, and vested in and assigned to the respective States and others by section 1311 of this title.

(b) In time of war or when necessary for national defense, and the Congress or the President shall so prescribe, the United States shall have the right of first refusal to purchase at the prevailing market price, all or any portion of the said natural resources, or to acquire and use any portion of said lands by proceeding in accordance with due process of law and paying just compensation therefor.

EXECUTIVE DOCUMENTS

PROC. NO. 5928. TERRITORIAL SEA OF UNITED STATES

Proc. No. 5928, Dec. 27, 1988, 54 F.R. 777, provided:

International law recognizes that coastal nations may exercise sovereignty and jurisdiction over their territorial seas.

The territorial sea of the United States is a maritime zone extending beyond the land territory and internal waters of the United States over which the United States exercises sovereignty and jurisdiction, a sovereignty and jurisdiction that extend to the airspace over the territorial sea, as well as to its bed and subsoil.

Extension of the territorial sea by the United States to the limits permitted by international law will advance the national security and other significant interests of the United States.

NOW, THEREFORE, I, RONALD REAGAN, by the authority vested in me as President by the Constitution of the United States of America, and in accordance with international law, do hereby proclaim the extension of the territorial sea of the United States of America, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, and any other territory or possession over which the United States exercises sovereignty.

The territorial sea of the United States henceforth extends to 12 nautical miles from the baselines of the United States determined in accordance with international law.

In accordance with international law, as reflected in the applicable provisions of the 1982 United Nations Convention on the Law of the Sea, within the territorial sea of the United States, the ships of all countries enjoy the right of innocent passage and the ships and aircraft of all countries enjoy the right of transit passage through international straits.

Nothing in this Proclamation:

(a) extends or otherwise alters existing Federal or State law or any jurisdiction, rights, legal interests, or obligations derived therefrom; or

(b) impairs the determination, in accordance with international law, of any maritime boundary of the United States with a foreign jurisdiction.

IN WITNESS WHEREOF, I have hereunto set my hand this 27th day of December, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and thirteenth.

RONALD REAGAN.

PROC. NO. 7219. CONTIGUOUS ZONE OF THE UNITED STATES

Proc. No. 7219, Sept. 2, 1999, 64 F.R. 48701, 49844, provided:

International law recognizes that coastal nations may establish zones contiguous to their territorial seas, known as contiguous zones.

The contiguous zone of the United States is a zone contiguous to the territorial sea of the United States, in which the United States may exercise the control necessary to prevent infringement of its customs, fiscal, immigration, or sanitary laws and regulations within its territory or territorial sea, and to punish infringement of the above laws and regulations committed within its territory or territorial sea.

Extension of the contiguous zone of the United States to the limits permitted by international law will advance the law enforcement and public health interests of the United States. Moreover, this extension is an important step in preventing the removal of cultural heritage found within 24 nautical miles of the baseline.

NOW, THEREFORE, I, WILLIAM J. CLINTON, by the authority vested in me as President by the Constitution of the United States, and in accordance with international law, do hereby proclaim the extension of the contiguous zone of the United States of America, including the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Mariana Islands, and any other territory or possession over which the United States exercises sovereignty, as follows:

The contiguous zone of the United States extends to 24 nautical miles from the baselines of the United

States determined in accordance with international law, but in no case within the territorial sea of another nation.

In accordance with international law, reflected in the applicable provisions of the 1982 Convention on the Law of the Sea, within the contiguous zone of the United States the ships and aircraft of all countries enjoy the high seas freedoms of navigation and overflight and the laying of submarine cables and pipelines, and other internationally lawful uses of the sea related to those freedoms, such as those associated with the operation of ships, aircraft, and submarine cables and pipelines, and compatible with the other provisions of international law reflected in the 1982 Convention on the Law of the Sea.

Nothing in this proclamation:

(a) amends existing Federal or State law;

(b) amends or otherwise alters the rights and duties of the United States or other nations in the Exclusive Economic Zone of the United States established by Proclamation 5030 of March 10, 1983 [16 U.S.C. 1453 note]; or

(c) impairs the determination, in accordance with international law, of any maritime boundary of the United States with a foreign jurisdiction.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of September, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

WILLIAM J. CLINTON.

EXECUTIVE ORDER NO. 13795

Ex. Ord. No. 13795, Apr. 28, 2017, 82 F.R. 20815, which related to an America-first offshore energy strategy and encouraged energy exploration and production, including on the Outer Continental Shelf, was revoked by Ex. Ord. No. 13990, §7(a), Jan. 20, 2021, 86 F.R. 7041, set out in a note under section 4321 of Title 42, The Public Health and Welfare.

TEMPORARY WITHDRAWAL OF ALL AREAS ON THE OUTER CONTINENTAL SHELF FROM OFFSHORE WIND LEASING AND REVIEW OF THE FEDERAL GOVERNMENT'S LEASING AND PERMITTING PRACTICES FOR WIND PROJECTS

Memorandum of President of the United States, Jan. 20, 2025, 90 F.R. 8363, provided:

Memorandum for the Secretary of the Treasury[,] the Attorney General[,] the Secretary of the Interior[,] the Secretary of Agriculture[,] the Secretary of Energy[, and] the Administrator of the Environmental Protection Agency

SECTION 1. *Temporary Withdrawal of Areas*. Consistent with the principles of responsible public stewardship that are entrusted to this office, with due consideration for a variety of relevant factors, including the need to foster an energy economy capable of meeting the country's growing demand for reliable energy, the importance of marine life, impacts on ocean currents and wind patterns, effects on energy costs for Americans–especially those who can least afford it–and to ensure that the United States is able to maintain a robust fishing industry for future generations and provide low cost energy to its citizens, I hereby direct as follows:

Under the authority granted to me in section 12(a) of the Outer Continental Shelf Lands Act, 43 U.S.C. 1341(a), I hereby withdraw from disposition for wind energy leasing all areas within the Offshore Continental Shelf (OCS) as defined in section 2 of the Outer Continental Shelf Lands Act, 43 U.S.C. 1331. This withdrawal shall go into effect beginning on January 21, 2025, and shall remain in effect until this Presidential Memorandum is revoked.

To the extent that an area is already withdrawn from disposition for wind energy leasing, the area's withdrawal is extended for a time period beginning on January 21, 2025, until this Presidential Memorandum is revoked.

This withdrawal temporarily prevents consideration of any area in the OCS for any new or renewed wind energy leasing for the purposes of generation of electricity or any other such use derived from the use of wind. This withdrawal does not apply to leasing related to any other purposes such as, but not limited to, oil, gas, minerals, and environmental conservation.

Nothing in this withdrawal affects rights under existing leases in the withdrawn areas. With respect to such existing leases, the Secretary of the Interior, in consultation with the Attorney General as needed, shall conduct a comprehensive review of the ecological, economic, and environmental necessity of terminating or amending any existing wind energy leases, identifying any legal bases for such removal, and submit a report with recommendations to the President, through the Assistant to the President for Economic Policy.

SEC. 2. *Temporary Cessation and Immediate Review of Federal Wind Leasing and Permitting Practices*.

(a) In light of various alleged legal deficiencies underlying the Federal Government's leasing and permitting of onshore and offshore wind projects, the consequences of which may lead to grave harm–including negative impacts on navigational safety interests, transportation interests, national security interests, commercial interests, and marine mammals–and in light of potential inadequacies in various environmental reviews required by the National Environmental Policy Act [of 1969, 42 U.S.C. 4321 et seq.] to lease or permit wind projects, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Energy, the Administrator of the Environmental Protection Agency, and the heads of all other relevant agencies, shall not issue new or renewed approvals, rights of way, permits, leases, or loans for onshore or offshore wind projects pending the completion of a comprehensive assessment and review of Federal wind leasing and permitting practices. The Secretary of the Interior shall lead that assessment and review in consultation with the Secretary of the Treasury, the Secretary of Agriculture, the Secretary of Commerce, through the National Oceanic and Atmospheric Administration, the Secretary of Energy, and the Administrator of the Environmental Protection Agency. The assessment shall consider the environmental impact of onshore and offshore wind projects upon wildlife, including, but not limited to, birds and marine mammals. The assessment shall also consider the economic costs associated with the intermittent generation of electricity and the effect of subsidies on the viability of the wind industry.

(b) In light of criticism that the Record of Decision (ROD) issued by the Bureau of Land Management on December 5, 2024, with respect to the Lava Ridge Wind Project Final Environmental Impact Statement (EIS), as approved by the Department of the Interior, is allegedly contrary to the public interest and suffers from legal deficiencies, the Secretary of the Interior shall, as appropriate, place a temporary moratorium on all activities and rights of Magic Valley Energy, LLC, or any other party under the ROD, including, but not limited to, any rights-of-way or rights of development or operation of any projects contemplated in the ROD. The Secretary of the Interior shall review the ROD and, as appropriate, conduct a new, comprehensive analysis of the various interests implicated by the Lava Ridge Wind Project and the potential environmental impacts.

(c) The Secretary of the Interior, the Secretary of Energy, and the Administrator of the Environmental Protection Agency shall assess the environmental impact and cost to surrounding communities of defunct and idle windmills and deliver a report to the President, through the Assistant to the President for Economic Policy, with their findings and recommended authorities to require the removal of such windmills.

(d) The Attorney General may, as appropriate and consistent with applicable law, provide notice of this order to any court with jurisdiction over pending litigation related to any aspect of the Federal leasing or permitting of onshore or offshore wind projects or the Lava Ridge Wind Project, and may, in the Attorney General's discretion, request that the court stay the litigation or otherwise delay further litigation, or seek other appropriate relief consistent with this order, pending the completion of the actions described in subsection (a) or subsection (b) of this section, as applicable.

This memorandum shall be implemented consistent with applicable law and subject to the availability of appropriations.

This memorandum is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person. You are authorized and directed to publish this memorandum in the Federal Register.

DONALD J. TRUMP.

§1332. Congressional declaration of policy

It is hereby declared to be the policy of the United States that—

(1) the subsoil and seabed of the outer Continental Shelf appertain to the United States and are subject to its jurisdiction, control, and power of disposition as provided in this subchapter;

(2) this subchapter shall be construed in such a manner that the character of the waters above the outer Continental Shelf as high seas and the right to navigation and fishing therein shall not be affected;

(3) the outer Continental Shelf is a vital national resource reserve held by the Federal Government for the public, which should be made available for expeditious and orderly development, subject to environmental safeguards, in a manner which is consistent with the maintenance of competition and other national needs;

(4) since exploration, development, and production of the minerals of the outer Continental Shelf will have significant impacts on coastal and non-coastal areas of the coastal States, and on other affected States, and, in recognition of the national interest in the effective management of the marine, coastal, and human environments—

(A) such States and their affected local governments may require assistance in protecting their coastal zones and other affected areas from any temporary or permanent adverse effects of such impacts;

(B) the distribution of a portion of the receipts from the leasing of mineral resources of the outer Continental Shelf adjacent to State lands, as provided under section 1337(g) of this title, will provide affected coastal States and localities with funds which may be used for the mitigation of adverse economic and environmental effects related to the development of such resources; and

(C) such States, and through such States, affected local governments, are entitled to an opportunity to participate, to the extent consistent with the national interest, in the policy and planning decisions made by the Federal Government relating to exploration for, and development and production of, minerals of the outer Continental Shelf.[1]

(5) the rights and responsibilities of all States and, where appropriate, local governments, to preserve and protect their marine, human, and coastal environments through such means as regulation of land, air, and water uses, of safety, and of related development and activity should be considered and recognized; and

(6) operations in the outer Continental Shelf should be conducted in a safe manner by well-trained personnel using technology, precautions, and techniques sufficient to prevent or minimize the likelihood of blowouts, loss of well control, fires, spillages, physical obstruction to other users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property, or endanger life or health.

§1333. Laws and regulations governing lands

(a) Constitution and United States laws; laws of adjacent States; publication of projected State lines; international boundary disputes; restriction on State taxation and jurisdiction

(1) JURISDICTION OF THE UNITED STATES ON THE OUTER CONTINENTAL SHELF.—

(A) IN GENERAL.—The Constitution and laws and civil and political jurisdiction of the United States are extended, to the same extent as if the outer Continental Shelf were an area of exclusive Federal jurisdiction located within a State, to—

(i) the subsoil and seabed of the outer Continental Shelf;

(ii) all artificial islands on the outer Continental Shelf;

(iii) installations and other devices permanently or temporarily attached to the seabed, which may be erected thereon for the purpose of exploring for, developing, or producing resources, including non-mineral energy resources; or

(iv) any such installation or other device (other than a ship or vessel) for the purpose of transporting or transmitting such resources.

(B) LEASES ISSUED EXCLUSIVELY UNDER THIS ACT.—Mineral or energy leases on the outer Continental Shelf shall be maintained or issued only under the provisions of this subchapter.

(2)(A) To the extent that they are applicable and not inconsistent with this subchapter or with other Federal laws and regulations of the Secretary now in effect or hereafter adopted, the civil and criminal laws of each adjacent State, now in effect or hereafter adopted, amended, or repealed are declared to be the law of the United States for that portion of the subsoil and seabed of the outer Continental Shelf, and artificial islands and fixed structures erected thereon, which would be within the area of the State if its boundaries were extended seaward to the outer margin of the outer Continental Shelf, and the President shall determine and publish in the Federal Register such projected lines extending seaward and defining each such area. All of such applicable laws shall be administered and enforced by the appropriate officers and courts of the United States. State taxation laws shall not apply to the outer Continental Shelf.

(B) Within one year after September 18, 1978, the President shall establish procedures for setting [1] any outstanding international boundary dispute respecting the outer Continental Shelf.

(3) The provisions of this section for adoption of State law as the law of the United States shall never be interpreted as a basis for claiming any interest in or jurisdiction on behalf of any State for any purpose over the seabed and subsoil of the outer Continental Shelf, or the property and natural resources thereof or the revenues therefrom.

(b) Longshore and Harbor Workers' Compensation Act applicable; definitions

With respect to disability or death of an employee resulting from any injury occurring as the result of operations conducted on the outer Continental Shelf for the purpose of exploring for, developing, removing, or transporting by pipeline the natural resources, or involving rights to the natural resources, of the subsoil and seabed of the outer Continental Shelf, compensation shall be payable under the provisions of the Longshore and Harbor Workers' Compensation Act [33 U.S.C. 901 et seq.]. For the purposes of the extension of the provisions of the Longshore and Harbor Workers' Compensation Act under this section—

(1) the term "employee" does not include a master or member of a crew of any vessel, or an officer or employee of the United States or any agency thereof or of any State or foreign government, or of any political subdivision thereof;

(2) the term "employer" means an employer any of whose employees are employed in such operations; and

(3) the term "United States" when used in a geographical sense includes the outer Continental Shelf and artificial islands and fixed structures thereon.

(c) National Labor Relations Act applicable

For the purposes of the National Labor Relations Act, as amended [29 U.S.C. 151 et seq.], any unfair labor practice, as defined in such Act, occurring upon any artificial island, installation, or other device referred to in subsection (a) of this section shall be deemed to have occurred within the judicial district of the State, the laws of which apply to such artificial island, installation, or other

device pursuant to such subsection, except that until the President determines the areas within which such State laws are applicable, the judicial district shall be that of the State nearest the place of location of such artificial island, installation, or other device.

(d) Coast Guard regulations; marking of artificial islands, installations, and other devices; failure of owner suitably to mark according to regulations

(1) The Secretary of the Department in which the Coast Guard is operating shall have authority to promulgate and enforce such reasonable regulations with respect to lights and other warning devices, safety equipment, and other matters relating to the promotion of safety of life and property on the artificial islands, installations, and other devices referred to in subsection (a) or on the waters adjacent thereto, as he may deem necessary.

(2) The Secretary of the Department in which the Coast Guard is operating may mark for the protection of navigation any artificial island, installation, or other device referred to in subsection (a) whenever the owner has failed suitably to mark such island, installation, or other device in accordance with regulations issued under this subchapter, and the owner shall pay the cost of such marking.

(e) Authority of Secretary of the Army to prevent obstruction to navigation

The authority of the Secretary of the Army to prevent obstruction to navigation in the navigable waters of the United States is extended to the artificial islands, installations, and other devices referred to in subsection (a).

(f) Provisions as nonexclusive

The specific application by this section of certain provisions of law to the subsoil and seabed of the outer Continental Shelf and the artificial islands, installations, and other devices referred to in subsection (a) or to acts or offenses occurring or committed thereon shall not give rise to any inference that the application to such islands and structures, acts, or offenses of any other provision of law is not intended.

§1334. Administration of leasing

(a) Rules and regulations; amendment; cooperation with State agencies; subject matter and scope of regulations

The Secretary shall administer the provisions of this subchapter relating to the leasing of the outer

Continental Shelf, and shall prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources of the outer Continental Shelf, and the protection of correlative rights therein, and, notwithstanding any other provisions herein, such rules and regulations shall, as of their effective date, apply to all operations conducted under a lease issued or maintained under the provisions of this subchapter. In the enforcement of safety, environmental, and conservation laws and regulations, the Secretary shall cooperate with the relevant departments and agencies of the Federal Government and of the affected States. In the formulation and promulgation of regulations, the Secretary shall request and give due consideration to the views of the Attorney General with respect to matters which may affect competition. In considering any regulations and in preparing any such views, the Attorney General shall consult with the Federal Trade Commission. The regulations prescribed by the Secretary under this subsection shall include, but not be limited to, provisions—

(1) for the suspension or temporary prohibition of any operation or activity, including production, pursuant to any lease or permit (A) at the request of a lessee, in the national interest, to facilitate proper development of a lease or to allow for the construction or negotiation for use of transportation facilities, or (B) if there is a threat of serious, irreparable, or immediate harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits (in areas leased or not leased), or to the marine, coastal, or human environment, and for the extension of any permit or lease affected by suspension or prohibition under clause (A) or (B) by a period equivalent to the period of such suspension or prohibition, except that no permit or lease shall be so extended when such suspension or prohibition is the result of gross negligence or willful violation of such lease or permit, or of regulations issued with respect to such lease or permit;

(2) with respect to cancellation of any lease or permit—

(A) that such cancellation may occur at any time, if the Secretary determines, after a hearing, that—

(i) continued activity pursuant to such lease or permit would probably cause serious harm or damage to life (including fish and other aquatic life), to property, to any mineral (in areas leased or not leased), to the national security or defense, or to the marine, coastal, or human environment;

(ii) the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time; and

(iii) the advantages of cancellation outweigh the advantages of continuing such lease or permit force;

(B) that such cancellation shall not occur unless and until operations under such lease or permit shall have been under suspension, or temporary prohibition, by the Secretary, with due extension of any lease or permit term continuously for a period of five years, or for a lesser period upon request of the lessee;

(C) that such cancellation shall entitle the lessee to receive such compensation as he shows to the Secretary as being equal to the lesser of (i) the fair value of the canceled rights as of the date of cancellation, taking account of both anticipated revenues from the lease and anticipated costs, including costs of compliance with all applicable regulations and operating orders, liability for cleanup costs or damages, or both, in the case of an oilspill, and all other costs reasonably anticipated on the lease, or (ii) the excess, if any, over the lessee's revenues, from the lease (plus interest thereon from the date of receipt to date of reimbursement) of all consideration paid for the lease and all direct expenditures made by the lessee after the date of issuance of such lease and in connection with exploration or development, or both, pursuant to the lease (plus interest on such consideration and such expenditures from date of payment to date of reimbursement), except that (I) with respect to leases issued before September 18, 1978, such compensation shall be equal to the amount specified in clause (i) of this subparagraph; and (II) in the case of joint leases which are canceled due to the failure of one or more partners to exercise due diligence, the innocent parties shall have the right to seek damages for such loss from the responsible

party or parties and the right to acquire the interests of the negligent party or parties and be issued the lease in question;

(3) for the assignment or relinquishment of a lease;

(4) for unitization, pooling, and drilling agreements;

(5) for the subsurface storage of oil and gas from any source other than by the Federal Government;

(6) for drilling or easements necessary for exploration, development, and production;

(7) for the prompt and efficient exploration and development of a lease area; and

(8) for compliance with the national ambient air quality standards pursuant to the Clean Air Act (42 U.S.C. 7401 et seq.), to the extent that activities authorized under this subchapter significantly affect the air quality of any State.

(b) Compliance with regulations as condition for issuance, continuation, assignment, or other transfer of leases

The issuance and continuance in effect of any lease, or of any assignment or other transfer of any lease, under the provisions of this subchapter shall be conditioned upon compliance with regulations issued under this subchapter.

(c) Cancellation of nonproducing lease

Whenever the owner of a nonproducing lease fails to comply with any of the provisions of this subchapter, or of the lease, or of the regulations issued under this subchapter, such lease may be canceled by the Secretary, subject to the right of judicial review as provided in this subchapter, if such default continues for the period of thirty days after mailing of notice by registered letter to the lease owner at his record post office address.

(d) Cancellation of producing lease

Whenever the owner of any producing lease fails to comply with any of the provisions of this subchapter, of the lease, or of the regulations issued under this subchapter, such lease may be forfeited and canceled by an appropriate proceeding in any United States district court having jurisdiction under the provisions of this subchapter.

(e) Pipeline rights-of-way; forfeiture of grant

Rights-of-way through the submerged lands of the outer Continental Shelf, whether or not such lands are included in a lease maintained or issued pursuant to this subchapter, may be granted by the Secretary for pipeline purposes for the transportation of oil, natural gas, sulphur, or other minerals, or under such regulations and upon such conditions as may be prescribed by the Secretary, or where appropriate the Secretary of Transportation, including (as provided in section 1347(b) of this title) assuring maximum environmental protection by utilization of the best available and safest technologies, including the safest practices for pipeline burial and upon the express condition that oil or gas pipelines shall transport or purchase without discrimination, oil or natural gas produced from submerged lands or outer Continental Shelf lands in the vicinity of the pipelines in such proportionate amounts as the Federal Energy Regulatory Commission, in consultation with the Secretary of Energy, may, after a full hearing with due notice thereof to the interested parties, determine to be reasonable, taking into account, among other things, conservation and the prevention of waste. Failure to comply with the provisions of this section or the regulations and conditions prescribed under this section shall be grounds for forfeiture of the grant in an appropriate judicial proceeding instituted by the United States in any United States district court having jurisdiction under the provisions of this subchapter.

(f) Competitive principles governing pipeline operation

(1) Except as provided in paragraph (2), every permit, license, easement, right-of-way, or other grant of authority for the transportation by pipeline on or across the outer Continental Shelf of oil or gas shall require that the pipeline be operated in accordance with the following competitive principles:

(A) The pipeline must provide open and nondiscriminatory access to both owner and nonowner shippers.

(B) Upon the specific request of one or more owner or nonowner shippers able to provide a guaranteed level of throughput, and on the condition that the shipper or shippers requesting such expansion shall be responsible for bearing their proportionate share of the costs and risks related thereto, the Federal Energy Regulatory Commission may, upon finding, after a full hearing with due notice thereof to the interested parties, that such expansion is within technological limits and economic feasibility, order a subsequent expansion of throughput capacity of any pipeline for which the permit, license, easement, right-of-way, or other grant of authority is approved or issued after September 18, 1978. This subparapraph [1] shall not apply to any such grant of authority approved or issued for the Gulf of Mexico or the Santa Barbara Channel.

(2) The Federal Energy Regulatory Commission may, by order or regulation, exempt from any or all of the requirements of paragraph (1) of this subsection any pipeline or class of pipelines which feeds into a facility where oil and gas are first collected or a facility where oil and gas are first separated, dehydrated, or otherwise processed.

(3) The Secretary of Energy and the Federal Energy Regulatory Commission shall consult with and give due consideration to the views of the Attorney General on specific conditions to be included in any permit, license, easement, right-of-way, or grant of authority in order to ensure that pipelines are operated in accordance with the competitive principles set forth in paragraph (1) of this subsection. In preparing any such views, the Attorney General shall consult with the Federal Trade Commission.

(4) Nothing in this subsection shall be deemed to limit, abridge, or modify any authority of the United States under any other provision of law with respect to pipelines on or across the outer Continental Shelf.

(g) Rates of production

(1) The leasee [2] shall produce any oil or gas, or both, obtained pursuant to an approved development and production plan, at rates consistent with any rule or order issued by the President in accordance with any provision of law.

(2) If no rule or order referred to in paragraph (1) has been issued, the lessee shall produce such oil or gas, or both, at rates consistent with any regulation promulgated by the Secretary of Energy which is to assure the maximum rate of production which may be sustained without loss of ultimate recovery of oil or gas, or both, under sound engineering and economic principles, and which is safe for the duration of the activity covered by the approved plan. The Secretary may permit the lessee to vary such rates if he finds that such variance is necessary.

(h) Federal action affecting outer Continental Shelf; notification; recommended changes

The head of any Federal department or agency who takes any action which has a direct and significant effect on the outer Continental Shelf or its development shall promptly notify the Secretary of such action and the Secretary shall thereafter notify the Governor of any affected State and the Secretary may thereafter recommend such changes in such action as are considered appropriate.

(i) Flaring of natural gas

After September 18, 1978, no holder of any oil and gas lease issued or maintained pursuant to this subchapter shall be permitted to flare natural gas from any well unless the Secretary finds that there is no practicable way to complete production of such gas, or that such flaring is necessary to alleviate a temporary emergency situation or to conduct testing or work-over operations.

(j) Cooperative development of common hydrocarbon-bearing areas

(1) Findings

(A) [3] The Congress of the United States finds that the unrestrained competitive production of hydrocarbons from a common hydrocarbon-bearing geological area underlying the Federal and

State boundary may result in a number of harmful national effects, including—

(i) the drilling of unnecessary wells, the installation of unnecessary facilities and other imprudent operating practices that result in economic waste, environmental damage, and damage to life and property;

(ii) the physical waste of hydrocarbons and an unnecessary reduction in the amounts of hydrocarbons that can be produced from certain hydrocarbon-bearing areas; and

(iii) the loss of correlative rights which can result in the reduced value of national hydrocarbon resources and disorders in the leasing of Federal and State resources.

(2) Prevention of harmful effects

The Secretary shall prevent, through the cooperative development of an area, the harmful effects of unrestrained competitive production of hydrocarbons from a common hydrocarbon-bearing area underlying the Federal and State boundary.

§1335. Validation and maintenance of prior leases

(a) Requirements for validation

The provisions of this section shall apply to any mineral lease covering submerged lands of the outer Continental Shelf issued by any State (including any extension, renewal, or replacement thereof heretofore granted pursuant to such lease or under the laws of such State) if—

(1) such lease, or a true copy thereof, is filed with the Secretary by the lessee or his duly authorized agent within ninety days from August 7, 1953, or within such further period or periods as provided in section 1336 of this title or as may be fixed from time to time by the Secretary;

(2) such lease was issued prior to December 21, 1948, and would have been on June 5, 1950, in force and effect in accordance with its terms and provisions and the law of the State issuing it had the State had the authority to issue such lease;

(3) there is filed with the Secretary, within the period or periods specified in paragraph (1) of this subsection, (A) a certificate issued by the State official or agency having jurisdiction over such lease stating that it would have been in force and effect as required by the provisions of paragraph (2) of this subsection, or (B) in the absence of such certificate, evidence in the form of affidavits, receipts, canceled checks, or other documents that may be required by the Secretary, sufficient to prove that such lease would have been so in force and effect;

(4) except as otherwise provided in section 1336 of this title hereof, all rents, royalties, and

other sums payable under such lease between June 5, 1950, and August 7, 1953, which have not been paid in accordance with the provisions thereof, or to the Secretary or to the Secretary of the Navy, are paid to the Secretary within the period or periods specified in paragraph (1) of this subsection, and all rents, royalties, and other sums payable under such lease after August 7, 1953, are paid to the Secretary, who shall deposit such payments in the Treasury in accordance with section 1338 of this title;

(5) the holder of such lease certifies that such lease shall continue to be subject to the overriding royalty obligations existing on August 7, 1953;

(6) such lease was not obtained by fraud or misrepresentation;

(7) such lease, if issued on or after June 23, 1947, was issued upon the basis of competitive bidding;

(8) such lease provides for a royalty to the lessor on oil and gas of not less than 12½ per centum and on sulphur of not less than 5 per centum in amount or value of the production saved, removed, or sold from the lease, or, in any case in which the lease provides for a lesser royalty, the holder thereof consents in writing, filed with the Secretary, to the increase of the royalty to the minimum herein specified;

(9) the holder thereof pays to the Secretary within the period or periods specified in paragraph (1) of this subsection an amount equivalent to any severance, gross production, or occupation taxes imposed by the State issuing the lease on the production from the lease, less the State's royalty interest in such production, between June 5, 1950, and August 7, 1953 and not heretofore paid to the State, and thereafter pays to the Secretary as an additional royalty on the production from the lease, less the United States' royalty interest in such production, a sum of money equal to the amount of the severance, gross production, or occupation taxes which would have been payable on such production to the State issuing the lease under its laws as they existed on August 7, 1953;

(10) such lease will terminate within a period of not more than five years from August 7, 1953 in the absence of production or operations for drilling, or, in any case in which the lease provides for a longer period, the holder thereof consents in writing, filed with the Secretary, to the reduction of such period so that it will not exceed the maximum period herein specified; and

(11) the holder of such lease furnishes such surety bond, if any, as the Secretary may require and complies with such other reasonable requirements as the Secretary may deem necessary to protect the interests of the United States.

(b) Conduct of operations under lease; sulphur rights

Any person holding a mineral lease, which as determined by the Secretary meets the requirements of subsection (a) of this section, may continue to maintain such lease, and may conduct operations thereunder, in accordance with (1) its provisions as to the area, the minerals covered, rentals and, subject to the provisions of paragraphs (8)–(10) of subsection (a) of this section, as to royalties and as to the term thereof and of any extensions, renewals, or replacements authorized therein or heretofore authorized by the laws of the State issuing such lease, or, if oil or gas was not being produced in paying quantities from such lease on or before December 11, 1950, or if production in paying quantities has ceased since June 5, 1950, or if the primary term of such lease has expired since December 11, 1950, then for a term from August 7, 1953 equal to the term remaining unexpired on December 11, 1950, under the provisions of such lease or any extensions, renewals, or replacements authorized therein, or heretofore authorized by the laws of such State, and (2) such regulations as the Secretary may under section 1334 of this title prescribe within ninety days after making his determination that such lease meets the requirements of subsection (a) of this section: *Provided, however*, That any rights to sulphur under any lease maintained under the provisions of this subsection shall not extend beyond the primary term of such lease or any extension thereof under the provisions of this subsection unless sulphur is being produced in paying quantities or drilling, well reworking, plant construction, or other operations for the production of sulphur, as approved by the Secretary, are being conducted on the area covered by such lease on the date of expiration of such primary term or extension: *Provided further*, That if sulphur is being produced in paying quantities on such date, then such rights shall continue to be maintained in accordance with such

lease and the provisions of this subchapter: *Provided further*, That, if the primary term of a lease being maintained under this subsection has expired prior to August 7, 1953 and oil or gas is being produced in paying quantities on such date, then such rights to sulphur as the lessee may have under such lease shall continue for twenty-four months from August 7, 1953 and as long thereafter as sulphur is produced in paying quantities, or drilling, well working, plant construction, or other operations for the production of sulphur, as approved by the Secretary, are being conducted on the area covered by the lease.

(c) Nonwaiver of United States claims

The permission granted in subsection (b) of this section shall not be construed to be a waiver of such claims, if any, as the United States may have against the lessor or the lessee or any other person respecting sums payable or paid for or under the lease, or respecting activities conducted under the lease, prior to August 7, 1953.

(d) Judicial review of determination

Any person complaining of a negative determination by the Secretary of the Interior under this section may have such determination reviewed by the United States District Court for the District of Columbia by filing a petition for review within sixty days after receiving notice of such action by the Secretary.

(e) Lands beneath navigable waters

In the event any lease maintained under this section covers lands beneath navigable waters, as that term is used in the Submerged Lands Act [43 U.S.C. 1301 et seq.], as well as lands of the outer Continental Shelf, the provisions of this section shall apply to such lease only insofar as it covers lands of the outer Continental Shelf.

§1336. Controversies over jurisdiction; agreements; payments; final settlement or adjudication; approval of notice concerning oil and gas operations in Gulf of Mexico

In the event of a controversy between the United States and a State as to whether or not lands are subject to the provisions of this subchapter, the Secretary is authorized, notwithstanding the provisions of section 1335(a) and (b) of this title and with the concurrence of the Attorney General of the United States, to negotiate and enter into agreements with the State, its political subdivision or

grantee or a lessee thereof, respecting operations under existing mineral leases and payment and impounding of rents, royalties, and other sums payable thereunder, or with the State, its political subdivision or grantee, respecting the issuance or nonissuance of new mineral leases pending the settlement or adjudication of the controversy. The authorization contained in the preceding sentence of this section shall not be construed to be a limitation upon the authority conferred on the Secretary in other sections of this subchapter. Payments made pursuant to such agreement, or pursuant to any stipulation between the United States and a State, shall be considered as compliance with section 1335(a)(4) of this title. Upon the termination of such agreement or stipulation by reason of the final settlement or adjudication of such controversy, if the lands subject to any mineral lease are determined to be in whole or in part lands subject to the provisions of this subchapter, the lessee, if he has not already done so, shall comply with the requirements of section 1335(a) of this title, and thereupon the provisions of section 1335(b) of this title shall govern such lease. §1337. Leases, easements, and rights-of-way on the outer Continental Shelf

(a) Oil and gas leases; award to highest responsible qualified bidder; method of bidding; royalty relief; Congressional consideration of bidding system; notice

(1) The Secretary is authorized to grant to the highest responsible qualified bidder or bidders by competitive bidding, under regulations promulgated in advance, any oil and gas lease on submerged lands of the outer Continental Shelf which are not covered by leases meeting the requirements of subsection (a) of section 1335 of this title. Such regulations may provide for the deposit of cash bids in an interest-bearing account until the Secretary announces his decision on whether to accept the bids, with the interest earned thereon to be paid to the Treasury as to bids that are accepted and to the unsuccessful bidders as to bids that are rejected. The bidding shall be by sealed bid and, at the discretion of the Secretary, on the basis of—

(A) cash bonus bid with a royalty at not less than 12½ percent, but not more than 162/3 percent, fixed by the Secretary in amount or value of the production saved, removed, or sold;

(B) variable royalty bid based on a per centum in amount or value of the production saved, removed, or sold, with either a fixed work commitment based on dollar amount for exploration or a fixed cash bonus as determined by the Secretary, or both;

(C) cash bonus bid, or work commitment bid based on a dollar amount for exploration with a fixed cash bonus, and a diminishing or sliding royalty based on such formulae as the Secretary shall determine as equitable to encourage continued production from the lease area as resources

diminish, but not less than 12½ percent, but not more than 162/3 percent, at the beginning of the lease period in amount or value of the production saved, removed, or sold;

(D) cash bonus bid with a fixed share of the net profits of no less than 30 per centum to be derived from the production of oil and gas from the lease area;

(E) fixed cash bonus with the net profit share reserved as the bid variable;

(F) cash bonus bid with a royalty at not less than 12½ percent, but not more than 162/3 percent, fixed by the Secretary in amount or value of the production saved, removed, or sold and a fixed per centum share of net profits of no less than 30 per centum to be derived from the production of oil and gas from the lease area;

(G) work commitment bid based on a dollar amount for exploration with a fixed cash bonus and a fixed royalty in amount or value of the production saved, removed, or sold;

(H) cash bonus bid with royalty at not less than 12½ percent, but not more than 162/3 percent, fixed by the Secretary in amount or value of production saved, removed, or sold, and with suspension of royalties for a period, volume, or value of production determined by the Secretary, which suspensions may vary based on the price of production from the lease; or

(I) subject to the requirements of paragraph (4) of this subsection, any modification of bidding systems authorized in subparagraphs (A) through (G), or any other systems of bid variables, terms, and conditions which the Secretary determines to be useful to accomplish the purposes and policies of this subchapter, except that no such bidding system or modification shall have more than one bid variable.

(2) The Secretary may, in his discretion, defer any part of the payment of the cash bonus, as authorized in paragraph (1) of this subsection, according to a schedule announced at the time of the announcement of the lease sale, but such payment shall be made in total no later than five years after the date of the lease sale.

(3)(A) The Secretary may, in order to promote increased production on the lease area, through direct, secondary, or tertiary recovery means, reduce or eliminate any royalty or net profit share set forth in the lease for such area.

(B) In the Western and Central Planning Areas of the Gulf of Mexico and the portion of the Eastern Planning Area of the Gulf of Mexico encompassing whole lease blocks lying west of 87 degrees, 30 minutes West longitude and in the Planning Areas offshore Alaska, the Secretary may, in order to—

(i) promote development or increased production on producing or non-producing leases; or

(ii) encourage production of marginal resources on producing or non-producing leases;

through primary, secondary, or tertiary recovery means, reduce or eliminate any royalty or net profit share set forth in the lease(s). With the lessee's consent, the Secretary may make other modifications to the royalty or net profit share terms of the lease in order to achieve these purposes.

(C)(i) Notwithstanding the provisions of this subchapter other than this subparagraph, with respect to any lease or unit in existence on November 28, 1995, meeting the requirements of this subparagraph, no royalty payments shall be due on new production, as defined in clause (iv) of this subparagraph, from any lease or unit located in water depths of 200 meters or greater in the Western and Central Planning Areas of the Gulf of Mexico, including that portion of the Eastern Planning Area of the Gulf of Mexico encompassing whole lease blocks lying west of 87 degrees, 30 minutes West longitude, until such volume of production as determined pursuant to clause (ii) has been produced by the lessee.

(ii) Upon submission of a complete application by the lessee, the Secretary shall determine within 180 days of such application whether new production from such lease or unit would be economic in the absence of the relief from the requirement to pay royalties provided for by clause (i) of this subparagraph. In making such determination, the Secretary shall consider the increased technological and financial risk of deep water development and all costs associated with exploring, developing, and producing from the lease. The lessee shall provide information required for a complete application to the Secretary prior to such determination. The Secretary shall clearly define the

information required for a complete application under this section. Such application may be made on the basis of an individual lease or unit. If the Secretary determines that such new production would be economic in the absence of the relief from the requirement to pay royalties provided for by clause (i) of this subparagraph, the provisions of clause (i) shall not apply to such production. If the Secretary determines that such new production would not be economic in the absence of the relief from the requirement to pay royalties provided for by clause (i), the Secretary must determine the volume of production from the lease or unit on which no royalties would be due in order to make such new production economically viable; except that for new production as defined in clause (iv)(I), in no case will that volume be less than 17.5 million barrels of oil equivalent in water depths of 200 to 400 meters, 52.5 million barrels of oil equivalent in 400–800 meters of water, and 87.5 million barrels of oil equivalent in water depths greater than 800 meters. Redetermination of the applicability of clause (i) shall be undertaken by the Secretary when requested by the lessee prior to the commencement of the new production and upon significant change in the factors upon which the original determination was made. The Secretary shall make such redetermination within 120 days of submission of a complete application. The Secretary may extend the time period for making any determination or redetermination under this clause for 30 days, or longer if agreed to by the applicant, if circumstances so warrant. The lessee shall be notified in writing of any determination or redetermination and the reasons for and assumptions used for such determination. Any determination or redetermination under this clause shall be a final agency action. The Secretary's determination or redetermination shall be judicially reviewable under section 702 of title 5, only for actions filed within 30 days of the Secretary's determination or redetermination.

(iii) In the event that the Secretary fails to make the determination or redetermination called for in clause (ii) upon application by the lessee within the time period, together with any extension thereof, provided for by clause (ii), no royalty payments shall be due on new production as follows:

(I) For new production, as defined in clause (iv)(I) of this subparagraph, no royalty shall be due on such production according to the schedule of minimum volumes specified in clause (ii) of this subparagraph.

(II) For new production, as defined in clause (iv)(II) of this subparagraph, no royalty shall be due on such production for one year following the start of such production.

(iv) For purposes of this subparagraph, the term "new production" is—

(I) any production from a lease from which no royalties are due on production, other than test production, prior to November 28, 1995; or

(II) any production resulting from lease development activities pursuant to a Development Operations Coordination Document, or supplement thereto that would expand production significantly beyond the level anticipated in the Development Operations Coordination Document, approved by the Secretary after November 28, 1995.

(v) During the production of volumes determined pursuant to clauses [1] (ii) or (iii) of this subparagraph, in any year during which the arithmetic average of the closing prices on the New York Mercantile Exchange for light sweet crude oil exceeds $28.00 per barrel, any production of oil will be subject to royalties at the lease stipulated royalty rate. Any production subject to this clause shall be counted toward the production volume determined pursuant to clause (ii) or (iii). Estimated royalty payments will be made if such average of the closing prices for the previous year exceeds $28.00. After the end of the calendar year, when the new average price can be calculated, lessees will pay any royalties due, with interest but without penalty, or can apply for a refund, with interest, of any overpayment.

(vi) During the production of volumes determined pursuant to clause (ii) or (iii) of this subparagraph, in any year during which the arithmetic average of the closing prices on the New York Mercantile Exchange for natural gas exceeds $3.50 per million British thermal units, any production of natural gas will be subject to royalties at the lease stipulated royalty rate. Any production subject to this clause shall be counted toward the production volume determined pursuant to clauses [1] (ii) or (iii). Estimated royalty payments will be made if such average of the closing prices for the previous

year exceeds $3.50. After the end of the calendar year, when the new average price can be calculated, lessees will pay any royalties due, with interest but without penalty, or can apply for a refund, with interest, of any overpayment.

(vii) The prices referred to in clauses (v) and (vi) of this subparagraph shall be changed during any calendar year after 1994 by the percentage, if any, by which the implicit price deflator for the gross domestic product changed during the preceding calendar year.

(4)(A) The Secretary of Energy shall submit any bidding system authorized in subparagraph (H) of paragraph (1) to the Senate and House of Representatives. The Secretary may institute such bidding system unless either the Senate or the House of Representatives passes a resolution of disapproval within thirty days after receipt of the bidding system.

(B) Subparagraphs (C) through (J) of this paragraph are enacted by Congress—

(i) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but they are applicable only with respect to the procedures to be followed in that House in the case of resolutions described by this paragraph, and they supersede other rules only to the extent that they are inconsistent therewith; and

(ii) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

(C) A resolution disapproving a bidding system submitted pursuant to this paragraph shall immediately be referred to a committee (and all resolutions with respect to the same request shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

(D) If the committee to which has been referred any resolution disapproving the bidding system of the Secretary has not reported the resolution at the end of ten calendar days after its referral, it shall be in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to the same bidding system which has been referred to the committee.

(E) A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same recommendation), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(F) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same bidding system.

(G) When the committee has reported, or has been discharged from further consideration of, a resolution as provided in this paragraph, it shall be at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(H) Debate on the resolution is limited to not more than two hours, to be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

(I) Motions to postpone, made with respect to the discharge from the committee, or the consideration of a resolution with respect to a bidding system, and motions to proceed to the consideration of other business, shall be decided without debate.

(J) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with

respect to a bidding system shall be decided without debate.

(5)(A) During the five-year period commencing on September 18, 1978, the Secretary may, in order to obtain statistical information to determine which bidding alternatives will best accomplish the purposes and policies of this subchapter, require, as to no more than 10 per centum of the tracts offered each year, each bidder to submit bids for any area of the outer Continental Shelf in accordance with more than one of the bidding systems set forth in paragraph (1) of this subsection. For such statistical purposes, leases may be awarded using a bidding alternative selected at random for the acquisition of valid statistical data if such bidding alternative is otherwise consistent with the provisions of this subchapter.

(B) The bidding systems authorized by paragraph (1) of this subsection, other than the system authorized by subparagraph (A), shall be applied to not less than 20 per centum and not more than 60 per centum of the total area offered for leasing each year during the five-year period beginning on September 18, 1978, unless the Secretary determines that the requirements set forth in this subparagraph are inconsistent with the purposes and policies of this subchapter.

(6) At least ninety days prior to notice of any lease sale under subparagraph (D), (E), (F), or, if appropriate, (H) of paragraph (1), the Secretary shall by regulation establish rules to govern the calculation of net profits. In the event of any dispute between the United States and a lessee concerning the calculation of the net profits under the regulation issued pursuant to this paragraph, the burden of proof shall be on the lessee.

(7) After an oil and gas lease is granted pursuant to any of the work commitment options of paragraph (1) of this subsection—

(A) the lessee, at its option, shall deliver to the Secretary upon issuance of the lease either (i) a cash deposit for the full amount of the exploration work commitment, or (ii) a performance bond in form and substance and with a surety satisfactory to the Secretary, in the principal amount of such exploration work commitment assuring the Secretary that such commitment shall be faithfully discharged in accordance with this section, regulations, and the lease; and for purposes of this subparagraph, the principal amount of such cash deposit or bond may, in accordance with regulations, be periodically reduced upon proof, satisfactory to the Secretary, that a portion of the exploration work commitment has been satisfied;

(B) 50 per centum of all exploration expenditures on, or directly related to, the lease, including, but not limited to (i) geological investigations and related activities, (ii) geophysical investigations including seismic, geomagnetic, and gravity surveys, data processing and interpretation, and (iii) exploratory drilling, core drilling, redrilling, and well completion or abandonment, including the drilling of wells sufficient to determine the size and a real extent of any newly discovered field, and including the cost of mobilization and demobilization of drilling equipment, shall be included in satisfaction of the commitment, except that the lessee's general overhead cost shall not be so included against the work commitment, but its cost (including employee benefits) of employees directly assigned to such exploration work shall be so included; and

(C) if at the end of the primary term of the lease, including any extension thereof, the full dollar amount of the exploration work commitment has not been satisfied, the balance shall then be paid in cash to the Secretary.

(8) Not later than thirty days before any lease sale, the Secretary shall submit to the Congress and publish in the Federal Register a notice—

(A) identifying any bidding system which will be utilized for such lease sale and the reasons for the utilization of such bidding system; and

(B) designating the lease tracts selected which are to be offered in such sale under the bidding system authorized by subparagraph (A) of paragraph (1) and the lease tracts selected which are to be offered under any one or more of the bidding systems authorized by subparagraphs (B) through (H) of paragraph (1), and the reasons such lease tracts are to be offered under a particular bidding system.

(b) Terms and provisions of oil and gas leases

An oil and gas lease issued pursuant to this section shall—

(1) be for a tract consisting of a compact area not exceeding five thousand seven hundred and sixty acres, as the Secretary may determine, unless the Secretary finds that a larger area is necessary to comprise a reasonable economic production unit;

(2) be for an initial period of—

(A) five years; or

(B) not to exceed ten years where the Secretary finds that such longer period is necessary to encourage exploration and development in areas because of unusually deep water or other unusually adverse conditions,

and as long after such initial period as oil or gas is produced from the area in paying quantities, or drilling or well reworking operations as approved by the Secretary are conducted thereon;

(3) require the payment of amount or value as determined by one of the bidding systems set forth in subsection (a) of this section;

(4) entitle the lessee to explore, develop, and produce the oil and gas contained within the lease area, conditioned upon due diligence requirements and the approval of the development and production plan required by this subchapter;

(1) Following each notice of a proposed lease sale and before the acceptance of bids and the issuance of leases based on such bids, the Secretary shall allow the Attorney General, in consultation with the Federal Trade Commission, thirty days to review the results of such lease sale, except that the Attorney General, after consultation with the Federal Trade Commission, may agree to a shorter review period.

(2) The Attorney General may, in consultation with the Federal Trade Commission, conduct such antitrust review on the likely effects the issuance of such leases would have on competition as the Attorney General, after consultation with the Federal Trade Commission, deems appropriate and shall advise the Secretary with respect to such review. The Secretary shall provide such information as the Attorney General, after consultation with the Federal Trade Commission, may require in order to conduct any antitrust review pursuant to this paragraph and to make recommendations pursuant to paragraph (3) of this subsection.

(B) issue such lease, and notify the lessee and the Attorney General of the reason for such decision.

(f) Antitrust immunity or defenses

Nothing in this subchapter shall be deemed to convey to any person, association, corporation, or other business organization immunity from civil or criminal liability, or to create defenses to actions, under any antitrust law.
